

Doing Our Part

Our catering and cargo operations are ISO 14001 – certified to manage environmental issues responsibly.

SATS is committed to ensuring continual improvement of its environmental performance and prevention of pollution through an environmental management system.

Our Catering, Cargo and Maintenance units have already set in place a series of ISO 14001 – certified procedures for managing environmental issues systematically, such as tracking usage of water, electricity and fuel; recycling of non-biodegradable materials such as plastics, skids, paper and waste metals; control of chemicals and oil spillage; and monitoring of air pollutants.

Not only are we concerned for our physical environment, we also take our responsibility as a corporate citizen seriously.

Doing our part at the SATS Staff Home for Senior Citizens, our community project since 1979.

Since 1979, our SATS Staff Association (SSA) has been running a shelter for the elderly at the void deck of Block 33, Bedok South Avenue 2. The Association, which encourages all staff to play a meaningful role in meeting the needs of the community, is funded by monthly contributions from SATS employees.

Our employees also distribute food to the needy, particularly those living in one or two-room apartments, as well as those on public assistance schemes with the Ministry of Community Development and Sports. Our employees have also volunteered their time to various organisations like the Pertapis Children's Home, Gracehaven Orphanage, Movement for the Intellectually Disabled in Singapore (MINDS), and the Singapore School For The Deaf. We are also proud that our employees are actively supporting the Community Chest through the Group's SHARE programme.
