- Reduction in **SoAJV** due to lower business volumes driven by inflationary pressure on certain carriers and non-recurring provisions.
- **PATMI** improved by \$4.3M to reach **\$75.1M**, partially supported by lower interest expenses.

- Share buyback from non-controlling interest relates to NWA share buyback

* FCF = Free Cash Flow, refers to net cash from operating activities less capital expenditure and lease payment.

Note: EBITDA (AL) represents EBITDA less ROU depreciation and lease interest expense.

Outlook

Outlook

Navigating near-term uncertainty from a position of proven resilience

Cargo

- **Global cargo demand rose 8.5% in June***, with growth recorded across all regions and led by North American and Asia-Pacific carriers (13.1% and 7.9% growth respectively); demand was underpinned by strength in high-value and time-sensitive freight shipments.
- **Non-LFL growth continues**, driven by new wins across all regions including Kuehne + Nagel in the Americas and EMEA.
- **EU de minimis removal** to weigh on e-commerce volumes in the coming quarter.
- **Cost pressures** remain a factor to watch, with network adjustments and inflationary pressures potentially adding to the cost base in the coming quarter.

Ground handling

- **Global passenger demand fell 1.7% in June***, driven mainly by domestic declines in China, the US and Japan; international demand outside the Middle East grew 1.1%, led by the Europe-Asia corridor at 11.0%.
- **New wins** with Air France (JFK) and SQ (KUL) demonstrate continued momentum and a robust commercial pipeline.
- **Operational complexity** remains a margin risk, with flight disruptions and schedule volatility requiring additional manpower to sustain turnaround performance.

Food

- **Aviation demand**, while impacted by ME situation, **remains steady** through mitigation by **new wins**.
- **Non-Aviation continues to sustain positive momentum** with strategic customer expansion across key segments.
- **Cost inflation remains a headwind** though moderated through revenue growth and productivity initiatives.
- FS Network expanded further with addition of **Noida inflight catering station in India**.

- The Middle East conflict has disrupted activities at certain stations, affecting cargo and flight flows, but rerouting through alternative corridors also created opportunities in parts of our network, reflected in our strong YoY volume growth as a group.
- Decrease in APAC flights handled driven by volume reductions due to high fuel costs.
- Increase in Americas flights handled driven mainly by new contract win commenced in Jan26.

Note:

1QFY26 cargo tonnage for a subsidiary was reallocated between APAC and EMEA to better reflect split between the regions; total cargo tonnage figure remains unchanged.
