| 931  | 24V up to 75.0 kw (100 H.P)  To supply and replace step-down transformer ( 240V to 24v) up to                                  | no   | 85             |
| 932  | 50 VA To supply and replace control relay c/w socket 8 to 12 pins, coil                                                        | no   | 51             |
| 933  | voltage 230Vstep-down transformer ( 240V to 24V) up to 50 VA To supply and replace control relay c/w socket 8 to 12 pins, coil | no   | 51             |
| 934  | voltage 110V  To supply and replace control relay c/w socket 8 to 12 pins, coil                                                | no   | 51             |
| 935  | voltage 24V To supply and replace time delay replay c/w socket 8 to 12 pins,                                                   | no   | 76.5           |
| 936  | coil voltage 230V Delay time: 1-30 sec To supply and replace time delay replay c/w socket 8 to 12 pins,                        | no   | 76.5           |
| 937  | coil voltage 110V. Delay time: 1-30 sec To supply and replace time delay replay c/w socket 8 to 12 pins,                       | no   | 76.5           |
| 938  | coil voltage 24V. Delay time: 1-30 sec To supply and replace run capacitor up to 6 uf (unfarad)                                | no   | 14.45          |
| 939  | supply and replace run capacitor up to 20 uf (unfarad)                                                                         | no   | 24.65          |

| S/No | Description                                                                                                        | Unit | Unit Cost (\$) |
|------|--------------------------------------------------------------------------------------------------------------------|------|----------------|
| 940  | supply and replace run capacitor up to 22.5 uf (unfarad)                                                           | no   | 28.05          |
| 941  | supply and replace run capacitor up to 25 uf (unfarad)                                                             | no   | 31.45          |
| 942  | supply and replace run capacitor up to 30 uf (unfarad)                                                             | no   | 35.7           |
| 943  | supply and replace run capacitor up to 50 uf (unfarad)                                                             | no   | 51             |
| 944  | supply and replace run capacitor up to 60 uf (unfarad)                                                             | no   | 68             |
| 945  | supply and replace run capacitor up to 100 uf (unfarad)                                                            | no   | 85             |
| 946  | To supply and replace starting capacitor up to 150 uf (unfarad)                                                    | no   | 21.25          |
| 947  | To supply materials and labour to replace thermal overload relay -3                                                | no   | 68             |
| 948  | phase (0.12A to 0.18A) up to (4.0A to 6.0A)  To supply materials and labour to replace thermal overload relay -3   | no   | 76.5           |
| 949  | phase (5.6A to 8.0A) up to (22A to 24A)  To supply materials and labour to replace thermal overload relay -3       | no   | 93.5           |
| 950  | phase 24A to 32A  To supply materials and labour to replace thermal overload relay -3                              | no   | 123.25         |
| 951  | phase 30A to 45A (including termiN.A.l cables) To supply materials and labour to replace thermal overload relay -3 | no   | 148.75         |
| 952  | phase 60A to 75A (including termiN.A.l cables) To supply materials and labour to replace auxiliary contact block 2 | no   | 25.5           |
| 953  | contacts To supply materials and labour to replace auxiliary contact block 4                                       | no   | 34             |
| 954  | contacts  To supply all materials , labour and transport to install/replace                                        | no   | 4.25           |
| 955  | indicating light with holder  To supply all materials, labour and transport to install/replace                     | no   | 1.7            |
| 956  | indicating light without holder  To supply all materials , labour and transport to install/replace fuse            | no   | 2.55           |
| 957  | (all sizes)  To supply labour and material to install/replace galvanised steel                                     | m    | 2.55           |
| 958  | conduit c/w saddles run on surface 18mm dia To supply labour and material to install/replace galvanised steel      | m    | 3.4            |
|      | conduit c/w saddles run on surface 25mm dia                                                                        |      |                |

| S/No | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Unit | Unit Cost (\$) |

|------|----------------------------------------------------------------------|------|----------------|
|      | cooled condenser with approved chemical and painting of rusty        |      |                |
|      | parts up to 50RT (175.8kw) cooling capacity                          |      |                |
| 1831 | To supply all labour, materials for the chemical cleaning of air-    | no   | 187            |
|      | cooled condenser with approved chemical and painting of rusty        |      |                |
|      | parts up to 60 RT (21.1 kw) cooling capacity                         |      |                |
| 1832 | To supply all labour, materials for the chemical cleaning of air-    | no   | 195.5          |
|      | cooled condenser with approved chemical and painting of rusty        |      |                |
|      | parts up to 70 RT (246kw) cooling capacity                           |      |                |
| 1833 | To supply all labour, materials for the chemical cleaning of chilled | no   | 46.75          |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
|      | painting of rusty parts up to 4 kw cooling capacity                  |      |                |
| 1834 | To supply all labour, materials for the chemical cleaning of chilled | no   | 74.8           |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
|      | painting of rusty parts up to 11kw cooling capacity                  |      |                |
| 1835 | To supply all labour, materials for the chemical cleaning of chilled | no   | 93.5           |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
| 4026 | painting of rusty parts up to 18 kw cooling capacity                 |      | 442.2          |
| 1836 | To supply all labour materials for the chemical cleaning of chilled  | no   | 112.2          |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
| 4027 | painting of rusty parts up to 36 kw cooling capacity                 |      | 120.0          |
| 1837 | To supply all labour, materials for the chemical cleaning of chilled | no   | 130.9          |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
| 1020 | painting of rusy parts up to 53 kw cooling capacity                  |      | 1.40.25        |
| 1838 | To supply all labour, materials for the chemical cleaning of chilled | no   | 140.25         |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
| 4020 | painting of rusy parts up to 71 kw cooling capacity                  |      | 110.6          |
| 1839 | To supply all labour, materials for the chemical cleaning of chilled | no   | 149.6          |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
| 1010 | painting of rusy parts up to 106 kw cooling capacity                 |      | 450.05         |
| 1840 | To supply all labour, materials for the chemical cleaning of chilled | no   | 158.95         |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
| 1044 | painting of rusy parts up to 141 kw cooling capacity                 |      | 407            |
| 1841 | To supply all labour, materials for the chemical cleaning of chilled | no   | 187            |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |
| 1842 | painting of rusy parts up to 176 kw cooling capacity                 | no   | 215.05         |
| 1042 | To supply all labour, materials for the chemical cleaning of chilled | no   | 215.05         |
|      | water cooling coils (AHUs and FCUs) with approved chemical and       |      |                |

| 2460  | 2kg                                                                                                                                     |      |                |
| 2469  | Supply and replace Fire Extinguisher c/w wall bracket including installation and taking down existing extinguisher for disposal – CO2   | no   | 144.93         |
|       | 5kg                                                                                                                                     |      |                |
| 2470  | Supply and replace of protective metal boxes for the following sizes of                                                                 | no   | 78.63          |
|       | fire extinguishers – 2.5kg type                                                                                                         |      |                |
| 2471  | Supply and replace of protective metal boxes for the following sizes of                                                                 | no   | 87.55          |
| 2472  | fire extinguishers – 4.5kg type                                                                                                         |      |                |
| 2472  | Supply and replace of protective metal boxes for the following sizes of fire extinguishers – 9.0kg type                                 | no   | 114.33         |
| 2473  | Refill and recharging of dry chemical fire extinguishers (any brand)                                                                    | Kg   | 6.38           |
| 2.73  | maintained pressure                                                                                                                     | ۵,,  | 0.50           |
| 2474  | Refill and recharging of CO2 fire extinguishers (any brand)                                                                             | Kg   | 10.63          |
|       |                                                                                                                                         |      |                |

| S/No | Description                                                          | Unit | Unit Cost (\$) |
|------|----------------------------------------------------------------------|------|----------------|
| 2475 | Supply and replace break glass with wording for key holder of either | no   | 9.78           |
|      | extinguisher cabinet or hosereel's box (approved type)               |      |                |
| 2476 | Supply and replace viewing glass for fire extinguishers or hosereel  | no   | 16.15          |
|      | cabinet (approved type)                                              |      |                |
| 2477 | Drainage and re-charging for drainage of sprinkler / hosereel system | Job  | 467.5          |
|      |                                                                      |      |                |

## PRICE SCHEDULE OF RATES III – ELECTRICAL WORKS

## 1. MAINTENANCE, REPAIRS, ADDITIONS & ALTERATIONS

| S/No | Description                                                                                                                                                                 | Unit | Unit Cost (\$) |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------|
| 1    | Ceiling/Pendant/Bracket light pt c/w 5 amp SP flush moulded switch and moulded box.                                                                                         | no   | 20.4           |
| 2    | Ceiling/Pendant/Bracket light pt without switch.                                                                                                                            | no   | 17             |
| 3    | Ceiling/Pendant/Bracket light pt c/w 5 amp 2 way SP flush moulded switch and moulded box.                                                                                   | no   | 25.5           |
| 4    | Spotlight pt c/w 5 amp SP flush moulded switch and moulded box.                                                                                                             | no   | 25.5           |
| 5    | Bracket wall fan pt c/w 5 amp SP flush moulded switch and moulded box, fan mounting block etc.                                                                              | no   | 20.4           |
| 6    | Ceiling fan pt c/w 5 amp flush moulded switch and moulded box, regulator mounting block and fan hook.                                                                       | no   | 30.6           |
| 7    | Exhaust fan pt c/w 5 amp flush moulded switch and moulded box etc.                                                                                                          | no   | 20.4           |
| 8    | Power socket outlet pt c/w 13 amp single gang switch socket outlet and moulded box (including ring circuits).                                                               | no   | 34             |
| 9    | Power socket outlet pt c/w 15 amp round pin flush type switch socket outlet and moulded box.                                                                                | no   | 42.5           |
| 10   | Power socket outlet pt c/w 13 amp twin flush type switch socket outlet and moulded box (including ring circuits).                                                           | no   | 42.5           |
| 11   | Electric clock pt c/w fuse connector.                                                                                                                                       | no   | 20.4           |
| 12   | Water heater pt c/w 20A DP switch with neon indicator and fused connection unit.                                                                                            | no   | 42.5           |
| 13   | Power socket outlet pt c/w 20 amp DP switch with neon indicator and 15 amp socket outlet adjacent to air- conditioner.                                                      | no   | 51             |
| 14   | Power socket outlet pt c/w 20 amp DP switch with neon indicator and 15 amp socket outlet, 3-way connector and teak block (180mm x 200mm x 32mm) w/o starter.                | no   | 68             |
| 15   | Red toggle of switch instead of white toggle of switch (additional cost).                                                                                                   | no   | 2.55           |
| 16   | Additional neon light for any moulded socket outlet plate or switch plate.                                                                                                  | no   | 3.4            |
| 17   | Hand dryer point c/w 13A single gang switch socket outlet and moulded box, 3-pin plug.                                                                                      | no   | 27.2           |
| 18   | Telephone pt c/w socket or faceplate (RJ11 or RJ45) with base.                                                                                                              | no   | 12.75          |
| 19   | Power socket outlet pt c/w 13 amp single gang switch socket outlet and moulded box (including ring circuits) but not exceeding 40M.                                         | no   | 127.5          |
| 20   | Power socket outlet pt c/w 15 amp single gang switch socket outlet and moulded box (including ring circuits) but not exceeding 40M.                                         | no   | 119            |
| 21   | Supply and Install Ceiling Pendent/Bracket light point c/w 5Amp 1/2 way SP switch, flush moulded box, in PVC trunking/conduit, 3x1 core 11.5mm2 PVC cable of above 50m run. | lot  | 85             |

| S/No | Description                                                                                                                                                                                                                      | Unit | Unit Cost (\$) |
|------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------|
| 22   | Supply and Install power point c/w 2 x 13Amp switch socket outlet, flush moulded box, in PVC trunking/conduit, 6x1 core 2.5mm2 PVC cable of above 40m run, including ring circuit.                                               | lot  | 153            |
| 23   | Power Socket outlet point c/w 20 amp DP shuttered combined metal switch socket but not exceeding 40M metal clad switch with neon indicator and 15 amp socket outlet adjacent to air-condition but not exceeding 40M.  Not in use | no   | 220.15         |
| 25   | Not in use                                                                                                                                                                                                                       |      |                |
| 26   | Spotlight pt c/w 5 amp SP surface type metal clad switch.                                                                                                                                                                        | no   | 35.7           |
| 27   | Bracket wall fan pt c/w 5 amp SP surface type metal clad switch, teak block and necessary accessories.                                                                                                                           | no   | 28.9           |
| 28   | Ceiling fan pt c/w 5 amp surface type metal clad switch, fan hook, teak block for mounting regulator etc.                                                                                                                        | no   | 42.5           |
| 29   | Power socket outlet pt c/w 3-pin & 13 amp shuttered combined metal clad switched socket outlet (including ring circuits).                                                                                                        | no   | 38.25          |
| 30   | Power socket outlet pt c/w 3-pin 15 amp shuttered combined metal clad switch socket outlet.                                                                                                                                      | no   | 59.5           |
| 31   | Electric clock pt c/w fuse connector.                                                                                                                                                                                            | no   | 28.9           |
| 32   | Power socket outlet pt c/w 13 amp shuttered type twin combined metal clad switch socket outlet (including ring circuit)                                                                                                          | no   | 45.05          |
| 33   | Water heater pt c/w 20 amp DP switch with neon indicator light and fused connection unit.                                                                                                                                        | no   | 59.5           |
| 34   | Power socket outlet pt c/w 20 amp DP metal clad switch with neon indicator and 15 amp socket outlet adjacent to air- conditioner.                                                                                                | no   | 71.4           |
| 35   | Power socket outlet pt c/w 20 amp DP switch with neon indicator lamp and 15 amp socket outlet, 3-way connector and teak block of size 180mm x 260mm x 32mm w/o starter.                                                          | no   | 95.2           |
| 36   | Additional neon light for any moulded socket outlet plate or switch plate.                                                                                                                                                       | no   | 3.4            |
| 37   | Power socket outlet pt c/w 20 amp DP shuttered combined metal clad switch socket but not exceeding 40M metal clad switch with neon indicator and 15 amp socket outlet adjacent to air-condition but not exceeding 40M.           | no   | 220.15         |

| 172 Supply and install 25mm x 3.25mm aluminum tape using purpose made aluminum saddles on purpose made cement blocks at one metre intervals.  173 Supply and install aluminum finial 300mm-600mm x 16mm diameter solid aluminum c/w base plate as Fuse RA105 or equivalent including connecting up to interconnecting aluminum tape.  174 Supply and install square tape clamp for forming straight through, cross or tee joint in aluminum tape as Fuse CT005 or equivalent including connecting up to interconnector for joining aluminum to copper tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.  175 Supply and install 50mm UPVC conduit to enclose lightning down conductor.  176 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  177 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm Gl inspection                                                                                                                                                                                                                                              | 171  |                                                                           | no   | 5.95           |
| aluminum saddles on purpose made cement blocks at one metre intervals.  Supply and install aluminum finial 300mm-600mm x 16mm diameter solid aluminum c/w base plate as Fuse RA105 or equivalent including connecting up to interconnecting aluminum tape.  174 Supply and install square tape clamp for forming straight through, cross or tee joint in aluminum tape as Fuse CT005 or equivalent.  Supply and install bi-metallic connector for joining aluminum to copper tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.  176 Supply and install 50mm UPVC conduit to enclose lightning down conductor.  177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  181 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm Gl inspection                                                                                                                                                                                                                                                                          | 470  |                                                                           |      |                |
| intervals.  Supply and install aluminum finial 300mm-600mm x 16mm diameter solid aluminum c/w base plate as Fuse RA105 or equivalent including connecting up to interconnecting aluminum tape.  174 Supply and install square tape clamp for forming straight through, cross or tee joint in aluminum tape as Fuse CT005 or equivalent.  175 Supply and install bi-metallic connector for joining aluminum to copper tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.  176 Supply and install 50mm UPVC conduit to enclose lightning down conductor.  177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA no 42.5 current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper no clad steel rod c/w brass or copper clamp and 20cm x 20cm Gl inspection                                                                                                                                            | 1/2  |                                                                           | m    | 2.98           |
| 173 Supply and install aluminum finial 300mm-600mm x 16mm diameter solid aluminum c/w base plate as Fuse RA105 or equivalent including connecting up to interconnecting aluminum tape.  174 Supply and install square tape clamp for forming straight through, cross or tee joint in aluminum tape as Fuse CT005 or equivalent.  175 Supply and install bi-metallic connector for joining aluminum to copper tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.  176 Supply and install 50mm UPVC conduit to enclose lightning down conductor.  177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper no clad steel rod c/w brass or copper clamp and 20cm x 20cm Gl inspection                                                                                                                                                                                                                                                                                                                                       |      |                                                                           |      |                |
| connecting up to interconnecting aluminum tape.  174 Supply and install square tape clamp for forming straight through, cross or tee joint in aluminum tape as Fuse CT005 or equivalent.  175 Supply and install bi-metallic connector for joining aluminum to copper tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.  176 Supply and install 50mm UPVC conduit to enclose lightning down conductor.  177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm GI inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 173  |                                                                           | no   | 0.5            |
| 174 Supply and install square tape clamp for forming straight through, cross or tee joint in aluminum tape as Fuse CT005 or equivalent.  175 Supply and install bi-metallic connector for joining aluminum to copper tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.  176 Supply and install 50mm UPVC conduit to enclose lightning down conductor.  177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm Gl inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |      |                                                                           |      | 8.5            |
| or tee joint in aluminum tape as Fuse CT005 or equivalent.  Supply and install bi-metallic connector for joining aluminum to copper tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.  Supply and install SOMM UPVC conduit to enclose lightning down conductor.  Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  As above but for 15A surge protective plug top.  o 68  Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm Gl inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |      |                                                                           |      |                |
| tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.  176 Supply and install 50mm UPVC conduit to enclose lightning down conductor.  177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm Gl inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 174  |                                                                           | no   | 2.13           |
| tape as Fuse lype A CN910 or equivalent including connecting up copper/aluminum tapes.  176 Supply and install 50mm UPVC conduit to enclose lightning down conductor.  177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm GI inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 175  | Supply and install bi-metallic connector for joining aluminum to copper   | no   | 24             |
| Supply and install 50mm UPVC conduit to enclose lightning down conductor.  177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm GI inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |      |                                                                           |      | 34             |
| conductor.  Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  As above but for 15A surge protective plug top.  no 68  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm Gl inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 176  |                                                                           |      | 2.4            |
| 177 Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.  178 Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  179 Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm GI inspection  170                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 1/6  |                                                                           | no   | 3.4            |
| reinforced chamber with 10mm thick steel checker plates.  Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.  Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.  180 13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)  181 As above but for 15A surge protective plug top.  182 Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.  183 Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm GI inspection                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 177  |                                                                           | no   | 34             |

| 420  | 600mm x 1245mm recessed fluorescent fitting c/w 2 x 28w tri-phosphor lamps, 2 x Dimmable HF electronics ballasts and semi-gloss cat 2 mirror louvre.                  | no   | 297.5          |
| 421  | 600mm x 1245mm recessed fluorescent fitting c/w 3 x 28w tri-phosphor lamps, 3 x Dimmable HF electronics ballasts and semi-gloss cat 3 mirror louvre.                  | no   | 382.5          |
| 422  | 600mm x 1245mm recessed fluorescent fitting c/w 4 x 28w tri-phosphor lamps, 4 x Dimmable HF electronics ballasts and semi-gloss cat 3 mirror louvre.                  | no   | 552.5          |
| 423  | Recessed down-light c/w 2 x plate 42w tri-phosphor, lamps, dimmable HF electronics ballasts and anodise facetted aluminum reflector.                                  | no   | 382.5          |
| 424  | Recessed down-light c/w 2 x plate 26w tri-phosphor, lamps, dimmable HF electronics ballasts and anodise facetted aluminum reflector.                                  | no   | 340            |
| 425  | Dimmable HF electronics ballast 1 x 14W - 28W one ballast to one fluorescent lamp inclusive of replacement.                                                           | no   | 102            |
| 426  | Dimmable HF electronics ballast 2 x 14W - 28W one ballast to one fluorescent lamp inclusive of replacement.                                                           | no   | 127.5          |
| 427  | Dimmable HF electronics ballast 1 x 13W - 42W PLC luminaries inclusive of replacement.                                                                                | no   | 127.5          |
| 428  | Recessed mounting for suspended ceiling board type, M2 mirror optics diffuser 2 x 14W (625mm x 625mm) c/w tubes and 2 dimmable HF electronic ballast.                 | no   | 272            |
| 429  | Recessed mounting for suspended ceiling board type, M2 mirror optics diffuser 3 x 14W (625mm x 625mm) c/w tubes and 3 dimmable HF electronic ballast.                 | no   | 382.5          |
| 430  | To replace existing electronic ballast all labours, parts <(>&<)> cables to light fittings, 1 x 28W ballast/1 x 14W ballast.                                          | no   | 25.5           |
| 431  | Supply, install and replace 2 x 54W weather proof fluorescent luminaries with IP 55 protection.                                                                       | no   | 97.75          |

| S/No | Description                                                                                                                                                                                 | Unit | Unit Cost (\$) |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------|
| 432  | Supply, install and replace explosion proof 2 x 28W light fixture c/w light                                                                                                                 | no   | 595            |
| 433  | tube. To supply and install wall mounted luminaries (any types of face plate description "Caution/Lecture in Progress/Laser in Operation/Toxic Discharge"/complete with gear and LED/tubes. | no   | 382.5          |
| 434  | To supply and install LED type of flood light fixture 80-200W complete with inverter and LED.                                                                                               | no   | 510            |
| 435  | To supply and install LED type of halogen light fixture complete with inverter and LED. (3-10W), any colour rendering, weather proof.                                                       | no   | 102            |
| 436  | Supply, deliver, replace and install circular globe fixtures c/w gear <(>&<)> lamp up to 250W, Globe of 400 diameter.                                                                       | no   | 255            |
| 437  | Supply, deliver, replace and install Zebra Crossing yellow circular globe c/w 30 - 50W LED including driver, timer, PCB.                                                                    | no   | 425            |
| 438  | Main bell wiring pt 230 Volts c/w switch.                                                                                                                                                   | no   | 20.4           |
| 439  | Mains wiring point for bell transformer.                                                                                                                                                    | no   | 17             |
| 440  | Bell push pt c/w bell push 30m run bell wire and mounting block.                                                                                                                            | no   | 20.4           |
| 441  | 240 to 6-24V bell transformer 12VA make.                                                                                                                                                    | no   | 12.75          |
| 442  | 6-24V (AC or DC) electric bell, 75mm diameter                                                                                                                                               | no   | 8.5            |
| 443  | 6-24V (AC or DC) electric buzzer.                                                                                                                                                           | no   | 8.5            |
| 444  | 230 volt electric gong 150mm diameter revolving light / baby siren / buzzer.                                                                                                                | no   | 51             |
| 445  | 230 volt electric gong 225mm diameter revolving light / baby siren / buzzer.                                                                                                                | no   | 85             |
| 446  | 300mm diameter AC230V electric, wall mounted clock with red seconds hand and 72 hours of power reserve in case of power failure.                                                            | no   | 170            |
| 447  | Electronic multi-function bell timer c/w a choice of 4 melodies, 2 control output channels and easy to program.                                                                             | no   | 807.5          |
| 448  | 300mm Wall Clock DC 1.5V.                                                                                                                                                                   | no   | 42.5           |
| 449  | Supply, install and replace TV point including splitter.                                                                                                                                    | no   | 17             |
| 450  | Supply, deliver, replace and install UPS >= 10KVA, 3 phase, 63A c/w 4 output terminal, tolerance range +/- 10%.                                                                             | no   | 4250           |
| 451  | Supply, deliver, replace and install UPS >= 20KVA, 3 phase, 63A c/w 4 output terminal, tolerance range +/- 10%.                                                                             | no   | 6800           |
| 452  | Supply, deliver, replace and install UPS >= 10KVA, 1 phase, 63A c/w 4 output terminal, tolerance range +/- 10%.                                                                             | no   | 1700           |
| 453  | Supply, deliver, replace and install UPS >= 20KVA, 1 phase, 63A c/w 4 output terminal, tolerance range +/- 10%.                                                                             | no   | 3400           |
| 454  | To remove one lighting point including wiring fitting, batten, conduits etc and make good wall or ceiling surface (excluding touch-up).                                                     | no   | 3.4            |
| 455  | To remove one power point including wiring fitting, batten, conduits etc and make good wall or ceiling surface (excluding touch-up).                                                        | no   | 3.4            |
| 456  | To remove bracket, exhaust or ceiling oscillating fan pt including wiring fan, batten, or conduits mounting block and make good wall surface.                                               | no   | 5.1            |

| S/No | Description                                                                                                              | Unit | Unit Cost (\$) |
|------|--------------------------------------------------------------------------------------------------------------------------|------|----------------|
| 457  | To remove ceiling fan pt including wiring, batten, fan/hook and regulator                                                | no   | 4.25           |

|------|----------------------------------------------------------------------------------------------------------|------|----------------|
| 506  | Supply and install water-proof isolator with minimum protection of IP 55, 45ADF                          | no   | 76.5           |
| 507  | Supply and install water-proof isolator with minimum protection of IP 55, 60ADF                          | no   | 85             |
| 508  | Supply and install water-proof isolator with minimum protection of IP 55, 20ATPN                         | no   | 66.3           |
| 509  | Supply and install water-proof isolator with minimum protection of IP 55, 32ATPN                         | no   | 76.5           |
| 510  | Supply and install water-proof isolator with minimum protection of IP 55, 45ATPN                         | no   | 102            |
| 511  | Supply and install water-proof isolator with minimum protection of IP 55, 60ATPN                         | no   | 127.5          |
| 512  | Supply and replace 250W Metal Halide Lamp                                                                | no   | 63.75          |
| 513  | Supply and replace 400W Metal Halide Lamp                                                                | no   | 76.5           |
| 514  | Supply and replace 250 - 400W Metal Halide ballast, Type Constant W attage Auto-Transformer (CWA)        | no   | 85             |
| 515  | Supply and replace Igniter for 70W - 400W metal halide high bay luminaries                               | no   | 27.2           |
| 516  | Supply and replace including connecting up 150 watt PAR 38 Reflector Lamp                                | no   | 10.2           |
| 517  | Supply and replace including connecting up 14 watt 400mm energy saving glue tube (Any colour rendering)  | no   | 4.25           |
| 518  | Supply and replace including connecting up 28 watt 1200mm energy saving glue tube (Any colour rendering) | no   | 8.08           |
| 519  | Supply and replace including connecting up 54 watt 1500mm energy saving fluo tube                        | no   | 6.38           |
| 520  | Supply and replace including connecting up fluorescent starter of any size                               | no   | 1.28           |
| 521  | Supply and replace including connecting up low loss ballast for 14 watt lamp                             | no   | 7.65           |
| 522  | Supply and replace including connecting up low loss ballast for 28 watt lamp                             | no   | 9.35           |
| 523  | Supply and replace including connecting up PL 9 watts to 13 watt lamp                                    | no   | 7.65           |
| 524  | Supply and replace including connecting up 10w to 40w 2D fluorescent lamp 2 to 4 pin                     | no   | 13.18          |
| 525  | Supply and replace including connecting up 60w and above spiral compact fluorescent lamp                 | no   | 25.5           |
| 526  | Supply and replace including connecting up PL-18 - 26 watt lamp                                          | no   | 12.75          |
| 527  | Supply and replace including connecting up ballast for PL 9 watt - 11 watt                               | no   | 5.1            |
| 528  | Supply and replace including connecting up ballast for PL 13 watt - 18 watt                              | no   | 6.8            |
| 529  | Supply and replace 10W - 13W PLC lamp including connecting up                                            | no   | 11.9           |
| 530  | Supply and replace 18W - 26W PLC lamp including connecting up                                            | no   | 14.03          |
|      |                                                                                                          |      | I              |

| S/No | Description                                                                                                                                                                                                                                                            | Unit | Unit Cost (\$) |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------|
| 531  | Supply and replace including connecting up ceiling rose with 3-plate                                                                                                                                                                                                   | no   | 3.83           |
| 532  | Supply and replace including connecting up batten holder/lamp holder                                                                                                                                                                                                   | no   | 3.83           |
| 533  | Supply and replace including connecting up capacitor for 1-2 metre or 1.5 metres ceiling fan                                                                                                                                                                           | no   | 7.65           |
| 534  | Supply and replace including connecting up 3 amp SP water tight switch                                                                                                                                                                                                 | no   | 17             |
| 535  | Supply and replace including connecting up twin gang 5 amp SP water tight switch                                                                                                                                                                                       | no   | 25.5           |
| 536  | Supply and replace including connecting up ceiling fan regulator of any type and make                                                                                                                                                                                  | no   | 14.03          |
| 537  | Supply and replace 8w fluorescent tube for exit light luminaries including connecting up                                                                                                                                                                               | no   | 2.55           |
| 538  | Supply and install plot cell control switch including connecting up                                                                                                                                                                                                    | no   | 38.25          |
| 539  | Supply and replace polypropylene power factor capacitor for any sizes of light fitting                                                                                                                                                                                 | no   | 4.25           |
| 540  | Supply and replace prismatic acrylic diffuser, size 600mm x 600mm                                                                                                                                                                                                      | no   | 8.5            |
| 541  | Supply and replace prismatic acrylic diffuser, size 1200 x 600mm                                                                                                                                                                                                       | no   | 11.9           |
| 542  | Supply and replace existing diffuser to egg crate silver anodized diffuser of any sizes including disposal                                                                                                                                                             | no   | 21.25          |
| 543  | Supply and replace/install including connecting up 6 gang 5 amps white rocker plate SP c/w moulded surface mounting box                                                                                                                                                | no   | 10.2           |
| 544  | Supply and replace/install including connecting up 8 gang 5 amps white rocker plate SP c/w moulded surface mounting box                                                                                                                                                | no   | 11.9           |
| 545  | Supply and install/replace including connecting up to power point and ready to operate for an electronic time switch 230V, 50Hz, 7 days operations, class of operation IP 42/11, with minimum time setting of 1 minute. The timber shall have 24 start/stop functions. | no   | 340            |
| 546  | Supply and install digital electronics time switch 230 volt 50 Hz c/s 10 Amp.                                                                                                                                                                                          | no   | 136            |
| 547  | Supply and install including connecting up to 35-60 Amp star-delta motor starter contactor c/w auxillary contacts                                                                                                                                                      | no   | 289            |
| 548  | Supply and replace Bulb ES or BC 15w-100w                                                                                                                                                                                                                              | no   | 2.55           |
| 549  | Supply and replace 42W PLC (4 pins) lamp (OSPAM) or equivalent                                                                                                                                                                                                         | no   | 25.5           |
| 550  | Supply and replace 35w-50w Halogen lamp c/w Cool beam & UV filter type                                                                                                                                                                                                 | no   | 17             |
| 551  | Supply and replace 10w Halogen lamp (Emergency light)                                                                                                                                                                                                                  | no   | 8.5            |
| 552  | Supply & replace 5w 6.3v blub (pilot indicating light)                                                                                                                                                                                                                 | no   | 1.7            |
| 553  | Supply and replace 35w - 60w ES or BC carbon bulb (Philips) or equivalent                                                                                                                                                                                              | no   | 34             |
| 554  | Supply & replace 20w - 40w UV fluorescent                                                                                                                                                                                                                              | no   | 34             |

| S/No | Description                                                                                                                                                     | Unit | Unit Cost (\$) |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------|
| 555  | Supply & replace 50w HME mercury lamp                                                                                                                           | no   | 11.9           |
| 556  | Supply & replace Ballast for 50w HME mercury lamp                                                                                                               | no   | 22.1           |
| 557  | Supply & replace 32w -40W circular flow lamp                                                                                                                    | no   | 8.5            |
| 558  | Digital KHH meter, 32A to 1000A equivalent c/w CTS ,< (>&<) > connections, wiring                                                                               | no   | 255            |
| 559  | Supply & replace 150W - 250w Sodium Vapour lamps ballast                                                                                                        | no   | 42.5           |
| 560  | Supply and replace 150w-250w sodium Vapour lamp                                                                                                                 | no   | 102            |
| 561  | Supply & replace 70w metal halide lamp/sodium                                                                                                                   | no   | 29.75          |
| 562  | Supply and replace 70w-200w metal halide lamp                                                                                                                   | no   | 42.5           |
| 563  | Supply and replace 70w - 200w metal halide ballast, type constant wattage auto-transformer (CWA)                                                                | no   | 59.5           |
| 564  | Supply and replace outdoor light fitting (L-810) 35w-50w 12V low voltage c/w bulb and transformer                                                               | no   | 102            |
| 565  | Supply and replace outdoor light fitting 12V to 24V, 35w - 50w transformer                                                                                      | no   | 42.5           |
| 566  | Supply and replace including connecting 50 to 65 watt lamps (energy saving lamp)                                                                                | no   | 34             |
| 567  | Supply & replace 1000 to 2000 watts sodium/mercury/metal halide lamp                                                                                            | no   | 127.5          |
| 568  | Supply & replace ballast for 1000 to 2000 watts sodium/mercury/metal halide lamp                                                                                | no   | 212.5          |
| 569  | Supply & replace ignitor for 1000 to 2000 watts sodium/mercury 1 metal halide lamp                                                                              | no   | 42.5           |
| 570  | Supply & replace including connecting up ballast for PLC 10- 23 watts                                                                                           | no   | 5.95           |
| 571  | Supply & replace including connecting up ballast for PLC 18- 26 watts                                                                                           | no   | 13.6           |
| 572  | Supply & replace fluorescent tube T5 (16mm) extra slim 25w Supply & replace weather protected junction Box IP65 of                                              | no   | 15.3           |
| 573  | any sizes                                                                                                                                                       | no   | 102            |
| 574  | Supply & replace ground buried luminaries metal halide fitting c/w 1 x $70$ w/ $100$ w lamp complete with control gear and protection conforms to IP 67 class 1 | no   | 425            |
| 575  | To check, testing, service and commissioning (software programming) lighting dimming system                                                                     | no   | 340            |
| 576  | To supply & replace 4-stage scene control & push button                                                                                                         | no   | 255            |
| 577  | To supply & replace master ON/OFF switch c/w indicating lights                                                                                                  | no   | 59.5           |
| 578  | To supply & replace HF electronic dimmable ballast for PLC bulb                                                                                                 | no   | 102            |
| 579  | To supply & replace HP electronic dimmable ballast for fluorescent tube                                                                                         | no   | 76.5           |

| S/No | Description                                                                                                                                                                                                              | Unit | Unit Cost (\$) |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------|
| 580  | To supply & replace LT/HT step-down transformer for outdoor building                                                                                                                                                     | no   | 127.5          |
| 581  | lighted signages (Any capacity)  To supply & replace outdoor water-proof lighted signages bulb                                                                                                                           | no   | 6.8            |
| 582  | To supply & replace programmable Dim Actuator DC 24V in Dimming System                                                                                                                                                   | no   | 102            |
| 583  | To supply & replace bus-voltage supply module                                                                                                                                                                            | no   | 170            |
| 584  | To supply & replace programmable dimming control modules 0.7kw to 2 kw range                                                                                                                                             | no   | 850            |
| 585  | To supply & replace plug in thysistor or Transistor modules for phase controlled in dimming system, the power range from 3 kw to 5 kw with phase control                                                                 | no   | 1020           |
| 586  | Supply, install and replace Emergency Push button, 240V c/w Red button                                                                                                                                                   | no   | 34             |
| 587  | Supply, install and replace 2 Amp to 10 Amp, cartridge fuse                                                                                                                                                              | no   | 2.55           |
| 588  | Supply, install and replace Programmable Digital Power KWH meter (EDMI) c/w remote monitoring capability, CTs testing and commissioning, surge protection and LEW endorsement                                            | lot  | 2975           |
| 589  | Supply, deliver and install 230B, 50 HZ Dehumidifier of capacity of at least 25 litres                                                                                                                                   | no   | 2125           |
| 590  | Supply, install and replace Motion/ Presence Detector control switch, 230V, 50 hz c/w timer control capability for at least 30 minutes, detection angle of 360 degrees horizontal, 180 degrees vertical range and wiring | no   | 204            |
| 591  | Supply & install Isolator point c/w 160Amp TP IP65 Isolator, in metal trunking, 5 x 1 core 70mm2 PVC cable above 30m run                                                                                                 | lot  | 1700           |
| 592  | Supply up to 28w 1200mm x 38mm fluo tube (any type of colour rendering)                                                                                                                                                  | no   | 3.4            |
| 593  | Supply, install and replace explosion proof tube 1 x 28w                                                                                                                                                                 | no   | 68             |
| 594  | Supply, install and replace explosion proof ballast, 1 x 28W                                                                                                                                                             | no   | 85             |
| 595  | To replace 1 x 54W electronics ballast                                                                                                                                                                                   | no   | 29.75          |
| 596  | Supply and replace 1 x 108W electronics ballast                                                                                                                                                                          | no   | 59.5           |
| 597  | Supply, deliver, replace & install 10A 1-5 gang switches c/w 1 dimmer <(>&<)> base                                                                                                                                       | no   | 17             |
| 598  | Supply, deliver, replace & install 10A 1-5 gang switches c/w 2 dimmer (<(>&<)> base                                                                                                                                      | no   | 21.25          |
| 599  | Supply, deliver, replace and install 3-10W LED (halogen type 0 bulb c/w UV filter                                                                                                                                        | no   | 25.5           |
| 600  | Supply, deliver, replace and install Halogens LED/light strip driver                                                                                                                                                     | no   | 34             |
| 601  | Supply, deliver, replace and install 1500mm light strip, 15-30W                                                                                                                                                          | no   | 68             |
| 602  | Supply, deliver, replace and install energy paving PAR 38, 25w                                                                                                                                                           | no   | 25.5           |
| 603  | CDMT Lamp, 2 PIN - 15 W                                                                                                                                                                                                  | no   | 25.5           |

| S/No | Description                                                                                                                                         | Unit | Unit Cost (\$) |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------|------|----------------|
| 604  | Supply, install and replace 3 way, 400V 200A - 800A, 4 pole manual                                                                                  | no   | 841.5          |
| 605  | transfer switch c/w modification                                                                                                                    | 20   |                |
| 605  | Excavate cable pit for fault location 1.5m x 1.5m x 1.5m deep on ground including backfilling, compacting, make good and returfing (other size pits | no   | 127.5          |
|      | will be pro-rated accordingly)                                                                                                                      |      |                |
| 606  | Excavate trench 750mm deep x 300mm width on ground and backfilling                                                                                  | m    | 10.2           |
|      | including re-turfing                                                                                                                                |      |                |
| 607  | Excavate trench 750mm deep and 60mm width on ground and backfilling including re-turfing                                                            | m    | 11.9           |
| 608  | Excavate trench 750mm x 300mm on gravel road and backfilling including                                                                              | m    | 68             |
