VOL 4	Plumbing and Sanitary	PS 1 – 196

PRICE SCHEUDLE OF RATES I - BUILDING WORKS

1. EXCAVATE

S/No	Description	Unit	Unit Cost (\$)
EX.1	Clear level or sloping site of tall grass, shrubs, bushes, undergrowth, etc. and small trees not exceeding 600 mm girth at a height of 1 metre above ground and grub up their roots and fill voids with earth obtained from Contractor's own sources and disposal of materials off site.	sq m	1.60
EX.2	Excavate surface to reduce level not exceeding 100 mm deep to average depth, get out, remove, deposit, spread, level and mechanically ram and consolidate on site or remove off site to a dump as directed by the University or deposit at contractor's own dumping ground.	sq m	2.00
EX.3	Excavate surface to reduce level exceeding 100 mm and not exceeding 200mm deep to average depth, get out, remove, deposit, spread, level and mechanically ram and consolidate on site or remove off site to a dump as directed by the University or deposit at contractor's own dumping ground.	sq m	2.20
EX.4	Excavate surface to reduce level exceeding 200 mm and not exceeding 300mm deep to average depth, get out, remove, deposit, spread, level and mechanically ram and consolidate on site or remove off site to a dump as directed by the University or deposit at contractor's own dumping ground.	sq m	3.30
EX.5	Excavate surface to reduce level exceeding 300 mm and not exceeding 1000mm deep to average depth, get out, remove, deposit, spread, level and mechanically ram and consolidate on site or remove off site to a dump as directed by the University or deposit at contractor's own dumping ground.	cu m	8.20
EX.6	Add for items 2 to 5 each additional 2.00 m in depth beyond the first 1.00m deep.	cu m	3.45
EX.7	Add for excavating by hand for which mechanical means is not possible for quantity which is less than 250 cu m in any single operation or for any other reason the use of mechanical plant is not possible for level n.e. 100 mm deep.	sq m	1.40
EX.8	Add for excavating by hand for which mechanical means is not possible for quantity which is less than 250 cu m in any single operation or for any other reason the use of mechanical plant is not possible for level exceeding 100mm & n.e. 200mm deep.	sq m	1.70
EX.9	Add for excavating by hand for which mechanical means is not possible for quantity which is less than 250 cu m in any single operation or for any other reason the use of mechanical plant is not possible for level exceeding 200mm & n.e. 300mm deep.	sq m	2.80
EX.10	Add for excavating by hand for which mechanical means is not possible for quantity which is less than 250 cu m in any single operation or for any other reason the use of mechanical plant is not possible for level exceeding 300mm & n.e. 1000 mm deep.	cu m	15.00
EX.11	Excavate in slopes or embankment and get out, remove, deposit, spread and level on Site and/or remove to ENV's approved dumping ground including trimming surfaces of slopes.	cu m	15.00
EX.12	Roll with power roller not exceeding one tonne or with approved hand roller.	sq m	0.70
EX.13	Trim undulating ground to form level surface or embankments or to required falls.	sq m	1.30
EX.14	Excavate trenches for surface water channels and drains not exceeding 525 mm width to an average depth not exceeding 750 mm, get out, backfill, remove surplus excavated materials off site and make good (length measured over sump pits)	m	8.10

S/No	Description	Unit	Unit Cost (\$)
EX.15	Excavate to form trenches for foundations, drains, culverts retaining walls, etc. not exceeding 2.00m deep and get out, part return, fill in and ram and remainder remove and deposit, spread and level on Site and/or remove to ENV's dumping ground.	cu m	15.00
EX.16	Excavate to form trenches for foundations, drains, culverts retaining walls, etc. exceeding 2.00m and not exceeding 4.00m deep and get out, part return, fill in and ram and remainder remove and deposit, spread and level on Site and/or remove to ENV's dumping ground.	cu m	18.00
EX.17	Excavate to form trenches for foundations, drains, culverts retaining walls, etc. exceeding 4.00m and not exceeding 6.00m deep and get out, part return, fill in and ram and remainder remove and deposit, spread and level on Site and/or remove to ENV's dumping ground.	cu m	44.85
EX.18	Excavate to form trenches for foundations, drains, culverts retaining walls, etc. exceeding 6.00m deep and get out, part return, fill in and ram and remainder remove and deposit, spread and level on Site and/or remove to ENV's dumping ground.	cu m	56.35
EX.19	Excavate for pier holes and the like not exceeding 1 cu m each and get out, remove, deposit, spread and level on site and/or remove to ENV's approved dumping ground.	no	23.00
EX.20	Extra over for excavating trenches in semi-hard ground not exceeding 2.00m deep.	cu m	25.90
EX.21	Extra over for excavating trenches in semi-hard ground exceeding 2.00m & not exceeding 4.00m deep.	cu m	32.80
EX.22	Extra over for excavating trenches in semi-hard ground exceeding 2.00m & not exceeding 6.00m deep.	cu m	67.30
EX.23	Extra over for excavating trenches in semi-hard ground exceeding 6.00m deep.	cu m	84.50
EX.24	Extra over for excavating pier holes in semi-hard ground.	cu m	34.50
EX.25	Extra over excavation for excavating trenches in hard ground not exceeding 2.00m deep (blasting will not be permitted. Work has to be carried out by pneumatic tools, etc.).	cu m	32.80
EX.26	Extra over excavation for excavating trenches in hard ground exceeding 2.00m & not exceeding 4.00m deep(blasting will not be permitted. Work has to be carried out by pneumatic tools, etc.).	cu m	41.50
EX.27	Extra over excavation for excavating trenches in hard ground exceeding 4.00m & not exceeding 6.00m deep(blasting will not be permitted. Work has to be carried out by pneumatic tools, etc.).	cu m	85.20
EX.28	Extra over excavation for excavating trenches in hard ground exceeding 6.00m deep(blasting will not be permitted. Work has to be carried out by pneumatic tools, etc.).	cu m	107.10
EX.29	Extra over excavation for excavating pier holes in hard ground (blasting will not be permitted. Work has to be carried out by pneumatic tools, etc.).	no	43.70
EX.30	Excavate pits, small holes, etc (i.e. holes not exceeding 1cu m) to receive bases of posts etc, get out, backfill, remove surplus excavated materials off site and make good.	no	21.50
EX.31	Timber left in excavation as directed including cutting runners below ground level (price to include wedges, cleats, etc.).	sqm	13.20
EX.32	Backfill and ram best of excavated material around foundations in 150 mm layers.	cu m	7.10
EX.33	Remove excavated material to a dump within site as directed by the University irrespective of distance.	cu m	8.30

S/No	Description	Unit	Unit Cost (\$)
EX.34	Remove excavated material to a dump off site as directed by the University irrespective of distance.	cu m	44.60
EX.35	Dry approved earth filling obtained from the Contractor's own sources, deposited, spread and consolidated by hand or mechanical means in layers of 300 mm and as directed to make up levels or banks.	cu m	9.30
EX.36	Dry approved earth filling obtained from the Contractor's own sources, in filling to slipped banks including taking out loose, muddy soil and all necessary hand or mechanical ramming as directed.	cu m	15.50
EX.37	Take out silt, loose muddy soil or other materials from existing running storewater channels, drains exceeding 150 mm deep, sump pits or cesspits and remove, deposit, spread and level in positions as directed by the University or remove off site.	cu m	47.30
EX.38	Take out silt, loose muddy soil or other materials from existing running storewater channels, drains exceeding 150 mm deep, sump pits or cesspits and remove, deposit, spread and level in positions as directed by the University or remove off site from shallow drains not exceeding 150 mm deep.	m	1.20
EX.39	Take out silt, loose muddy soil or other materials from existing running storewater channels drains exceeding 150 mm deep, sump pits or cesspits and remove, deposit, spread and level in positions as directed by the University or remove off site but including clearing grass on one or both sides of drains.	m	2.80
EX.40	Sand in bed, filling, etc. irrespective of thickness, deposited, spread, levelled and rammed with mechanical rammer, or rolled with hand roller.	cu m	107.20
EX.41	60 mm granite aggregate in beds, fillings, etc. irrespective of thickness, deposited, spread, levelled and rammed with mechanical rammer, or rolled with hand roller.	cu m	127.75
EX.42	40 mm granite aggregate in beds, fillings, etc. irrespective of thickness, deposited, spread, levelled and rammed with mechanical rammer, or rolled with hand roller.	cu m	107.10
EX.43	20 mm granite aggregate in beds, fillings, etc. irrespective of thickness, deposited, spread, levelled and rammed with mechanical rammer, or rolled with hand roller.	cu m	101.10
EX.44	12 mm granite aggregate in beds, fillings, etc. irrespective of thickness, deposited, spread, levelled and rammed with mechanical rammer, or rolled with hand roller.	cu m	94.75
EX.45	3 mm to 6 mm granite chipping in beds, filling, etc. irrespective of thickness, deposited, spread, levelled and rammed with mechanical rammer, or rolled with hand roller.	cu m	81.85
EX.46	Quarry waste in beds, filling, etc. irrespective of thickness, deposited, spread, levelled and rammed with mechanical rammer, or rolled with hand roller.	cu m	62.90
EX.47	Hardcore as specified in beds, making up levels, etc. and deposited, spread, levelled mechanically consolidated in (in layers of 300 mm thick if exceeding 300 mm thick) and top blinded with sand/granite dust.	cu m	80.40
EX.48	Breaking up for brick paving, tarmacadam including granite base course or other existing obstructions on the surface of the ground not exceeding 300 mm thick and removing debris off site.	sq m	20.50
EX.49	Breaking up for brick paving, tarmacadam including granite base course or other existing obstructions on the surface of the ground but exceeding 300 mm thick and removing debris off site.	cu m	77.40

S/No	Description	Unit	Unit Cost (\$)
EX.50	Break up concrete bases(including excavation around base) not exceeding 0.10 cu m to posts, gate stops, etc. break up concrete, remove debris off site and fill with earth to be obtained from Contractor's own sources and make good.	no	11.60
EX.51	Break up concrete bases(including excavation around base) exceeding 0.10cu m but not exceeding 0.30cu m to posts, gate stops, etc. break up concrete, remove debris off site and fill with earth to be obtained from Contractor's own sources and make good.	no	33.10
EX.52	Cutting of tarmacadam surface, brick pavement etc. using powered diamond cutter to achieve straight edge not exceeding 150 mm depth.	m	12.50
EX.53	Provide and assemble piling equipment on site to drive bakau pile including moving it around site, subsequent dismantling and removal on completion.	no	800.00
EX.54	Provide and assemble piling equipment on site to drive treated timber pile including moving it around site, subsequent dismantling and removal on completion.	no	1200.00
EX.55	Provide and assemble piling equipment on site to drive micro pile including moving it around site, subsequent dismantling and removal on completion.	no	3000.00
EX.56	Supply and drive 80 mm diameter bakau pile. Not exceeding 2.20m long including cutting of pile.	no	4.25
EX.57	Supply and drive 80 mm diameter bakau pile. Exceeding 2.20m but not exceeding 4.40m long including cutting of pile.	no	6.80
EX.58	Supply and drive 80 mm diameter bakau pile. Exceeding 4.40m but not exceeding 6.60m long including cutting of pile.	no	11.00
EX.59	Supply and drive 80 mm diameter bakau pile. Exceeding 4.40m but not exceeding 6.60m long including cutting of pile and mild steel pipe sleeves.	no	13.90
EX.60	Supply and drive 80 mm diameter bakau pile. Exceeding 6.60m but not exceeding 8.80m long including cutting of pile and mild steel pipe sleeves.	no	17.90
EX.61	Supply and drive 80 mm diameter bakau pile. Supply and lay 80mm diameter bakau roller.	m	1.40
EX.62	Supply and drive 100 mm x 100 mm pressure treated timber piles with an approved piling frame and monkey (transporting of piling frame to and from site measured separately)including maneuvering piling frame within site, testing, pitching, heading, pointing and splicing and driving down to an approved set and finally cutting off top of pile to the required level where necessary excavation and disposal of material displaced consequent upon the driving of the pile (Penetration length measured).	m	17.25
EX.63	Supply and drive 125mm x 125mm pressure treated timber piles with an approved piling frame and monkey(transporting of piling frame to and from site measured separately)including maneuvering piling frame within site, testing, pitching, heading, pointing and splicing and driving down to an approved set and finally cutting off top of pile to the required level where necessary excavation and disposal of material displaced consequent upon the driving of the pile (Penetration length measured).	m	19.55
EX.64	Supply and drive 150mm x 150mm pressure treated timber piles with an approved piling frame and monkey(transporting of piling frame to and from site measured separately)including maneuvering piling frame within site, testing, pitching, heading, pointing and splicing and driving down to an approved set and finally cutting off top of pile to the required level where necessary excavation and disposal of material displaced consequent upon the driving of the pile (Penetration length measured).	m	23.00

S/No	Description	Unit	Unit Cost (\$)
EX.65	Supply and drive 175mm x 175mm pressure treated timber piles with an approved piling frame and monkey(transporting of piling frame to and from site measured separately)including maneuvering piling frame within site, testing, pitching, heading, pointing and splicing and driving down to an approved set and finally cutting off top of pile to the required level where necessary excavation and disposal of material displaced consequent upon the driving of the pile (Penetration length measured).	m	29.90
EX.66	Supply and fix 5 mm thick mild steel welded box joint size 100 x 100 x 450 mm including all handling, cutting and spiking to pile.	no	16.10
EX.67	Supply and fix 5 mm thick mild steel welded box joint size 125 x 125 x 450 mm including all handling, cutting and spiking to pile.	no	18.40
EX.68	Supply and fix 5 mm thick mild steel welded box joint size 150 x 150 x 450 mm including all handling, cutting and spiking to pile.	no	20.70
EX.69	Supply and fix 5 mm thick mild steel welded box joint size 175 x 175 x 450 mm including all handling, cutting and spiking to pile.	no	24.20
EX.70	Strip turf average 50 mm deep, lay aside and preserve for re-use (preserving not exceeding 7 days).	sq m	2.50
EX.71	Take turf from stake and relay to level or slightly sloping ground (less than 45 degree) including 50 mm thick topsoil and sludge, top dressing, weeding out unwanted grass and weeds, cutting, watering and tending, and replacing when necessary until grass is established.	sq m	6.30
EX.72	Strip turf and remove off site (not extra over item).	sq m	1.60
EX.73	Cow-grass (Axonopus Compressors) obtained from Contractor's own sources laid or slightly sloping surfaces (less than 45 degrees) at 450 mm centres including 25 mm thick topsoil and sludge(1:1), top dressing, weeding out unwanted grass and weeds cutting, watering and tending and replacing when necessary until the grass is established(spot turfing).	sq m	4.00
EX.74	Cow-grass (Axonopus Compressors) obtained from Contractor's own sources laid or slightly sloping surfaces (less than 45 degrees) at 450 mm centres including 25 mm thick topsoil and sludge(1:1), top dressing, weeding out unwanted grass and weeds cutting, watering and tending and replacing when necessary until the grass is laid edge to edge (close turfing).	sq m	4.60
EX.75	25 mm thick (finished thickness) selected black soil obtained from Contractor's own sources, deposited, spread, levelled and rolled with a hand roller and including trimming and levelling formation.	sq m	1.30
EX.76	Add for each additional 25 mm thick (finished thickness) of selected black soil obtained from Contractor's own sources, deposited, spread, levelled and rolled with a hand roller and including trimming and levelling formation.	sq m	1.00
EX.77	25 mm thick topsoil and sludge mixture (3:1) obtained from Contractor's own sources, deposited, spread levelled and rolled with a hand roller.	sq m	0.90
EX.78	Add for each additional 25 mm thick of topsoil and sludge mixture (3:1) obtained from Contractor's own sources, deposited, spread levelled and rolled with a hand roller.	sq m	0.70
EX.79	Plough down not exceeding 300 mm deep with an approved disc plough, break up soil lumps as specified with approved tiller and mix sub-soil with sludge (proportion 6:1) as specified including trimming and leveling.	sq m	1.40
EX.80	Approved used sawn timber irrespective of sizes, for needling, strutting or shoring, including all hoop-iron (to be left in excavation).	sq m	56.60
EX.81	Approved used sawn timber for protective timber hoarding including erecting and dismantling after use-BCD drawing Type A(75) (where specially ordered, not related to the work and for protective timber hoarding required to be left in) - Appendix 1.	m	250.10

S/No	Description	Unit	Unit Cost (\$)
EX.82	Approved used sawn timber for protective timber hoarding including erecting and dismantling after use-BCD drawing Type B(75) (where specially ordered, not related to the work and for protective timber hoarding required to be left in) - Appendix 2.	m	153.10
EX.83	Approved used sawn timber for protective timber hoarding including erecting and dismantling after use-BCD drawing Type C(75) (where specially ordered, not related to the work and for protective timber hoarding required to be left in) - Appendix 3.	m	272.20

2. CONCRETE

S/No	Description	Unit	Unit Cost (\$)
Con.1	Concrete grade 15 as specified in bed, under foundations, column base,	cu m	247.50
Con.2	ground beams, in fillings, etc. irrespective of thickness. Concrete grade 20 as specified in foundations, beds, steps, slabs, aprons, footpath, etc. irrespective of sizes or thickness, including working around	cu m	258.75
Con.3	rod or fabric reinforcement, steel beams, stanchions, etc. Concrete grade 25 as specified in foundations, beds, suspended slabs, beams, columns, staircases, lintels, walls, suspended canopy, stiffeners etc. irrespective of sizes or thickness, including working around rod or fabric reinforcement, steel beams, stanchions, etc.	cu m	270.00
Con.4	Concrete grade 25 as specified in foundations each not exceeding 0.07cu m including all necessary formwork, excavation, removing surplus excavated material off site and backfilling.	no	22.50
Con.5	Concrete grade 25 as specified in foundations each exceeding 0.07cu m and not exceeding 0.15cu m including all necessary formwork, excavation, removing surplus excavated material off site and backfilling.	no	49.50
Con.6	Concrete grade 30 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, ramp, engine beds, etc. irrespective of sizes or thickness, including working around rod or fabric reinforcement, steel beams, stanchions etc.	cu m	292.50
Con.7	Concrete grade 35 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, etc. irrespective of sizes or thickness, including working around rod or fabric reinforcement, steel beams, stanchions etc.	cu m	303.75
Con.8	Concrete grade 40 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, etc. irrespective of sizes or thickness, including working around rod or fabric reinforcement, steel beams, stanchions etc.	cu m	326.25
Con.9	Extra over labour for trowelling top surface of concrete to a smooth finish and finished to falls and currents or cambers including additional cement required.	sq m	3.75
Con.10	Extra over labour for trowelling top surface of concrete to a rough finish and finished to falls and currents or cambers including additional cement required.	sq m	3.00
Con.11	Ready-mix concrete, grade 10 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, etc. irrespective of sizes or thickness including working around rod or fabric reinforcement, steel beams, stanchions etc.	cu m	202.50
Con.12	Ready-mix concrete, grade 20 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, etc. irrespective of sizes or thickness including working around rod or fabric reinforcement, steel	cu m	225.00

S/No	Description	Unit	Unit Cost (\$)
	beams, stanchions etc.		
Con.13	Ready-mix concrete, grade 25 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, etc. irrespective of sizes or thickness including working around rod or fabric reinforcement, steel beams, stanchions etc.	cu m	236.25
Con.14	Ready-mix concrete, grade 30 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, etc. irrespective of sizes or thickness including working around rod or fabric reinforcement, steel beams, stanchions etc.	cu m	247.50
Con.15	Ready-mix concrete, grade 35 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, etc. irrespective of sizes or thickness including working around rod or fabric reinforcement, steel beams, stanchions etc.	cu m	258.75
Con.16	Ready-mix concrete, grade 40 as specified in foundations, beds, slabs, beams, columns, staircases, retaining walls, etc. irrespective of sizes or thickness including working around rod or fabric reinforcement, steel beams, stanchions etc.	cu m	270.00
Con.17	Waterproofed concrete complying with BS 8110 with approved waterproofing compound G30.	cu m	262.50
Con.18	Waterproofed concrete complying with BS 8110 with approved waterproofing compound G35.	cu m	273.75
Con.19	Concrete (grade 20) in new surface water drain shall be 150 mm wide internally and not exceeding 150 mm deep to invert with 100 mm thick sides and semi-circular bottom, reinforced with approved fabric reinforcement, bottom, sides and top rendered with 15 mm thick cement and sand (1:3) including excavation, hardcore, removing surplus excavated material off site, formwork, laying to falls, bends, stopped ends, etc (note: for depth exceeding 300 mm deep the sides shall be 150 mm thick).	m	38.10
Con.20 Con.21	Add for each additional stage of 25 mm depth to invert. Concrete (grade 20) in new surface water drain shall be 225 mm wide internally and not exceeding 225 mm deep to invert with 100 mm thick sides and semi-circular bottom, reinforced with approved fabric reinforcement, bottom, sides and top rendered with 15 mm thick cement and sand (1:3) including excavation, hardcore, removing surplus excavated material off site, formwork, laying to falls, bends, stopped ends, etc (note: for depth exceeding 300 mm deep the sides shall be 150 mm thick).	m m	2.60 51.00
Con.22 Con.23	Add for each additional stage of 25 mm depth to invert. Concrete (grade 20) in new surface water drain shall be 300 mm wide internally and not exceeding 225 mm deep to invert with 100 mm thick sides and semi-circular bottom, reinforced with approved fabric reinforcement, bottom, sides and top rendered with 15 mm thick cement and sand (1:3) including excavation, hardcore, removing surplus excavated material off site, formwork, laying to falls, bends, stopped ends, etc (note: for depth exceeding 300 mm deep the sides shall be 150 mm thick).	m m	3.25 57.00
Con.24	Add for each additional stage of 25 mm depth to invert.	m	3.90

S/No	Description	Unit	Unit Cost (\$)
Con.25	Concrete (grade 20) in surface water drain shall be 150 mm wide internally and not exceeding 150 mm deep to invert with 100 mm thick sides and semi-circular bottom, reinforced with approved fabric reinforcement, bottom, sides and top rendered with 15 mm thick cement and sand (1:3) including excavation, hardcore, removing surplus excavated material off site, formwork, laying to falls, bends, stopped ends, etc (note: for depth exceeding 300 mm deep the sides shall be 150 mm thick). But in replacement including hacking up existing and temporarily diverting drains as necessary and making good (note: for depth exceeding 300 mm deep the sides should be 150 mm thick).	m	43.10
Con.26 Con.27	Add for each additional stage of 25 mm depth to invert. Concrete (grade 20) in surface water drain shall be 225 mm wide internally and not exceeding 225 mm deep to invert with 100 mm thick sides and semi-circular bottom, reinforced with approved fabric reinforcement, bottom, sides and top rendered with 15 mm thick cement and sand (1:3) including excavation, hardcore, removing surplus excavated material off site, formwork, laying to falls, bends, stopped ends, etc (note: for depth exceeding 300 mm deep the sides shall be 150 mm thick). But in replacement including hacking up existing and temporarily diverting drains as necessary and making good (note: for depth exceeding 300 mm deep the sides should be 150 mm thick).	m m	2.60 56.00
Con.28	Precast concrete (grade 20) in new or existing work with all exposed faces finished fair, bedded, jointed and pointed in cement mortar (1:3) or with edges bedded and pointed in putty or mastic including making good, removing debris, all necessary moulds, transporting, handling and fixing in 50 mm thick slab for footpath, paving or apron slabs in suitable sizes.	m	3.25
Con.29	Concrete (grade 20) in surface water drain shall be 300 mm wide internally and not exceeding 225 mm deep to invert with 100 mm thick sides and semi-circular bottom, reinforced with approved fabric reinforcement, bottom, sides and top rendered with 15 mm thick cement and sand (1:3) including excavation, hardcore, removing surplus excavated material off site, formwork, laying to falls, bends, stopped ends, etc (note: for depth exceeding 300 mm deep the sides shall be 150 mm thick). But in replacement including hacking up existing and temporarily diverting drains as necessary and making good (note: for depth exceeding 300 mm deep the sides should be 150 mm thick).	m	62.00
Con.30	Add for each additional stage of 25 mm depth to invert.	m	3.50
Con.31	Extra over surface water drain (any width) for forming cascade not exceeding 150 mm drop.	no	5.25
Con.32	Extra over surface water drain (any width) for forming cascade exceeding 150 mm but not exceeding 300 mm drop.	no	6.90
Con.33	Hack up existing surface water drain and remove debris off site.	m	6.45
Con.34	Cut out cracks in surface water channels or drains (any type & size) including removing silt and cutting grass on banks.	m	6.00
Con.35	Form 100 mm wide scupper drain in existing concrete floor, made to correct line and falls and form rebate to receive grating if any, render invert and sides with 15 mm cement and sand (1:3) and including hacking existing concrete of similar grade to floor below scupper drain, making good surrounds, form-work and clearing debris off site.	m	42.00

S/No	Description	Unit	Unit Cost (\$)
Con.36	Form 125 mm wide scupper drain in existing concrete floor, made to correct line and falls and form rebate to receive grating if any, render invert and sides with 15 mm cement and sand (1:3) and including hacking existing concrete of similar grade to floor below scupper drain, making good surrounds, form-work and clearing debris off site.	m	43.50
Con.37	Form 150 mm wide scupper drain in existing concrete floor, made to correct line and falls and form rebate to receive grating if any, render invert and sides with 15 mm cement and sand (1:3) and including hacking existing concrete of similar grade to floor below scupper drain, making good surrounds, form-work and clearing debris off site.	m	45.00
Con.38	Form 250 mm wide scupper drain in existing concrete floor, made to correct line and falls and form rebate to receive grating if any, render invert and sides with 15 mm cement and sand (1:3) and including hacking existing concrete of similar grade to floor below scupper drain, making good surrounds, form-work and clearing debris off site.	m	51.00
Con.39	Concrete (Grade 25) in curbs etc. irrespective of size in new or existing work including hacking, formwork, angles, ends, intersections, jointing to existing and removing debris per 1,000 sq. mm sectional area. Rate is for every 1,000 sq. mm in sectional area eg.75 mm x 100 mm curb = 7,500 sq. mm in sectional area. Therefore rate is \$11.25 per lin. metre i.e.(7500 x 1.50)/1000.	m	3.25
Con.40	Concrete (Grade 25) in curbs rendered on both sides and top with 15 mm cement and sand rendering, (irrespective of size) in new or existing work including hacking, formwork, angles, ends, intersections, jointing to existing and removing debris per 1,000 sq mm in sectional area. Rate is for every 1,000 sq. mm in sectional area eg. 75 mm x 100 mm curb = 7,500 sq. mm in sectional area. Therefore rate is \$15.00 per lin. metre ie. (7500 x 2.00)/1000.	m	5.20
Con.41	Precast concrete (grade 20) in new or existing work with all exposed faces finished fair, bedded, jointed and pointed in cement mortar (1:3) or with edges bedded and pointed in putty or mastic including making good, removing debris, all necessary moulds, transporting, handling and fixing in posts, bollards, blocks, lintels, copings, cills, steps, strings, railings etc. irrespective of size including all temporary support and hoisting up to 3 m above ground level.	cu m	990.00
Con.42 Con.43	Extra over above for each additional 1.50 m of hoisting. Precast concrete (grade 20) in new or existing work with all exposed faces finished fair, bedded, jointed and pointed in cement mortar (1:3) or with edges bedded and pointed in putty or mastic including making good, removing debris, all necessary moulds, transporting, handling and fixing in 60 mm thick louvered vents including spacer block.	cu m sq m	30.00 288.00
Con.44	Precast concrete (grade 20) in new or existing work with all exposed faces finished fair, bedded, jointed and pointed in cement mortar (1:3) or with edges bedded and pointed in putty or mastic including making good, removing debris, all necessary moulds, transporting, handling and fixing in 50mm thick slabs over drains, sumps, septic tanks, etc complete with recesses, rebates, grooves, holes, hand-holds, mild steel flush lifting rings, etc. and reinforced with and including approved fabric reinforcement and top surface rendered smooth to falls.	sq m	38.34
Con.45 Con.46	Add for each additional stage of 15 mm in thickness. Deduct for each additional stage of 15 mm in thickness.	sq m sq m	7.50 7.50
C011.70	Deduction each additional stage of 15 mill in thickness.	34 111	1 7.50

S/No	Description	Unit	Unit Cost (\$)
Con.47	Precast concrete (grade 20) in new or existing work with all exposed faces finished fair, bedded, jointed and pointed in cement mortar (1:3) or with edges bedded and pointed in putty or mastic including making good, removing debris, all necessary moulds, transporting, handling and fixing in 50 mm thick slab for footpath, paving or apron slabs in suitable sizes.	sq m	63.00
Con.48	Add for each additional stage of 15 mm in thickness.	sq m	5.25
Con.49	Deduct for each additional stage of 15 mm in thickness.	sq m	5.25
Con.50	Supply and lay approved 120 mm thick precast concrete slabs, of any pattern laid to any pattern and fill all voids with top soil and turf including excavation and trimming to formation and removing surplus excavated materials off site (sand bed measured separately).	sq m	108.00
Con.51	Supply and lay approved 115 mm thick precast concrete slabs, of any pattern laid to any pattern and fill all voids with top soil and turf including excavation and trimming to formation and removing surplus excavated materials off site (sand bed measured separately).	sq m	99.00
Con.52	Supply and lay approved 100 mm thick precast concrete slabs, of any pattern laid to any pattern and fill all voids with top soil and turf including excavation and trimming to formation and removing surplus excavated materials off site (sand bed measured separately).	sq m	86.40
Con.53	Supply and lay approved 75 mm thick precast concrete slabs, of any pattern laid to any pattern and fill all voids with top soil and turf including excavation and trimming to formation and removing surplus excavated materials off site (sand bed measured separately).	sq m	75.60
Con.54	Supply and lay approved 65 mm thick precast concrete slabs, of any pattern laid to any pattern and fill all voids with top soil and turf including excavation and trimming to formation and removing surplus excavated materials off site (sand bed measured separately).	sq m	64.80
Con.55	Select from stack and lay aeration precast concrete slab including filling all voids with top soil and turf, excavating to formation, trimming and removing surplus excavated material off site.	sq m	4.10
Con.56	Take out existing precast slab and remove off site.	sq m	2.90
Con.57	Take out existing precast slab, stack up for re-use and remove damaged pieces off site.	sq m	3.45
Con.58	Select from stack and lay only precast slab including jointing in cement mortar(1:3) (new slabs measured separately).	sq m	5.00
Con.59	Hack out damaged pointing and repoint in cement mortar to existing precast slabs and pavements not exceeding 63 mm thick irrespective of widths of gaps between slabs and pavements.	m	3.75
Con.60	Type C1, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	14.40
Con.61	Type C2, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	27.00

S/No	Description	Unit	Unit Cost (\$)
Con.62	Type C3, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	34.20
Con.63	Type C6, Composite precast concrete (Grade 20) channel drain as per drawing shown inAppendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	48.60
Con.64	Type C7, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	63.00
Con.65	Type C7A, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	59.40
Con.66	Type C8A, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	136.80
Con.67	Type C8B, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	144.00
Con.68	Type C4, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 5 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	28.80
Con.69	Type C5, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 5 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	34.20
Con.70	Type C7B, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	52.20
Con.71	Type B1, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	55.80

S/No	Description	Unit	Unit Cost (\$)
Con.72	Type B2, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	63.00
Con.73	Type B3, Composite precast concrete (Grade 20) channel drain as per drawing shown in Appendix 4 laid to falls as directed on and including 75 mm thick sand bed, with joints grouted in cement mortar (1:3) not more than 20 mm thick including all necessary excavation, trimming, disposal of surplus excavated materials, backfilling, etc.	m	153.00
Con.74	Type S1 scupper drain and pipe laid to even falls and jointed in cement and sand (1:3) mortar.	m	41.60
Con.75	Scupper drain and 230 mm diameter concrete pipe laid to even falls and jointed in cement and sand (1:3) mortar.	m	43.20
Con.76	Scupper drain and 300 mm diameter concrete pipe laid to even falls and jointed in cement and sand (1:3) mortar.	m	54.00
Con.77	Scupper drain and 250 mm diameter class AW" heavy duty PVC pipe laid to even falls and "jointed in cement and sand (1:3) mortar.	m	86.40
Con.78	Take out precast concrete surface water channel (any width and type), trim earth to fall, remove debris off site; join up with cement mortar and temporarily divert drains as necessary and make good (rate not inclusive of new sand bed & channels).	m	7.50
Con.79	Extra over precast concrete surface water channel (any width) for forming cascade not exceeding 150 mm drop.	no	6.75
Con.80	Extra over precast concrete surface water channel (any width) for forming cascade exceeding 150 mm but not exceeding 300 mm drop.	no	13.50
Con.81	Precast concrete(grade 20) of 125 mm x 300 mm size Type K7/K7A in roadside kerbs and dividers as shown in the appendix 6 & 7 herein including all necessary excavation, removal of surplus excavated material, backfilling, laying, bedding, jointing and pointing in cement mortar (1:3) (concrete base measured separately).	m	24.66
Con.82	Precast concrete(grade 20) of 150 mm x 300 mm size Type D2 in roadside kerbs and dividers as shown in the appendix 6 & 7 herein including all necessary excavation, removal of surplus excavated material, backfilling, laying, bedding, jointing and pointing in cement mortar (1:3) (concrete base measured separately).	m	24.12
Con.83	Precast concrete(grade 20) of 200 mm x 380 mm size Type D4 in roadside kerbs and dividers as shown in the appendix 6 & 7 herein including all necessary excavation, removal of surplus excavated material, backfilling, laying, bedding, jointing and pointing in cement mortar (1:3) (concrete base measured separately).	m	43.02
Con.84	Extra over for 125 mm x 300 mm x 900 mm long kerb with scupper mouth.	no	2.40
Con.85	Take out and stack on site for reuse precast concrete kerbs (any size) and remove debris off site.	m	4.95
Con.86	Select from stack, lay and join divider/kerb in cement and sand (1:3) mortar.	m	6.75
Con.87	Take out existing precast concrete kerbs & remove off site.	m	3.75
Con.88	Precast concrete (Grade 20) lintel finished fair on all exposed surfaces, Size 115 x 150 mm high and reinforced with one 10 mm diameter mild steel bar.	m	19.62
Con.89	Precast concrete (Grade 20) lintel finished fair on all exposed surfaces, Size 115 x 225 mm high and reinforced with one 13 mm diameter mild steel bar.	m	25.20
Con.90	Precast concrete (Grade 20) lintel finished fair on all exposed surfaces, Size 225 x 150 mm high and reinforced with two 10 mm diameter mild steel bar.	m	30.60

S/No	Description	Unit	Unit Cost (\$)
Con.91	Precast concrete (Grade 20) lintel finished fair on all exposed surfaces, Size 225 x 225 mm high and reinforced with two 13 mm diameter mild steel bar.	m	37.62
Con.92	Timber formwork to plane surface in-situ concrete including strutting not exceeding 3.50m high.	sq m	40.50
Con.93	Timber formwork to curved surface in-situ concrete including strutting not exceeding 3.50m high.	sq m	45.00
Con.94	Timber formwork to plane surface to produce true and even concrete face in-situ concrete including strutting not exceeding 3.50m high.	sq m	42.00
Con.95	Timber formwork to curved surface to produce true and even concrete face in-situ concrete including strutting not exceeding 3.50m high.	sq m	49.50
Con.96	Extra over formwork for strutting exceeding 3.50 m high for each 1.50 m high.	sq m	4.50
Con.97	6 mm to 16 mm diameter mild steel rods in foundations, beams, slabs, stairs, canopies, etc including all labour forming stirup, links, spacer blocks etc to comply with SS18.	kg	2.25
Con.98	Over 16 mm diameter mild steel rods in foundations, beams, slabs, stairs, canopies, etc including all labour forming stirup, links, spacer blocks etc to comply with SS18.	kg	2.10
Con.99	9 mm to 16 mm diameter deformed high tensile steel rod in foundations, beams, slabs, stairs, canopies, etc including all labour forming stirups, links, spacer blocks etc to comply with SS2.	kg	2.25
Con.100	20 mm to 25 mm diameter deformed high tensile steel rod in foundations, beams, slabs, stairs, canopies, etc including all labour forming stirups, links, spacer blocks etc to comply with SS2.	kg	2.10
Con.101	Over 28 mm diameter deformed high tensile steel rod in foundations, beams, slabs, stairs, canopies, etc including all labour forming stirups, links, spacer blocks etc to comply with SS2.	kg	2.25
Con.102	200 x 200 mm x 1.54 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type A5).	sq m	4.20
Con.103	200 x 200 mm x 2.22 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type A6).	sq m	7.20
Con.104	200 x 200 mm x 3.02 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type A7).	sq m	7.50
Con.105	200 x 200 mm x 3.95 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type A8).	sq m	9.00
Con.106	200 x 200 mm x 4.99 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type A9).	sq m	12.00
Con.107	200 x 200 mm x 6.16 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type A10).	sq m	13.50
Con.108	100 x 400 mm x 2.61 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type C6).	sq m	7.50
Con.109	100 x 400 mm x 3.41 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type C7).	sq m	9.15
Con.110	100 x 400 mm x 4.34 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type C8).	sq m	10.50
Con.111	100 x 400 mm x 5.55 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type C9).	sq m	12.75
Con.112	100 x 400 mm x 6.72 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type C10).	sq m	15.00
Con.113	well lapped and tied at joints (Type C10). 100 x 400 mm x 8.44 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type C11).	sq m	18.00

S/No	Description	Unit	Unit Cost (\$)
Con.114	100 x 400 mm x 9.87 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type C12).	sq m	21.00
Con.115	100 x 200 mm x 3.05 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type B5).	sq m	8.25
Con.116	100 x 200 mm x 3.73 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type B6).	sq m	9.00
Con.117	100 x 200 mm x 4.53 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type B7).	sq m	10.20
Con.118	100 x 200 mm x 5.93 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type B8).	sq m	13.05
Con.119	100 x 200 mm x 6.97 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type B9).	sq m	15.00
Con.120	100 x 200 mm x 8.14 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type B10).	sq m	18.00
Con.121	100 x 200 mm x 9.43 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type B11).	sq m	20.40
Con.122	100 x 200 mm x 10.90 kg/sq m approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type B12).	sq m	24.30
Con.123	$100 \times 100 \text{ mm} \times 4.44 \text{ kg/sq m}$ approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type D6).	sq m	10.50
Con.124	$100 \times 100 \text{ mm} \times 6.04 \text{ kg/sq m approved fabric reinforcement to SS } 32:1986 \text{ well lapped and tied at joints (Type D7).}$	sq m	13.50
Con.125	$100 \times 100 \text{ mm} \times 7.90 \text{ kg/sq m approved fabric reinforcement to SS } 32:1986 \text{ well lapped and tied at joints (Type D8).}$	sq m	16.95
Con.126	$100 \times 100 \text{ mm} \times 9.98 \text{ kg/sq m approved fabric reinforcement to SS } 32:1986 \text{ well lapped and tied at joints (Type D9).}$	sq m	21.45
Con.127	$100 \times 100 \text{ mm} \times 12.32 \text{ kg/sq m}$ approved fabric reinforcement to SS 32:1986 well lapped and tied at joints (Type D10).	sq m	26.40
Con.128	$100 \times 100 \text{ mm} \times 14.91 \text{ kg/sq m approved fabric reinforcement to SS}$ 32:1986 well lapped and tied at joints (Type D11).	sq m	31.50
Con.129	Mass or lightly reinforced (i.e. one layer of mesh reinforcement) concrete work such as slabs, aprons, steps, cooking bases, curbs etc. removing debris off site and making good works disturbed to match with existing OR breaking up the concrete into smaller pieces to form hardcore bed, cutting and removing reinforcement where necessary, providing sand, granite dust top blinding, leveling and mechanically consolidating, removing debris off site and making good works disturbed.	cu m	165.00
Con.130	Break up reinforced concrete columns, suspended beams, slabs and canopies, etc. including cutting reinforcement and removing debris off site and making good works disturbed to match with existing.	cu m	195.00
Con.131	Cutting of concrete pavement using powered diamond cutter to achieve a straight edge up to 150 mm deep.	m	9.00
Con.132	Cut through reinforced concrete floors or walls (any thickness) to form opening not exceeding 0.02cu m including making good, cutting reinforcement and removing debris off site.	no	12.00
Con.133	Cut through reinforced concrete floors or walls (any thickness) to form opening exceeding 0.02cu m and not exceeding 0.05cu m including making good, cutting reinforcement and removing debris off site.	no	24.00
Con.134	Cut through reinforced concrete floors or walls (any thickness) to form opening exceeding 0.05cu m and not exceeding 0.10cu m including making good, cutting reinforcement and removing debris off site.	no	45.00

S/No	Description	Unit	Unit Cost (\$)
Con.135	Cut through reinforced concrete floors or walls (any thickness) to form opening exceeding 0.10cu m and not exceeding 0.20cu m including making good, cutting reinforcement and removing debris off site.	no	67.50
Con.136	Cut through reinforced concrete floors or walls (any thickness) to form opening exceeding 0.20cu m including making good, cutting reinforcement and removing debris off site.	no	240.00
Con.137	Hot bitumen or mastic filling in 15 mm wide x 25 mm deep groove to form expansion joint and filling with weak cement mortar where necessary.	m	3.00
Con.138	Add for 15 mm in depth to form expansion joint.	m	0.60
Con.139	Deduct for 15 mm in depth to form expansion joint.	m	0.60
Con.140	Supply & apply polyurethane sealants 25 mm wide x 15 mm deep to joints including an expansion joint backing material.	m	20.55
Con.141	Supply & apply polyurethane sealants 25 mm wide x 25 mm deep to joints including an expansion joint backing material.	m	33.60
Con.142	Supply & apply polyurethane sealants 50 mm wide x 25 mm deep to joints including an expansion joint backing material.	m	64.35
Con.143	Supply & apply polyurethane sealants 100 mm wide x 15 mm deep to joints including an expansion joint backing material.	m	78.75
Con.144	Supply and fix bitumen impregnated fibre board expansion joint filler to 10 mm thick x 75 mm high joints.	m	2.25
Con.145	Supply and fix bitumen impregnated fibre board expansion joint filler to 13 mm thick x 75 mm high joints.	m	2.40
Con.146	Supply and fix bitumen impregnated fibre board expansion joint filler to 20 mm thick x 75 mm high joints.	m	4.05
Con.147	Supply and fix bitumen impregnated fibre board expansion joint filler to 25 mm thick x 75 mm high joints.	m	4.50
Con.148	Add for every stage of 25mm in width for 10 mm thick	m	0.75
Con.149	Deduct for every stage of 25mm in width for 10 mm thick	m	0.75
Con.150	Add for every stage of 25mm in width for 13 mm thick	m	0.80
Con.151	Deduct for every stage of 25mm in width for 13 mm thick	m	0.80
Con.152	Add for every stage of 25mm in width for 20 mm thick	m	1.35
Con.153	Deduct for every stage of 25mm in width for 20 mm thick	m	1.35
Con.154	Add for every stage of 25mm in width for 25 mm thick	m	1.50
Con.155	Deduct for every stage of 25mm in width for 25 mm thick	m	1.50
Con.156	Supply and apply silicone sealants including 25 mm diameter polyurethane foam rod to 25 mm x 15 mm joints all to manufacturer's instructions.	m	16.50
Con.157	Supply and apply silicone sealants including 25 mm diameter polyurethane foam rod to 25 mm x 25 mm joints all to manufacturer's instructions.	m	27.00
Con.158	Supply and apply silicone sealants to 6 mm x 6 mm joints without foam rod all to manufacturer's instructions.	m	3.45
Con.159	Supply and apply silicone sealants to 8 mm x 8 mm joints without foam rod all to manufacturer's instructions.	m	6.90
Con.160	Supply and apply silicone sealants to 25 mm x 15 mm joints without foam rod all to manufacturer's instructions.	m	9.90
Con.161	Supply and apply silicone sealants to 25 mm x 25 mm joints without foam rod all to manufacturer's instructions.	m	15.00
Con.162	Remove existing filling in groove not exceeding 50 mm x 50 mm deep, clean & prepare to receive new work.	m	1.95
Con.163	10 mm diameter closed cell polyethylene foam in circular section cords as bond breaking strip fixed into joint.	m	2.25
Con.164	12 mm diameter closed cell polyethylene foam in circular section cords as bond breaking strip fixed into joint.	m	3.00

S/No	Description	Unit	Unit Cost (\$)
Con.165	15 mm diameter closed cell polyethylene foam in circular section cords as bond breaking strip fixed into joint.	m	3.75
Con.166	25 mm diameter closed cell polyethylene foam in circular section cords as bond breaking strip fixed into joint.	m	4.20
Con.167	6 mm diameter x 450 mm long mild steel bonding tie with one end cast into concrete and hooked around reinforcement and joints of brickwork including forming perforations in formwork.	no	0.45
Con.168	Precast concrete Grade 20 heelstone 150 mm high to suit section of door frame and including 13 mm diameter mild steel dowel 100 mm long.	no	10.40
Con.169	Precast concrete Grade 25 heelstone 150 mm high to suit section of door frame and including 13 mm diameter mild steel dowel 100 mm long.	no	10.80
Con.170	Supply labour, materials, tools & equipments to construct heelstone to existing metal door frame with cement and sand to follow the prifile of existing frame including taking down existing door panel, cutting of existing metal frame and apply anti-rust paint to the cut portion, painting to existing metal door frame with one primer coat and two finishing coats, and all necessary reinstatement works.	no	57.50
Con.171	Patch up opening for pipe/conduit not exceeding 100 mm diameter with water-proofed cement and sand mortar(1:3) in wall/floor not exceeding 225 mm thick including use of waterproof cement addictive and making good to match existing.	no	11.50
Con.172	Patch up opening for pipe/conduit not exceeding 100 mm diameter with water-proofed cement and sand mortar(1:3) in wall/floor exceeding 225 mm thick including use of waterproof cement addictive and making good to match existing.	no	15.80
Con.173	Patch up opening for pipe/conduit exceeding 100 mm diameter with water-proofed cement and sand mortar(1:3) in wall/floor not exceeding 225 mm thick including use of waterproof cement addictive and making good to match existing.	no	13.00
Con.174	Patch up opening for pipe/conduit exceeding 100 mm diameter with water-proofed cement and sand mortar(1:3) in wall/floor exceeding 225 mm thick including use of waterproof cement addictive and making good to match existing.	no	23.80
Con.175	One layer of heavy duty (Basis weight:527 g/sq m) approved building paper laid under concrete slab and lapped 150 mm at joints. (Measured net. No allowance made for laps.).	sq m	7.90
Con.176	One layer of heavy duty (Basis weight:280 g/sq m) approved building paper laid under concrete slab and lapped 150 mm at joints. (Measured net. No allowance made for laps.).	sq m	4.10
Con.177	Supply and fix 200 mm wide UPVC water stop embedded in concrete.	m	34.50
Con.178 Con.179	Supply and fix 230 mm wide UPVC water stop embedded in concrete. Supply and fix 150 mm width Combiflex Hypalon sealing strip, 1.5 mm thick, including preparation of surface and adhesive, or equivalent to construction joints.	m m	39.00 41.30
Con.180	Supply and fix 200 mm width Combiflex Hypalon sealing strip, 1.5 mm thick, including preparation of surface and adhesive, or equivalent to construction joints.	m	75.00
Con.181	Supply and fix 300 mm width Combiflex Hypalon sealing strip, 1.5 mm thick, including preparation of surface and adhesive, or equivalent to construction joints.	m	112.50
Con.182	Supply and fix 150 mm width Combiflex Hypalon sealing strip, 2.00 mm thick, including preparation of surface and adhesive or equivalent, to construction joints.	m	71.30

S/No	Description	Unit	Unit Cost (\$)
Con.183	Supply and fix 200 mm width Combiflex Hypalon sealing strip, 2.00 mm thick, including preparation of surface and adhesive or equivalent, to construction joints.	m	90.00
Con.184	Supply and fix 300 mm width Combiflex Hypalon sealing strip, 2.00 mm thick, including preparation of surface and adhesive or equivalent, to construction joints.	m	127.50
Con.185	Cut out crack to form V-shape groove (minimum 25 mm x 25 mm), clean and prepare surface and pressure grout the crack with approved grouting materials with sufficient adhesive, compressive and tensile strength including provision for mobilization, grout pipe, fine wiremesh, pressure grouting pump, tools, all accessories, scaffolding and hacking and making good plastered or tiled finishes if any. Apply two coats of water and weather resistant protective/decorative coating as carbonation barrier all in accordance to grouting specialist's recommendation. Non-shrink cementatious grouting, on concrete floor, columns, vertical side of beam and the like (minimum one (1) metre total length within the building and per call).	m	75.00
Con.186	Cut out crack to form V-shape groove (minimum 25 mm x 25 mm), clean and prepare surface and pressure grout the crack with approved grouting materials with sufficient adhesive, compressive and tensile strength including provision for mobilization, grout pipe, fine wiremesh, pressure grouting pump, tools, all accessories, scaffolding and hacking and making good plastered or tiled finishes if any. Apply two coats of water and weather resistant protective/decorative coating as carbonation barrier all in accordance to grouting specialist's recommendation. Non-shrink cementatious grouting, in soffit of concrete slab, canopy, beam and the like (minimum one (1) metre total length within the building and per call).	m	90.00
Con.187	Cut out crack to form V-shape groove (minimum 25 mm x 25 mm), clean and prepare surface and pressure grout the crack with approved grouting materials with sufficient adhesive, compressive and tensile strength including provision for mobilization, grout pipe, fine wiremesh, pressure grouting pump, tools, all accessories, scaffolding and hacking and making good plastered or tiled finishes if any. Apply two coats of water and weather resistant protective/decorative coating as carbonation barrier all in accordance to grouting specialist's recommendation. Non-shrink cementatious grouting, in brick structure (minimum one (1) metre total length within the building and per call).	m	60.00
Con.188	Flexin" resin grouting (minimum one (1) metre total length within the building and per call). "	m	195.00
Con.189	Epoxy resin grouting on concrete floor, column, vertical side beam and the like (minimum one (1) metre total length within the building and per call).	m	60.00
Con.190	Epoxy resin grouting in soffit of concrete slab, canopy, beam and the like (minimum one (1) metre total length within the building and per call).	m	75.00
Con.191	Epoxy resin grouting around floor trap, rainwater down pipe, water pipe for various sizes (rate is for maximum of two (2) groute points).	no	150.00
Con.192	Cut out crack to form v-shape groove (25 mm x 25 mm) and form undercut in soffit of concrete slab, canopy, beam and the like. Clean and prepare surface of groove by using compressed air or wire brush. Prime all surfaces with a bonding agent and patch up groove with approved non-shrink cementatious mortar including fine wire mesh if necessary and making good affected areas with materials to match existing (minimum two (2) metres total length within the building and per call).	m	9.80

S/No	Description	Unit	Unit Cost (\$)
Con.193	Cut out crack to form v-shape groove (25 mm x 25 mm) and form undercut in vertical surfaces of concrete wall, columns, beams and the like. Clean and prepare surface of groove by using compressed air or wire brush. Prime all surfaces with a bonding agent and patch up groove with approved non-shrink cementatious mortar including fine wire mesh if necessary and making good affected areas with materials to match existing (minimum two (2) metres total length within the building and per call).	m	6.80
Con.194	Cut out crack to form v-shape groove (25 mm x 25 mm) and form undercut in brick structure. Clean and prepare surface of groove by using compressed air or wire brush. Prime all surfaces with a bonding agent and patch up groove with approved non-shrink cementatious mortar including fine wire mesh if necessary and making good affected areas with materials to match existing (minimum two (2) metres total length within the building and per call).	m	5.30
Con.195	Thoroughly remove spalled or loose concrete in patches in soffit of concrete slab, canopy, beam and the like until good concrete is reached. Thoroughly brush and clean all surfaces of concrete by using compressed air or chemicals. Prime all concrete surfaces with a bonding agent and patch up with approved non-shrink cementatious grout with sufficient adhesive, compressive and tensile strength including provisions for mobilization, grout pipe, fine wire mesh, pressure grouting pump, tools, all accessories, scaffolding and hacking and making good plaster or tiled finishes if any. Apply two coats of water and weather resistant protective/decorative coating as carbonation barrier all in accordance to grouting specialist's recommendation. Thickness of spalled or loose concrete not exceeding 30 mm thick (minimum one (1)sq m within the building and per call).	sq m	270.00
Con.196	Thoroughly remove spalled or loose concrete in patches in vertical surfaces of columns, walls and the like until good concrete is reached. Thoroughly brush and clean all surfaces of concrete by using compressed air or chemicals. Prime all concrete surfaces with a bonding agent and patch up with approved non-shrink cementatious grout with sufficient adhesive, compressive and tensile strength including provisions for mobilization, grout pipe, fine wire mesh, pressure grouting pump, tools, all accessories, scaffolding and hacking and making good plaster or tiled finishes if any. Apply two coats of water and weather resistant protective/decorative coating as carbonation barrier all in accordance to grouting specialist's recommendation. spalled or loose concrete not exceeding 30 mm thick (minimum one (1)sq m within the building and per call).	sq m	345.00
Con.197	Hack off spalled or loose concrete in patches until rusty reinforcement and good concrete is reached. Thoroughly brush rusty reinforcement to remove rust and scale, clean all surfaces of concrete and reinforcement by using wire brush and compressed air or chemicals. Prime all exposed reinforcement with approved rust and corrosion inhibitive primer. Apply a layer of approved bonding agent to concrete and reinforcement. Construct formwork props if necessary and patch up with approved grouting materials with sufficient adhesive, compressive and tensile strength including provision for mobilization, grout pipe, fine wire mesh, pressure grouting pump,tools, all accessories, scaffolding and hacking and making good plaster or tiled finishes if any, all in accordance to grouting specialist's recommendation. Remove formwork including props if any (minimum half (1/2)sq m within the complex and per call) inclusive of repair of all cracks by means of Flexin or equivalent injections. Non-shrink cementatious grouting in soffit of concrete slab, canopy, beam and the like.	sq m	660.00

S/No	Description	Unit	Unit Cost (\$)
Con.198	Hack off spalled or loose concrete in patches until rusty reinforcement and good concrete is reached. Thoroughly brush rusty reinforcement to remove rust and scale, clean all surfaces of concrete and reinforcement by using wire brush and compressed air or chemicals. Prime allexposed reinforcement with approved rust and corrosion inhibitive primer. Apply a layer of approved bonding agent to concrete and reinforcement. Construct formwork props if necessaryand patch up with approved grouting materials with sufficient adhesive, compressive and tensilestrength including provision for mobilization, grout pipe, fine wire mesh, pressure grouting pump,tools, all accessories, scaffolding and hacking and making good plaster or tiled finishes if any,all in accordance to grouting specialist's recommendation. Remove formwork including props if any (minimum half (1/2)sq m within the complex and per call) inclusive of repair of all cracks bymeans of Flexin or equivalent injections. Non-shrink cementatious	sq m	450.00
Con.199	grouting on concrete slab and in vertical surfaces of column and the like. Hack off spalled or loose concrete in patches until rusty reinforcement & good concrete is reached. Thoroughly brush rusty reinforcement to remove rust and scale, clean all surfaces of concrete & reinforcement by using wire brush & compressed air or chemicals. Prime exposed reinforcement with approved rust & corrosion inhibitive primer. Apply a layer of approved bonding agent to concrete & reinforcement. Construct formwork props & patch up with approved grouting materials with sufficient adhesive, compressive & tensile strength including provision for mobilization, grout pipe, fine wire mesh, pressure grouting pump, tools, all accessories, scaffolding & hacking & making good plaster or tiled finishes, accordance to grouting specialist's recommendation. Remove formwork including props (minimum half (1/2)sq m within complex & per call) inclusive of repair of all cracks by means of Flexin or equivalent injections. Epoxy resin grouting in soffit of concrete slabs, canopy, beam & the like.	sq m	1200.00
Con.200	Hack off spalled or loose concrete in patches until rusty reinforcement and good concrete is reached. Thoroughly brush rusty reinforcement to remove rust and scale, clean all surfaces of concrete and reinforcement by using wire brush and compressed air or chemicals. Prime all exposed reinforcement with approved rust and corrosion inhibitive primer. Apply a layer of approved bonding agent to concrete and reinforcement. Construct formwork props if necessary and patch up with approved grouting materials with sufficient adhesive, compressive and tensile strength including provision for mobilization, grout pipe, fine wire mesh, pressure grouting pump, tools, all accessories, scaffolding and hacking and making good plaster or tiled finishes if any, all in accordance to grouting specialist's recommendation. Remove formwork including props if any (minimum half (1/2)sq m within the complex and per call) inclusive of repair of all cracks by means of Flexin or equivalent injections. Epoxy resin grouting on concrete slab and in vertical surfaces of column and the like.	sq m	780.00

Con.458	12 mm thick closed cell expanded polyethylene filler board to joint including all necessary formwork	sq m	150.20
Con.459	20 mm thick closed cell expanded polyethylene filler board to joint including all necessary formwork	sq m	170.00
Con.460	25 mm thick closed cell expanded polyethylene filler board to joint including all necessary formwork.	sq m	231.40
Con.461	Polysulphide sealer squeezed into 25 x 15 mm joint.	m	17.10
Con.462	Polysulphide sealer squeezed into 25 x 25 mm joint.	m	27.45
Con.463	Polysulphide sealer squeezed into 50 x 15 mm joint.	m	44.25
Con.464	Concrete (Grade 20) heelstone cast to suit section of door frame including one 100 x 13 mm diameter mild steel dowel and 150 mm high.	no	12.60

3. BRICKWORK

S/No	Description	Unit	Unit Cost (\$)
BW.1	Brick-on-edge wall with brickwork in common bricks	sq m	26.30
BW.2	Half brick thick wall (102.5 mm thick) with brickwork in common bricks.	sq m	38.00
BW.3	One brick wall (215 mm thick) with brickwork in common bricks.	sq m	71.20
BW.4	Half brick thick built honeycomb in common bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	34.50
BW.5	Extra over common brickwork for building fair face with joints raked out and pointed in tinted cement as the work proceeds (one side only).	sq m	5.20
BW.6	Extra over common brickwork for building for facing in first quality clay facing bricks (one side only).	sq m	11.50

S/No	Description	Unit	Unit Cost (\$)
BW.7	Extra over common brickwork for building for facing in clinker facing bricks (one side only).	sq m	30.00
BW.8	Extra over common brickwork for building for facing in sand face	sq m	13.20
	/perforated facing bricks or plainface perforated facing bricks (one side only).	54	20.20
BW.9	90 mm thick brickwork in cement/sand/concrete bricks (15 mn/sq m).	sq m	31.70
BW.10	190 mm thick brickwork in cement/sand/concrete bricks (15 mn/sq m).	sq m	58.70
BW.11	290 mm thick brickwork in cement/sand/concrete bricks (15 mn/sq m).	sq m	73.60
BW.12	Half brick thick (102.5 mm thick) engineering bricks.	sq m	59.20
BW.13	One brick thick (215 mm thick) engineering bricks.	no	112.80
BW.14	Half brick thick built honeycomb brickwork built entirely in first quality clay facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	32.70
BW.15	Half brick thick (102.5 mm thick) brickwork built entirely in first quality clay facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	46.80
BW.16	One brick thick (215 mm thick) brickwork built entirely in first quality clay facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	84.50
BW.17	Half brick thick honeycomb brickwork built entirely in clinker facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	42.20
BW.18	Half brick thick brickwork built entirely in clinker facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	59.30
BW.19	One brick thick brickwork built entirely in clinker facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	108.90
BW.20	Half brick thick honeycomb brickwork built entirely in sandface/plain-face perforated facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	33.90
BW.21	Half brick thick brickwork built entirely in sandface/plain-face perforated facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	48.40
BW.22	One brick thick brickwork built entirely in sandface/plain-face perforated facing bricks one side with joints raked out and pointed in tinted cement as the work proceeds.	sq m	87.60
BW.23	Half brick thick honeycomb brickwork built both sides entirely in first quality clay facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	37.10
BW.24	Half brick thick brickwork built both sides entirely in first quality clay facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	52.40
BW.25	One brick thick brickwork built both sides entirely in first quality clay facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	92.10
BW.26	Half brick thick built honeycomb brickwork built both sides entirely in clinker facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	46.60
BW.27	Half brick thick brickwork built both sides entirely in clinker facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	64.90
BW.28	One brick thick brickwork built both sides entirely in clinker facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	117.10

S/No	Description	Unit	Unit Cost (\$)
BW.29	Half brick thick built honeycomb brickwork built both sides entirely in sandface perforated facing bricks/plain-face perforated facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	34.90
BW.30	Half brick thick brickwork built both sides entirely in sandface perforated facing bricks/plain-face perforated facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	53.90
BW.31	One brick thick brickwork built both sides entirely in sandface perforated facing bricks/plain-face perforated facing bricks with joints raked out and pointed in tinted cement as the work proceeds.	sq m	95.00
BW.32	Wash existing pointed brickwalls or blockwalls with caustic soda or other similar chemical cleaning liquid and removing dirt, grease, stains, fungus, etc.	sq m	1.30
BW.33	Hack out damaged pointing in joints and re-point in cement mortar or neat tinted cement as necessary to match existing (one side only).	sq m	1.80
BW.34	75 mm thick aerated concrete blocks (4.1 n/sq mm) in partition, infill panel and the like.	sq m	30.50
BW.35	100 mm thick aerated concrete blocks (4.1 n/sq mm) in partition, infill panel and the like.	sq m	38.50
BW.36	75 mm thick hollow concrete blocks laid in cement mortar(1:4) with 10mm joints including cutting, toothing, bonding, waste and preparing existing wall to receive new and reinforced at every course with and including "Exmet" or other equal and approved brick reinforcement.	sq m	20.40
BW.37	100 mm thick hollow concrete blocks laid in cement mortar(1:4) with 10mm joints including cutting, toothing, bonding, waste and preparing existing wall to receive new and reinforced at every course with and including "Exmet" or other equal and approved brick reinforcement	sq m	23.70
BW.38	150 mm thick hollow concrete blockslaid in cement mortar(1:4) with 10mm joints including cutting, toothing, bonding, waste and preparing existing wall to receive new and reinforced at every course with and including "Exmet" or other equal and approved brick reinforcement.	sq m	28.20
BW.39	Extra over blockwork for building fairface with joints raked out and pointed in cement as the works proceeds (one side only).	sq m	2.90
BW.40	Extra over for filling 75 mm thick block solid with concrete (grade 15).	sq m	1.60
BW.41	Extra over for filling 100 mm thick block solid with concrete (grade 15).	sq m	1.60
BW.42	Extra over for filling 150 mm thick block solid with concrete (grade 15).	sq m	4.10
BW.43	100 mm thick concrete vent block in grille blockwall consisting of rain-proof concrete vent blocks (any size) bedded and jointed in cement mortar (1:6) reinforced every course with and including approved galvanised brick reinforcement.	sq m	64.30
BW.44	113 mm thick concrete vent block in grille blockwall consisting of rain-proof concrete vent blocks (any size) bedded and jointed in cement mortar (1:6) reinforced every course with and including approved galvanised brick reinforcement.	sq m	66.20
BW.45	150 mm thick concrete vent block in grille blockwall consisting of rain-proof concrete vent blocks (any size) bedded and jointed in cement mortar (1:6) reinforced every course with and including approved galvanised brick reinforcement.	sq m	79.70
BW.46	Hammer dressed random rubble wall in selected granite blocks laid in cement mortar (1:3) including raking out joints and pointing in plain or white cement as work proceeds.	cu m	236.60
BW.47	Render top of granite wall with cement mortar (1:3) average 50 mm thick including layer of mesh reinforcement.	sq m	17.00

S/No	Description	Unit	Unit Cost (\$)
BW.48	Extra over for setting granite blocks against slipped banks.	cu m	23.90
BW.49	112.5 mm wide 3 ply bituminous felt horizontal damp proof course complying with BS 743 Type B in cement mortar (1:4) with mortar plasticiser to wall.	m	0.70
BW.50	225 mm wide 3 ply bituminous felt horizontal damp proof course complying with BS 743 Type B in cement mortar (1:4) with mortar plasticiser to wall.	m	1.40
BW.51	Exceeding 300 mm wide 3 ply bituminous felt horizontal damp proof course complying with BS 743 Type B in cement mortar (1:4) with mortar plasticiser to wall.	sq m	14.80
BW.52	0.6 mm thick polythylene moisture barrier laid to top, side or underside of concrete structure.	sq m	8.10
BW.53	0.8 mm thick polythylene moisture barrier laid to top, side or underside of concrete structure.	sq m	12.70
BW.54	Sisalthene '300' heavy weight building paper laid to top, side or underside of concrete structure.	sq m	3.00
BW.55	Sisalkraft '355' medium weight building paper laid to top, side or underside of concrete structure.	sq m	4.80
BW.56	1.5 mm thick Trocal type 'T' membrance with 2 layers of geotextile fleece laid to top, side or underside of concrete structure.	sq m	54.00
BW.57	2.0 mm thick Trocal type 'T' membrance with 2 layers of geotextile fleece laid to top, side or underside of concrete structure.	sq m	59.80
BW.58	Supply and apply one coat of "DRIWAL" colourless waterproof compound to exposed surfaces of fair-faced brickwall.	sq m	4.00
BW.59	Supply and apply additional coating of "DRIWAL" colourless waterproof compound to exposed surfaces of fair-faced brickwall.	sq m	3.45
BW.60	Prepare and apply "Colpave" sealer along the crack line on walls or slabs to cure leaks.	m	8.10
BW.61	38 mm x 3 mm galvanished wrougt iron or primed mild steel holdfast 225 mm long, one end turned up and screwed to timber and other end spilt and built into brickwork.	no	1.20
BW.62	38 mm x 3 mm galvanished wrougt iron or primed mild steel holdfast 150 mm long, one end turned up and screwed to timber and other end spilt and built into brickwork.	no	0.90
BW.63	Hack off existing brickwork and/or blockwork, clear of site and stack good bricks aside for re-use and including all necessary minor shoring.	cu m	105.80
BW.64	Hack off existing granite rubble wall, clear off site or stack good blocks aside for re-use and cart debris off site and including all necessary minor shoring.	cu m	117.80
BW.65	Take from stack and rebuilt granite random rubble wall in cement mortar (1:3) with joints raked out and pointed in plain or white cement as the work proceeds.	cu m	190.40
BW.66	One course brick-on-edge laid in cement mortar (1:3) with 10 mm joints in steps, sills, copings, footpaths etc (Plan area measured).	sq m	55.00
BW.67	Replace all broken and missing brick-on-edge in steps, sills, copings and the like with new one in cement mortar (1:3) to match existing.	sq m	41.20
BW.68	One course plain quarry tiles (any sizes) laid on cement mortar (1:3) with 10 mm joints in sills, weatherings or copings.	sq m	30.70
BW.69	Two courses plain quarry tiles (any sizes) laid on cement mortar (1:3) with 10 mm joints in sills, weatherings or copings.	sq m	61.90
BW.70	Cut chases in existing rendered, tiled or fair face brickwork or concrete work, clear away debris and make existing in the following cross sections, not exceeding 2,500 sq mm.	m	7.00

S/No	Description	Unit	Unit Cost (\$)
BW.71	Cut chases in existing rendered, tiled or fair face brickwork or concrete work, clear away debris and make existing in the following cross sections, over 2,500 and not exceeding 8,000 sq mm.	m	9.10
BW.72	Cut chases in existing rendered, tiled or fair face brickwork or concrete work, clear away debris and make existing in the following cross sections, over 8,000 and not exceeding 16,000 sq mm.	m	10.50
BW.73	Cut chases in existing rendered, tiled or fair face brickwork or concrete work, clear away debris and make existing in the following cross sections, over 16,000 and not exceeding 24,000 sq mm.	m	12.20
BW.74	Cut chases in existing rendered, tiled or fair face brickwork or concrete work, clear away debris and make existing in the following cross sections, over 24,000 and not exceeding 32,000 sq mm.	m	14.00
BW.75	Form holes for small pipe not exceeding 50 mm diameter in existing or new brickwork or blockwork not exceeding 65 mm thick, clear away debris and make good surrounds to match existing.	no	2.30
BW.76	Add for each additional stage of 25 mm thick wall, floor, etc. for item BW092.	no	0.90
BW.77	Form holes for pipe exceeding 50 mm diameter and not exceeding 200 mm diameter in existing or new brickwork or blockwork not exceeding 65 mm thick, clear away debris and make good surrounds to match existing.	no	6.10
BW.78	Add for each additional stage of 25 mm thick wall, floor, etc. for item (BW094).	no	2.30
BW.79	Cut small opening (ie not exceeding 0.50sq m) in existing or new brick or block walls not exceeding 150 mm thick (total thickness) and remove debris off site.	no	17.30
BW.80	Add for each additional stage of 25 mm thick wall, floor, etc. for item (BW096).	no	2.90
BW.81	Cut large opening (ie exceeding 0.50sq m and not exceeding 2sq m) in existing or new brick or block walls not exceeding 150 mm thick (total thickness) and remove debris off site.	no	55.70
BW.82	Add for each additional stage of 25 mm thick wall, floor, etc. for item (BW098).	no	3.50
BW.83	Below 25 mm diameter unplasticised PVC non-pressure pipe not exceeding 150 mm long with one end splayed and built in wall.	no	1.60
BW.84	25 mm to 50 mm diameter unplasticised PVC non-pressure pipe not exceeding 150 mm long with one end splayed and built in wall.	no	2.40
BW.85	50 mm to 75 mm diameter unplasticised PVC non-pressure pipe not exceeding 150 mm long with one end splayed and built in wall.	no	3.50
BW.86	75 mm to 100 mm diameter unplasticised PVC non-pressure pipe not exceeding 150 mm long with one end splayed and built in wall.	no	4.70
BW.87	Add for each 25 mm in length for item BW100.	no	0.25
BW.88	Deduct for each 25 mm in length for item BW100.	no	-0.20
BW.89	Add for each 25 mm in length for item BW101.	no	0.35
BW.90	Deduct for each 25 mm in length for item BW101.	no	-0.30
BW.91	Add for each 25 mm in length for item BW102	no	0.45
BW.92	Deduct for each 25 mm in length for item BW102.	no	-0.40
BW.93	Add for each 25 mm in length for item BW103.	no	0.70
BW.94	Deduct for each 25 mm in length for item BW103.	no	-0.60
BW.95	100 mm diameter clay earthenware weep pipes built in wall.	m	21.60
BW.96	150 mm diameter clay earthenware weep pipes built in wall.	m	26.50
BW.97	Lay only 80 mm thick hollow glass block (any type) with approved horizontal joint reinforcing placed at every course including mortar and pointing with cement.	sq m	32.90

S/No	Description	Unit	Unit Cost (\$)
BW.98	Supply and lay 80 mm thick hollow glass block (any type) with approved horizontal joint reinforcing placed at every course including mortar and pointing with cement.	sq m	287.50
BW.99	Lay only 100 mm thick hollow glass block (any type) with approved horizontal joint reinforcing placed at every course including mortar and pointing with cement.	sq m	37.30
BW.100	Supply and lay 100 mm thick hollow glass block (any type) with approved horizontal joint reinforcing placed at every course including mortar and pointing with cement.	sq m	340.70
BW.101	Carefully remove existing glass bricks (any size) from 80 mm or 100 mm thick walls, vents, etc. clear off site or cart to store area or stack good bricks aside for re-use and cart away debris.	sq m	9.90
BW.102	Take from stack and rebuilt glass brick walls in cement mortar (1:6) and pointed in tinted cement as the work proceeds.	sq m	28.20

4. AMENDMENTS TO THE TENDER DOCUMENTS

S/No	Description	Unit	Unit Cost (\$)
RF.1	0.47mm high tensile profile patent/kliplok galvanized steel sheet roof decking, wall cladding,fascia. etc. fixed to timber or steel purlins or angle, rail etc. including all necessary fixing clips, screws, etc. and stop to open rib ends of deck, labour in flange bending to form turn- ups at ridge or turn-down at eaves, all cutting and waste, and all necessary materials, with the manufacturer's printed instructions (Net area measured).	sq m	24.00
RF.2	0.47 mm high tensile profile colourbond/colourcote steel sheet roof decking, wall cladding, fascia, etc. fixed to timber or steel purlins or angle, rail etc. including all necessary fixing clips, screws, etc. and stops to open rib ends of deck, labour in flange bending to form turn-ups at ridge or turn-down at eaves, all cutting and waste, and all necessary materials, equipment and labour for hoisting and fixing in accordance with the manufacturer's printed instructions.(Net area measured)	sq m	28.80
RF.3	0.53 mm high tensile profile patent kliplock galvanized steel sheet roof decking, wall cladding fascia, etc. fixed to timber or steel purlins or angle, rail etc. including all necessary fixing clips, screws, etc. and stops to open rib ends of deck, labour in flange bending to form turn-ups at ridge or turn-down at eaves, all cutting and waste, and all necessary materials, equipment and labour for hoisting and fixing in accordance with the manufacturer's printed instructions.(Net area measured)	sq m	30.00
RF.4	0.53 mm high tensile profile colourbond/colourcote steel sheet roof decking, wall cladding fascia, etc. fixed to timber or steel purlins or angle, rail etc. including all necessary fixing clips, screws, etc. and stops to open rib ends of deck, labour in flange bending to form turn-ups at ridge or turn-down at eaves, all cutting and waste, and all necessary materials, equipment and labour for hoisting and fixing in accordance with the manufacturer's printed instructions.(Net area measured)	sq m	33.00
RF.5	0.65 mm profile patent galvanized kliplok steel roof decking, wall cladding fascia, etc. fixed to timber or steel purlins or angle, rail etc. including all necessary fixing clips, screws, etc. and stops to open rib ends of deck, labour in flange bending to form turn-ups at ridge or turn-down at eaves, all cutting and waste, and all necessary materials, equipment and labour for hoisting and fixing in accordance with the manufacturer's printed instructions.(Net area measured)	sq m	34.70

S/No	Description	Unit	Unit Cost (\$)
RF.6	0.65 mm profile colourbond/colourcote steel roof decking, wall cladding fascia, etc. fixed to timber or steel purlins or angle, rail etc. including all necessary fixing clips, screws, etc. and stops to open rib ends of deck, labour in flange bending to form turn-ups at ridge or turn-down at eaves, all cutting and waste, and all necessary materials, equipment and labour for hoisting and fixing in accordance with the manufacturer's printed instructions.(Net area measured)	sq m	39.50
RF.7	0.75 mm profile patent galvanized kliplok sheet roof decking, wall cladding, fascia, etc. fixed to timber or steel purlins or angle, rail etc. including all necessary fixing clips, screws, etc. and stops to open rib ends of deck, labour in flange bending to form turn-ups at ridge or turn-down at eaves, all cutting and waste, and all necessary materials, equipment and labour for hoisting and fixing in accordance with the manufacturer's printed instructions. (Net area measured)	sq m	40.80
RF.8	0.75 mm profile colourbond /colourcote sheet roof decking, wall cladding, fascia, etc. fixed to timber or steel purlins or angle, rail etc. including all necessary fixing clips, screws, etc. and stops to open rib ends of deck, labour in flange bending to form turn-ups at ridge or turn-down at eaves, all cutting and waste, and all necessary materials, equipment and labour for hoisting and fixing in accordance with the manufacturer's printed instructions. (Net area measured).	sq m	46.60
RF.9	Flashing for galvanized steel profile patterns roof including bending, joints, beaded edges, dressing, cutting chase in masonry work, ceiling chase with cementatious mortar, etc.	sq m	46.00
RF.10	Flashing for colourbond/colourcote steel profile patterns roof including bending, joints, beaded edges, dressing, cutting chase in masonry work, ceiling chase with cementatious mortar, etc. (Net area measured).	sq m	52.10
RF.11	Supply and install "Decrabond" flashing with baked enamel finish of girth 300 mm	m	14.80
RF.12	Supply and install "Decrabond" ridge and hip fitting with baked enamel finish	m	14.40
RF.13	Used corrugated sheet fixed to purlins with one corrugation side laps and minimum 150 mm end laps as specified. (Net area measured).	sq m	6.20
RF.14	Approved non-abestos corrugated sheet fixed to purlins with one corrugation side laps and minium 150 mm end laps as specified. (Net area measured).	sq m	21.60
RF.15	Used Pattern clay roofing tiles, best quality of approved brand, laid and fixed to existing timber battens and including wiring or nailing tiles to battens at every alternate course (Net area measured).	sq m	10.00
RF.16	Used Pattern clay roofing tiles, best quality of approved brand, laid and including new kapur battens with two coats of approved preservative coating and including wiring or nailing tiles to battens at every alternate course (Net area measured).	sq m	22.20
RF.17	Redland or other equal and approved ordinary colour (red, brown, grey) standard interlocking tiles to match existing if in replacement and laid on and including tantalized sawn kapur battens with copper nails at every alternate course (Net area measured).	sq m	38.00
RF.18	Redland or other equal and approved ordinary colour (red, brown, grey) standard interlocking tiles to match existing if in replacement and laid on including new kapur battens with two coats of approved preservative coating and including tantalized sawn kapur battens with copper nails at every alternate course (Net area measured).	sq m	40.60

S/No	Description	Unit	Unit Cost (\$)
RF.19	Redland or other equal and approved ordinary colour (red, brown, grey) standard interlocking tiles to match existing if in replacement and laid on existing battens (Net area measured).	sq m	21.00
RF.20	Scantile panel or their equal and approved 0.66 mm thick high tensile steel continuous hot dipped galvanized with Kynar 500 Polyvbinlyidence (PVF2) coating fixed to timber or steel etc. including all necessary materials, equipment and labour for hoisting and fixing in accordance with the manufacturer's printed instructions (Net area measured)	sq m	58.40
RF.21	Redland or other equal and approved special colour (green, yellow, white) standard interlocking tiles to match existing if in replacement and laid on and including tantalized sawn kapur battens with copper nails at every alternate course (Net area measured).	sq m	39.20
RF.22	Redland or other equal and approved special colour (green, yellow, white) standard interlocking tiles to match existing if in replacement and laid on including new kapur battens with two coats of approved preservative coating and including tantalized sawn kapur battens with copper nails at every alternate course (Net area measured).	sq m	41.80
RF.23	Redland or other equal and approved special colour (green, yellow, white) standard interlocking tiles to match existing if in replacement and laid on existing battens (Net area measured).	sq m	22.20
RF.24	Monier or other equal and approved ordinary colour pantile to match existing if in replacement and laid on and including tantalized sawn kapur battens, and nailing to battens with copper nails at every course (Net area measured).	sq m	29.30
RF.25	Monier or other equal and approved ordinary colour pantile to match existing if in replacement and laid on and include new kapur battens with two coats of approved preservative coating and including tantalized sawn kapur battens, and nailing to battens with copper nails at every course (Net area measured).	sq m	32.40
RF.26	Monier or other equal and approved ordinary colour pantile to match existing if in replacement and laid on laid on existing battens (Net area measured).	sq m	17.30
RF.27	Monier or other equal and approved special colour pantile to match existing if in replacement and laid on and including tantalized sawn kapur battens, and nailing to battens with copper nails at every course (Net area measured).	sq m	30.70
RF.28	Monier or other equal and approved special colour pantile to match existing if in replacement and laid on and include new kapur battens with two coats of approved preservative coating and including tantalized sawn kapur battens, and nailing to battens with copper nails at every course (Net area measured).	sq m	33.80
RF.29	Monier or other equal and approved special colour pantile to match existing if in replacement and laid on laid on existing battens (Net area measured).	sq m	18.70
RF.30	Decrabond interlocking roofing tiles as specified including hips and ridges fixed on to and including 38 mm x 50 mm tantalized sawn kapur battens according to manufacturer's instructions	sq m	55.60
RF.31	Decrabond interlocking roofing tiles as specified including hips and ridges fixed on and including new kapur battens with two coats of approved preservative coating.	sq m	60.50
RF.32	Decrabond interlocking roofing tiles as specified including hips and ridges laid on existing battens.	sq m	43.80

S/No	Description	Unit	Unit Cost (\$)
RF.33	Translucent corrugated fiberglass sheeting weighing 1.82 kg per sq. metre fixed to purlins or rails etc. with two corrugations side laps and with end laps minimum 150 mm including all necessary drive nails and washer or hook bolts and washers, all cutting and fixing all in accordance with manufacturer's instructions (Net area measured)	sq m	72.70
RF.34	Translucent corrugated fiberglass sheeting weighing 2.43 kg per sq. metre fixed to purlins or rails etc. with two corrugations side laps and with end laps minimum 150 mm including all necessary drive nails and washer or hook bolts and washers, all cutting and fixing all in accordance with manufacturer's instructions (Net area measured)	sq m	105.70
RF.35	PVC transparent corrugated sheeting of the same profile to match corrugated asbestos, metal or bituminous roofing sheets fixed to purlins or rails etc. with two corrugations side laps and with minimum 150 mm end laps including all necessary drive nails and washers or hook bolts and washers, all in accordance with manufacturer's instructions (Net area measured).	sq m	23.00
RF.36	Supply only used Chinese tile to match existing with 2 corrugation side laps & 150mm end laps.	no	0.70
RF.37	Supply and fix 0.5mm gauge corrugated aluminium roofing sheet with 125mm side lamps complete with fixing accessories & 150mm minimum end laps. (Measured nett, no allowance made for laps)	sq m	18.00
RF.38	Supply and fix 0.5mm gauge corrugated aluminium roofing sheet with 125mm side lamps complete with fixing accessories & 225mm minimum end laps. (Measured nett, no allowance made for laps)	sq m	21.60
RF.39	Supply and fix 0.5mm gauge corrugated aluminium roofing sheet with 125mm side lamps complete with fixing accessories & 300mm minimum end laps. (Measured nett, no allowance made for laps)	sq m	25.20
RF.40	Supply and fix 0.5mm gauge corrugated aluminium roofing sheet with 125mm side lamps complete with fixing accessories in ridges or hips. (Measured nett, no allowance made for laps)	m	6.60
RF.41	Labour and material replacing Alocrome corrugated roofing sheets including takingdown existing damaged corrugated roofing sheets and removing debris to ENV's dumping ground.	sq m	37.20
RF.42	Labour and material fixing Dico aluminium roofing sheet to roof including taking down existing damaged roofing sheets and removing debris to ENV's dumping ground.	sq m	26.40
RF.43	Supply and fix 0.4mm gauge corrugated galvanised iron roofing sheet with 125mm side laps and complete with fixing accessories & 150mm minimum end laps. (Measured nett, no allowance made for laps).	sq m	17.80
RF.44	Supply and fix 0.5mm gauge corrugated galvanised iron roofing sheet with 125mm side laps and complete with fixing accessories & 150mm minimum end laps. (Measured nett, no allowance made for laps).	sq m	18.40
RF.45	Supply and fix 0.6mm gauge corrugated galvanised iron roofing sheet with 125mm side laps and complete with fixing accessories & 150mm minimum end laps. (Measured nett, no allowance made for laps).	sq m	19.10
RF.46	Supply and fix 0.6mm gauge corrugated galvanised iron roofing sheet with 125mm side laps and complete with fixing accessories & 225mm minimum end laps. (Measured nett, no allowance made for laps).	sq m	19.50
RF.47	Supply and fix 0.6mm gauge corrugated galvanised iron roofing sheet with 125mm side laps and complete with fixing accessories & 300mm minimum end laps. (Measured nett, no allowance made for laps)	sq m	19.80

S/No	Description	Unit	Unit Cost (\$)
RF.48	Supply and fix corrugated galvanised iron roofing sheet with 125mm side laps and complete with fixing accessories in ridges or hips. (Measured nett, no allowance made for laps)	sq m	9.60
RF.49	Supply and fix matching 'J' -hooks to existing corrugated roofing sheets, not exceeding 10 nos. at any one time.	no	6.00
RF.50	Supply and fix matching 'J' -hooks to existing corrugated roofing sheets, exceeding 10 nos. at any one time.	no	4.80
RF.51	Prepare and seal with silicon compound to screw holes of roofing sheets of quantities not exceeding 20 nos.	no	1.20
RF.52	Prepare and seal with silicon compound to screw holes of roofing sheets of quantities exceeding 20 nos.	no	0.80
RF.53	Prepare and seal with silicon compound to defective side-lamps of roofing sheets, flashings, cappings, etc of quantities not exceeding 10m.	m	15.60
RF.54	Prepare and seal with silicon compound to defective side-lamps of roofing sheets, flashings, cappings, etc of quantities exceeding 10m.	m	10.80
RF.55	Labour and material cleaning 50mm wide joints of existing roofing sheets/valley gutters and sealed up with 'Expandite Instantseal'.	m	4.30
RF.56	Labour and material cleaning 75mm wide joints of existing roofing sheets/valley gutters and sealed up with 'Expandite Instantseal'.	m	5.40
RF.57	Labour and material cleaning 100mm wide joints of existing roofing sheets/valley gutters and sealed up with 'Expandite Instantseal'.	m	6.10
RF.58	Labour and materials driving to existing sheeting self-tapping screws not exceeding 13mm diameter x 17mm long including necessary tools.	no	0.60
RF.59	Labour for taking down and removing existing damaged metal roofing sheets to ENV's dumping ground.(Inclusive of ENV dumping charges)	sq m	4.80
RF.60	Labour and material for patching up nail holes in metal roofing sheets with mastic and one layer of bituminous felt.	no	3.00
RF.61	Galvanized steel profile patterns standard ridges capping for pitch roof, notched and dressed down between ribs and fix with approved fasteners (measured net).	m	13.00
RF.62	Galvanized steel profile patterns standard ridges capping for flat roof, notched and dressed down between ribs and fix with approved fasteners (measured net).	m	16.30
RF.63	Galvanized steel profile colourbond ridges capping for pitch roof, notched and dressed down between ribs and fix with approved fasteners (measured net).	m	15.80
RF.64	Galvanized steel profile colourbond ridges capping for flat roof, notched and dressed down between ribs and fix with approved fasteners (measured net).	m	19.60
RF.65	Used clay ridge or hip tiles including bedding and pointing in cement mortar (1:3)	m	4.70
RF.66	Ordinary colour concrete ridge or hip tiles including bedding and pointing in cement mortar (1:3).	m	7.20
RF.67	Special colour concrete ridge or hip tiles including bedding and pointing in cement mortar (1:3).	m	7.70
RF.68	Galvanized iron ridges or hips pieces 300 mm wide fixed complete.	m	6.80
RF.69	Approved non-asbestos close fitting two pieces ridges or hips (measured net).	m	22.80
RF.70	Half round ridge tiles for "Scantile" roof system.	m	34.80
RF.71	Ridge tile end cap for "Scantile" roof system.	no	7.40
RF.72	Gable trim (300 mm girth) for "Scantile" roof system.	m	17.90
RF.73	Wall flashing (240 mm girth) for "Scantile" roof system.	m	20.30
RF.74	Eaves trim (170 mm girth) for "Scantile" roof system.	m	18.60
RF.75	Valley gutter (600 mm girth)	m	28.30

S/No	Description	Unit	Unit Cost (\$)
RF.76	Take out existing valley gutters, flashings, etc. remove off site and prepare to receive new (Rate for new gutters etc. under Section F Structural Steelworks and Metalwork).	sq m	6.20
RF.77	Take out existing eaves gutters including brackets where necessary, remove off site and make good work disturbed.	m	1.40
RF.78	150 mm half-round eaves gutter fabricated from 2.0 mm thick aluminium sheeting with beaded edges and soldered joints, bends, stopped ends, outlets, balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	m	18.60
RF.79	225 mm half-round eaves gutter fabricated from 2.0 mm thick aluminium sheeting with beaded edges and soldered joints, bends, stopped ends, outlets, balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	m	24.60
RF.80	Box/eave gutter and flashing, fitments etc to any sizes and shapes in 2.0 mm thick aluminium sheeting with beaded edges and soldered joints, bends, stopped ends, outlets, balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	83.40
RF.81	Box/eave gutter and flashing, fitments etc to any sizes and shapes in 1.5 mm thick aluminium sheeting with beaded edges and soldered joints, bends, stopped ends, outlets, balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	54.60
RF.82	Box/eave gutter and flashing ,fitments etc to any sizes and shapes in 1.0 mm thick aluminium sheeting with beaded edges and soldered joints, bends, stopped ends, outlets, balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	48.60
RF.83	Supply and fix box/eave gutter and flashing, fitments etc to any sizes and shapes from 0.75mm thick aluminium sheeting with beaded edges and soldered joints, bends, stopped ends, outlets balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	48.00
RF.84	Supply and fix box/eave gutter and flashing, fitments etc to any sizes and shapes from 0.55mm thick aluminium sheeting with beaded edges and soldered joints, bends, stopped ends, outlets balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	37.80
RF.85	Supply and fix box/eave gutter and flashing, fitments etc to any sizes and shapes from 0.5mm thick stainless steel sheeting with beaded edges and soldered joints, bends, stopped ends, outlets balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	42.70
RF.86	Supply and fix box/eave gutter and flashing, fitments etc to any sizes and shapes from 0.75mm thick stainless steel sheeting with beaded edges and soldered joints, bends, stopped ends, outlets balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	85.80
RF.87	Supply and fix box/eave gutter and flashing, fitments etc to any sizes and shapes from 1mm thick stainless steel sheeting with beaded edges and soldered joints, bends, stopped ends, outlets balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	100.20

S/No	Description	Unit	Unit Cost (\$)
RF.88	Supply and fix box/eave gutter and flashing, fitments etc to any sizes and shapes from 1.5mm thick stainless steel sheeting with beaded edges and soldered joints, bends, stopped ends, outlets balloon grating and fixing with and including brackets and connecting to existing gutters and rainwater down pipes.	sq m	126.60
RF.89	200 mm x 200 mm square trough shaped approved UPVC gutter with solvent cement joint including all necessary mitre joints, caps and mild steel brackets and balloon grating.	m	66.00
RF.90	250 mm x 125 mm square trough shaped approved UPVC gutter with solvent cement joint including all necessary mitre joints, caps and mild steel brackets and balloon grating.	m	56.60
RF.91	150mm diameter half round shaped approved UPVC gutter with solvent cement joint including all necessary mitre joints, caps and mild steel brackets and balloon grating.	m	16.80
RF.92	Clean out and remove rubbish from roof gutters including outlets.	m	1.00
RF.93	0.75 mm thick, 150 mm half-round gutters fabricated from stainless steel sheet complete with bends, stopped ends, balloons grating, outlets and fixing with and including brackets and connecting to existing gutters and rainwater downpipe (Rate Per Metre).	m	31.10
RF.94	1mm thick, 150 mm half-round gutter fabricated from stainless steel sheet complete with bends, stopped ends, balloons grating, outlets and fixing with and including brackets and connecting to existing gutters and rainwater downpipe (Rate Per Metre).	m	36.40
RF.95	1.5mm thick, 150 mm half-round gutter fabricated from stainless steel sheet complete with bends, stopped ends, balloons grating, outlets and fixing with and including brackets and connecting to existing gutters and rainwater downpipe (Rate Per Metre).	m	43.30
RF.96	0.75mm thick, 225 mm half-round gutter fabricated from stainless steel sheet complete with bends, stopped ends, balloons grating, outlets and fixing with and including brackets and connecting to existing gutters and rainwater downpipe (Rate Per Metre).	m	43.80
RF.97	1mm thick, 225 mm half-round gutter fabricated from stainless steel sheet complete with bends, stopped ends, balloons grating, outlets and fixing with and including brackets and connecting to existing gutters and rainwater downpipe (Rate Per Metre).	m	52.10
RF.98	1.5mm thick, 225 mm half-round gutter fabricated from stainless steel sheet complete with bends, stopped ends, balloons grating, outlets and fixing with and including brackets and connecting to existing gutters and rainwater downpipe (Rate Per Metre).	m	60.40
RF.99	Supply and install 100 mm diameter cast iron dome grating and fluted flange including joining to rainwater down pipes and setting in concrete slab to form a water tight joint	no	28.60
RF.100	Supply and install 150 mm diameter cast iron dome grating and fluted flange including joining to rainwater down pipes and setting in concrete slab to form a water tight joint	no	45.40
RF.101	Take out existing rainwater down pipes/scupper drain pipes (any type and size), remove off site and make good work disturbed including necessary cutting in position	m	1.10
RF.102	Take out existing metal holderbats for pipe, (any diameter) remove off site and make good work disturbed.	no	0.60

S/No	Description	Unit	Unit Cost (\$)
RF.103	Supply labour and all necessary tools for cleaning choked rain water down pipe/scupper drain pipe (rate per sta no Scaffolding to charge separately if exceeds one sty height.		
RF.104	Supply and install 50 mm diameter UPVC scupper drain pipe/rainwater down pipe.	m	10.20
RF.105	75 mm diameter UPVC rainwater down pipe/scupper drain pipe ditto cement solvent joint including all necessary brackets or fixing straps, down spouts, joiners, elbows, shoes, etc.	m	11.40
RF.106	100 mm diameter UPVC rainwater down pipe/scupper drain pipe(any type and size), remove off site and make good work disturbed including necessary cutting in position.	m	13.80
RF.107	150 mm diameter UPVC rainwater down pipe/scupper drain pipe(any type and size), remove off site and make good work disturbed including necessary cutting in position.	m	25.80
RF.108	150 mm x 100 mm UPVC rainwater down pipe/scupper drain pipe(any type and size), remove off site and make good work disturbed including necessary cutting in position.	m	31.90
RF.109	Take out existing rainwater head (any type and size) and remove off site.	no	2.20
RF.110	Supply and install 75 mm diameter UPVC scupper drain cover to scupper drain outlet including jointing material.	no	2.40
RF.111	Supply and install 100 mm diameter UPVC scupper drain cover to scupper drain outlet including jointing material.	no	3.00
RF.112	Supply and install 75 mm diameter UPVC domed-shape drain cover to drain outlet.	no	22.20
RF.113	Supply and install 100 mm diameter UPVC domed-shape drain cover to drain outlet.	no	24.00
RF.114	Supply and install domed-shape roof outlet, diameter of 'A' measuring approximately 300 mm and rainwater down pipe 'B' measured at a range of 75 mm to 125 mm in diameter (Appendix 8).	no	168.00
RF.115	Fix only any size/shape outlet to roof	no	2.40
RF.116	6 mm thick steel roof trap door with 38 mm x 38 mm mild steel angle framing all round complete with hinges, hasp and staple (padlock measured separately) rest on and including 50 mm x 50 mm mild steel angle fixed to concrete work or the like and three coats painting.	sq m	276.80
RF.117	Take out and cart away existing trap roof door and make good work disturbed.	sq m	26.60
RF.118	Take out and recondition roof trap door.	no	48.00
RF.119	Roof trap door with 18 mm thick water-proof plywood backing, and covered all round with 24 G aluminium sheeting, complete with hinges, hasp and staple (padlock measured) 50 mm x 50 mm x 6 mm mild steel angle fixed to concrete work or the like and three coats painting to angle.	sq m	132.00
RF.120	Strip existing galvanized steel profiled sheeting including ridges and remove off site.	sq m	1.40
RF.121	Strip existing Chinese tiles including ridge and hip tiles and remove off site.	sq m	1.00
RF.122	Strip existing Chinese tiles including ridge and hip tiles including battens and remove off site.	sq m	1.70
RF.123	Strip existing corrugated non-asbestos or trafford type asbestos or including ridges and hips and remove off site.	sq m	0.80
RF.124	Strip existing corrugated metal, bituminous, PVC or Decrabond sheeting including ridges and hips and remove off site.	sq m	0.80
RF.125	Strip existing pattern clay, glass roofing tiles or concrete interlocking tiles including ridge and hip tiles and remove off site.	sq m	1.00

S/No	Description	Unit	Unit Cost (\$)
RF.126	Strip existing pattern clay, glass roofing tiles or concrete interlocking tiles including ridge and hip tiles including battens and remove off site.	sq m	1.60
RF.127	Strip existing galvanized steel sheeting including ridges and carefully stack aside where directed for re-use.	sq m	1.90
RF.128	Strip existing Chinese tiles including ridges and hip tiles and carefully stack aside where directed for re-use.	sq m	1.30
RF.129	Strip existing Chinese tiles including ridges and hip tiles, including taking out battens and removing battens off site and carefully stack aside where directed for re-use.	sq m	2.00
RF.130	Strip existing corrugated non-asbestos or trafford type asbestos including ridges and hips and carefully stack aside where directed for re-use.	sq m	1.00
RF.131	Strip existing corrugated metal, bituminous, PVC or Decrabond sheeting including ridges and hips and carefully stack aside where directed for re-use.	sq m	1.00
RF.132	Strip existing pattern clay, glass roofing tiles or concrete interlocking tiles, pantiles, including ridges and hips and carefully stack aside where directed for re-use.	sq m	1.10
RF.133	Strip existing pattern clay, glass roofing tiles or concrete interlocking tiles, pantiles, including ridges and hips & including taking out battens and removing battens off site and carefully stack aside where directed for re-use.	sq m	1.90
RF.134	Take from stack relay existing galvanized steel profiled pattern sheeting including ridges fixed with new clips, screws etc. where necessary. (New sheet measured separately).	sq m	4.10
RF.135	Take from stack relay existing Chinese tiles including ridge and hip tiles and filling and pointing ends of crowns of tiles with cement mortar (1:3) at 1000 mm intervals. (New sheet measured separately).	sq m	5.00
RF.136	Take from stack relay existing Chinese tiles including ridge and hip tiles and filling and pointing ends of crowns of tiles with cement mortar (1:3) at 1000 mm intervals including new kapur battens with two coats of approved preservative coating. (New sheet measured separately).	sq m	27.20
RF.137	Take from stack relay existing non-asbestos (any type) metal, bituminous, PVC or Decrabondinterlocking roofing tiles laid with adequate side and end laps fixed with new galvanized drive nails and washers or new galvanized hook bolts and washers. (New sheet measured separately).	sq m	5.20
RF.138	Take from stack relay existing non- asbestos (any type) metal, bituminous, PVC or Decrabond interlocking roofing tiles laid with adequate side and end laps fixed with new galvanized drive nails and washers or new galvanized hook bolts and washers including bedding side and end laps with approved adhesive. (New sheet measured separately).	sq m	11.20
RF.139	Take from stack relay existing pattern clay tile, glass roofing tile, concrete standard interlocking tile or concrete pantile including new copper nails. (New sheet measured separately).	sq m	5.20
RF.140	Take from stack relay existing pattern clay tile, glass roofing tile, concrete standard interlocking tile or concrete pantile including new copper nails including new kapur battens with two coats of approved preservative coating. (New sheet measured separately).	sq m	26.90
RF.141	Take from stack relay existing clay or concrete ridge/ hip tiles including bedding and pointing in cement mortar (1:3). (New sheet measured separately).	m	3.70
RF.142	Take from stack relay existing cement or metal or bituminous or Decrabond ridges and hips fixed complete. (New sheet measured separately).	m	5.90

S/No	Description	Unit	Unit Cost (\$)
RF.143	Supply and installation of 50mm thick Insulfoam MRB-32 or other equal and approved moulded expanded polystyrene board (laid to falls) with self-interlocking system as described laid in strict accordance with Manufacturer's instructions	sq m	25.20
RF.144	Saturated bitumen two-ply felt as specified in two layer weighing 35.5 kg per 20 sq m roll laid, sealed and bonded with hot bitumen on flat roofs (net area measured).	sq m	13.20
RF.145	Saturated bitumen two-ply felt as specified in two layer weighing 35.5 kg per 20sq m roll laid, sealed and bonded with hot bitumen on flat roofs in skirting, upstands, eaves, edges, gutters, etc. (net area measured).	sq m	23.00
RF.146	Saturated bitumen two-ply felt as specified in one layer weighing 35.5 kg per 20sq m roll laid, sealed and bonded with hot bitumen on flat roofs (net area measured).	sq m	7.70
RF.147	Saturated bitumen one-ply felt as specified in one layer weighing 35.5 kg per 20sq m roll laid, sealed and bonded with hot bitumen on flat roofs in skirting, upstands, eaves, edges, gutters (net area measured).	sq m	13.30
RF.148	Saturated bitumen one-ply felt as specified weighing 17.75 kg per 20sq m roll laid, sealed and bonded with hot bitumen on roofs (net area measured).	sq m	6.70
RF.149	Saturated bitumen one-ply felt as specified weighing 17.75 kg per 20sq m roll laid, sealed and bonded with hot bitumen on roofs in skirting, upstands, eaves, edges, gutters (net area measured).	sq m	12.50
RF.150	Extra labour and material to dressing to outlets fitting etc.	no	22.80
RF.151	6 mm thick layer of granite chips (3 mm size) laid shoulder to shoulder on and including hot bitumen dressing compound to flat roofs.	sq m	3.00
RF.152	One coat of hot bituminous compound laid at 1.5 kg per 10sq m.	sq m	2.00
RF.153	Supply and lay ONE layer of 4mm thick "Torch On" waterproofing membrance on concrete flat roof including one coat of bitumen black primer and 150mm height upturn for skirting.	sq m	24.00
RF.154	Patent panel roofing comprising three layers bituminous felt, the first and second layers each weighing 27 kg per 20sq m roll (1 ply) and the third layer weighing 45 kg per 20sq m roll (3 ply) laid on flat roof in accordance with specialist recommendations.	sq m	19.90
RF.155	Patent panel roofing comprising three layers bituminuos felt, the first and second layers each weighing 27 kg per 20sq m roll (1 ply) and the third layer weighing 45 kg per 20sq m roll (3 ply) laid in skirting, upstands, eaves, edges, gutters, etc.	sq m	35.80
RF.156	Average 25 mm thick waterproof cement and sand (1:3) topping laid in panels of 750 x 750 mm to slope or flat roof all in accordance with specialist recommendation including steel trowelled and finished to falls.	sq m	18.70
RF.157	Average 25 mm thick waterproof cement and sand (1:3) topping laid in panels of 750 x 750 mm to slope or flat roof all in accordance with specialist recommendation including steel trowelled and finished to falls in skirting, upstands, eaves, edges, gutters, etc.	sq m	24.40
RF.158	Add for each additional 5 mm thick waterproof of cement and sand topping as before described.	sq m	3.10
RF.159	Remove existing felt roofing including chipping, if any. Prepare surface to receive new and debris off site.	sq m	4.20
RF.160	Remove existing cement panels and if necessary prepare surface to receive new and debris off site.	sq m	6.00
RF.161	Hack up existing cement panels and make good in patches, each patch not exceeding 2 panels and 25 mm thick and debris off site (rate per patch).	no	4.00

S/No	Description	Unit	Unit Cost (\$)
RF.162	Hack up existing cement panels and make good in patches, each patch not exceeding 2 panels and 25 mm thick including replacement of 3 layers roofing felts as before specified and cement panels in patches and debris off site (rate per patch).	no	47.30
RF.163	Approved bituminous liquid solution fillings to expansion joints of panel roofing, crevices, cracks, etc. approximately 15 mm wide x 22 mm deep to panel roofing including forming groove if necessary.	m	1.30
RF.164	Approved bituminous liquid solution fillings to expansion joints of panel roofing, crevices, cracks, etc. approximately 15 mm wide x 22 mm deep to panel roofing including forming groove if necessary, in replacement including hacking existing fillings and carting away debris on completion.	m	2.20
RF.165	Investigate and cure leak in tiled roof including providing new tiles not exceeding 0.50sq m in area to match existing for 1st spot of leak (NOTE: Individual block of building considered separately).	no	28.80
RF.166	Investigate and cure leak in tiled roof including providing new tiles not exceeding 0.50sq m in area to match existing for each additional spot of leak (NOTE: Individual block of building considered separately).	no	17.20
RF.167	Seal existing nail or bolts heads with bituminous sealing compound on corrugated roofing sheets (Measured net area from mid-point of nail heads).	sq m	1.60
RF.168	Seal existing nail or bolts heads with liquid-applied membrane of heavy duty acrylic polymer reinforced fiber glass on corrugated roofing sheets (Measured net area from mid-point of nail heads).	sq m	4.80
RF.169	Seal existing side and end laps with bituminous sealing compound irrespective of girth inclusive of cement mortar where necessary.	m	1.60
RF.170	Seal existing side and end laps with liquid applied membrane of heavy duty acrylic polymer reinforced by fiber glass.	m	5.00
RF.171	Supply labour and material to bend deck flange at existing metal roof decking.	m	2.90
RF.172	Take out existing roof sheeting, seal side and end laps with sealing compound and relay including new drive nails and washers or hook bolts and washers (new roof sheeting measured separately).	sq m	12.10
RF.173	Remove existing dead light including frame, glass, etc. and make good to surrounds to receive new, or tiles or roofing sheets to match existing and including removing debris off site (Tiles, roofing sheets and extra roofing joists measured separately).	sq m	25.90
RF.174	Remove existing latern light including frame, glass, etc. and make good to surrounds to receive new, or tiles or roofing sheets to match existing and including removing debris off site (Tiles, roofing sheets and extra roofing joists measured separately) (measured on plan).	sq m	38.90
RF.175	Supply and fix 16 mm diameter steel sag rod exceeding 500 mm and n.e. 800 m long including bolts, nuts and washers.	no	7.90
RF.176 RF.177	Supply and install 150 mm wide "Emfiband" to roof. Formstar clear/coloured weather proof coatings system on flat surfaces laid	m	10.20 20.20
	to fall not exceeding 50sq m.	sq m	
RF.178	Formstar clear/coloured weather proof coatings system on flat surfaces laid to fall exceeding 50sq m.	sq m	18.60
RF.179	Formstar clear/coloured weather proof coatings system on wall, parapet wall, plinth gutter, skirting, upstand and the like exceeding 150 mm girth.	sq m	21.00
RF.180	Prepare new roof decking and apply 2 coats of Flinkote PF 4 or Shellkote Type 3.	sq m	9.10
RF.181	Prepare new metal or concrete roof decking and apply 2 coats of bitumen solution and 2 coats santex-matt coating.	sq m	10.60

S/No	Description	Unit	Unit Cost (\$)
RF.182	Prepare existing metal or concrete roof decking previously painted with	sq m	9.10
RF.183	sandtex-matt coating, clean and apply 2 coats of sandtex-matt coating. Prepare new wall cladding and apply 2 coats of Flinkote PF 4 or Shellkote Type 3.	sq m	9.70
RF.184	Prepare new wall cladding and apply 2 coats of bitumen solution and 2 coats santex-matt coating.	sq m	11.20
RF.185	Prepare existing wall cladding previously painted with sandtex-matt coating, clean and apply 2 coats of sandtex-matt coating.	sq m	9.70
RF.186	Brush down and apply one coat of approved bituminous base aluminium solution formulated with high grade bitumen and finely divided aluminium on surfaces of roofing felt, asphalt, concrete, etc.	sq m	5.50
RF.187	Brush down and apply 3 coats of rubberized flat paint on cement rendering surface	sq m	17.30
RF.188	Prepare existing surfaces of cement rendering, etc. and wash down to receive finishing.	sq m	1.70
RF.189	Supply and apply Vandex waterproofing compound to concrete surface including labour and materials for surface preparation, etc. in accordance with manufacturer's instructions.	sq m	24.00
RF.190	Supply and apply QUIC-seal 102 water proofing compound to concrete surfaces including labour and materials for surface preparation, etc. in accordance with manufacturer's instructions.	sq m	14.30
RF.191	Supply and apply QUIC-seal 102 waterproofing compound to concrete surfaces including labour and materials for surface preparation, etc. in accordance with manufacturer's instructions.	sq m	17.40
RF.192	Supply and lay Bituthene 3000 waterproofing membrane to concrete surface including labour and materials for surface preparation and apply one coat of bituthene primer to receive waterproofing membrane, all as specified and in accordance with the manufacturer's instructions (rate inclusive of the provision of a 10-year warranty).	sq m	13.80
RF.193	Prepare and apply Bituthene EM3000 elastomeric sealant in and including forming of 25 mm width chases in concrete structure, all in accordance with manufacturer's instructions.	m	7.30
RF.194	Supply and lay approved felt as protective cover to Bituthene 3000 waterproofing membrane including EM3000 mastic adhesive.	sq m	7.80
RF.195	Supply and lay over flat roof in 1mx1m x25mm thick panels in cement and sand (1:2) mortar mixed with Sika waterproofing compound as per manufacturer's instructions in the proportion of 2.3 kg of waterproofing compound to 45 kg of cement and 10 m joints subsequently filled with and including bituminous compound.	sq m	21.60
RF.196	Break up existing cement panels, clean up surface and remove debris, hack to form key and supply and lay one layer of Bituprimer and one layer of Asbestumen, each layer is to be about 1.6 mm thick; supply and lay over the Bituprima layer 25 mm thick cement and sand (1:2) mortar mixed with waterproofing compound of Sika or other approved waterproofing compound in accordance with the manufacturer's instructions. The cement and sand mortar shall be laid in panels of not more than 1 m x 1 m square with joints 10 mm wide filled with and including bituminous compound.	sq m	48.00
RF.197	Supply and lay new Bituflex BF-160 self-adhesive waterproof membrane to existing roof surfaces all in accordance with the manufacturer's instructions.	sq m	19.80
RF.198	Supply and lay one coat of Bituprima or Bituproof prior to the application of bitumastic compound as a base.	sq m	4.20

S/No	Description	Unit	Unit Cost (\$)
RF.199	Supply and lay one layer of Bituprima and one layer of Asbestumen	sq m	7.40
RF.200	bitumastic solution to an average thickness of 1.6 mm each layer. Prepare existing flat roof by removing all bituminous joints, plants, debris, etc., cleaning and filling up grooves, cracks etc. with approved sealant and wash clean to receive new roofing. (NOTE: New screed measured	sq m	5.80
RF.201	separately). On flat surfaces laid to fall not exceeding 50sq m, 2.1 mm thick "Nuralite" roof covering system laid in panels of 2.40 m x 0.90 m.	sq m	57.00
RF.202	On flat surfaces laid to fall not exceeding 50sq m, 2.00 mm thick "Carbofol" roof covering system.	sq m	44.40
RF.203	On flat surfaces laid to fall not exceeding 50sq m, 1.00 mm thick "Skellurup Butyclad" roof covering system.	sq m	63.00
RF.204	On flat surfaces laid to fall not exceeding 50sq m, Traffigard roof covering.	sq m	47.90
RF.205	On flat surfaces laid to fall not exceeding 50sq m, Formstar Clear/Colour roof covering.	sq m	20.20
RF.206	On flat surfaces laid to fall not exceeding 50sq m, 4 mm thick "Polygum" roof covering system.	sq m	47.20
RF.207	On flat surfaces laid to fall not exceeding 50sq m, 4 mm thick "Index" roof covering system.	sq m	23.30
RF.208	On flat surfaces laid to fall not exceeding 50sq m, 4.50 mm thick "Index Mineral Green" roof covering system.	sq m	33.40
RF.209	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like not exceeding 50sq m, 2.1 mm thick "Nuralite" roof covering system laid in panels of 2.40 m x 0.90m.	sq m	62.80
RF.210	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like not exceeding 50sq m, 2.00 mm thick "Carbofol" roof covering system.	sq m	48.80
RF.211	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like not exceeding 50sq m, 1.00 mm thick "Skellurup Butyclad" roof covering system.	sq m	69.40
RF.212	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like not exceeding 50sq m, Traffigard roof covering.	sq m	52.70
RF.213	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like not exceeding 50sq m, Formstar Clear/Colour roof covering.	sq m	21.00
RF.214	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like not exceeding 50sq m, 4 mm thick "Polygum" roof covering system.	sq m	50.30
RF.215	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like not exceeding 50sq m, 4 mm thick "Index" roof covering system.	sq m	25.60
RF.216	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like not exceeding 50sq m, 4.50 mm thick "Index Mineral Green" roof covering system.	sq m	36.70
RF.217	On flat surfaces laid to fall exceeding 50sq m, 2.1 mm thick "Nuralite" roof covering system laid in panels of 2.40 m x 0.90 m.	sq m	41.60
RF.218	On flat surfaces laid to fall exceeding 50sq m, 2.00 mm thick "Carbofol" roof covering system.	sq m	37.00
RF.219	On flat surfaces laid to fall exceeding 50sq m, 1.00 mm thick "Skellurup Butyclad" roof covering system.	sq m	58.00
RF.220	On flat surfaces laid to fall exceeding 50sq m, Traffigard roof covering.	sq m	32.80
RF.221	On flat surfaces laid to fall exceeding 50sq m, Formstar Clear/Colour roof covering.	sq m	18.60

S/No	Description	Unit	Unit Cost (\$)
RF.222	On flat surfaces laid to fall exceeding 50sq m, 4 mm thick "Polygum" roof covering system.	sq m	38.80
RF.223	On flat surfaces laid to fall exceeding 50sq m, 4 mm thick "Index" roof covering system.	sq m	21.50
RF.224	On flat surfaces laid to fall exceeding 50sq m, 4.50 mm thick "Index Mineral Green" roof covering system.	sq m	30.80
RF.225	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like exceeding 50sq m, 2.1 mm thick "Nuralite" roof covering system laid in panels of 2.40 m x 0.90 m.	sq m	45.40
RF.226	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like exceeding 50sq m, 2.00 mm thick "Carbofol" roof covering system.	sq m	40.70
RF.227	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like exceeding 50sq m, 1.00 mm thick "Skellurup Butyclad" roof covering system.	sq m	63.00
RF.228	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like exceeding 50sq m, Traffigard roof covering.	sq m	35.30
RF.229	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like exceeding 50sq m, Formstar Clear/Colour roof covering.	sq m	19.40
RF.230	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like exceeding 50sq m, 4 mm thick "Polygum" roof covering system.	sq m	47.90
RF.231	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like exceeding 50sq m, 4 mm thick "Index" roof covering system.	sq m	24.50
RF.232	Supply & lay on wall, parapat wall, conc. plinth, rc gutter, skirting, upstand and the like exceeding 50sq m, 4.50 mm thick "Index Mineral Green" roof covering system.	sq m	35.30
RF.233	Dressing around vent pipes/rainwater outlets and the like, 2.1 mm thick "Nuralite" roof covering system laid in panels of 2.40 m x 0.90 m.	no	21.80
RF.234	Dressing around vent pipes/rainwater outlets and the like, 2.00 mm thick "Carbofol" roof covering system.	no	21.80
RF.235	Dressing around vent pipes/rainwater outlets and the like, 1.00 mm thick "Skellurup Butyclad" roof covering system.	no	13.90
RF.236	Dressing around vent pipes/rainwater outlets and the like, Traffigard roof covering.	no	11.00
RF.237	Dressing around vent pipes/rainwater outlets and the like, 4 mm thick "Polygum" roof covering system.	no	21.80
RF.238	Dressing around vent pipes/rainwater outlets and the like, 4 mm thick "Index" roof covering system.	no	21.80
RF.239	Dressing around vent pipes/rainwater outlets and the like, 4.50 mm thick "Index Mineral Green" roof covering system.	no	21.80
RF.240	On flat surfaces laid to fall not exceeding 50sq m, 0.9mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	sq m	42.20
RF.241	On flat surfaces laid to fall not exceeding 50sq m, 1.2mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	sq m	47.90
RF.242	On flat surfaces laid to fall not exceeding 50sq m, 0.9mm "Hypalon Uniroof Reinforced Membrane" roof covering system.	sq m	50.20
RF.243	On flat surfaces laid to fall not exceeding 50sq m, 1.2mm "Hypalon Uniroof Reinforced Membrane" roof covering system.	sq m	51.70
RF.244	On flat surfaces laid to fall not exceeding 50sq m, 3mm "Uniflame" Polyester Based Torch-On roof covering system.	sq m	34.10
RF.245	On flat surfaces laid to fall not exceeding 50sq m, 4mm "Uniflame" Polyester Based Torch-On roof covering system.	sq m	36.60

S/No	Description	Unit	Unit Cost (\$)
RF.246	On flat surfaces laid to fall not exceeding 50sq m, "Duraroof" Polyurethane	sq m	39.10
RF.247	Based Liquid Membrane roof covering system. Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like not exceeding 50sq m, 0.9mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	sq m	46.40
RF.248	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like not exceeding 50sq m, 1.2mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	sq m	52.70
RF.249	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like not exceeding 50sq m, 0.9mm "Hypalon Uniroof Reinforced Membrane" roof covering system.	sq m	55.20
RF.250	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like not exceeding 50sq m, 1.2mm "Hypalon Uniroof Reinforced Membrane" roof covering system.	sq m	56.90
RF.251	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like not exceeding 50sq m, 3mm "Uniflame" Polyester Based Torch-On rooof covering system.	sq m	37.40
RF.252	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like not exceeding 50sq m, 4mm "Uniflame" Polyester Based Torch-On rooof covering system.	sq m	40.30
RF.253	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like not exceeding 50sq m, "Duraroof" Polyurethane Based Liquid Membrane roof covering system.	sq m	43.10
RF.254	On flat surfaces laid to fall exceeding 50sq m, 0.9mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	sq m	41.60
RF.255	On flat surfaces laid to fall exceeding 50sq m, 1.2mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	sq m	46.70
RF.256	On flat surfaces laid to fall exceeding 50sq m, 0.9mm "Hypalon Uniroof Reinforced Membrane" roof covering system.	sq m	47.90
RF.257	On flat surfaces laid to fall exceeding 50sq m, 1.2mm "Hypalon Uniroof Reinforced Membrane" roof covering system.	sq m	50.40
RF.258	On flat surfaces laid to fall exceeding 50sq m, 3mm "Uniflame" Polyester Based Torch-On roof covering system.	sq m	32.40
RF.259	On flat surfaces laid to fall exceeding 50sq m, 4mm "Uniflame" Polyester Based Torch-On roof covering system.	sq m	33.60
RF.260	On flat surfaces laid to fall exceeding 50sq m, "Duraroof" Polyurethane Based Liquid Membrane roof covering system.	sq m	37.80
RF.261	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like exceeding 50sq m, 0.9mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	sq m	45.80
RF.262	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like exceeding 50sq m, 1.2mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	sq m	51.40
RF.263	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like exceeding 50sq m, 0.9mm "Hypalon Uniroof Reinforced Membrane" roof covering system.	sq m	52.70
RF.264	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like exceeding 50sq m, 1.2mm "Hypalon Uniroof Reinforced Membrane" roof covering system.	sq m	55.40
RF.265	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like exceeding 50sq m, 3mm "Uniflame" Polyester Based Torch-On roof covering system.	sq m	35.60

S/No	Description	Unit	Unit Cost (\$)
RF.266	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like exceeding 50sq m, 4mm "Uniflame" Polyester Based Torch-On roof covering system.	sq m	37.00
RF.267	Supply & lay on wall, parapet wall, conc. Plinth, rc gutter, skirting, upstands and the like exceeding 50sq m, "Duraroof" Polyurethane Based Liquid Membrane roof covering system.	sq m	41.60
RF.268	Dressing around vent pipes/rainwater outlets and the like, 0.9mm "Hypalon Uniroof Membrane" - Fibre Backed roof covering system.	no	21.80

CP.43	28mm thick wrot Kapur tongued and grooved boarding to floors, shelves, fitments, partitions, ceiling, etc in new or existing work (in patches) well cramped up, nailed or screwed to bearers (bearers measured separately)	sq m	56.10
CP.44	38mm thick wrot Kapur tongued and grooved boarding to floors, shelves, fitments, partitions, ceiling, etc in new or existing work (in patches) well cramped up, nailed or screwed to bearers (bearers measured separately)	sq m	60.50
CP.45	13mm thick wrot Balau tongued and grooved boarding to floors, shelves, fitments, partitions, ceiling, etc in new or existing work (in patches) well cramped up, nailed or screwed to bearers (bearers measured separately)	sq m	28.60
CP.46	19mm thick wrot Balau tongued and grooved boarding to floors, shelves, fitments, partitions, ceiling, etc in new or existing work (in patches) well cramped up, nailed or screwed to bearers (bearers measured separately)	sq m	34.10
CP.47	25mm thick wrot Balau tongued and grooved boarding to floors, shelves, fitments, partitions, ceiling, etc in new or existing work (in patches) well cramped up, nailed or screwed to bearers (bearers measured separately)	sq m	52.80

S/No	Description	Unit	Unit Cost (\$)
CP.48	28mm thick wrot Balau tongued and grooved boarding to floors, shelves, fitments, partitions, ceiling, etc in new or existing work (in patches) well cramped up, nailed or screwed to bearers (bearers measured separately)	sq m	59.40
CP.49	38mm thick wrot Balau tongued and grooved boarding to floors, shelves, fitments, partitions, ceiling, etc in new or existing work (in patches) well cramped up, nailed or screwed to bearers (bearers measured separately)	sq m	68.20
CP.50	Take out existing tongued and grooved boarding (any thickness) and remove off site.	sq m	3.00
CP.51	Extra over for pressure impreganted timber boards (any thickness).	sq m	2.60
CP.52	20mm thick tongued and grooved ramin boarding including sanding and polishing surface all according to specialist's instructions.	sq m	105.60
CP.53	20mm thick tongued and grooved ramin boarding including sanding and polishing surface all according to specialist's instructions including bearers below.	sq m	111.10
CP.54	Sawn Kapur, ledged and braced shutters or doors with 19mm butt jointed boarding on 19 mm ledges and braces hung in frames.(Rate does not include framess, glazing, wire gauze and ironmongery)	sq m	65.10
CP.55	Wrot Kapur, ledged and braced shutters or doors with 19mm butt jointed boarding on 19 mm ledges and braces hung in frames. (Rate does not include framess, glazing, wire gauze and ironmongery)	sq m	80.10
CP.56	25mm thick wrot Chengal framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of tongued, grooved and v-jointed match boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	137.50
CP.57	38mm thick wrot Chengal framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of tongued, grooved and v-jointed match boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	160.60
CP.58	44mm thick wrot Chengal framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of tongued, grooved and v-jointed match boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	171.60
CP.59	50mm thick wrot Chengal framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of tongued, grooved and v-jointed match boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	176.00
CP.60	25mm thick wrot Kapur framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of tongued, grooved and v-jointed match boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	96.80
CP.61	38mm thick wrot Kapur framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of tongued, grooved and v-jointed match boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	113.30
CP.62	44mm thick wrot Kapur framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of tongued, grooved and v-jointed match boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	119.90
CP.63	50mm thick wrot Kapur framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of tongued, grooved and v-jointed match boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	129.80

S/No	Description	Unit	Unit Cost (\$)
CP.64	25mm thick wrot Chengal framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of butt jointed boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	129.80
CP.65	38mm thick wrot Chengal framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of butt jointed boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	148.50
CP.66	44mm thick wrot Chengal framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of butt jointed boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	154.00
CP.67	50mm thick wrot Chengal framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of butt jointed boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	158.40
CP.68	25mm thick wrot Kapur framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of butt jointed boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	82.50
CP.69	38mm thick wrot Kapur framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of butt jointed boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	101.20
CP.70	44mm thick wrot Kapur framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of butt jointed boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	107.80
CP.71	50mm thick wrot Kapur framed, ledged and braced shutters or doors (partly glazed if necessary) comprising of butt jointed boarding fixed to frames, ledges and braces to make up the total thickness stated including hanging onto door frames.	sq m	117.70
CP.72	25mm thick Chengal casement or door in panels open to receive glass, waterproof plywood or wire gauze with rebated and moulded rails, stiles, glazing or diving bars and pinned heads including hanging onto door frames (nb: infill panels of glass/plywood/wire gauze, etc to be measured separately)	sq m	92.40
CP.73	38 mm thick Chengal casement or door in panels open to receive glass, waterproof plywood or wire gauze with rebated and moulded rails, stiles, glazing or diving bars and pinned heads including hanging onto door frames (nb: infill panels of glass/plywood/wire gauze, etc to be measured separately)	sq m	104.50
CP.74	44 mm thick Chengal casement or door in panels open to receive glass, waterproof plywood or wire gauze with rebated and moulded rails, stiles, glazing or diving bars and pinned heads including hanging onto door frames (nb: infill panels of glass/plywood/wire gauze, etc to be measured separately)	sq m	108.90
CP.75	50 mm thick Chengal casement or door in panels open to receive glass, waterproof plywood or wire gauze with rebated and moulded rails, stiles, glazing or diving bars and pinned heads including hanging onto door frames (nb: infill panels of glass/plywood/wire gauze, etc to be measured separately)	sq m	113.30

S/No	Description	Unit	Unit Cost (\$)
CP.76	25mm thick Kapur casement or door in panels open to receive glass, waterproof plywood or wire gauze with rebated and moulded rails, stiles, glazing or diving bars and pinned heads including hanging onto door frames (nb: infill panels of glass/plywood/wire gauze, etc to be measured separately)	sq m	74.80
CP.77	38 mm thick Kapur casement or door in panels open to receive glass, waterproof plywood or wire gauze with rebated and moulded rails, stiles, glazing or diving bars and pinned heads including hanging onto door frames (nb: infill panels of glass/plywood/wire gauze, etc to be measured separately)	sq m	82.50
CP.78	44 mm thick Kapur casement or door in panels open to receive glass, waterproof plywood or wire gauze with rebated and moulded rails, stiles, glazing or diving bars and pinned heads including hanging onto door frames (nb: infill panels of glass/plywood/wire gauze, etc to be measured separately)	sq m	86.90
CP.79	50 mm thick Kapur casement or door in panels open to receive glass, waterproof plywood or wire gauze with rebated and moulded rails, stiles, glazing or diving bars and pinned heads including hanging onto door frames (nb: infill panels of glass/plywood/wire gauze, etc to be measured separately)	sq m	91.30
CP.80	25mm thick Chengal panelled casement or door partly panelled with solid timber or plywood not exceeding 12mm thick partly open for glazing with rebated and moulded rails, stiles, glazing beads including hanging onto door frames (glass panel measured separately).	sq m	113.30
CP.81	38 mm thick Chengal panelled casement or door partly panelled with solid timber or plywood not exceeding 12mm thick partly open for glazing with rebated and moulded rails, stiles, glazing beads including hanging onto door frames (glass panel measured sepa	sq m	117.70
CP.82	44 mm thick Chengal panelled casement or door partly panelled with solid timber or plywood not exceeding 12mm thick partly open for glazing with rebated and moulded rails, stiles, glazing beads including hanging onto door frames (glass panel measured separately).	sq m	123.20
CP.83	50 mm thick Chengal panelled casement or door partly panelled with solid timber or plywood not exceeding 12mm thick partly open for glazing with rebated and moulded rails, stiles, glazing beads including hanging onto door frames (glass panel measured sepa	sq m	129.80
CP.84	25mm thick Kapur panelled casement or door partly panelled with solid timber or plywood not exceeding 12mm thick partly open for glazing with rebated and moulded rails, stiles, glazing beads including hanging onto door frames (glass panel measured separately)	sq m	83.60
CP.85	38 mm thick Kapur panelled casement or door partly panelled with solid timber or plywood not exceeding 12mm thick partly open for glazing with rebated and moulded rails, stiles, glazing beads including hanging onto door frames (glass panel measured separately)	sq m	92.40
CP.86	44 mm thick Kapur panelled casement or door partly panelled with solid timber or plywood not exceeding 12mm thick partly open for glazing with rebated and moulded rails, stiles, glazing beads including hanging onto door frames (glass panel measured separately)	sq m	96.80
CP.87	50 mm thick Kapur panelled casement or door partly panelled with solid timber or plywood not exceeding 12mm thick partly open for glazing with rebated and moulded rails, stiles, glazing beads including hanging onto door frames (glass panel measured separately)	sq m	101.20

S/No	Description	Unit	Unit Cost (\$)
CP.88	38mm thick Chengal louvred casement or comprising of twice splayed louvres fixed at an angle of 60 degrees not more than 40mm apart and rebated and moulded and stiles including hanging onto frames.	sq m	111.10
CP.89	44 mm thick Chengal louvred casement or comprising of twice splayed louvres fixed at an angle of 60 degrees not more than 40mm apart and rebated and moulded and stiles including hanging onto frames.	sq m	117.70
CP.90	50 mm thick Chengal louvred casement or comprising of twice splayed louvres fixed at an angle of 60 degrees not more than 40mm apart and rebated and moulded and stiles including hanging onto frames.	sq m	122.10
CP.91	38mm thick Kapur louvred casement or comprising of twice splayed louvres fixed at an angle of 60 degrees not more than 40mm apart and rebated and moulded and stiles including hanging onto frames.	sq m	88.00
CP.92	44 mm thick Kapur louvred casement or comprising of twice splayed louvres fixed at an angle of 60 degrees not more than 40mm apart and rebated and moulded and stiles including hanging onto frames.	sq m	92.40
CP.93	50 mm thick Kapur louvred casement or comprising of twice splayed louvres fixed at an angle of 60 degrees not more than 40mm apart and rebated and moulded and stiles including hanging onto frames.	sq m	93.50
CP.94	21mm thick covered on both sides with 4 mm thick waterproof plywood hollow flush door or cupboard door comprising of kapur skeleton framing and lipping all round including hanging onto door frames	sq m	51.00
CP.95	27mm thick covered on both sides with 6 mm thick waterproof plywood hollow flush door or cupboard door comprising of kapur skeleton framing and lipping all round including hanging onto door frames	sq m	82.50
CP.96	31mm thick covered on both sides with 6 mm thick waterproof plywood hollow flush door or cupboard door comprising of kapur skeleton framing and lipping all round including hanging onto door frames	sq m	88.00
CP.97	40mm thick covered on both sides with 6 mm thick waterproof plywood hollow flush door or cupboard door comprising of kapur skeleton framing and lipping all round including hanging onto door frames	sq m	99.00
CP.98	43mm thick covered on both sides with 9 mm thick waterproof plywood hollow flush door or cupboard door comprising of kapur skeleton framing and lipping all round including hanging onto door frames	sq m	110.00
CP.99	37mm thick Kapur hollow flush door comprising of Kapur skeleton framing and lipping all round covered on both sides with waterproof plywood as shown in Appendices 9/10/11including hanging onto door frames	sq m	92.40
CP.100	43mm thick Kapur hollow flush door comprising of Kapur skeleton framing and lipping all round covered on both sides with waterproof plywood as shown in Appendices 9/10/11including hanging onto door frames	sq m	96.80
CP.101	48mm thick Kapur hollow flush door comprising of Kapur skeleton framing and lipping all round covered on both sides with waterproof plywood as shown in Appendices 9/10/11including hanging onto door frames	sq m	100.50
CP.102	Extra over above items (CP073 to CP080) for constructing fixed aluminium louvre as shown in Appendices 10C/10D/12/14	sq m	11.60
CP.103	Extra over above items (CP073 to CP080) for glazed peephole as shown in Appendices 10A/10B/10C/13/14	sq m	6.90
CP.104	39mm thick Kapur semi-flush door comprising of hardwood skeleton framing lipping all round including hanging onto door frame including rebated V-jointed Kapur panel as shown in Appendix 15	sq m	109.80
CP.105	48mm thick Kapur semi-flush door comprising of hardwood skeleton framing lipping all round including hanging onto door frame including rebated V-jointed Kapur panel as shown in Appendix 15	sq m	117.80

S/No	Description	Unit	Unit Cost (\$)
CP.106	39mm thick Chengal semi-flush comprising of hardwood skeleton framing lipping all round including hanging onto door frame including rebated V-jointed Chengal panel as shown in Appendix 15	sq m	167.50
CP.107	48mm thick Chengal semi-flush door comprising of hardwood skeleton framing lipping all round including hanging onto door frame including rebated V-jointed Chengal panel as shown in Appendix 15	sq m	182.50
CP.108	38 mm thick Kapur solid core flush door as shown in Appendix 16 comprising of hardwood lipping all round, core strips, plywood and reinforcing bars including hanging onto door frames	sq m	225.00
CP.109	50 mm thick Kapur solid core flush door as shown in Appendix 16 comprising of hardwood lipping all round, core strips, plywood and reinforcing bars including hanging onto door frames	sq m	285.00
CP.110	38 mm thick Chengal solid core flush door as shown in Appendix 16 comprising of hardwood lipping all round, core strips, plywood and reinforcing bars including hanging onto door frames	sq m	290.00
CP.111	50 mm thick Chengal solid core flush door as shown in Appendix 16 comprising of hardwood lipping all round, core strips, plywood and reinforcing bars including hanging onto door frames	sq m	295.00
CP.112	38 mm thick Kapur solid panel door as shown in Appendix 17 comprising tongued and grooved battens including reinforcing bars, and hanging onto door frames	sq m	228.00
CP.113	50 mm thick Kapur solid panel door as shown in Appendix 17 comprising tongued and grooved battens including reinforcing bars, and hanging onto door frames	sq m	310.00
CP.114	38 mm thick Chengal solid panel door as shown in Appendix 17 comprising tongued and grooved battens including reinforcing bars, and hanging onto door frames	sq m	375.00
CP.115	50 mm thick Chengal solid panel door as shown in Appendix 17 comprising tongued and grooved battens including reinforcing bars, and hanging onto door frames	sq m	385.00
CP.116	38mm thick Kapur solid panel door including glazed panel as shown in Appendix 18 comprising tongued and grooved battens including reinforcing bars, and hanging onto door frames.	sq m	235.00
CP.117	50mm thick Kapur solid panel door including glazed panel as shown in Appendix 18 comprising tongued and grooved battens including reinforcing bars, and hanging onto door frames.	sq m	320.00
CP.118	38mm thick Chengal solid panel door including glazed panel as shown in Appendix 18 comprising tongued and grooved battens including reinforcing bars, and hanging onto door frames.	sq m	385.00
CP.119	50mm thick Chengal solid panel door including glazed panel as shown in Appendix 18 comprising tongued and grooved battens including reinforcing bars, and hanging onto door frames.	sq m	392.00
CP.120	Supply and install approved PVC folding door	sq m	110.00
CP.121	Supply and install approved UPVC flush door c/w approved lock and hinges.	sq m	116.10
CP.122	Supply and install a complete set of UPVC door frame.	set	148.50
CP.123	900 x 2100 x 45mm thick, single leaf, Polynorm 1/2 hour rated timber fire door complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame	no	935.00
CP.124	900 x 2100 x 46mm thick, single leaf, Pyropanel 1/2 hour rated timber fire door complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame	no	990.00

S/No	Description	Unit	Unit Cost (\$)
CP.125	1200 x 2100 x 45mm thick, double unequal leaf, Polynorm 1/2 hour rated timber fire door complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame	no	1628.00
CP.126	1200 x 2100 x 48mm thick, double unequal leaf, Pyropanel 1/2 hour rated timber fire door complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame	no	1265.00
CP.127	900 x 2100 x 48mm thick, single leaf, Pyropanel 1 hour rated timber fire door complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame	no	1285.90
CP.128	1200 x 2100 x 48 mm thick, single leaf, Pyropanel 1 hour rated timber fire door complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame	no	1493.80
CP.129	900 x 2100 x 48mm thick, single leaf, Pyropanel 2 hour rated timber fire door complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame	no	1417.90
CP.130	2100 x 2100 x 48mm thick, double unequal leaf, Pyropanel 2 hour rated timber fire door complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame	no	1645.60
CP.131	900x2400x50mm thk,single leaf laminated semi-solid timber flush door with complete ironmongeries (except lockset)	no	680.00
CP.132	1200x2150x50mm thk,11/4 leaf laminated semi-solid timber flush door with complete ironmongeries (except lockset)	no	910.00
CP.133	1800x2400x50mm thk,double equal leaf laminated semi-solid timber door with complete ironmongery (except lockset)	no	1040.00
CP.134	Supply and fix 36 mm approved fibreglass door c/w approved lock and hinges.	sq m	145.20
CP.135	Labour and materials for cutting glazed peephole in door (any size and shape).	no	33.00
CP.136	Labour and materials for cutting hole in door (any size and shape) and fixed with louvres.	no	77.00
CP.137	Take out ledged and braced shutters or doors not exceeding 3.00sq m (Chengal, Kapur, Keruing, Meranti) replace not more than three ledges and/or braces by new and rehang including carting away old materials (area of door measured).	sq m	20.80
CP.138	Take out ledged and braced shutters or doors exceeding 3.00sq m (Chengal, Kapur, Keruing, Meranti) replace not more than three ledges and/or braces by new and rehang including carting away old materials (area of door measured).	sq m	27.10
CP.139	Replace small (not exceeding 0.20sq m) amounts of boarding (Chengal, Kapur, Keruing, Meranti) in ledged/lipping and braced shutters or doors not exceeding 3.00 sq m including taking down, rehanging and carting away old materials (area of door measured).	sq m	20.80
CP.140	Replace small (not exceeding 0.20sq m) amounts of boarding (Chengal, Kapur, Keruing, Meranti) in ledged/lipping and braced shutters or doors exceeding 3.00 sq m including taking down, rehanging and carting away old materials (area of door measured).	sq m	31.80
CP.141	Take down framed, ledged/lipping and braced shutters not exceeding 3.00sq m (any type) replace not more than three ledges, frames and/or braces, glazing bars by new and rehang including carting away old materials (area of door measured).	sq m	24.00

S/No	Description	Unit	Unit Cost (\$)
CP.142	Take down framed, ledged/lipping and braced shutters exceeding 3.00sq m (any type) replace not more than three ledges, frames and/or braces, glazing bars by new and rehang including carting away old materials (area of door measured).	sq m	30.60
CP.143	Replacement small (not exceeding 0.20 sq m) amounts of boarding (any type) in framed ledged and braced shutters or door not exceeding 3.00sq m including taking down, rehanging and removing old boards off site (area of door measured).	sq m	29.60
CP.144	Replacement small (not exceeding 0.20 sq m) amounts of boarding (any type) in framed ledged and braced shutters or door exceeding 3.00sq m including taking down, rehanging and removing old boards off site (area of door measured).	sq m	38.40
CP.145	Take down casement window, shutter or door, etc remove ironmongery and remove remainder off site, or cart away off site. (Rate per leaf not exceeding 3.00 sq m)	no	5.70
CP.146	Take down casement window, shutter or door, etc remove ironmongery and remove remainder off site, or cart away off site. (Rate per leaf exceeding 3.00 sq m)	sq m	1.40
CP.147	Take down casement window, shutter or door, etc not exceeding 3.00sq m, replace wedges, cramp up secure all joints, refix, rehang and adjust ironmongery (new ironmongery measured separately).	no	16.60
CP.148	Take down exisiting alumin door frames and refix to another new position including the provision of all necessary new accessories and making good all works disturbed	no	12.00
CP.149	Take down casement window, shutter or door, etc exceeding 3.00sq m, replace wedges, cramp up secure all joints, refix, rehang and adjust ironmongery (new ironmongery measured separately). (Area of door measured.)	sq m	6.90
CP.150	Fix and hang only casement window shutter or door, not exceeding 3.00sq m (excluding supply of new ironmongery and frame).	no	8.10
CP.151	Fix and hang only casement window shutter or door, exceeding 3.00sq m (excluding supply of new ironmongery and frame).(area of door measured.)	sq m	3.40
CP.152	Take down casement window or door not exceeding 3.00sq m (any type) take out some or all panels or louvres, prepare rail, styles and muntins as necessary for glazing (including providing beads), replace wedges, cramp up, secure all joints, refix, rehang and adjust ironmongery. (New ironmongery measured separately.)	no	54.30
CP.153	Take down casement window or door exceeding 3.00sq m (any type) take out some or all panels or louvres, prepare rail, styles and muntins as necessary for glazing (including providing beads), replace wedges, cramp up, secure all joints, refix, rehang and adjust ironmongery. (New ironmongery measured separately.)(area of door measured)	sq m	22.70
CP.154	Take down existing timber door not exceeding 3.00sq m, trim to reduce height or width not exceeding 50mm, including making good paintwork, adjust door and rehang. (New ironmongery measured separately.)	no	28.90
CP.155	Trim to reduce height or width not exceeding 50mm(for door not exceeding 3 sq m), including making good paintwork, adjust door and rehang without taking down existing door. (New ironmongery measured separately.)	no	8.80
CP.156	Take down existing timber door exceeding 3.00sq m trim to reduce height or width not exceeding 50mm, including making good paintwork and adjust door. (New ironmongery measured separately.)(area of door measured)	sq m	12.10

S/No	Description	Unit	Unit Cost (\$)
CP.157	Take out one only of either style, muntin or glazing bar in wrot panelled, glazed or louvred casement, shutter or doors (any type) not exceeding 3.00sq m, remove off site and replace the rail, etc by new to match including taking down, splicing, framing up and rehanging as necessary (new ironmongery measured separately)	no	35.90
CP.158	Replace plywood (any thickness) panels or solid wrot timber panels in windows, shutters or doors exceeding 3.00sq m including taking down, framing up and rehang as necessary, and removing old panels off site (new ironmongery measured separately) (area of door measured)	sq m	22.10
CP.159	Replace small area (not exceeding 3 louvres) of louvres in windows, shutters or doors exceeding 3.00sq m including taking down, framing up and rehang as necessary, and removing old panels off site (new ironmongery measured separately) (area of door measured)	sq m	24.00
CP.160	Ease/adjust and trim (when necessary) doors and windows (any type and size) including taking down, rehanging and make good disturbed areas as necessary.	no	24.20
CP.161	Ease/adjust and trim (when necessary) doors and windows (any type and size) without taking down existing door including making good disturbed areas as necessary.	no	12.80
CP.162	Labour for preparing existing door jamb to receive new work.	no	4.60
CP.163	Supply & install 12mm thick clear tempered glass door 1950mmHx975mmW c/w Dorma bottom pivot hinge	no	1496.00
CP.164	Service Dorma operated auto-swing glass system including EM lock (exclude part replacement)	no	198.00
CP.165	S & I Dorma ED200 motor assembly for each auto-swing glass door leaf	no	1980.00
CP.166	Supply & install Dorma bottom pivot hinge including taking down & fix back door leaf, motor and accessories	no	715.00
CP.167	Supply & install Dorma EM lock including take down & dispose existing part(s) & make good	no	748.00
CP.168	Supply and replace ED200A board for 'DORMA' auto glass door.	no	445.50
CP.169	Extra for encasing new door with 0.5 mm aluminium or glavanised iron sheeting including pinning with non-ferrous nails.	sq m	25.20
CP.170	Extra for encasing new door with 0.8 mm aluminium or glavanised iron sheeting including pinning with non-ferrous nails.	sq m	28.70
CP.171	Extra for encasing existing door with 0.5 mm aluminium or glavanised iron sheeting including pinning with non-ferrous nails, preparation, taking down and rehanging door.	sq m	28.50
CP.172	Extra for encasing existing door with 0.8 mm aluminium or glavanised iron sheeting including pinning with non-ferrous nails, preparation, taking down and rehanging door.	sq m	32.10
CP.173	1 mm thick stainless steel plate fixed to new or existing door, partition etc with approved screws.	sq m	157.30
CP.174	2 mm thick stainless steel plate fixed to new or existing door, partition etc with approved screws.	sq m	193.60
CP.175	3 mm thick stainless steel plate fixed to new or existing door, partition etc with approved screws.	sq m	239.60
CP.176	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Ramin timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame not exceeding 2,000sq mm cross-sectional area)	m	9.90
CP.177	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Kapur timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame not exceeding 2,000sq mm	m	9.80

S/No	Description	Unit	Unit Cost (\$)
	cross-sectional area)		
CP.178	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Chengal timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame not exceeding 2,000sq mm	m	10.50
CP.179	cross-sectional area) Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Balau timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame not exceeding 2,000sq mm cross-sectional area)	m	9.40
CP.180	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Ramin timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 2,000sq mm and not exceeding 4,000sq mm cross-sectional area)	m	15.50
CP.181	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Kapur timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 2,000sq mm and not exceeding 4,000sq mm cross-sectional area)	m	13.50
CP.182	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Chengal timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 2,000sq mm and not exceeding 4,000sq mm cross-sectional area)	m	14.90
CP.183	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Balau timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 2,000sq mm and not exceeding 4,000sq mm cross-sectional area)	m	14.30
CP.184	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Ramin timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 4,000sq mm and not exceeding 6,000sq mm cross-sectional area)	m	24.80
CP.185	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Kapur timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 4,000sq mm and not exceeding 6,000sq mm cross-sectional area)	m	21.80
CP.186	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Chengal timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 4,000sq mm and not exceeding 6,000sq mm cross-sectional area)	m	26.80
CP.187	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Balau timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 4,000sq mm and not exceeding 6,000sq mm cross-sectional area)	m	26.40
CP.188	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Ramin timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 6,000sq mm cross-sectional area)	m	27.00
CP.189	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Kapur timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 6,000sq mm cross-sectional area)	m	34.40

S/No	Description	Unit	Unit Cost (\$)
CP.190	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Chengal timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 6,000sq mm cross-sectional area)	m	37.40
CP.191	Frame, head, mullion, transome, studs, cill fitments, joinery, etc in wrot Balau timber worked to the required shape including forming grooves, rebated, throats, weathered edges etc (Frame exceeding 6,000sq mm cross-sectional area)	m	36.30
CP.192	Add to any of above items (CP145 to CP160) if pressure impregnated.	m	0.80
CP.193	Cut out lengths of framing not exceeding 2,000sq mm cross-sectional area to existing door, window, partition, studding, staircase, joinery, fitment etc remove off site, and where necessary prepare cut surface to receive new	m	3.30
CP.194	Cut out lengths of framing exceeding 2,000sq mm and not exceeding 4,000sq mm cross-sectional area to existing door, window, partition, studding, staircase, joinery, fitment etc remove off site, and where necessary prepare cut surface to receive new	m	4.40
CP.195	Cut out lengths of framing exceeding 4,000sq mm cross-sectional area to existing door, window, partition, studding, staircase, joinery, fitment etc remove off site, and where necessary prepare cut surface to receive new (Appendix 19).	m	5.00
CP.196	Labour cutting existing frame to form grooves, rebates, throats, etc not exceeding 1,500sq mm in sectional area.	m	4.00
CP.197	Take out existing frame for door, window, etc provide temporary support if necessary, remove off site and make good reveal.	m	41.80
CP.198	Take out existing frame for door, window, etc cramp up re-wedge joint and refix, provide temporary support if necessary, remove off site and make good reveal.	no	50.60
CP.199	Beads, picture rails, skirtings, architraves, fillets, etc in wrot Remin timber not exceeding 500sq mm in sectional area (irrespective of profile).	m	9.50
CP.200	Add CP168 for each additional increase of 500sq mm sectional area	m	1.10
CP.201	Beads, picture rails, skirtings, architraves, fillets, etc in wrot Chengal timber not exceeding 500sq mm in sectional area (irrespective of profile).	m	9.90
CP.202	Add CP170 for each additional increase of 500sq mm sectional area	m	1.10
CP.203	Beads, picture rails, skirtings, architraves, fillets, etc in wrot Kapur timber not exceeding 500sq mm in sectional area (irrespective of profile).	m	9.20
CP.204	Add CP172 for each additional increase of 500sq mm sectional area	m	0.90
CP.205 CP.206	Add to any of the above items (CP168 to CP173) if pressure impregnated. Cut out lengths of existing beads, picture rails skirtings, architraves, fillets, etc (any size) remove off site and where necessary prepare cut surface to receive new.	m m	0.80 2.00
CP.207	Supply and install standard partition comprising sawn Kapur framing not exceeding 4,000sq mm in sectional area fixed at 600mm centre both ways (lining measured separately).	sq m	17.60
CP.208	Supply and install standard partition comprising sawn Kapur framing exceeding 4,000sq mm and not exceeding 6,500sq mm in sectional area fixed at 600mm centre both ways (lining measured separately).	sq m	19.80
CP.209	Supply and install standard partition comprising Chengal sawn framing not exceeding 4,000sq mm in sectional area fixed at 600mm centre both ways (lining measured separately)	sq m	22.20
CP.210	Supply and install standard partition comprising Chengal sawn framing exceeding 4,000sq mm and not exceeding 6,500sq mm in sectional area fixed at 600mm centre both ways (lining measured separately)	sq m	29.60

S/No	Description	Unit	Unit Cost (\$)
CP.211	Take down existing timber partition and remove off site.	sq m	8.50
CP.212	Take down existing timber partition but rebuild in large section using the same material and cart away remaining off site.	sq m	19.40
CP.213	Labour and material for cutting opening in partition to receive ducts, telephone tray, etc (any size) and including additional bearers (new opening frame and telephone tray/ducting measured separately).	no	64.10
CP.214	Making opening in existing timber partition and fix frame (any size) for air- conditioner including making good surrounds and cart away debris off site (rate inclusive of new opening frame).	no	69.00
CP.215	Supply and install approved toilet compartment consisting of 10mm thick solid compact laminate finished with melamine on both sides c/w stainless steel leg supports etc. (colour of lamination to be approved)	sq m	259.90
CP.216	Supply and install approved toilet compartment consisting of 13mm thick solid compact laminate finished with melamine on both sides c/w stainless steel leg supports etc. (colour of lamination to be approved)	sq m	308.00
CP.217	Supply and install door consisting of 10mm thick solid compact laminate finished with melamine on both sides and c/w stainless steel leg supports, heavy duty gravity hinges, indicator bolt, aluminium trimmings, etc.	sq m	279.50
CP.218	Supply and install door consisting of 13mm thick solid compact laminate finished with melamine on both sides and c/w stainless steel leg supports, heavy duty gravity hinges, indicator bolt, aluminium trimmings, etc.	sq m	326.70
CP.219	Dismantle toilet partitions and remove off site including make good affected areas.	no	9.90
CP.220	Supply and fix 20mm thick fibreglass door or hardboard door to WC compartment including 1.5 pairs of 100 x 75mm stainless steel butt hinges.	sq m	154.00
CP.221	Supply and fix in replacement Moflex toilet partitions 10mm thick, model Ardmoe including all necessary accessories and of approved colour.	sq m	198.00
CP.222	Supply and fix in replacement Moflex toilet cubicle door 10mm thick of approved colour complete with hinges	sq m	220.00
CP.223	Supply and fix 1200 x 200 x 3mm thick black common rubber sheet to edge of toilet partition including 25 x 6mm thick aluminium strip and 6mm diameter x 13mm long bolts and nuts.	no	23.10
CP.224	Take out existing Chengal treads and risers, remove off site and replace with new to match existing including wedging, screwing, blocking and bracketting as necessary.	sq m	100.10
CP.225	Take out existing Kapur treads and risers, remove off site and replace with new to match existing including wedging, screwing, blocking and bracketting as necessary.	sq m	63.50
CP.226	Take out existing Balau treads and risers, remove off site and replace with new to match existing including wedging, screwing, blocking and bracketting as necessary.	sq m	68.80
CP.227	Cut out length of existing string to Chengal staircase, remove off site and replace with new to match including all necessary splicing joints, forming housing for treads and risers, refixing balusters and under-pinning	cu m	2009.70
CP.228	Cut out length of existing string to Kapur staircase, remove off site and replace with new to match including all necessary splicing joints, forming housing for treads and risers, refixing balusters and under-pinning	cu m	1299.40
CP.229	Cut out length of existing string to Balau staircase, remove off site and replace with new to match including all necessary splicing joints, forming housing for treads and risers, refixing balusters and under-pinning	cu m	1605.50

S/No	Description	Unit	Unit Cost (\$)
CP.230	Cut out length of Chengal wall hand-rail or handrail to balustrade including frames, bends, etc remove off site and replace with new to match including all necessary splicing joints to existing brackets and joints to dowels and balusters.	cu m	2427.80
CP.231	Cut out length of Balau wall hand-rail or handrail to balustrade including frames, bends, etc remove off site and replace with new to match including all necessary splicing joints to existing brackets and joints to dowels and balusters.	cu m	1692.10
CP.232	Take out existing chengal baluster, remove off site and replace with new to match including housing at both ends.	no	26.40
CP.233	Take out existing Kapur baluster, remove off site and replace with new to match including housing at both ends.	no	21.80
CP.234	Take out existing balau baluster, remove off site and replace with new to match including housing at both ends.	no	26.80
CP.235	Cut out short length of existing chengal newel (not exceeding 10,000sq mm cross-sectional area), remove off site and replace with new to match including temporary support if necessary and housing for handrails, string etc.	m	37.40
CP.236	Cut out short length of existing Kapur newel (not exceeding 10,000sq mm cross-sectional area), remove off site and replace with new to match including temporary support if necessary and housing for handrails, string etc.	m	36.30
CP.237	Cut out short length of existing Balau newel (not exceeding 10,000sq mm cross-sectional area), remove off site and replace with new to match including temporary support if necessary and housing for handrails, string etc.	m	38.00
CP.238	Take down existing balustrade and rebuild using the same material including new wedges for joints, glueing, cramping etc.	no	48.50
CP.239	Secure existing handrail to existing wall bracket or to existing newel or other support.	no	9.70
CP.240	Secure one end of loose baluster.	no	2.30
CP.241	6mm thick calcium silicate board reinforced with cellulose for internal use only and including fixing to bearers. (Bearers measured separately).	sq m	19.00
CP.242	9mm thick calcium silicate board reinforced with cellulose for internal use only and including fixing to bearers. (Bearers measured separately).	sq m	23.30
CP.243	12mm thick calcium silicate board reinforced with cellulose for internal use only and including fixing to bearers. (Bearers measured separately).	sq m	29.20
CP.244	15mm thick calcium silicate board reinforced with cellulose for internal use only and including fixing to bearers. (Bearers measured separately).	sq m	53.70
CP.245	4.5mm thick calcium silicate board reinforced with selected fibres and fillers for internal and external use and including fixing to bearers (bearers measured separately).	sq m	30.00
CP.246	6mm thick calcium silicate board reinforced with selected fibres and fillers for internal and external use and including fixing to bearers (bearers measured separately).	sq m	38.90
CP.247	9mm thick calcium silicate board reinforced with selected fibres and fillers for internal and external use and including fixing to bearers (bearers measured separately).	sq m	59.80
CP.248	12mm thick calcium silicate board reinforced with selected fibres and fillers for internal and external use and including fixing to bearers (bearers measured separately).	sq m	108.20

S/No	Description	Unit	Unit Cost (\$)
CP.249	6mm thick top gradefibre resistance calcium silicate board reinforced with selected fibres and fillers for internal use and including fixing to bearers (bearers measured separately).	sq m	26.40
CP.250	9mm thick top gradefibre resistance calcium silicate board reinforced with selected fibres and fillers for internal use and including fixing to bearers (bearers measured separately).	sq m	33.00
CP.251	12mm thick top gradefibre resistance calcium silicate board reinforced with selected fibres and fillers for internal use and including fixing to bearers (bearers measured separately).	sq m	37.60
CP.252	4.5mm thick fibre-reinforced cement building board fixed to bearers (bearers measured separately).	sq m	17.60
CP.253	6mm thick fibre-reinforced cement building board fixed to bearers (bearers measured separately).	sq m	19.10
CP.254	9mm thick fibre-reinforced cement building board fixed to bearers (bearers measured separately).	sq m	32.70
CP.255	12mm thick fibre-reinforced cement building board fixed to bearers (bearers measured separately).	sq m	26.40
CP.256	6mm thick top grade fire-reisistance fibre-reinforced cement building board fixed to bearers (bearers measured separately)	sq m	27.50
CP.257	9mm thick top grade fire-reisistance fibre-reinforced cement building board fixed to bearers (bearers measured separately)	sq m	38.30
CP.258	12mm thick top grade fire-reisistance fibre-reinforced cement building board fixed to bearers (bearers measured separately)	sq m	46.60
CP.259	6mm thick cement building board fixed to bearers (Bearers measured separately).	sq m	16.60
CP.260	8mm thick cement building board fixed to bearers (Bearers measured separately).	sq m	18.00
CP.261	10mm thick cement building board fixed to bearers (Bearers measured separately).	sq m	19.70
CP.262	12mm thick cement building board fixed to bearers (Bearers measured separately).	sq m	23.10
CP.263	16mm thick cement building board fixed to bearers (Bearers measured separately).	sq m	29.70
CP.264	18mm thick cement building board fixed to bearers (Bearers measured separately).	sq m	37.00
CP.265	24mm thick cement building board fixed to bearers (Bearers measured separately).	sq m	43.60
CP.266	10mm thick approved gypsum board pinned to bearers or fixed with brass screws to bearers (Bearers measured separately)	sq m	15.80
CP.267	13mm thick approved gypsum board pinned to bearers or fixed with brass screws to bearers (Bearers measured separately)	sq m	17.60
CP.268	2mm thick lead sheet lining covered with and including laminated gypsum board.	sq m	261.40
CP.269	3mm thick lead sheet lining covered with and including laminated gypsum board.	sq m	332.80
CP.270	13mm thick approved termite-proof fibre-board fixed to bearers with and including galvanised clout headed nail set out symmetrically and finished with V-shaped butt joints (bearers measured separately)	sq m	7.70
CP.271	13mm thick fibre board ceiling lining or wall panelling (timber framing and painting measured separately).	sq m	15.40
CP.272	Extra over fibreboard lining for junction piece not exceeding 75mm x 13mm fixed to bearers with and including galvanised clout headed nail set out symmetrically and finished with V-shaped butt joints (bearers measured	m	1.50

CP.302	25mm thick approved marine plywood fixed and glued with an approved compound as panelling or pinned or fixed to bearers with brass screws (Bearers measured separately).	sq m	66.00
CP.303 CP.304	Decorative vinyl or veneer (any thickness) to gypsum board, plywood, etc. 0.8mm thick laminated plastic lining fixed to timber surfaces with approved adhesive compound including preparing surface.	sq m sq m	7.60 19.40
CP.305	1mm thick laminated plastic lining fixed to timber surfaces with approved adhesive compound including preparing surface.	sq m	22.20
CP.306	1.3 mm thick laminated plastic lining fixed to timber surfaces with approved adhesive compound including preparing surface.	sq m	25.10
CP.307	1mm thick decorative steel plate formica fixed to timber surfaces with approved adhesive compound including preparing surface	sq m	101.60
CP.308	Strip existing laminated plastic veneer lining, remove off site and prepare surfaces to receive new.	sq m	3.90
CP.309	10mm thick (at mid-point) Ramin panel comprising of 75mm wide or 100mm wide Ramin strips shaoed to required sizes and design, fixed to timber bearers (Bearers measured separately).	sq m	104.00
CP.310	Take out existing lining (any type and thickness) from partition, counter tops, fitments, wall panels and the like, remove old boards off site and prepare surrounds to receive new.	sq m	2.60

S/No	Description	Unit	Unit Cost (\$)
CP.311	Take out existing lining (any type and thickness) from partition, counter tops, fitments, wall panels and the like, set aside old boards for reuse and prepare surrounds to receive new.	sq m	2.20
CP.312	Take from stack and refix old lining (not exceeding 6mm thick) including new fasteners.	sq m	4.10
CP.313	Take from stack and refix old lining (exceeding 6mm thick and not exceeding 15mm thick) including new fasteners.	sq m	5.10
CP.314	Take from stack and refix old lining (exceeding 15mm thick) including new fasteners.	sq m	6.10
CP.315	Refix only existing plastic lamination after all necessary surface preparations using approved adhesive (Min. 0.5sq m)	sq m	5.50
CP.316	Supply and install 50mm thick light weight partitions all in accordance with the manufacturer's instructions.	sq m	69.30
CP.317	Supply and install cushion lining to peddle cell walls and floor consisting of 6mm thk plywood backing, 50mm foam rubber infill, 1 layer of PVC sheet and 1 layer of canvas dressing, each panel not exceeding 600mm width including lining around squatting pan, observation opening.	sq m	76.20
CP.318	Supply and fix nylon fly-proof netting (14 mesh x 31 gauge) to window, door, panels, etc.	sq m	4.70
CP.319	Supply & Install fly-proof netting 640mm x 410mm magnetic screen for Hostel door louvres.	no	110.00
CP.320	Take out and cart away nylon fly-proof netting (14 mesh x 31 gauge) and prepare surrounds to receive new.	sq m	0.80
CP.321	Take out existing chicken wire netting in fence including any framing or posts (any type) with foundations, remove off site and including making good work disturbed.	sq m	1.50
CP.322	Take out existing chicken wire netting, cart away from site or lay aside for re-use.	sq m	1.20
CP.323	Take from stack and fix only chicken wire netting.	sq m	2.80
CP.324	24 gauge galvanised iron hex chicken wire netting (13 mm each) (fillets measured separately)	sq m	5.70
CP.325	Supply only 13mm x 13mm x 1.2mm thick stainless steel chicken wire mesh.	sq m	34.70
CP.326	Install only stainless steel chicken wire mesh.	sq m	5.50
CP.327	Expanded steel ornamesh 16mm x 38mm x 1mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	5.80
CP.328	Expanded steel ornamesh 22mm x 57mm x 2mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	14.70
CP.329	Expanded steel ornamesh 35mm x 76mm x 2mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	10.20
CP.330	Expanded steel ornamesh 35mm x 76mm x 3mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	24.40
CP.331	Expanded steel balustrade mesh 25mm x 4mm x 3mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	20.90
CP.332	Expanded steel balustrade mesh 33mm x 102mm x 3mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	13.80

S/No	Description	Unit	Unit Cost (\$)
CP.333	Expanded steel Gridmesh 43mm x 135mm x 5mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	49.70
CP.334	Expanded steel Gridmesh 30mm x 75mm x 3mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	44.20
CP.335	Expanded steel gridmesh 30mm x 75mm x 5mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	87.30
CP.336	Square weldmesh 50mm x 50mm x 3.25mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	5.70
CP.337	Square weldmesh 50mm x 50mm x 4.10mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	8.10
CP.338	Finemesh 12.5mm x 12.5mm x 1.5mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	6.70
CP.339	Finemesh 12.5mm x 12.5mm x 1.2mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	5.50
CP.340	Finemesh 12.5mm x 25mm x 1.5mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	5.30
CP.341	Finemesh 12.5mm x 25mm x 1.2mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	3.90
CP.342	Finemesh 25mm x 25mm x 1.5mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	3.90
CP.343	Finemesh 25mm x 25mm x 1.2mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	2.80
CP.344	Finemesh 50mm x 50mm x 1.5mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	2.10
CP.345	Finemesh 50mm x 50mm x 2.0mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	4.70
CP.346	Finemesh 50mm x 50mm x 2.0mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	3.50
CP.347	Roof mesh 75mm x 75mm x 1.5mm thick in vents grille work, undersides of eaves etc (fixed to timber or metal frames) (fillets measured separately)	sq m	1.50
CP.348	Extra over above items (CP293 to CP312) for tack welding to metal frames (area of mesh measured) (welding equipment measured separately).	sq m	3.30
CP.349	Take out existing weldmesh and the like including or excluding beadings, carting away from site and making good surrounding.	sq m	2.00
CP.350	Tinned wire gauge cut to required sizes and fixed complete including metal or wooden beads and 2 coats paint to bead.	sq m	10.10
CP.351	Aluminium, brass or copper woven wire cut to required sizes and fixed complete including metal or wooden beads and 2 coats paint to bead.	sq m	18.00
CP.352	Perforated zinc cut to required sizes and fixed complete including metal or wooden beads and 2 coats paint to bead.	sq m	5.60
CP.353	Take out existing including beading and cart away.	sq m	0.60
CP.354	Supply and install 50mm thick fibreglass of density 13 - 16kg/cu m insulation.	sq m	7.70
CP.355	Supply and install 50mm thick fibreglass of density 32kg/cu m insulation.	sq m	9.60
CP.356	Supply and install 50mm thick fibreglass of density 48kg/cu m insulation.	sq m	17.10
CP.357	Supply and install 25mm thick mineral wood of density 100 kg/cu m insulation.	sq m	10.10

S/No	Description	Unit	Unit Cost (\$)
CP.358	Supply and install 50mm thick mineral wood of density 50kg/cu m insulation.	sq m	12.50
CP.359	Supply and install 50mm thick mineral wood of density 60kg/cu m insulation.	sq m	13.00
CP.360	Supply and install 50mm thick mineral wood of density 80kg/cu m insulation.	sq m	16.80
CP.361	Supply and install 50 mm thick mineral wood density 100kg/cu m insulation.	sq m	19.00
CP.362	Add to above items (CP319 to CP326) laminated with aluminium foil.	sq m	6.40
CP.363	Supply and install 25mm thick woodwool slab pinned or screwed to bearers (bearers measured separately).	sq m	19.90
CP.364	Supply and install 50mm thick woodwool slab pinned or screwed to bearers (bearers measured separately).	sq m	23.70
CP.365	Supply and install 75mm thick woodwool slab pinned or screwed to bearers (bearers measured separately).	sq m	33.10
CP.366	One layer of 'Sisalation 450' or other equal and approved double sided, double reinforced fire resistant aluminium foil, lapped 150mm at joint, including extra labour dressing insulation sheet over roof purlins, bearers of ceilings, partitions etc (measured nett, no allowance made for laps).	sq m	5.00
CP.367	One layer of 'Sisalation 431' or other equal and approved double sided, double reinforced fire resistant aluminium foil, lapped 150mm at joint, including extra labour dressing insulation sheet over roof purlins, bearers of ceilings, partitions etc (measured nett, no allowance made for laps).	sq m	4.00
CP.368	One layer of 'Sisalation 525' or other equal and approved double sided, double reinforced fire resistant aluminium foil, lapped 150mm at joint, including extra labour dressing insulation sheet over roof purlins, bearers of ceilings, partitions etc (measured nett, no allowance made for laps).	sq m	4.30
CP.369	One layer of 'Sisalation 901' single sided, double reinforced fire resistant aluminium foil, lapped 150mm at joint, including extra labour dressing insulation sheet over roof purlins, bearers of ceilings, partitions etc (measured nett, no allowance made for laps).	sq m	2.30
CP.370	One layer of 'Thermofoil 750' or other equal and approved double sided, reinforced aluminium foil, lapped 150mm at joints, including extra labour dressing over roof purlins, bearers of ceilings, partitions etc (measured nett, no allowance made for laps).	sq m	4.30
CP.371	One layer of 'Thermofoil 731' or other equal and approved double sided, reinforced aluminium foil, lapped 150mm at joints, including extra labour dressing over roof purlins, bearers of ceilings, partitions etc (measured nett, no allowance made for laps).	sq m	3.60
CP.372	One layer of 'Thermofoil 600' single-sided, reinforced aluminium foil, lapped 150mm at joints, including extra labour dressing over roof purlins, bearers of ceilings, partitions etc (measured nett, no allowance made for laps).	sq m	2.80
CP.373	Supply new or in replacement approved type Kapur pelmet, 150mm wide x 150mm deep to curtain rail, sliding partitions, etc	m	8.10
CP.374	Supply new or in replacement approved type Kapur pelmet with Teak ply, 150mm wide x 150mm deep to curtain rail, sliding partitions, etc	m	10.10
CP.375	White plastic curtain rail for light weight fabric curtain c/w brackets, stop and gliders.	m	13.60
CP.376	White plastic curtain rail for heavy fabric curtain c/w brackets, stop and gliders.	m	20.00
CP.377	White plastic curtain rail for heavy fabric curtain c/w brackets, stop and gliders but double tracks.	m	38.50

S/No	Description	Unit	Unit Cost (\$)
CP.378	TOSO' to other equal and approved aluminium 'Elite' type curtain rails for light weight fabric curtain c/w fittings and chord.	m	16.30
CP.379	TOSO' to other equal and approved aluminium 'Delac' type for heavy draperies curtain rails for light weight fabric curtain c/w fittings and chord.	m	24.30
CP.380	TOSO' to other equal and approved aluminium 'Theatrac' type for heavy draperies for stage curtain in schools, halls, etc for light weight fabric curtain c/w fittings and chord.	m	49.70
CP.381	TOSO' to other equal and approved aluminium 'Partrac II' type straight track only c/w fittings, chord and adjustable rod hangers.	m	39.10
CP.382	Extra over straight track for 400 x 400mm single curve rail section including extra hanger rod where necessary	no	29.00
CP.383	Extra over straight track for 910 x 910mm single curve rail section including extra hanger rod where necessary	no	39.10
CP.384	Extra over straight track for double connector including extra hanger rod where necessary	no	96.80
CP.385	Take out existing pelmet and remove off site.	m	2.10
CP.386	Take out existing curtain rail and cart away off site.	m	0.70
CP.387	Take out existing curtain rail and refix.	m	2.60
CP.388	To remove/hang single-draw curtain (any type/size) from or onto the track	per	1.70
C1 .500	To remove/hang single araw curtain (any type/size/ from or onto the track	set	1.70
CP.389	To remove/hang double-draw curtain (any type/size) from or onto the track	per set	2.80
CP.390	19mm diameter chromium plated rails for bathroom curtain including wall flanges, hooks and rings.	m	26.60
CP.391	25mm diameter chromium plated rails for bathroom curtain including wall flanges, hooks and rings.	m	31.50
CP.392	Supply and install 90 degree Curvature Monstrack including aluminium slid track, suspension cover, tube suspension collar c/w fittings.	m	80.60
CP.393	Supply and install velvet curtain c/w black cloth backing, tracks and other necessary accessories.	sq m	66.00
CP.394	Supply and install PVC curtain c/w tracks and other necessary accessories.	sq m	30.80
CP.395	Supply and install velvet curtain c/w black cloth both internally and externally and complete with suspension tube.	sq m	101.20
CP.396	Take out existing, supply and fix new felt (any colour) only for noticeboard	sq m	20.00
CP.397	To supply and install new projector screen (manual) approved type size 177.8cm x 177.8 cm c/w installation brackets, ceiling or wall mounted	set	198.00
CP.398	Supply and install OS/AM-1818, OS 1800 x 1800mm wall or ceiling mounted screen (manual) c/w all necessary accessories.	set	198.00
CP.399	Supply and install approved motorized projection screen with motor, high and low limit switch and control switch or remote control, size L2000mm x H2700mm	set	800.00
CP.400	Supply and install approved motorized projection screen, size more than L2000mm with approved motor, high and low limit switch and control switch or remote control with dirrerence type of size includes set up staging for the work	sq m	180.00
CP.401	Supply and install additional control switch for motorized projection screen with all necessary wiring, drilling of hole etc at teaching console or wall	set	100.00
CP.402	Supply and replace existing screen only w/o replacement of brackets including removal and disposal	set	165.00
CP.403	Take out existing projector screen (manual) stack aside or remove off site and make good surrounding.	no	10.60
CP.404	Fix only projecter screen (manual) by using approved fasteners (projector screen provided separately)	no	2.80

S/No	Description	Unit	Unit Cost (\$)
CP.405	U-channel top rail for sliding glass panel.	m	1.70
CP.406	Runner for sliding glass panel.	m	2.20
CP.407	Sliding track for sliding glass panel.	m	1.70
CP.408	Wheel for runner.	no	1.10
CP.409	Take out existing defective U-channel, top rail, runner or sliding track.	m	1.10
CP.410	Take out only existing 4.8mm Timsonplate wall mounted 'SS' chalkboard including hardboard backing c/w anodised aluminium frame or kapur timber frame and chalk ledge stack aside or remove off site and make good surround.	no	10.60
CP.411	Take out only existing 4.8mm Timsonplate wall mounted 'SS' chalkboard including hardboard backing c/w anodised aluminium frame or kapur timber frame and chalk ledge and refix including providing new fasteners.	no	24.20
CP.412	Installation of 4.8mm Timsonplate wall mounted 'SS' chalkboard including hardboard backing c/w anodised aluminium frame or kapur timber frame and chalk ledge including providing new fasteners.	no	1.10
CP.413	4.8mm Timsonplate wall mounted 'SS' 600 x 900mm chalkboard including hardboard backing c/w anodised aluminium frame and chalk ledge	no	41.80
CP.414	4.8mm Timsonplate wall mounted 'SS' 600 x 900mm chalkboard including hardboard backing c/w kapur frame and chalk ledge	no	30.80
CP.415	4.8mm Timsonplate wall mounted 'SS' 900 x 1200mm chalkboard including hardboard backing c/w anodised aluminium frame and chalk ledge	no	83.60
CP.416	4.8mm Timsonplate wall mounted 'SS' 900 x 1200mm chalkboard including hardboard backing c/w kapur frame and chalk ledge	no	63.80
CP.417	4.8mm Timsonplate wall mounted 'SS' 900 x 1500mm chalkboard including hardboard backing c/w anodised aluminium frame and chalk ledge	no	104.50
CP.418	4.8mm Timsonplate wall mounted 'SS' 900 x 1500mm chalkboard including hardboard backing c/w kapur frame and chalk ledge	no	79.20
CP.419	4.8mm Timsonplate wall mounted 'SS' 900 x 1800mm chalkboard including hardboard backing c/w anodised aluminium frame and chalk ledge	no	125.40
CP.420	4.8mm Timsonplate wall mounted 'SS' 900 x 1800mm chalkboard including hardboard backing c/w kapur frame and chalk ledge	no	95.70
CP.421	4.8mm Timsonplate wall mounted 'SS' 1200 x 1500mm chalkboard including hardboard backing c/w anodised aluminium frame and chalk ledge	no	140.80
CP.422	4.8mm Timsonplate wall mounted 'SS' 1200 x 1500mm chalkboard including hardboard backing c/w kapur frame and chalk ledge	no	106.70
CP.423	4.8mm Timsonplate wall mounted 'SS' 1200 x 1800mm chalkboard including hardboard backing c/w anodised aluminium frame and chalk ledge	no	167.20
CP.424	4.8mm Timsonplate wall mounted 'SS' 1200 x 1800mm chalkboard including hardboard backing c/w kapur frame and chalk ledge	no	128.70
CP.425	4.8mm Timsonplate wall mounted 'SS' 1200 x 2400mm chalkboard including hardboard backing c/w anodised aluminium frame and chalk ledge	no	224.40
CP.426	4.8mm Timsonplate wall mounted 'SS' 1200 x 2400mm chalkboard including hardboard backing c/w kapur frame and chalk ledge	no	171.60
CP.427	4.8mm Timsonplate wall mounted 'SS' 1200 x 3600 mm chalkboard including hardboard backing c/w anodised aluminium frame and chalk ledge	no	334.40
CP.428	4.8mm Timsonplate wall mounted 'SS' 1200 x 3600mm chalkboard including hardboard backing c/w kapur frame and chalk ledge	no	257.40
CP.429	Provide and fix in brickwork or concrete wooden plugs of class 'B' timber treated with wood preservative or approved plastic.	no	0.30

S/No	Description	Unit	Unit Cost (\$)
CP.430	Fix only noticeboards whiteboards/chalkboards etc by using approved 'HILTI' fasteners.	no	5.50
CP.431	Modify existing timber window (any type and size) provide new transome and bearers including taking out and rehanging window. Fit in air-condition frame (frame supplied separately) between the window sill and the new transome and block up the opening on both sides of the frames with 6mm thick plywood including 3 coats of paint and making good work disturbed.	no	132.00
CP.432	Modify existing aluminium window/vent (any type and size) for the installation of air-condition, including take out existing window /vent, cut out existing mullion, install air-condition frame and new aluminium mullion to two sides of air-condition frame, fixing fixed glass panel to surrounding of air-condition frame including all necessary aluminium 'C' channel hollow section etc.	no	176.00
CP.433	Modify existing adjustable metal louvred frame (any type and size) and including taking out louvres etc. Fit in air-condition frame (frame supplied separately) and block up the openings on both sides of the frames with 6mm thick plywood including 3 coats of paint and making good work disturbed.	no	121.00
CP.434	Fabricate, supply and deliver window unit type air condition frame comprising of 100mm x 50mm wrot Kapur including three coats of selected paint.	no	33.00
CP.435	Key box overall size 150 x 150 x 50mm wide constructed of wrot Kapur frames 38 x 25mm thick rebated to receive and including 6mm thick plywood backing and sizes and c/w glazed framed door, 25mm padlock with keys, hasps and staples, hinges and painted with three coats of selected paint and mounted on the wall.	no	77.00
CP.436	Emergency keybox with break glass (any type and size)	no	27.50
CP.437	Take out existing keybox with break glass (any type and size)	no	2.20
CP.438	Remove existing timber railing (any design and height), cart away and make good area disturbed.	m	1.40
CP.439	Remove existing timber railing (any design and height), but replace any damaged portion (but not exceeding 2 balusters per m run or 0.5m run of handrail) cramp and secure all joints and refix (any design and height).	m	17.60
CP.440	Slatted panels consisting of Kapur battens not exceeding 1000sq mm sectional area fixed not more than 20mm apart on and including 6mm thick plywood backing.	sq m	32.30
CP.441	Slatted panels consisting of on timber bearers (bearers measured spearately)not exceeding 1000sq mm sectional area fixed not more than 20mm apart on and including 6mm thick plywood backing.	sq m	25.40
CP.442	Shaped drawer pull handle (any shape, length and type of timber screwed to drawer front).	no	2.20
CP.443	Drawers consisting of Teak timber 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Teak timber. The internal and external finishes shall be painted or finished with laminated plastic with internal area not exceeding 0.10sq m.	no	41.50
CP.444	Drawers consisting of Teak timber 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Teak timber. The internal and external finishes shall be painted or finished with laminated plastic with internal area exceeding 0.10 sq m & not exceeding 0.20 sq m.	no	59.30

S/No	Description	Unit	Unit Cost (\$)
CP.445	Drawers consisting of Teak timber 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Teak timber. The internal and external finishes shall be painted or finished with laminated plastic with internal area exceeding 0.20 sq m & not exceeding 0.30 sq m.	no	69.10
CP.446	Add for CP443 each additional 0.10sq m in internal area	no	13.00
CP.447	Add for CP443 each additonal 75mm in depth	no	5.40
CP.448	Drawers consisting of plywood with Polyken 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick plywood with Polyken. The internal and external finishes shall be painted or finished with laminated plastic with internal area not exceeding 0.10sq m.	no	22.10
CP.449	Drawers consisting of plywood with Polyken 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick plywood with Polyken. The internal and external finishes shall be painted or finished with laminated plastic with internal area exceeding 0.10 sq m & not exceeding 0.20 sq m.	no	31.00
CP.450	Drawers consisting of plywood Polyken 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick plywood with Polyken. The internal and external finishes shall be painted or finished with laminated plastic with internal area exceeding 0.20 sq m & not exceeding 0.30 sq m. Add for CP444 each additional 0.10sq m in internal area	no no	36.70 5.80
CP.451 CP.452	Add for CP444 each additonal 75mm in depth Drawers consisting of Kapur timber 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Kapur plywood. The internal and external finishes shall be painted or finished with laminated plastic with internal area not exceeding 0.10sq m.	no no	2.00 17.30
CP.453	Drawers consisting of Kapur timber19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Kapur plywood. The internal and external finishes shall be painted or finished with laminated plastic with internal area exceeding 0.10 sq m & not exceeding 0.20 sq m.	no	23.40
CP.454	Drawers consisting of Kapur timber 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Kapur plywood. The internal and external finishes shall be painted or finished with laminated plastic with internal area exceeding 0.20 sq m & not exceeding 0.30 sq m.	no	28.20
CP.455	Add for CP445 each additional 0.10sq m in internal area	no	4.50
CP.456	Add for CP445 each additonal 75mm in depth	no	0.70
CP.457	Drawers consisting of Dark Red Meranti 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Dark Red Meranti plywood. The internal and external finishes shall be painted or finished with laminated plastic with internal area not exceeding 0.10sq m.	no	13.90

S/No	Description	Unit	Unit Cost (\$)
CP.458	Drawers consisting of Dark Red Meranti19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Dark Red Meranti plywood. The internal and external finishes shall be painted or finished with laminated plastic with internal area exceeding 0.10 sq m & not exceeding 0.20 sq m.	no	19.00
CP.459	Drawers consisting of Dark Red Meranti 19mm front, 13mm sides and back and butt jointed bottom, all dovetailed housed and glued together to a depth of between 75mm to 200mm internally and the bottom shall be 9mm thick Dark Red Meranti plywood. The internal and external finishes shall be painted or finished with laminated plastic with internal area exceeding 0.20 sq m & not exceeding 0.30 sq m.	no	23.00
CP.460	Add for CP446 each additional 0.10sq m in internal area	no	4.40
CP.461	Add for CP446 each additonal 75mm in depth	no	0.70
CP.462	Upper level wrot 'Kapur' kitchen cabinet (Type D) not exceeding 800mm high and 290mm wide and 2100mm length as shown in Appendix 19D fixed to wall including all necessary ironmongery	no	472.60
CP.463	Lower level wrot 'Kapur' kitchen cabinet (Type E) not exceeding 850mm high and 600mm wide and 6100mm length as shown in Appendix 19D fixed to wall including all necessary ironmongery (6mm hollow block wall to support sink and $100 \times 100 \times 6$ mm thick white wall tile finishes measured separately)	no	2059.20
CP.464	Wrot 'Kapur' kitchen cabinet (Type F) as shown in Appendix 19E fixed to wall and concrete base including all necessary ironmongery (100 x 100 x 6mm thick white tiles measured separately)	no	1905.00
CP.465	Built-in wrot 'Kapur' wardrobe not exceeding 600mm wide with height to soffit of ceiling as shown in Appendix 19F fixed to wall and concrete base including all necessary ironmongery.	m	550.00
CP.466	Wrot 'Kapur' kitchen cabinet full height (upper and lower level) fixed to wall and concrete base as shown in Appendix 19G including necessary sealants to abutting worktop and ironmongery.	m	660.00
CP.467	Wrot 'Kapur' kitchen cabinet (lower level) as shown in Appendix 19H fixed to wall and concrete base including all necessary ironmongery and sealants to abutting worktop.	m	495.00
CP.468	Supply, fabricate and install built-in cabinet with sliding doors approx.size L3100mm x W600mm x H950mm, 20mm thick solid plywood with approved lamination,ABS edging and wooden trimming, adjustable shelves with keyalike lockable sliding doors c/w heavy duty roller and sliding track.	no	900.00
CP.469	Take out existing counter (any type)/kitchen cabinet and remove off site.	m	7.30
CP.470	Repair to existing counter, kitchen sink cabinet and the like not exceeding 1 metre wide by replacing short lengths of damaged timber, plywood or formica lining not exceeding 0.5sq m per spot and recramp drawers or doors. (short lengths not exceeding 750mm long. Hollow black wall and white wall tile finishing measured separately)	m	68.60
CP.471	Repair to existing cabinet, wardrobe, counter, etc including stripping the existing veneer lining and prepare surface to receive new finishes.	sq m	28.00
CP.472	Dismantle existing cabinet, wardrobe, counter, etc and reinstall to new location.	m	35.00
CP.473	Make opening (any size) in new or existing counter top for sit-in sink including additional bearers and making good.	no	42.90

S/No	Description	Unit	Unit Cost (\$)
CP.474	Extra over counter, kitchen cabinet, shelves or other prefabricated joinery fitments which are rated against the break down items for extra handling, transportation, prefabrication, etc (length of fitments measured irrespective of width and height).	m	92.40
CP.475	Supply and fix water-resistant decorative postformed worktops of standard sizes 600mm x 3000mm x 40mm thick (marine ply base measured separately).	m	89.20
CP.476	Supply and fix water-resistant decorative postformed worktops of standard sizes 600mm x 3000mm x 20mm thick (marine ply base measured separately).	m	56.70
CP.477	Rubber felt lining to door frames.	m	4.40
CP.478	Fibre felt lining to door frames.	m	4.70
CP.479	Take out existing felt lining and prepare to receive new.	m	1.50
CP.480	Remove existing timber or steel or stone table, stools any size, etc and cart away off site including making good floor and wall finishes to match existing.	no	21.10

CP.908	Supply and fix 200 mm x 200 mm x 1.5 mm anodised aluminium push plate	no	9.50
CP.909	Supply and fix 200 mm x 300 mm x 1.5 mm anodised aluminium push plate	no	20.40
CP.910	Supply and fix 200 mm x 900 mm x 1.5 mm anodised aluminium push plate	no	49.50
CP.911	Supply and fix 200 mm x 300 mm x 1.5 mm anodised aluminium kicking	no	20.40
CP.912	plate Supply and fix 230 mm x 900 mm x 1.5 mm anodised aluminium kicking plate	no	49.50
CP.913	Supply and fix any size but 2mm thick anodised (18 micron) aluminium plated on both surfaces	sq m	66.00
CP.914	Take out damaged sliding tracks, cart away and make good work disturbed (size of opening measured)	m	0.30
CP.915	Take out loose sliding track and refix (size of opening measured)	m	0.80
CP.916	Brass or Aluminium cupboard or cabinet sliding top and bottom tracks (size of opening measured)	m	14.30
CP.917	Nylon cupboard or cabinet sliding top and bottom tracks (size of opening measured)	m	12.10
CP.918	Plastic drawer track	no	6.10
CP.919	PVC coated metal drawer track complete with roller	no	6.60
CP.920	Supply and fix Henderson or other equal and approved sliding and folding door gear complete with track, channel brackets, hanger, guides and acessories including fixing to timber door. (Any width and height of door)(Rate per metre of door opening)	m	358.30
CP.921	Take out sliding door gear complete, remove of site and make good work disturbed	set	19.80
CP.922	Take out parts of sliding door gear as necessary, adjust, refix, oil and bring to working good, taking down and rehanging door as necessary (per door opening)	no	93.50
CP.923	Supply and fix sliding door gear complete with tracks, channel brackets, hanger, guides and accessories	no	218.80
CP.924	Supply 'Henderson' 21 K hanger	no	41.80
CP.925	Supply 'Henderson' 106R/94 guide	no	5.20
CP.926	Supply & fix 75mm common wire cabin hooks & eyes	no	1.40
CP.927	Supply & fix 150mm common wire cabin hooks & eyes	no	1.40
CP.928	Supply & fix 225mm common wire cabin hooks & eyes	no	2.10
CP.929	Supply & fix 300mm common wire cabin hooks & eyes	no	2.60
CP.930	Supply & fix 75mm Japanned malleable iron 'very strong' pattern cabin hooks & eyes	no	2.20
CP.931	Supply & fix 150mm Japanned malleable iron 'very strong' pattern cabin hooks & eyes	no	2.90

S/No	Description	Unit	Unit Cost (\$)
CP.932	Supply & fix 225mm Japanned malleable iron 'very strong' pattern cabin hooks & eyes	no	4.40
CP.933	Supply & fix 300mm Japanned malleable iron 'very strong' pattern cabin hooks & eyes	no	6.30
CP.934	Supply & fix 375mm Japanned malleable iron 'very strong' pattern cabin hooks & eyes	no	8.50
CP.935	Supply & fix 450mm Japanned malleable iron 'very strong' pattern cabin hooks & eyes	no	10.70
CP.936	Supply & fix 75mm brass cabin hooks & eyes	no	4.50
CP.937	Supply & fix 150mm brass cabin hooks & eyes	no	7.00
CP.938	Supply & fix 200mm brass cabin hooks & eyes	no	10.50
CP.939	Supply & fix 250mm brass cabin hooks & eyes	no	13.10
CP.940	Supply & fix 300mm brass cabin hooks & eyes	no	17.30
CP.941	Supply & fix 75 mm Japanned steel wire loop, hinged to plate with hasp and staple or plate	no	2.40
CP.942	Supply & fix 100mm Japanned steel wire loop, hinged to plate with hasp and staple or plate	no	2.50
CP.943	Supply & fix 125mm Japanned steel wire loop, hinged to plate with hasp and staple or plate	no	2.90
CP.944	Supply & fix 150mm Japanned steel wire loop, hinged to plate with hasp and staple or plate	no	3.70
CP.945	Supply & fix 200mm Japanned steel wire loop, hinged to plate with hasp and staple or plate	no	3.90
CP.946	Supply & fix 75 mm Japanned flat bar 38 x 3 mm with hinged joint hasps and staples	no	2.50
CP.947	Supply & fix 100mm Japanned flat bar 38 x 3 mm with hinged joint hasps and staples	no	2.90
CP.948	Supply & fix 125mm Japanned flat bar 38 x 3 mm with hinged joint hasps and staples	no	3.10
CP.949	Supply & fix 150mm Japanned flat bar 38 x 3 mm with hinged joint hasps and staples	no	6.20
CP.950	Supply & fix 75 mm Brass flat bar 38 x 3 mm with hinged joint hasps and staples	no	13.40
CP.951	Supply & fix 100mm Brass flat bar 38 x 3 mm with hinged joint hasps and staples	no	16.20
CP.952	Supply & fix 125mm Brass flat bar 38 x 3 mm with hinged joint hasps and staples	no	21.20
CP.953	Supply and fix 135 x 65 mm Brass hasps and staples	no	30.80
CP.954	Supply and fix 200 x 75 x 3 mm Brass hasps and staples	no	28.60
CP.955	Supply and fix 125 x 65 x 6 mm Brass hasps and staples	no	29.70
CP.956	Supply and fix 135 x 65 x 6mm Brass hasps and staples	no	30.80
CP.957	Supply and fix 150 x 65 x 6 mm Brass hasps and staples	no	33.00
CP.958	Take off existing hook (any type) eye or hasp and staple, remove off site and make good work disturbed	no	0.70
CP.959	Fix only cabin hook and eye or hasp and staple/toilet roll holder	no	2.00
CP.960	Supply and fix 150 mm anodised aluminium coat hook with black inserts	no	4.00
CP.961	Supply and fix 150 mm black Japanned coat hooks	no	1.90
CP.962	Supply and fix 150 mm chromium plated brass coat hooks	no	4.70
CP.963	Supply and fix 150 mm Stainless steel coat hook	no	5.50
CP.964	Supply and fix 150 mm Stainless steel hat and coat hook with rubber buffer	no	6.40
CP.965	Supply and fix 50 mm Aluminium hat and coat hooks	no	2.30
CP.966	Supply and fix 100 mm Brass cabin hook and eye	no	2.30

S/No	Description	Unit	Unit Cost (\$)
CP.967	Supply and fix 150 mm Brass cabin hook and eye	no	2.50
CP.968	Supply and fix 200 mm Brass cabin hook and eye	no	2.80
CP.969	Supply and fix 100 mm Black japanned cabin hook and eye	no	2.20
CP.970	Supply and fix 150 mm Black japanned cabin hook and eye	no	2.20
CP.971	Supply and fix 200 mm Black japanned cabin hook and eye	no	2.30
CP.972	Supply and fix 250 mm Black japanned cabin hook and eye	no	2.40
CP.973	Supply and fix 300 mm Black japanned cabin hook and eye	no	2.60
CP.974	Supply and fix approved nylon brackets for adjustable shelves including drilling holes	no	0.30
CP.975	Supply and fix approved steel plug for adjustable shelves including drilling holes	no	0.60
CP.976	Supply and fix Black Japanned brackets for shelves, 225 mm x 225 mm including matching screws	no	3.60
CP.977	Supply and fix Black Japanned brackets for shelves, 300 mm x 300 mm including matching screws	no	7.30
CP.978	Approved aluminium letter slot 150 mm long and fixed to timber including making hole in doors, partition, etc	no	26.40
CP.979	Labour for pulling out existing nails, hooks, screws, etc from timber, and fill up holes with putty or other approved material and touch up with paint to match existing	no	1.10
CP.980	Labour filling up door lock holes, hinges rebates, etc with and including timber, sand papering and knotting surface, and painting to match existing	no	5.50
CP.981	Plugging to walls and soffits complete for wood fillets, ground, moulding etc for fixing picture rails, name or number plates	no	0.40
CP.982	Labour taking down and refixing cover fillets after renewal or frames of expanded metal doors and windows	m	0.60
CP.983	Labour taking down and removing decayed balusters, cover fillets, etc	m	0.30
CP.984	Supply and fix sawn Seriah timber of any size for rough barricading works	cu m	330.00
CP.985	Supply and fix BRC 228 (50 x 50 x 4 mm diameter) galvanised weldmesh panels to wood frames with and including fillets, dismantling damaged corroded mesh, removing debris and painting to approval	sq m	13.80
CP.986	Supply and fix temporary partition constructed of timber framings and 6 mm thick plywood on One side and removal after use	sq m	13.20
CP.987	Supply and fix 1.3 mm thick, cigarette proof laminated plastic veneer pressed onto timber surfaces, etc with adhesive compound	sq m	31.90
CP.988	Marley' or other equal and approved vinyl handrail of approved colour fixed to 50 mm x 10 mm mild steel flat cove rail (measured separately) including joining and forming bend, ends, etc	m	28.1
CP.989	25 mm x 3 mm thick galvanised wrot iron water bar bedded and jointed in white lead	m	1.70
CP.990	6 mm thick steel chain not exceeding 600 mm long to secure existing fire hose reel (padlock measured separately)	no	2.80
CP.991	Supply labour for replacing lock, hinges, casement stay, etc in metal casement, door, etc including taking out glass and refixing where necesary (Welding and cutting apparatus measured separately)	no	7.20
CP.992	Supply and fix 75 mm diameter swivel rubber castors	no	9.60
CP.993	Supply and fix 50 mm diameter swivel rubber castors	no	8.80
CP.994	Supply and fix polyurethane twin-wheel swivel castor wheel (any diameter)	no	3.30
CP.995	Supply and fix pneumatic 'chair height adjustment' gas cylinder (any approved type)	no	52.80
CP.996	Supply and fix 25 mmm diameter, 600 mm long stainless steel grab bar	no	84.70

S/No	Description	Unit	Unit Cost (\$)
CP.997	20 mm x 20 mm x 5 mm x 1 mm thick nylon 'U' shaped channel or 'L' shaped fixed to and including adhesive to edge of fitment door	m	5.80
CP.998	35 mm x 15 mm x 5 mm x 1 mm thick nylon 'U' shaped channel fixed to and including adhesive to edge of drawer	m	8.40
CP.999	To fix existing loose door knobs/handles or new knobs/handles c/w new screws to match existing	no	2.20
CP.1000	Take out existing handles, knobs, etc to door fitments etc and remove off site	no	1.30
CP.1001	Supply and fix 30 mm diameter brass pulley	no	36.30
CP.1002	Supply and fix 20 mm diameter stainless steel bar including holders	no	6.60
CP.1003	Supply and fix 25 mm diameter stainless steel bar including holders	no	7.70
CP.1004	Refix round stainless steel bars or any material of any length	no	1.70
CP.1005	Remove door selector and make good surface	no	2.80
CP.1006	Supply and fix 20 mm aluminium hollow bar including holder	set	6.60
CP.1007	Supply and fix aluminium holder	pair	3.30
CP.1008	Calibrating 'Master or Key-alike System' single or double cylinder lock.	no	13.20
CP.1009	Duplicate keys for locksets	no	3.30
CP.1010	Duplicate keys for 'KABA' lockset	no	33.00
CP.1011	Duplicate keys for 'EWA DPI' security lockset 8181X series	no	19.80
CP.1012	Supply and fix straps on bed batten strip	no	7.70
CP.1013	Supply and fix glass holder (125 mm to 150 mm)	pair	6.60
CP.1014	Fix 'Master Key System' locks (labour only)	no	2.20
CP.1015	Supply and fix 25 mm right angle brass key hook	no	0.70
CP.1016	Supply and fix pop-rivet	no	1.70
CP.1017	Supply and form one key lock with missing keys including taking out lock if necessary and refix same	no	13.20
CP.1018	Labour only for opening door to gain access into premises where keys have been lost	no	9.90
CP.1019	Labour only for opening letter box lock (any type and size)	no	6.60
CP.1020	Labour only for opening locker lock (any type and size)	no	2.80
CP.1021	Supply and fix 25 mm diameter metal pulley to flag pole including taking down existing defective pulley and all necessary welding	no	5.10
CP.1022	Supply and fix approved venetian blind complete with all necessary accessories for size not exceeding 1sq m	sq m	36.30
CP.1023	Supply and fix approved venetian blind complete with all necessary accessories for size exceeding 1sq m and not exceeding 2.00sq m	sq m	35.20
CP.1024	Supply and fix approved venetian blind complete with all necessary accessories exceeding 2.00sq m	sq m	34.10
CP.1025	Take down existing venetian blinds including brackets and cut away off site	set	1.10
CP.1026	Take down existing venetian blinds, repair without replacing any accessories and refix	sq m	3.90
CP.1027	Take down existing venetian blinds, repair and refix including replacing the necessary cord lock, ladder cord, string, tilter rod etc (not more than three (3) components for each set)	set	13.20
CP.1028	Without taking down existing venetian blinds, repair and refix including replacing the necessary cord lock, ladder cord, string, tilter rod etc (not more than 1 component for each set)	set	2.80
CP.1029	Supply and installation of metal brackets or clips of any type to match existing venetian blinds, rawl plugged to concrete or brickwall	no	3.30
CP.1030	Supply and install plastic bracket/clip to match existing venetian blinds, plugged to concrete / brick wall	no	2.80
CP.1031	Rehang any set of venetian blinds	set	2.20

S/No	Description	Unit	Unit Cost (\$)
CP.1032	Supply and install Bamboo chicks of approved brand fixed complete with top and bottom members, PVC backing, brass cleats, pulleys, nylon cord, etc	sq m	71.50
CP.1033	Supply and install Bamboo chicks w/o PVC backing of approved brand fixed come with top and bottom members, brass cleats, pull nylon cord, etc.	sq m	66.00
CP.1034	Supply and fix unpainted and unlined split Bertam chicks properly and strongly constructed with ropes of No. 8 white glaze cord or nylon cord, 25 mm dia galvanised pulleys, puleys secured to galvanised screw hooks, size 18 mm x 100mm brass cleat or cup hooks are to be provided and securely fixed at the bottom of the chicks on the outside to prevent the chicks been blown out. Rate includes for all cutting and pluging to brickwork, concrete, etc required and for all making good of plaster, woodwork and decoration as necessary.	sq m	21.60
CP.1035	Add to above item CP881 for painting one side with one (1) coat of primer, one (1) undercoat and one (1) finishing coat of enamel paint	sq m	5.50
CP.1036	Add to above item CP881 for lining one side with first quality approved blue drill cloth or approved plastic cloth including properly binding the edges and allowing for all	sq m	5.50
CP.1037	Take down and cart away chicks and make good to work disturbed (any size)	no	3.20
CP.1038	Supply and fix plastic chicks of approved brand fixed complete with to and bottom members, brass cleats, pulleys, nylon, cord, etc	sq m	33.00
CP.1039	Take out as necessary, repair and fix the plastic chicks including replacing all the necessary accessories	sq m	13.20
CP.1040	Take down existing chicks, repair new ropes or nylon chord, pulleys, cleats, etc as necessary but excluding painting and lining	sq m	8.70

CP.1087	Supply Abloy Sentry Padlock, 50mm shackle c/w 2 Sentry keys	no	140.00
	PL330B/50(Controlled Key)		
CP.1088	Supply Abloy Sentry Padlock, 25mm shackle c/w 2 Sentry keys	no	160.00
	PL341B/25(Controlled Key)		
CP.1089	Supply Abloy Sentry Padlock, 50mm shackle c/w 2 Sentry keys	no	165.00
	PL341B/50(Controlled Key)		
CP.1090	Supply AOBA SS420-3435 Stainless Steel Padlock, 36mm Shackle c/w 2	no	60.00
	program & 3 user keys, laser engraved on padlock and keys. (Controlled)		
CP.1091	Supply AOBA SS420-5038 Stainless Steel Padlock, 38mm Shackle c/w 2	no	70.00
	program & 3 user keys, laser engraved on padlock and keys. (Controlled)		
CP.1092	Supply AOBA SS420-5560 Stainless Steel Padlock, 60mm Shackle c/w 2	no	85.00
	program & 3 user keys, laser engraved on padlock and keys. (Controlled)		

6. STEELWORK

S/No	Description	Unit	Unit Cost (\$)
SW.1	Mild steel rod, plate, angle, channel, flats, etc. cut in lengths including all labour, bending, welding, drilling and painting one coat of inhibitive primer before delivery.	kg	3.50
SW.2	Wrought iron rod, plate, angle, channel, flats, etc cut in lengths including all labour, bending, welding, drilling and painting one coat of inhibitive primer before delivery.	kg	3.00
SW.3	Roll steel of any section or size including cutting, welding, and painting one coat of inhibitive primer before delivery, in stanchions, beams, girders, roof trusses, purlins, cleats, brackets, etc.	kg	3.30
SW.4	Mild steel tubular or rectangular or square hollow section of any section or size including cutting, welding, and painting one coat of inhibitive primer before delivery, in stanchions, beams, girders, roof trusses, purlins, cleats, brackets, etc.	kg	3.50
SW.5	Light gauge steel channel section etc in purlins, rafters, cleats, brackets, etc.	kg	3.50
SW.6	Mild steel bright tubular, square or rectangular hollow section of any section or size including cutting, welding, and painting one coat of inhibitive primer before delivery in framing to joinery, fitments and fittings.	kg	3.50
SW.7	Weld joints, any thickness of steel or weld (length of girth of joint measured) (welding machine measured separately).	m	2.10
SW.8	Spot weld ie. ends of wire to frames (welding machine measured separately).	no	0.30
SW.9	Grouting up gap not exceeding 300mm wide x 50mm thick between RSJ and brickwall with dry-pack-cement mortar (1:1) to the satisfaction of SO and clean surrounds.	m	5.30
SW.10	Grouting up gap exceeding 300mm wide x 50mm thick between RSJ and brickwall with dry-pack-cement mortar (1:1) to the satisfaction of SO and clean surrounds.	m	11.30
SW.11	25mm thick dry-pack-cement mortar grouting (1:1) under steel stanchion base plate.	sq m	41.40
SW.12	Cut off existing projecting metal hollow section, T-bearers, I-beam, etc not exceeding 100mm girth (Rate measured per spot) (cutting machine measured separately).	no	7.50
SW.13	Add for each 25mm increase in girth.	no	0.60

S/No	Description	Unit	Unit Cost (\$)
SW.14	Cut off existing projecting reinforcing bar (any size) and remove debris off site (hacking up concrete and cutting machine measured separately).	no	1.80
SW.15	Build end of steel joists, bearers, etc into concrete work, brickwork, etc and make good surround with and including materials to match (making holes measured separately).	no	9.00
SW.16	Hot-dipped galvanising to steel members.	kg	1.20
SW.17	Hot-dipped galvanising to mild steel grating (Type A)	m	8.70
SW.18	0.7mm aluminium sheet for fabricating valley gutters, box gutters, eaves gutters, flashing, fitments, etc (brackets for gutter measured separately) including joints welded seams, beaded edges, galvanisied nails, dressing and bending, cutting, chase in wall, sealing compound and cement mortar, forming outlets, stop ends, etc (measured nett, no allowance made for laps).	sq m	48.50
SW.19	1.00mm aluminium sheet for fabricating valley gutters, box gutters, eaves gutters, flashing, fitments, etc (brackets for gutter measured separately) including joints welded seams, beaded edges, galvanisied nails, dressing and bending, cutting, chase in wall, sealing compound and cement mortar, forming outlets, stop ends, etc (measured nett, no allowance made for laps).	sq m	62.90
SW.20	1.32mm aluminium sheet for fabricating valley gutters, box gutters, eaves gutters, flashing, fitments, etc (brackets for gutter measured separately) including joints welded seams, beaded edges, galvanisied nails, dressing and bending, cutting, chase in wall, sealing compound and cement mortar, forming outlets, stop ends, etc (measured nett, no allowance made for laps).	sq m	71.70
SW.21	2.00mm aluminium sheet for fabricating valley gutters, box gutters, eaves gutters, flashing, fitments, etc (brackets for gutter measured separately) including joints welded seams, beaded edges, galvanisied nails, dressing and bending, cutting, chase in wall, sealing compound and cement mortar, forming outlets, stop ends, etc (measured nett, no allowance made for laps).	sq m	108.30
SW.22	0.794mm stainless steel sheet for fabricating valley gutters, box gutters, caves gutter, flashing, fitments, etc to any size and shape, (Brackets for gutters measured separately).	sq m	142.50
SW.23	1.00mm stainless steel sheet for fabricating valley gutters, box gutters, caves gutter, flashing, fitments, etc to any size and shape, (Brackets for gutters measured separately).	sq m	163.50
SW.24	1.32mm stainless steel sheet for fabricating valley gutters, box gutters, caves gutter, flashing, fitments, etc to any size and shape, (Brackets for gutters measured separately).	sq m	210.00
SW.25	2.00mm stainless steel sheet for fabricating valley gutters, box gutters, caves gutter, flashing, fitments, etc to any size and shape, (Brackets for gutters measured separately).	sq m	243.80
SW.26	3.00mm stainless steel sheet for fabricating valley gutters, box gutters, caves gutter, flashing, fitments, etc to any size and shape, (Brackets for gutters measured separately).	sq m	312.00
SW.27	Approved 75mm diameter aluminium alloy holderbats/for pipe (round or box type) fixed new or to match existing.	no	2.40
SW.28	Approved 100mm diameter aluminium alloy holderbats/for pipe (round or box type) fixed new or to match existing.	no	2.70
SW.29	Approved 150mm diameter aluminium alloy holderbats/for pipe (round or box type) fixed new or to match existing.	no	3.00

S/No	Description	Unit	Unit Cost (\$)
SW.30	Approved 100mm x 100mm diameter aluminium alloy holderbats/for pipe (round or box type) fixed new or to match existing.	no	3.80
SW.31	Approved 100mm x 150mm diameter aluminium alloy holderbats/for pipe (round or box type) fixed new or to match existing.	no	3.80
SW.32	Approved 150mm x 150mm diameter aluminium alloy holderbats/for pipe (round or box type) fixed new or to match existing.	no	4.20
SW.33	Approved 150mm x 200mm diameter aluminium alloy holderbats/for pipe (round or box type) fixed new or to match existing.	no	4.70
SW.34	Take out existing metal holderbats for pipe, (any diameter) remove off site and make good work disturbed.	no	0.80
SW.35	Take out existing brackets to eaves, gutters, remove off site and make good work disturbed.	no	0.80
SW.36	3mm thick x 25mm wide mild steel flat bar bent to the shape of bracket to receive gutter including fixing to fascia and 3 coats paint to match.	m	6.00
SW.37	3mm thick x 25mm wide stainless steel bent to the shape of bracket to receive gutter including fixing to fascia.	m	18.20
SW.38	40mm mesh x 10 SWG (3.25mm) galvanised chain link mesh with strand of 6 SWG straining wire at 600mm centres fencing in new work or fixed on top of existing fence including linking to existing, comprising combination of some of the following items (nett area measured).	sq m	15.00
SW.39	50mm mesh x 10 SWG (3.25mm) galvanised chain link mesh with strand of 6 SWG straining wire at 600mm centres fencing in new work or fixed on top of existing fence including linking to existing, comprising combination of some of the following items (nett area measured).	sq m	12.30
SW.40	50mm mesh x 9 SWG (3.66mm) galvanised chain link mesh with strand of 6 SWG straining wire at 600mm centres fencing in new work or fixed on top of existing fence including linking to existing, comprising combination of some of the following items (nett area measured).	sq m	14.00
SW.41	50mm mesh x 8 SWG (4.06mm) galvanised chain link mesh with strand of 6 SWG straining wire at 600mm centres fencing in new work or fixed on top of existing fence including linking to existing, comprising combination of some of the following items (nett area measured).	sq m	16.20
SW.42	63mm mesh x 8 SWG (4.06mm) galvanised chain link mesh with strand of 6 SWG straining wire at 600mm centres fencing in new work or fixed on top of existing fence including linking to existing, comprising combination of some of the following items (nett area measured).	sq m	14.40
SW.43	50mm mesh x 10 SWG (3.25mm) (total thickness) galvanised chain link mesh with strand of 6 SWG (4.88mm) (total thickness) straining wire at	sq m	13.80
SW.44	600mm centres both coated with polyvinyl chloride (NB: Wire thickness 13 SWG or 2.34mm). 50mm mesh x 9 SWG (3.66mm) (total thickness) galvanised chain link mesh with strand of 6 SWG (4.88mm) (total thickness) straining wire at 600mm centres both coated with polyvinyl chloride (NB: Wire thickness 12 SWG or	sq m	16.10
SW.45	2.64mm). 50mm mesh x 8 SWG (4.06mm) (total thickness) galvanised chain link mesh with strand of 6 SWG (4.88mm) (total thickness) straining wire at 600mm centres both coated with polyvinyl chloride (NB: Wire thickness 11 SWG or 2.95mm).	sq m	17.90
SW.46	Extra over all above items for infilling the mesh one way aluminium slate including 2 coats of synthetic enamel paint on both sides.	sq m	31.20
SW.47	Extra over all above items for infilling the mesh double way aluminium slate including 2 coats of synthetic enamel paint on both sides.	sq m	39.30

S/No	Description	Unit	Unit Cost (\$)
SW.48	Posts for fence (any type) consisting of 50mm x 50mm x 6mm thick mild steel angles placed not more than 3.00m apart, corner, intermediate and posts to be 25mm bigger, ie size 75mm x 75mm x 6mm thick, each post with bottom fixed on top of concrete/brick base or wall including holding down angles and bolts or welded to top of existing posts or bottom with minimum 300mm long embedded into and including 300 x 300 x 500mm concrete foundation, all necessary tying wires, split pins, drilling holes and painting with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint. (Nett area of mesh measured).	sq m	8.40
SW.49	Posts for fence (any type) consisting of 65mm x 65mm x 6mm thick mild steel angles etc (size of corners, intermediate and end posts is 90mm x 90mm x 6mm thick) each post with bottom fixed on top of concrete/brick base or wall including holding down angles and bolts or welded to top of existing posts or bottom with minimum 300mm long embedded into and including 300 x 300 x 500mm concrete foundation, all necessary tying wires, split pins, drilling holes and painting with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint. (Nett area of mesh measured).	sq m	9.90
SW.50	Posts for fence (any type) consisting of 75mm x 75mm x 6mm thick mild steel angles etc (size of corners, intermediate and end posts is 100mm x 100mm x 6mm thick) each post with bottom fixed on top of concrete/brick base or wall including holding down angles and bolts or welded to top of existing posts or bottom with minimum 300mm long embedded into and including 300 x 300 x 500mm concrete foundation, all necessary tying wires, split pins, drilling holes and painting with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint. (Nett area of mesh measured).	sq m	11.10
SW.51	Posts for fence (any type) consisting of 89mm x 5.4mm thick mild steel pipe placed not more than 3.00m apart and 76mm diameter x 5.4mm thick mild steel pipe placed horizontally at top and middle section of fence, each post with bottom welded to 250mm x 250mm x 3mm thick plate including embedded post with minimum 600mm long into and include 500 x 500 x 750mm concrete foundation including all necessary tying wires, split pins, drilling holes and painting with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint. (Nett area of mesh measured).	sq m	34.80
SW.52	50mm x 50mm x 6mm thick mild steel angle struts for fence, two to each intermediate and corner posts, one to each post, placed not more than 12m apart and inclined at 60 degrees to post, one end of strut bolted or welded to post, the other end split with minimum 300mm long, cast in and include concrete foundation as per drawing shown in Appendix 30 and all necessary tying wires, split pins, drilling holes and painting with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint. (Nett area of mesh measured).	sq m	4.80
SW.53	65mm x 65mm x 6mm thick mild steel angle struts for fence, two to each intermediate and corner posts, one to each post, placed not more than 12m apart and inclined at 60 degrees to post, one end of shrut bolted or welded to post, the other end split with minimum 300mm long, cast in and including concrete foundation as per drawing shown in Appendix 30 and all necessary tying wires, split pins, drilling holes and painting with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint (Nett area of mesh measured).	sq m	5.30

S/No	Description	Unit	Unit Cost (\$)
SW.54	75mm x 75mm x 6mm thick mild steel angle struts for fence, two to each intermediate and corner posts, one to each post, placed not more than 12m apart and inclined at 60 degrees to post, one end of shrut bolted or welded to post, the other end split with minimum 300mm long, cast in and including concrete foundation as per drawing shown in Appendix 30 and all necessary tying wires, split pins, drilling holes and painting with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint (Nett area of mesh measured).	sq m	5.70
SW.55	76mm diameter x 5.4mm thick mild steel pipe fence strut, two to each intermediate, one to each end post not more than 12m apart and inclined at 45 degrees to post, one end of strut bolted or welded to post, the other end welded to and includes 250mm x 250mm x 3mm thick mild steel plate cast in and include concrete foundation as shown in Appendix 31 and all necessary tying wires, split pins, drilling holes and painting with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint (Nett area of mesh measured).	sq m	6.50
SW.56	25mm x 3mm thick mild steel clamp bar at every posts including bolts and nuts, drilling and painting with 3 coats paint, with one coat of inhibitive primer and two coats of aluminium or synthetic enamel paint (Nett area of mesh measured).	sq m	1.70
SW.57	Cranked or straight mild steel angle 50 x 50x 6mm thick x 300mm long anticlimb arm with 3 strands PVC coated galvanised barbed wires (14 SWG) or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	3.00
SW.58	Cranked or straight mild steel angle 50 x 50x 6mm thick x 300mm long anticlimb arm with 4 strands barbed wires (14 SWG) or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	3.60
SW.59	Cranked or straight mild steel angle 50 x 50x 6mm thick x 300mm long anticlimb arm with 3 strands barbed wire fixed horizontally and 2 strands fixed diagonally or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	4.20
SW.60	Cranked or straight mild steel angle 50 x 50x 6mm thick x 300mm long anticlimb arm with 4 strands barbed wires fixed horizontally and 2 strands fixed diagonally or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	4.80

S/No	Description	Unit	Unit Cost (\$)
SW.61	Cranked or straight mild steel angle 65 x 65x 6mm thick x 300mm long anticlimb arm with 3 strands PVC coated galvanised barbed wires (14 SWG) or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	3.30
SW.62	Cranked or straight mild steel angle 65 x 65x 6mm thick x 300mm long anticlimb arm with 4 strands barbed wires (14 SWG) or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	3.90
SW.63	Cranked or straight mild steel angle 65 x 65x 6mm thick x 300mm long anticlimb arm with 3 strands barbed wire fixed horizontally and 2 strands fixed diagonally or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	4.50
SW.64	Cranked or straight mild steel angle 65 x 65x 6mm thick x 300mm long anticlimb arm with 4 strands barbed wires fixed horizontally and 2 strands fixed diagonally or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	5.10
SW.65	Cranked or straight mild steel angle 75 x 75x 6mm thick x 300mm long anticlimb arm with 3 strands PVC coated galvanised barbed wires (14 SWG) or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	3.60
SW.66	Cranked or straight mild steel angle 75 x 75x 6mm thick x 300mm long anticlimb arm with 4 strands barbed wires (14 SWG) or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	4.20
SW.67	Cranked or straight mild steel angle 75 x 75x 6mm thick x 300mm long anticlimb arm with 3 strands barbed wire fixed horizontally and 2 strands fixed diagonally or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	4.80

S/No	Description	Unit	Unit Cost (\$)
SW.68	Cranked or straight mild steel angle 75 x 75x 6mm thick x 300mm long anticlimb arm with 4 strands barbed wires fixed horizontally and 2 strands fixed diagonally or 2.03mm welded onto top of new or existing fence post or secured on top of existing/new wall, spaced not more than 3.00m apart including painting with one coat of inhibitive primer and coats aluminium paint, making holes in wall minimum 150mm deep to receive end of arm, grouting with cement mortar and providing two arms to corner post (length measured on plan).	m	5.40
SW.69	Add for each additional stage of 100mm arm length including extra strand of barbed wire (14 SWG) for above 4 items (FF0057 - FF0060).	m	1.10
SW.70	Y' anti-climb arm of 50 x 50x 6mm thick x 300mm long mild steel angle each arm with 3 strands PVC coated galvanised barbed wire (14 SWG) or 2.03mm welded onto top of new existing fence posts or on existing/new wall spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan).	m	6.00
SW.71	Y' anti-climb arm of $50 \times 50 \times 6$ mm thick $\times 300$ mm long mild steel angle each arm with 4 strands barbed wire or 2.03mm welded onto top of new existing fence posts or on existing/new wall spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan).	m	7.20
SW.72	Y' anti-climb arm of 50 x 50x 6mm thick x 300mm long mild steel angle each arm with 3 strands PVC coated galvanised barbed wire (14 SWG) or 2.03mm fixed horizontally and 2 strands fixed diagonally welded onto top of new or existing fence posts or on existing/new wall, spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan)	m	8.40
SW.73	Y' anti-climb arm of 50 x 50x 6mm thick x 300mm long mild steel angle each arm with 4 strands barbed wire fixed horizontally and 2 strands fixed diagonally or 2.03mm fixed horizontally and 2 strands fixed diagonally welded onto top of new or existing fence posts or on existing/new wall, spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan)	m	9.30
SW.74	Add for each additional 100mm arm length (14 SWG) for item (FF0064) to (FF0067) above.	m	2.10
SW.75	Y' anti-climb arm of 65 x 65x 6mm thick x 300mm long mild steel angle each arm with 3 strands PVC coated galvanised barbed wire (14 SWG) or 2.03mm welded onto top of new existing fence posts or on existing/new wall spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan).	m	6.60

S/No	Description	Unit	Unit Cost (\$)
SW.76	Y' anti-climb arm of 65 x 65x 6mm thick x 300mm long mild steel angle each arm with 4 strands barbed wire or 2.03mm welded onto top of new existing fence posts or on existing/new wall spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan).	m	7.80
SW.77	Y' anti-climb arm of 65 x 65x 6mm thick x 300mm long mild steel angle each arm with 3 strands PVC coated galvanised barbed wire (14 SWG) or 2.03mm fixed horizontally and 2 strands fixed diagonally welded onto top of new or existing fence posts or on existing/new wall, spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan)	m	9.00
SW.78	Y' anti-climb arm of 65 x 65x 6mm thick x 300mm long mild steel angle each arm with 4 strands barbed wire fixed horizontally and 2 strands fixed diagonally or 2.03mm fixed horizontally and 2 strands fixed diagonally welded onto top of new or existing fence posts or on existing/new wall, spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan)	m	9.90
SW.79	Y' anti-climb arm of 75 x 75x 6mm thick x 300mm long mild steel angle each arm with 3 strands PVC coated galvanised barbed wire (14 SWG) or 2.03mm welded onto top of new existing fence posts or on existing/new wall spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan).	m	7.20
SW.80	Y' anti-climb arm of 75 x 75x 6mm thick x 300mm long mild steel angle each arm with 4 strands barbed wire or 2.03mm welded onto top of new existing fence posts or on existing/new wall spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan).	m	8.40
SW.81	Y' anti-climb arm of 75 x 75x 6mm thick x 300mm long mild steel angle each arm with 3 strands PVC coated galvanised barbed wire (14 SWG) or 2.03mm fixed horizontally and 2 strands fixed diagonally welded onto top of new or existing fence posts or on existing/new wall, spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan).	m	9.60
SW.82	Y' anti-climb arm of 75 x 75x 6mm thick x 300mm long mild steel angle each arm with 4 strands barbed wire fixed horizontally and 2 strands fixed diagonally or 2.03mm fixed horizontally and 2 strands fixed diagonally welded onto top of new or existing fence posts or on existing/new wall, spaced not more than 3.00m apart and including painting one coat of inhibitive primer and 2 coats aluminium or synthetic enamel paint, making holes in wall to receive end of arm and grouting with cement mortar (Length measured on plan).	m	10.50
SW.83	Remove existing fence (any type) c/w posts, struts, foundations, anti-climb arm, creepers, etc. as directed and remove off site including making good work disturbed. (Length of fence measured but height measured from top of foundation to apex of post or anti-climb arm if applicable).	sq m	4.80

S/No	Description	Unit	Unit Cost (\$)
SW.84	Take out existing chain link mesh only (any type) and remove off site (Nett area of mesh measured).	sq m	1.70
SW.85	Take out as necessary and tighten existing chain link mesh only or refix in new position including providing new straining wires, bolts, and staples to match existing. (Nett area of fence measured).	sq m	6.20
SW.86	Take out existing chain link fence c/w posts, struts, concrete base, etc and lay aside for re-use including removing debris off site and making good work disturbed (Nett area of fence measured).	sq m	5.40
SW.87	Take from stack and fix only existing chain link fence in new position c/w posts, struts, beading etc including providing new straining wires, bolts and staples to match existing (nett area measured separately).	sq m	5.90
SW.88	Cut remove grass, shrubs, creepers and hedges on one side of fence and clear away (Nett area measured).	sq m	1.80
SW.89	Take out existing tubular or mild steel angle fence posts, struts, etc (any height) including foundation when directed, remove off site, make good work disturbed or prepare to receive new works.	no	5.70
SW.90	Replace existing tubular or mild steel angle fence struts or posts (any size) not exceeding 1m high from top of concrete base with new including taking out fence (any type), refixing, tightening, providing new bolts, staples, 3 coats paint, etc and removing existing concrete foundations when directed (New foundation measured separately).	no	16.50
SW.91	Add for each additional stage of 100mm in height.	no	1.80
SW.92	Cut and remove part of tubular or mild steel angle fence strut, post or anticlimb arm not exceeding 1m in length and replace with new to match including removing existing concrete foundations, taking out fence (any type), site welding, refixing, tightening, providing new bolts, staples, etc and 3 coats paint (New foundation measured separately).	no	16.50
SW.93	Add for each additional stage of 100mm in height.	no	1.80
SW.94	Replace mild steel tubular angle posts (any size) in isolated position and not exceeding 1m high, welded on top of existing metal work or one end split, caulked and cast in concrete as described including drilling holes and 3 coats paint (New foundation and taking out existing foundation measured separately).	no	12.50
SW.95	Add for each additional 100mm in height (New foundation and taking out existing foundation measured separately).	no	1.50
SW.96	Labour only to refix existing tubular or angle fence post (any size and height) (Foundation measured separately).	m	2.90
SW.97	38mm diameter galvanised steel pipe tubing (medium duty) in fence posts & unclimbable arms, framed and welded together or framed with tees, bends, elbows etc including all drilling (nett length measured, concrete foundation and painting measured separately).	m	15.30
SW.98	50mm diameter galvanised steel pipe tubing (medium duty) in fence posts & unclimbable arms, framed and welded together or framed with tees, bends, elbows etc including all drilling (nett length measured, concrete foundation and painting measured separately).	m	22.80
SW.99	63mm diameter galvanised steel pipe tubing (medium duty) in fence posts & unclimbable arms, framed and welded together or framed with tees, bends, elbows etc including all drilling (nett length measured, concrete foundation and painting measured separately).	m	31.10

S/No	Description	Unit	Unit Cost (\$)
SW.100	75mm diameter galvanised steel pipe tubing (medium duty) in fence posts & unclimbable arms, framed and welded together or framed with tees, bends, elbows etc including all drilling (nett length measured, concrete foundation and painting measured separately).	m	42.80
SW.101	100mm diameter galvanised steel pipe tubing (medium duty) in fence posts & unclimbable arms, framed and welded together or framed with tees, bends, elbows etc including all drilling (nett length measured, concrete foundation and painting measured separately).	m	55.70
SW.102	Take out strand of existing barbed wire or plain wire and remove off site.	m	0.20
SW.103	Take out strand of existing barbed wire or plain wire and lay aside for reuse.	m	0.20
SW.104	Take from stack and fix only strand of barbed wire or plain wire including providing new staples etc.	m	0.40
SW.105	Take out as necessary and tighten strand of existing barbed wire or plain wire including providing new staples etc.	m	0.40
SW.106	Galvanised barbed wire 14 SWG (2.03mm) fixed with and including staples etc.	m	0.50
SW.107	Galvanised barbed wire 12 SWG (2.64mm) fixed with and including staples etc.	m	0.60
SW.108	Plain wire No 8 gauge (4.08mm) fixed with and including staples etc.	m	0.80
SW.109	Plain wire No 10 gauge (3.25mm) fixed with and including staples etc.	m	0.60
SW.110	PVC coated 14 SWG fixed with and including staples etc.	m	0.60
SW.111	PVC coated 12 SWG (2.64mm) fixed with and including staples etc.	m	0.80
SW.112 SW.113	PVC coated 10 SWG (3.25mm.) fixed with and including staples etc. Metal gate consisting of 50mm diameter galvanised steel tubular hollow	m sq m	0.90 125.00
	section or 65mm x 38mm x 6mm thick mild steel angle framing with necessary matching intermediate rails and cross braces, and 50mm x 50mm x 3.25mm weldmesh or galvanised chain link 50mm mesh x gauge 10 (3.25mm) infilling including hinges, stops, guide plates, drop bolts, padlock bolts, etc and apply 1 priming coat, 1 undercoat and 1 finishing coat of synthetic enamel paint after installation.		
SW.114	Mild steel grilled gate comprising of not exceeding 50mm x 50mm x 5mm hollow section or 50mm diameter pipe surround with infilling of mild steel flat bars not exceeding 25mm x 6mm thick, ditto and c/w pivoted hinges, stops, drop bolts and other accessories, apply one coat of inhibitive primer before delivery and apply 1 priming coat, 1 undercoat and 1 finishing coat of synthetic enamel paint after installation.	sq m	147.30
SW.115	Extra over item (FF0099) and (FF0100) for forming opening for and including one leaf of wicket door measuring not exceeding 2.00sq m complete with door frames, hinges and padlock bolt.	sq m	14.60
SW.116	Metal gate consisting of 75mm diameter galvanised steel pipe as outer frame and infill with 50mm diameter galvanised steel pipe welded vertically c/w 20mm pipe diameter galvanised steel pipe welded at a certain angle with one end to the outer frame and the other to the vertical section including ironmongeries and apply 1 priming coat, 1 undercoat and 1 finishing coat of synthetic enamel paint after installation	sq m	315.00
SW.117	Take out metal gate (any type), cut out damaged or corroded portions, provide new in replacement, including welding, refixing, easing and removing debris off site (Replacement of ironmongery and painting measured separately).	sq m	43.50
SW.118	Take out existing fence gate and remove off site.	sq m	4.20

S/No	Description	Unit	Unit Cost (\$)
SW.119	Mild steel angle gate posts not exceeding 75mm x 75mm x 6mm thick, one end splayed and cast in concrete base including 3 coats paint (Foundation measured separately) (Length measured from top of concrete base).	m	22.80
SW.120	75mm diameter mild steel tubular gate posts ('B' pipes) one end splayed and cast in concrete base including 3 coats paint (Foundation measured separately) (Length measured from top of concrete base).	m	22.10
SW.121	100mm diameter mild steel tubular gate posts ('B' pipes) one end splayed and cast in concrete base including 3 coats paint (Foundation measured separately) (Length measured from top of concrete base).	m	39.50
SW.122	150mm diameter mild steel tubular gate posts ('B' pipes) one end splayed and cast in concrete base including 3 coats paint (Foundation measured separately) (Length measured from top of concrete base).	m	55.20
SW.123	Take out existing gate posts, including grubbing up concrete foundation as directed, remove off site and fill voids with earth well rammed. (Length measured from top of concrete base).	m	3.60
SW.124	Supply and install approved 40.1mm x 40.1mm x 2.0mm stove enamel slotted angle in shelving and equipment frames etc (any size and design) (any length below 300mm shall be counted as 300mm).	m	4.30
SW.125	Supply and install approved 62.0mm x 40.9mm x 2.0mm stove enamel slotted angle in shelving and equipment frames etc (any size and design)(any length below 300mm shall be counted as 300mm).	m	5.20
SW.126	Punched steel strap size 38.1mm x 2.0mm with 10mm holes at 20mm centres.	no	5.20
SW.127	Bracing angle size 34.3mm x 14.5mm x 2.0mm with 10mm holes.	no	5.20
SW.128	Supply and install approved 900mm X 300mm steel panel (shelves) with etch primed or stove enamelled battleship grey finish for use with slotted angle section.	no	16.40
SW.129	Supply and install approved 900mm X 450mm steel panel (shelves) with etch primed or stove enamelled battleship grey finish for use with slotted angle section.	no	24.20
SW.130	Supply and install approved 900mm X 600mm steel panel (shelves) with etch primed or stove enamelled battleship grey finish for use with slotted angle section.	no	27.10
SW.131	Supply and install approved 900mm X 900mm steel panel (shelves) with etch primed or stove enamelled battleship grey finish for use with slotted angle section.	no	41.20
SW.132	Supply and install approved 900mm x 150mm steel panel heavy duty shelving bolted directly to horizontally beams with stove enamelled finish.	no	6.70
SW.133	Supply and install approved 900mm x 150mm steel panel heavy duty shelving bolted directly to horizontally beams with aluminium alloy finish.	no	9.10
SW.134	Supply and install approved 300 x 140mm perforated steel shelf dividers with etch-primed or stove enamelled battleship grey finish.	no	3.50
SW.135	Supply and install approved 300 x 215mm perforated steel shelf dividers with etch-primed or stove enamelled battleship grey finish.	no	3.80
SW.136	Supply and install approved 450 x 140mm perforated steel shelf dividers with etch-primed or stove enamelled battleship grey finish.	no	4.60
SW.137	Supply and install approved 450 x 215mm perforated steel shelf dividers with etch-primed or stove enamelled battleship grey finish.	no	4.90
SW.138	Approved 50mm fixed iron castors fixed to feet of equipment.	no	9.60

SW.150	Approved zinc plated steel adjuster clips.	no	0.60
SW.151	Approved zinc plated stove enamelled finished steel corner plates.	no	0.40
SW.152	Approved 6mm dia zinc plated hexagonal headed type steel bolts with nuts and washers.	no	0.50
SW.153	Approved 8mm dia zinc plated hexagonal headed type steel bolts with nuts and washers.	no	0.50
SW.154	Approved 8mm dia zinc plated or sheradized type steel bolts with nuts and washers.	no	0.30
SW.155	Approved 8mm dia high tensile type steel bolts with nuts and washers.	no	0.50
SW.156	Take out metal/timber windows, return to store or away and make good work disturbed.	sq m	7.20
SW.157	Take out, oil and refix metal/timber window (any type and size) and put to smooth working condition.	no	28.80
SW.158	Approved galvanised steel adjustable louvred window frame with 6mm thick clips to receive 150mm blades including screws to match (louvred measured separately), (control measured separately).	no	19.20
SW.159	Approved galvanised steel adjustable louvred window frame with 6mm thick clips to receive 150mm blades including screws to match (louvred measured separately). Extra over item for galvanised steel frame for each	no	1.80
SW.160	control mechanism. Approved galvanised steel adjustable louvred window frame with 6mm thick clips to receive 150mm blades including screws to match (louvred measured separately), Set of natural anodised frame control measured	m	40.00
SW.161	separately. Approved anodised bronze adjustable louvred window frame with 6mm thick clips to receive 150mm blades including screws to match (louvred measured separately), (control measured separately).	m	42.00
SW.162	Extra over for each control mechanism of approved galvanised steel adjust lourved window frame with natural anodised frame control measured separately.	m	2.40
SW.163	Extra over approved anodised bronze adjust lourved window frame with 6mm clips for each control mechanism.	m	2.40
SW.164	1.2mm thick natural anodised aluminium section frames in single light, complete with ironmongery, fixing straps, vinyl weather strips including building-in and pointing frame (glass measured separately) with sidehinged window and casement frames.	sq m	170.00
SW.165	1.2mm thick natural anodised aluminium section frames in single light, complete with ironmongery, fixing straps, vinyl weather strips including building-in and pointing frame (glass measured separately) with tophung window frame and sash.	sq m	197.90
SW.166	1.2mm thick natural anodised aluminium section frames in single light, complete with ironmongery, fixing straps, vinyl weather strips including building-in and pointing frame (glass measured separately) with sliding window frame and sash.	sq m	149.30

S/No	Description	Unit	Unit Cost (\$)
SW.167	1.2mm thick natural anodised aluminium section frames in single light, complete with ironmongery, fixing straps, vinyl weather strips including building-in and pointing frame (glass measured separately) with fixed window frame.	sq m	114.80
SW.168	10mm square mild steel burglar-proof bar fixed to holders of louvred window frames.	m	2.60
SW.169	12.5mm diameter aluminium burglar-proof bar fixed to holders of louvred window frames.	m	3.60
SW.170	1.00mm approved metal weather strips (any approved type and width) fixed to window cill.	m	3.00
SW.171	Take out existing timber or metal louvers (any size) from doors, windows, vents, louvred frames, etc and return to store or cart away as directed.	m	0.50
SW.172	Replace screws to louvred frames.	no	0.20
SW.173	Take out existing louvred window frames (any type and size), make good work disturbed and remove off site or set aside for re-use (excluding glass).	no	1.40
SW.174	Take out existing louvred window frames (any type and size), make good work disturbed and refix (excluding glass).	no	4.30
SW.175	Take out existing louvred window frame, ease, oil adjust and refix in position (excluding glass).	no	4.90
SW.176	1.5mm anodised aluminium louvred blades with stucco embossed pattern 100mm wide to 100mm wide clips of louvred frames or grooves in timber, with aluminium rivets or bolts and washers including preparing or cleaning clips or grooved and drilling.	m	7.20
SW.177	1.5mm anodised aluminium louvred blades with stucco embossed pattern 150mm wide to 150mm wide clips of adjustable louvred frames or grooves in timber, with aluminium rivets or bolts and washers including preparing or cleaning clips or grooved and drilling.	m	10.00
SW.178	Supply labour and material to fix aluminium louvred blades to existing louvred frames, including removing blades, drilling and fixing 4 rivets to each blade (rate per blade).	no	1.40
SW.179	Anodised bronze aluminium fixed louvers c/w anodised bronze aluminium frames.	sq m	234.80
SW.180	Sliding and folding door consisting of mild steel angle frames, infilled with 1.32mm mild steel plates and including welded brackets, etc riveting together and c/w approved sliding gear, track, guide, lock, hinges and all other necessary ironmongery and including one coat of inhibitive primer before delivery and two coats of enamel paint after installation.	sq m	226.50
SW.181	Approved mild steel collapsible gate cum folding door (1.5mm) c/w sliding gear, track, guide, lock, hinges and all other necessary accessories and including applying one coat of inhibitive primer before delivery and two coats of enamel paint after installation.	sq m	316.50
SW.182	Mild steel grilled door comprising of 25mm x 25mm x 2mm mild steel hollow section surround and 25mm x 6mm mild steel flat bar fixed vertically at not exceeding 500mm centre to centre and infill with 19mm x 6mm mild steel flat bars arranged diagonally at 80mm centre to centre, the whole fillet welded together, c/w hinges, approved lock, 25mm x 25mm x 3mm mild steel angle door frame and fixing frame to wall with holdfasts including all necessary welding and all other accessories, applying one coat of inhibitive primer before delivery and two coats of enamel paint after installation.	sq m	118.10

S/No	Description	Unit	Unit Cost (\$)
SW.183	Mild steel grilled door comprising of 25mm x 25mm x 2mm mild steel hollow section and fixed vertically at not exceeding 500mm centre to centre infill with 19mm x 6mm mild steel flat bars at 100mm centre to centre, the whole fillet welded together, c/w hinges, approved lock, 32mm x 32mm x 3mm mild steel angle door frame and fixing frame to wall with holdfasts including all necessary welding and all other accessories, applying one coat of inhibitive primer before delivery and two coats of enamel paint after installation.	sq m	121.40
SW.184	Mild steel sliding grilled door comprising of 25mm x 25mm x 2mm mild steel hollow section surround and 25mm x 6mm mild steel flat bars fixed vertically at not exceeding 500mm centre to centre and infill with 19mm x 6mm mild steel flat bars arranged diagonally at 80mm centre to centre, c/w approved lock, sliding track consisting 65mm x 38mm mild steel 'U' channel at the bottom, rollers and huides including 50mm x 50mm x 4mm mild steel hollow section door frame and fixing frame to wall with holdfast or approved bolts, including whole welding and all other necessary accessories, applying one coat of inhibitive primer before delivery and two coats of enamel paint after installation.	sq m	132.00
SW.185	Mild steel sliding grilled door comprising of 38mm x 38mm x 3mm mild steel hollow section surround and infill with 19mm x 4.5mm flat bars bent to approved ornamental shape or design c/w approved lock, sliding track, rollers and guides including 38mm x 38mm x 3mm thick mild steel angle door frame and fixing frame to wall with holdfasts or approved bolts, including whole welding and all other necessary accessories, applying one coat of inhibitive primer before delivery and two coats of enamel paint after installation.	sq m	156.00
SW.186	Mild steel sliding grilled door comprising of 38mm x 38mm x 3mm thick mild steel hollow section surround 25mm x 6mm flat bar fixed vertically at not exceeding 600mm centre to centre and infill with 19mm x 6mm flat bars at 80mm centre to centre, the whole fillet welded together c/w approved lock, sliding track consisting of 65mm x 38mm 'U' channel at the top and 36mm x 19mm hollow section at the bottom, roller and guides including 38mm x 38mm x 3mm thick mild steel angle door frame and fixing frame to wall with holdfasts or approved bolts, including whole welding and all other necessary accessories, applying one coat of inhibitive primer before delivery and two coats of enamel paint after installation.	sq m	199.50
SW.187	Mild steel sliding grilled door comprising of 25mm x 25mm x 3mm thick mild steel hollow section surround, 25mm x 6mm flat bar fixed vertically at not exceeding 600mm centre to centre and infill with 10mm x 10mm square bars arranged diagonally at 80mm centre to centre, the whole fillet welded together c/w lock, sliding track, rollers and guides including 25mm x 25mm x 3mm thick hollow section door frames and fixing frame to wall with holdfasts or approved bolts, including whole welding and all other necessary accessories, applying one coat of inhibitive primer before delivery and two coats of enamel paint after installation.	sq m	140.30
SW.188	Mild steel grilles comprising of mild steel flat bars surround and fixed vertically not exceeding 500mm centre to centre and infilled with square bars arranged diagonally at 80mm centre to centre and including whole welding, fixing to woodwork, brickwork, concrete work or counter top etc applying one coat of inhibitive primer before delivery and two coats of enamel paint after installation	sq m	99.90

S/No	Description	Unit	Unit Cost (\$)
SW.189	Mild steel grilles comprising of 25mm x 6m mild steel flat bars surround and infill with 19mm x 4.5mm mild steel flat bars bent to approved ornamental shape or design and including whole welding, fixing to woodwork, brickwork, concrete work or counter top etc applying one coat of inhibitive primer before delivery and two coats enamel paint after installation.	sq m	101.00
SW.190	Mild steel grilles comprising of 25mm x 6mm mild steel flat bar surround and 20mm x 4.5mm mild steel flat bar fixed vertically at not exceeding 350mm centre to centre and horizontally at 105mm centre to centre and including whole welding, fixing to woodwork, brickwork, concrete work or counter top etc applying one coat of inhibitive primer before delivery and two coats enamel paint after installation.	sq m	98.00
SW.191	Mild steel grilles comprising of 19mm x 6.4mm mild steel bar fixed vertically at 120mm centre to centre and horizontally at 300mm centre to centre and including whole welding, fixing to woodwork, brickwork, concrete work, etc. with 6mm diameter x 50mm retraction bolt place at 300mm centre to centre, applying one coat of inhibitive primer and two coats enamel paint.	sq m	171.60
SW.192	Mild steel grilles comprising of 17mm x 4mm mild steel flat bars surround and fixed vertically at not exceeding 750mm centre to centre and infilled with 17mm x 4mm mild steel flat bar arranged diagonally at 82mm centre to centre and including whole welding, fixing to woodwork, brickwork, concrete work or counter top etc, applying one coat of inhibitive primer and two coats enamel paint.	sq m	82.50
SW.193	Mild steel grilles comprising of 15mm x 4.5mm mild steel flat bars surround and infill with 15mm x 4.5mm bent to approved ornamental shape or design and including whole welding, fixing to woodwork, brickwork, concrete work or counter top etc, applying one coat of inhibitive primer and two coats enamel paint.	sq m	127.10
SW.194	Gauge 18 aluminium ornamental grilles consisting of not exceeding 76mm x 44mm hollow section surround and 19mm x 3mm infilling bent to approved ornamental shape or design including all necessary welding and fixing to woodwork, brickwork, concrete work or counter top etc.	sq m	101.60
SW.195	Supply and install fixed bronze anodised aluminium grille comprising of 30mm x 30mm hollow section framing and 12mm x 10mm Amplimesh '103'/'104' including U-channel edging and rivets.	sq m	170.40
SW.196	Supply and install bronze anodised aluminium sliding grille comprising of aluminium hollow section framing and 12mm x 10mm Amplimesh '103'/'104' including approved lock, track, roller guides and all necessary accessories.	sq m	189.60
SW.197	Supply and install bronze anodised aluminium sliding door comprising of hollow section framing and 12mm x 10mm Amplimesh '103'/'104' including cylinder lock, track, roller guides and all necessary accessories.	sq m	260.90
SW.198	Supply and install bronze anodised aluminium door comprising hollow section and Amplimesh '103'/'104' including door frame and approved lock.	sq m	227.90
SW.199	Supply and install fixed natural anodised aluminium grille comprising of 30mm x 30mm hollow section framing and Amplimesh '103'/'104' including U-channel edging and rivets.	sq m	144.00
SW.200	Take out existing metal grilles, railing, window guards etc including fillets and remove off site or to store or stack for re-use.	sq m	5.40
SW.201	Take from stack existing metal grilles, railing, window guards etc. including fillets and refix to concrete, brickwork or timberwork.	sq m	8.60
SW.202	Take down existing heavy duty cast iron grilled railing (any pattern or type) including hackin concrete hardstanding and remove to store or remove off site or stack aside for re-use.	sq m	10.30

S/No	Description	Unit	Unit Cost (\$)
SW.203	Take from stack ditto and refix to concrete work, brickwork, or timberwork including excavation, formwork and concrete if necessary hoisting and propping up in position. (NOTE: Take down weldmesh - measured separately).	sq m	12.40
SW.204	50mm diameter tubular mild steel handrail or bottom rail welded to baluster including running joint.	m	18.00
SW.205	Extra over for bend for 50mm diameter tubular mild steel handrail or bottom rail welded to baluster including running joint.	no	11.70
SW.206	Extra over for ramp for 50mm diameter tubular mild steel handrail or bottom rail welded to baluster including running joint.	no	5.70
SW.207	Extra over for knee for 50mm dia tubular mild steel handrail or bottom rail welded to baluster running joint for knee.	no	5.70
SW.208	38mm diameter x 900mm long mild steel baluster welded on to pipe rail, one end split and cast into concrete stringer and grouted in cement mortar (1:3).	no	18.00
SW.209	20mm x 5mm mild steel baluster 600mm long welded to pipe rails.	no	3.50
SW.210	Remove existing plain or chequered metal plate as treads in staircase and prepare to receive new works.	no	8.10
SW.211	Demountable partition framing (for full height lining) with an overall thickness of not more than 75mm, comprising of mild steel studs or galvanised iron studs with exposed anodised aluminium framing placed at 600mm centre at both ways,, corner and end posts, anodised aluminium ceiling and floor tracks c/w approved vinyl insert, aluminium door frames, if any, 100mm (max.) high aluminium skirting and other recommended accessories (Lining measure separately).	sq m	30.00
SW.212	Demountable partition framing (for full height lining) with an overall thickness of not more than 75mm, comprising of mild steel studs or galvanised iron studs with exposed anodised aluminium framing placed at 600mm centre at both ways,, corner and end posts, anodised aluminium ceiling and floor tracks c/w approved vinyl insert, aluminium door frames, if any, 100mm (max.) high aluminium skirting and other recommended accessories but with fanlight (lining and glass measured separately).	sq m	34.90
SW.213	Demountable partition framing (for full height lining) with an overall thickness of not more than 75mm, in two panel with top or both panels open to receive glass and bottom panel open to receive lining and fixed c/w approved vinyl insert, 100mm (max.) high aluminium skirting, door frames, if any, transome and other recommended accessories. (Lining and glass measured separately).	sq m	34.90
SW.214	Demountable partition framing (for full height lining) with an overall thickness of not more than 75mm, in two panel with top or both panels open to receive glass and bottom panel open to receive lining and fixed c/w approved vinyl insert, 100mm (max.) high aluminium skirting, door frames, if any, transome and other recommended accessories with fanlight. (Lining and glass measured separately).	sq m	42.20
SW.215	Supply and install 75mm thk demountable wall partition consisting of 13mm thick non combustible gypsum boards on both sides filled with 50mm thk fibreglass wool complete both sides filled with aluminium binding sections, stud framings, skirtings and all fixing accessories and painting with 3 coats of approved acrylic emuslion paint on both sides of partition. (Door and door frames are measured separately).	sq m	58.00

S/No	Description	Unit	Unit Cost (\$)
SW.216	Supply and install 75mm thk demountable wall partition consisting of 13mm thick non combustible gypsum boards on both sides filled with 50mm thk fibreglass wool complete both sides filled with aluminium binding sections, stud framings, skirtings and all fixing accessories and painting with 3 coats of approved acrylic emuslion paint on both sides of partition with 400mm high fanlight and including clear sheet glass. (Door and door frames are measured separately).	sq m	64.00
SW.217	Supply and install 75mm thk demountable wall partition consisting of 6mm thick non combustible calcium silicate boards on both sides filled with 50mm thk fibreglass wool with density of 60kg/m3 complete both sides filled with aluminium binding sections, stud.	sq m	58.00
SW.218	Supply and install 75mm thk demountable wall partition consisting of 6mm thick non combustible calcium silicate boards on both sides filled with 50mm thk fibreglass wool with density of 60kg/m3 complete both sides filled with aluminium binding sections, stud.	sq m	64.00
SW.219	Taken down demountable aluminium framing partition including door and glass, if any, remove to store or stack aside for re-use or remove off site and make good area disturbed.	sq m	8.40
SW.220	Take from stack and refix in position demountable aluminium partition including door and providing all necessary accessories, vinyl insert, screws, etc.	sq m	17.80
SW.221	Repair existing demountable aluminium partition including replacing vinyl insert and accessories to match existing (Lining measured separately).	sq m	14.20
SW.222 SW.223	Form opening on demountable partition (minimum 1 sqaure metre). Aluminium door frame and fixing to demountable partition (Timber door is measured separately).	sq m no	8.60 72.00
SW.224	Vinyl 'U' shaped gasket to receive glass in new or in replacement including taking out existing and making good surround.	m	0.50
SW.225 SW.226	75mm high black vinyl skirting to demountable partition including adhesive. 100mm high black vinyl skirting to demountable partition including adhesive.	m m	2.20 2.60
SW.227	Supply and lay medium duty vinyl or fabric covering including preparation of surface to receive wall covering and all fixing accessories.	sq m	13.20
SW.228	Supply labour and compatible adhesive for fixing decorative fabric/vinyl paper to wall including cutting border, strips corner and motice to profile for fixing.	m	5.00
SW.229 SW.230	65mm high bronze anodised aluminium skirting to demountable partition. 100mm high natural anodised aluminium skirting with vinyl insert to	m m	4.80 5.00
SW.231	demountable aluminium partition. 100mm high anodised natural anodised aluminium skirting with vinyl insert to demountable aluminium partition but in replacement including taking down existing and removing off site.	m	5.50
SW.232	Replace missing or defective vinyl glazing gasket or vinyl insert for aluminium partition stud or skirting.	m	1.40
SW.233	Extra over demountable partition for 40mm thk single leaf flush door with anodised aluminium edging and with or without glazed peephole (ironmongery measured separately). Covered on both sided with and including 13mm thk plain gypsum board finished with 2 coats of emulsion paint.	sq m	119.60
SW.234	Extra over demountable partition for 40mm thk single leaf flush door with anodised aluminium edging and with or without glazed peephole (ironmongery measured separately). Covered on both sides with and including 13mm thk Vinyl faced gypsum board.	sq m	134.50

S/No	Description	Unit	Unit Cost (\$)
SW.235	Extra over demountable partition for 40mm thk single leaf flush door with anodised aluminium edging and with or without glazed peephole (ironmongery measured separately). Covered on both sides with and including 6mm thk teak veneered plywood.	sq m	119.60
SW.236	Extra over demountable partition for 40mm thk single leaf flush door with anodised aluminium edging and with or without glazed peephole but with louvred vent not exceeding 0.50sq m (ironmongery measured separately). Covered on both sided with and including 13mm thk plain gypsum board finished with 2 coats of emulsion paint.	sq m	167.40
SW.237	Extra over demountable partition for 40mm thk single leaf flush door with anodised aluminium edging and with or without glazed peephole but with louvred vent not exceeding 0.50sq m (ironmongery measured separately). Covered on both sides with and including 13mm thk Vinyl faced gypsum board.	sq m	197.20
SW.238	Extra over demountable partition for 40mm thk single leaf flush door with anodised aluminium edging and with or without glazed peephole but with louvred vent not exceeding 0.50sq m (ironmongery measured separately). Covered on both sides with and including 6mm thk teak veneered plywood.	sq m	167.40
SW.239	Extra over demountable partition for 40mm thk double leaf flush door with anodised aluminium edging and with or without glazed peephole (ironmongery measured separately). Covered on both sided with and including 13mm thk plain gypsum board finished with 2 coats of emulsion paint.	sq m	191.30
SW.240	Extra over demountable partition for 40mm thk double leaf flush door with anodised aluminium edging and with or without glazed peephole (ironmongery measured separately). Covered on both sides with and including 13mm thk Vinyl faced gypsum board.	sq m	203.20
SW.241	Extra over demountable partition for 40mm thk double leaf flush door with anodised aluminium edging and with or without glazed peephole (ironmongery measured separately). Covered on both sides with and including 6mm thk teak veneered plywood.	sq m	191.30
SW.242	Extra over demountable partition for 40mm thk panelled door, top panel opened to receive glass (rate for glass included) and bottom panel to receive lining including vinyl glazing gasket (ironmongery measured separately). Covered on both sided with and including 13mm thk plain gypsum board finished with 2 coats of emulsion paint.	sq m	179.40
SW.243	Extra over demountable partition for 40mm thk panelled door, top panel opened to receive glass (rate for glass included) and bottom panel to receive lining including vinyl glazing gasket (ironmongery measured separately). Covered on both sides with and including 13mm thk Vinyl faced gypsum board.	sq m	203.20
SW.244	Extra over demountable partition for 40mm thk panelled door, top panel opened to receive glass (rate for glass included) and bottom panel to receive lining including vinyl glazing gasket (ironmongery measured separately). Covered on both sides with and including 6mm thk teak veneered plywood.	sq m	179.40
SW.245	Take down door from demountable aluminium partition , remove to store or remove off site or stack aside for re-use and make good surround	no	5.80
SW.246	Hang existing door to demountable aluminium partition including replacing accessories to match existing (Ironmongery measured separately).	no	14.40
SW.247	1 hour rated steel fire door 1200 x 2100 x 47mm thick, single leaf, Polynorm complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	1,471.50

S/No	Description	Unit	Unit Cost (\$)
SW.248	1 hour rated steel fire door 1200 x 2100 x 47mm thick, single leaf, Pyropanel complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	1,728.00
SW.249	1 hour rated steel fire door 2400 x 2100 x 47mm thick, double leaf, Polynorm complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	2,719.50
SW.250	1 hour rated steel fire door 2400 x 2100 x 47mm thick, double leaf, Pyropanel complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	3,144.00
SW.251	2 hour rated steel fire door 1200 x 2100 x 48mm thick, single leaf, Polynorm complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	1,945.00
SW.252	2 hour rated steel fire door 1200 x 2100 x 48mm thick, single leaf, Pyropanel complying with SS332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	1,885.50
SW.253	2 hour rated steel fire door 2400 x 2100 x 48mm thick, double leaf, Polynorm complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	2,878.50
SW.254	2 hour rated steel fire door 2400 x 2100 x 48mm thick, double leaf, Pyropanel complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	3,303.00
SW.255	1/2 hour rated steel fire door 1000 x 2250 x 45mm thick, single leaf, Polynorm complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	800.00
SW.256	1 hour rated steel fire door 1800 x 2250 x 45mm thick, double leaf, Polynorm complying with SS 332 complete with fire proofed cylinder lockset, stainless steel ball bearing hinges, flush bolt, door closer and frame.	no	1,600.00
SW.257	Steel Flush door 1800x2380x45mm thk,double leaf with 1800x340 top panel complete with ironmongory	no	2,000.00
SW.258	Heavy duty natural anodised louvred doors comprising of 50mm x 45mm x 1.83mm thick aluminium vertical stiles, 80mm x 45mm x 2.3mm thick aluminium top and centre rails, 50mm x 45mm x 2.3mm thick aluminium bottom rail, 75mm girth x 3mm thick aluminium louvred blade infill, 38mm x 3mm thick aluminium bracing c/w approved hinges, 150mm bolts and heavy duty hasp and staple including 102mm x 50mm x 3mm thick and 50mm x 25mm x 2mm thick aluminium hollow section door frame and fixed frame to wall.	sq m	418.00
SW.259	Heavy duty anodised bronze aluminium louvred doors comprising of 50mm x 45mm x 1.83mm thick aluminium vertical stiles, 80mm x 45mm x 2.3mm thick aluminium top and centre rails, 50mm x 45mm x 2.3mm thick aluminium bottom rail, 75mm girth x 3mm thick aluminium louvred blade infill, 38mm x 3mm thick aluminium bracing c/w approved hinges, 150mm bolts and heavy duty hasp and staple including 102mm x 50mm x 3mm thick and 50mm x 25mm x 2mm thick aluminium hollow section door frame and fixed frame to wall.	sq m	448.80
SW.260	Aluminium sliding door (approved thickness) in single or multiple leaves with anodised natural satin matt finish framing, in one panel and with vinyl glazing gasket to receive glass, c/w door frame including waterproof cement fillet, vinyl weather strip all round, tracks, channels, nylon rollers, guides, concealed hook, cylinder lock operated by latch or by key and all necessary accessories (Glass measured separately).	sq m	154.60

S/No	Description	Unit	Unit Cost (\$)
SW.261	Aluminium sliding door (approved thickness) in single or multiple leaves with anodised natural satin matt finish framing, in two panels and with vinyl glazing gasket to receive glass, c/w door frame including waterproof cement fillet, vinyl weather strip all round, tracks, channels, nylon rollers, guides, concealed hook, cylinder lock operated by latch or by key and all necessary accessories (Glass measured separately).	sq m	157.60
SW.262	Take down existing aluminium sliding door complete, remove off site or stack aside for re-use and make good area disturbed.	sq m	29.30
SW.263	Take out swing door if necessary, replace hydraulic oil in the mechanism box and rehang (rate per leaf).	no	58.40
SW.264	Adjust, ease, oil and make good track, frame, etc for aluminium sliding door (any thickness) and including replacing any missing or damaged rollers and guide, taking out door and re-hanging if necessary (rate per leaf).	no	46.60
SW.265	Take out glass door (any type and size), refit patch, fitting & rehang glass door & realignment (rate per leaf).	no	120.00
SW.266	Adjust, ease, oil and make good track, frame, etc for aluminium swing door including replacing any missing or damage top centre do (rate per leaf).	no	46.60
SW.267	Anodised aluminium glazed swing door and frame 75mm x 40mm thick door surround with weather strip all round and gasket to receive glass c/w necessary floor spring, lock and 200mm high push/pull plate (Glass measured separately).	sq m	240.00
SW.268	Anodised aluminium glazed swing door and frame 100mm x 40mm thick door surround with weather strip all round and gasket to receive glass c/w necessary floor spring, lock and 200mm high push/pull plate (Glass measured separately).	sq m	274.80
SW.269	Anodised aluminium framed partition divided into one or multiple panels and fanlights and comprising 75 x 40mm studs placed at not more than 1200mm centre c/w weather strip all round, gasket to receive glass and 100mm high aluminium skirting (Glass measured separately).	sq m	116.20
SW.270	Anodised aluminium framed partition divided into one or multiple panels and fanlights and comprising 100 x 40mm studs placed at not more than 1200mm centre c/w weather strip all round, gasket to receive glass and 100mm high aluminium skirting (Glass measured separately).	sq m	145.90
SW.271	Anodised aluminium framed partition divided into one or multiple panels and fanlights and comprising 75 x 40mm studs including aluminium fascia (Glass measured separately).	sq m	149.50
SW.272	Aluminium framed partition with fixed glazed panel as before described each with 200mm high transome, including top fixed light, fanlight and one or multiple leaves of standard swing doors, each with 200mm high push/pull plates on both sides and with weather strips all round c/w approved floor spring and lock. (Glass measured separately).	sq m	120.70
SW.273	Anodised bronze aluminium glazed swing door c/w door frame including weather strips, gasket, floor spring, lock and push/pull plate. (Glass measured separately).	sq m	404.40
SW.274	Bronze aluminium sliding door in single or multiple leaves with bronze anodised material satin matt finished framing and vinyl glazing gasket to receive glass, c/w door frame including waterproof cement fillet, vinyl weather strip all round, tracks, channels, rollers, guides, concealed hook, cylinder lock operated by latch or by key and all other necessary accessories (Glass measured separately).	sq m	153.10

S/No	Description	Unit	Unit Cost (\$)
SW.275	Approved aluminium sliding casement with 75mm x 50mm anodised natural satin matt finished framing in one panel opened and with vinyl glazing gaskets to receive glazing c/w casement frame including waterproof cement fillet, vinyl weather strip, tracks, channels, nylon rollers, guides, zinc casting casement catch or lock with key and all other necessary accessories (Glass measured separately).	sq m	105.10
SW.276	Approved bronze anodised aluminium sliding window with 75mm x 50mm anodised natural satin matt finished framing in one panel opened and with vinyl glazing gaskets to receive glazing c/w casement frame including waterproof cement fillet, vinyl weather strip, tracks, channels, nylon rollers, guides, zinc casting casement catch or lock with key and all other necessary accessories (Glass measured separately).	sq m	126.80
SW.277	Approved aluminium side hung window with anodised natural satin matt finished framing with vinyl glazing gaskets to receive glazing c/w casement frame including waterproof cement fillet, vinyl weather strip, zinc casting casement catch or lock with key and all other necessary accessories (Glass measured separately).	sq m	132.00
SW.278	Approved bronze anodised aluminium side hung window with anodised natural satin matt finished framing with vinyl glazing gaskets to receive glazing c/w casement frame including waterproof cement fillet, vinyl weather strip, zinc casting casement catch or lock with key and all other necessary accessories (Glass measured separately).	sq m	189.10
SW.279	Take down approved bronze anodised aluminium side hung window complete, remove off site and make good area disturbed.	sq m	17.30
SW.280	Anodised aluminium fixed panel comprising of 75mm x 50mm anodised aluminium hollow section surround and fixed vertically at not exceeding 900mm centre to centre c/w beading and glazing gaskets to receive glazing (Glass measured separately).	sq m	79.20
SW.281	Anodised bronze aluminium fixed panel comprising of 75mm x 50mm anodised bronze aluminium hollow section surround and fixed vertically at not exceeding 900mm centre to centre c/w beading and glazing gaskets to receive glazing (Glass measured separately).	sq m	103.20
SW.282	Anodised aluminium fixed panel comprising of 100mm x 50mm anodised aluminium hollow section surround and fixed vertically at not exceeding 900mm centre to centre c/w glazing gaskets to receive glazing (Glass measured separately).	sq m	92.40
SW.283	Anodised bronze aluminium fixed panel comprising of 100mm x 50mm anodised aluminium hollow section surround and fixed vertically at not exceeding 900mm centre to centre c/w glazing gaskets to receive glazing (Glass measured separately).	sq m	113.50
SW.284	Supply and fix 50 x 100 x 3mm powder coated door frame of size 1000mm wide x 2400mm high	set	240.00
SW.285	Supply and fix 50 x 100 x 3mm powder coated door frame of size 1250mm wide x 2400mm high.	set	300.00
SW.286	Supply and fix 50 x 100 x 3mm powder coated door frame of size 2000mm wide x 2400mm high.	set	336.00
SW.287	Approved aluminium top-hung window with anodised natural satin matt finished framing with vinyl glazing gaskets, c/w casement frame including waterproof cement fillet, vinyl weather strip, zinc casting casement catch and all other necessary accessories (glass measured separately). Overall not exceeding 0.40sq m.	sq m	340.10

S/No	Description	Unit	Unit Cost (\$)
SW.288	Approved aluminium top-hung window with anodised natural satin matt finished framing with vinyl glazing gaskets, c/w casement frame including waterproof cement fillet, vinyl weather strip, zinc casting casement catch and all other necessary accessories (glass measured separately). Overall exceeding 0.40sq m but not exceeding 1.10sq m.	sq m	243.80
SW.289	Approved aluminium top-hung window with anodised natural satin matt finished framing with vinyl glazing gaskets, c/w casement frame including waterproof cement fillet, vinyl weather strip, zinc casting casement catch and all other necessary accessories (glass measured separately). Overall exceeding 1.10sq m.	sq m	206.60
SW.290	Bronze aluminium top-hung window with bronze anodised natural satin matt finished framing with vinyl glazing gaskets, c/w casement frame including waterproof cement fillet, vinyl weather strip, casement catch and all other necessary accessories (glass measured separately). Overall not exceeding 0.40sq m.	sq m	356.40
SW.291	Bronze aluminium top-hung window with bronze anodised natural satin matt finished framing with vinyl glazing gaskets, c/w casement frame including waterproof cement fillet, vinyl weather strip, casement catch and all other necessary accessories (glass measured separately). Overall exceeding 0.40sq m but not exceeding 1.10sq m.	sq m	261.40
SW.292	Bronze aluminium top-hung window with bronze anodised natural satin matt finished framing with vinyl glazing gaskets, c/w casement frame including waterproof cement fillet, vinyl weather strip, casement catch and all other necessary accessories (glass measured separately). Overall exceeding 1.10sq m.	sq m	223.20
SW.293	Supply and install sunbreaker comprising of 18 SWG (1.22mm) fixed plain or extruded aluminium louvres 100mm wide, bent as necessary with all edges beaded, soldered fixed at 60 degrees to and including 75mm x 25mm aluminium hollow section surround and mullions consisting of 75mm x 45mm 'U' channel fixed to 75mm x 45mm aluminium hollow section at not exceeding 900mm centre to centre.	sq m	195.60
SW.294	Take out existing louvred blades from sunbreaker, remove off site and replace blades to match existing (Rate per length of blade).	m	7.80
SW.295	Remove off site existing sunbreaker including frames, struts etc and make good work disturbed.	sq m	2.50
SW.296	Supply and install approved aluminium sunbreaker comprising of baked enamelled louvred panels(0.6mm thick) and stringers, c/w anodised aluminium hollow section frames and struts, wall brackets, approved bolts, screws, etc and all other necessary accessories. Area not exceeding 50sq m.	sq m	128.30
SW.297	Supply and install approved aluminium sunbreaker comprising of baked enamelled louvred panels(0.6mm thick) and stringers, c/w anodised aluminium hollow section frames and struts, wall brackets, approved bolts, screws, etc and all other necessary accessories. Area exceeding 50sq m but not exceeding 100sq m.	sq m	114.00
SW.298	Supply and install approved aluminium sunbreaker comprising of baked enamelled louvred panels(0.6mm thick) and stringers, c/w anodised aluminium hollow section frames and struts, wall brackets, approved bolts, screws, etc and all other necessary accessories. Area exceeding 100sq m but not exceeding 500sq m.	sq m	107.30
SW.299	Supply and install approved aluminium sunbreaker comprising of baked enamelled louvred panels(0.6mm thick) and stringers, c/w anodised aluminium hollow section frames and struts, wall brackets, approved bolts, screws, etc and all other necessary accessories. Area not exceeding 500sq	sq m	99.80

S/No	Description	Unit	Unit Cost (\$)
	m.		
SW.300	Supply and install approved aluminium sunbreaker comprising of extruded aluminium louvred panels (0.6mm thick) c/w anodised aluminium frames, profile cap, panel lock brackets lock, panel bracket and all other necessary accessories. Area not exceeding 50sq m.	sq m	262.00
SW.301	Supply and install approved aluminium sunbreaker comprising of extruded aluminium louvred panels (0.6mm thick) c/w anodised aluminium frames, profile cap, panel lock brackets lock, panel bracket and all other necessary accessories. Area exceeding 50sq m but not exceeding 100sq m.	sq m	199.60
SW.302	Supply and install approved aluminium sunbreaker comprising of extruded aluminium louvred panels (0.6mm thick) c/w anodised aluminium frames, profile cap, panel lock brackets lock, panel bracket and all other necessary accessories. Area exceeding 100sq m but not exceeding 500sq m.	sq m	187.10
SW.303	Supply and install approved aluminium sunbreaker comprising of extruded aluminium louvred panels (0.6mm thick) c/w anodised aluminium frames, profile cap, panel lock brackets lock, panel bracket and all other necessary accessories. Area exceeding 500sq m.	sq m	174.60
SW.304	Supply and install aluminium ceiling comprising of aluminium panels of 0.5mm thick in baked enamel coating, V5 aluminium carrier, black infill and all necessary fixing accessories.	sq m	78.10
SW.305	Approved manually operated self-coiling natural finished aluminium roller shutter (fixed at bookshop, workshop, etc) of not less than 1.22mm interlocking latches c/w spring barrel assembly on top, bolted to concrete lintel and encased with not less than 1.0mm sheet including guides and brackets to concrete, fitting with 2 Nos. brass slip bolts at both ends of bottom rail with (Extreme size of openings shall be measured).	sq m	173.50
SW.306	Provide opening in above item and including wicket door hinged to brickwork, concrete work, etc and all necessary ironmongery (padlock measured separately) (Extreme size of openings measured).	sq m	252.00
SW.307	Take out and repair existing aluminium or other metal roller shutter including replacing missing rollers, overhanging gears, tracks, oiling to working condition and refixing shutter in position. Overall size not exceeding 4m x 4m.	no	234.00
SW.308	Take out and repair existing aluminium or other metal roller shutter including replacing missing rollers, overhanging gears, tracks, oiling to working condition and refixing shutter in position. Overall size exceeding 4m x 4m.	sq m	16.80
SW.309	Take out existing roller shutter complete, remove off site or set aside for reuse and make good work disturbed.	no	111.60
SW.310	Fix only roller shutter in position as directed including providing minor accessories.	sq m	55.80
SW.311	Supply and install approved manually operated type bronze anodised aluminium roller shutter c/w guides. lock accessories, etc (Extreme size of openings shall be measured).	sq m	208.30
SW.312	Supply and install approved manually operated type colour powder coated aluminium roller shutter c/w guides. lock accessories, etc (Extreme size of openings shall be measured).	sq m	276.00

S/No	Description	Unit	Unit Cost (\$)
SW.313	Supply and install approved chain operated colour powder coated aluminium roller shutter c/w guides, 3 phase gear motor with safety chain, limit switch, push button, accessories, etc.	sq m	372.00
SW.314	Replacement of metal U-channel track including removal and making good work disturbed (Take down doors to be measured separately).	m	8.40
SW.315	1.0mm rolled aluminium sheet panelling well lapped at joint and fixed to hollow section railing with stainless steel self tapping screws, as fascia, railing, etc including all cutting, waste and drilling. (Measured nett) (No allowance made for laps).	sq m	240.00
SW.316	Take down aluminium weather fascia board and remove off site or stack for re-use.	sq m	0.70
SW.317	Refix aluminium weather fascia board including supplying new screws, cutting damaged and preparing edge to receive new.	sq m	15.40
SW.318	(1.32mm) anodised aluminium section cut to 19mm x 19mm hollow section, fixed to brickwork, concrete work, etc including bending, welding and drilling holes etc.	m	5.60
SW.319	(1.32mm) anodised aluminium section cut to 25mm x 13mm hollow section, fixed to brickwork, concrete work, etc including bending, welding and drilling holes etc.	m	5.60
SW.320	(1.32mm) anodised aluminium section cut to 38mm x 25mm hollow section, fixed to brickwork, concrete work, etc including bending, welding and drilling holes etc.	m	7.60
SW.321	(1.32mm) anodised aluminium section cut to 50mm x 25mm hollow section , fixed to brickwork, concrete work, etc including bending, welding and drilling holes etc.	m	8.30
SW.322	(1.32mm) anodised aluminium section cut to 75mm x 25mm hollow section, fixed to brickwork, concrete work, etc including bending, welding and drilling holes etc.	m	10.40
SW.323	(1.32mm) anodised aluminium section cut to 75mm x 50mm hollow section fixed to brickwork, concrete work, etc including bending, welding and drilling holes etc.	m	16.80
SW.324	(1.32mm) anodised aluminium section cut to 100mm x 25mm hollow section, fixed to brickwork, concrete work, etc including bending, welding and drilling holes etc.	m	13.20
SW.325	(1.32mm) anodised aluminium section cut to 100mm x 40mm hollow section, fixed to brickwork, concrete work, etc including bending, welding and drilling holes etc.	m	17.40
SW.326	(1.32mm) anodised aluminium section cut to 25mm x 25mm hollow section, fixed to brickwork, concrete work, etc including bending, welding and	m	6.50
SW.327	drilling holes etc. (1.32mm) anodised aluminium section cut to 75mm x 75mm hollow section, fixed to brickwork,	m	19.70
SW.328	concrete work, etc including bending, welding and drilling holes etc. (1.32mm) anodised aluminium section cut to 25mm x 20mm bead, fixed to brickwork, concrete work, etc including bending, welding and drilling holes	m	4.20
SW.329	etc. (1.32mm) anodised aluminium section cut to 6mm x 6mm channel, fixed to brickwork, concrete work, etc including bending, welding and drilling holes	m	3.80
SW.330	etc. (1.32mm) anodised aluminium section cut to 10mm x 10mm channel, fixed to brickwork, concrete work, etc including bending, welding and drilling	m	4.00
SW.331	holes etc. (1.32mm) anodised aluminium section cut to 13mm x 13mm channel, fixed to brickwork, concrete work, etc including bending, welding and drilling	m	4.20

SW.504	5mm diameter hole 'HILTI' LB punched steel band or other equal and approved type to hang or secure pipes, ducts, etc.	no	2.50
SW.505	7mm diameter hole 'HILTI' LB punched steel band or other equal and approved type to hang or secure pipes, ducts, etc.	no	3.50
SW.506	8mm diameter hole 'HILTI' LB punched steel band or other equal and approved type to hang or secure pipes, ducts, etc.	no	4.10
SW.507	50mm x 50mm x 6mm thick mild steel angle arris protective guard 1.00m high, set flush to brick or concrete surface with 2 Nos. of 25mm x 3mm x 225mm long fixing lugs grouted into mortices with cement mortar (1:3).	no	9.60

S/No	Description	Unit	Unit Cost (\$)
SW.508	Supply and fix 150mm diameter mild steel tubular bollard 1.20m from ground level including embedding 300mm in concrete foundation including painting with one coat of inhibitive primer and two coats of aluminium/synethic enamel paint (concrete foundation measured	no	60.00
	separately).		
SW.509	Standard design basketball stand c/w timber board, metal ring to receive basketball net, three coats of enamel paint, concrete (Grade 20) foundation, including all necessary excavation, formwork, removing debris off site breaking existing concrete surface, etc (Rate per set 2 Nos.).	set	2,400.00
SW.510	Supply & deliver 3.18mm (1/8 inch) link dia galv chain link.	m	1.80
SW.511	Supply & deliver 3.97mm (5/32 inch) link dia galv chain link.	m	1.90
SW.512	Supply & deliver 4.76mm (3/16 inch) link dia galv chain link.	m	1.90
SW.513	Supply & deliver 6.35mm (1/4 inch) link dia galv chain link.	m	2.80
SW.514	Supply & deliver 7.94mm (5/16 inch) link dia galv chain link.	m	4.60
SW.515	Supply & deliver 9.53mm (3/8 inch) link dia galv chain link.	m	6.60
SW.516	Supply and deliver 3.18 mm (1/8 inch) link dia stainless steel chain link	m	6.20
SW.517	Supply and deliver 3.97mm (5/32 inch) link dia stainless steel chain link	m	8.60
SW.518	Supply and deliver 4.76mm (3/16 inch) link dia stainless steel chain link	m	10.10
SW.519	Supply and deliver 6.35mm (1/4 inch) link dia stainless steel chain link	m	11.70
SW.520	Supply and deliver 7.94mm (5/16 inch) link dia stainless steel chain link	m	15.60
SW.521	Supply and deliver 9.53mm (3/8 inch) link dia stainless steel chain link.	m	20.30
SW.522	Supply labour and material for cutting or welding locks, hinges, bolt, etc in replacement (Ironmongery and cutting or welding apparatus measured separately).	no	6.60
SW.523	Remove existing strong room steel security door (not more than 300kg) complete, transport and deliver to store or remove off site, including breaking up walls, remove debris off site and making good work disturbed.	no	1,440.00
SW.524	Labour and material for cutting openings (any size) in weldmesh (any mesh and gauge) and including filling out ends smooth. (Cutting apparatus measured separately).	no	4.30
SW.525	Mild steel dowels not exceeding 12mm diameter x 150mm long fixed to foot of wood frames.	no	0.80
SW.526	40mm x 3mm mild steel cramps 225mm girth once bent, one end split and fixed in brickwork and other end screwed to wood frame.	no	1.00
SW.527	Mild steel straps (to fasten foot of wooden posts etc) not exceeding 50mm x 6mm x 600mm long holed for and including 2 numbers of steel bolts with nuts and washers including casting one end in concrete.	no	10.60
SW.528	6mm thick mild steel shoe of purpose-made design (any size) for holding timber purlins, rafters, joints, etc.	no	15.60
SW.529	Aluminium rivets to linings (Any size).	no	0.20
SW.530	Mild steel rag bolts (irrespective of size and lengths) with nuts and washers including temporary boxing to form holes, building in and grouting.	kg	7.20
SW.531	Labour for removing mild steel brackets, plugs, from wall and make good work disturbed.	no	3.60
SW.532	Supply labour and all necessary equipment for argon welding to stainless steel ware.	m	45.60
SW.533	Supply and install 5mm dia galvanised eye or hook c/w extension bolt.	no	2.40
SW.534	Supply and install 6mm dia galvanised eye or hook c/w extension bolt.	no	3.10
SW.535	Supply and install 8mm dia galvanised eye or hook c/w extension bolt	no	3.70
SW.536	Supply and install 10mm dia galvanised eye or hook c/w extension bolt.	no	5.40
SW.537	Supply and install 5mm dia stainless steel eye or hook c/w extension bolt	no	4.80
SW.538	Supply and install 6mm dia stainless steel eye or hook c/w extension bolt.	no	6.20

S/No	Description	Unit	Unit Cost (\$)
SW.539	Supply and install 8mm dia stainless steel eye or hook c/w extension bolt	no	7.40
SW.540	Supply and install 10mm dia stainless steel eye or hook c/w extension bolt.	no	10.80
SW.541	Supply and install 3mm dia stainless steel Dee shackle.	no	3.10
SW.542	Supply and install 4mm dia stainless steel Dee shackle.	no	3.20
SW.543	Supply and install 5mm dia stainless steel Dee shackle.	no	3.40
SW.544	Supply and install 6mm dia stainless steel Dee shackle	no	4.10
SW.545	Supply and install 8mm dia stainless steel Dee shackle	no	4.60
SW.546	Supply and install 10mm dia stainless steel Dee shackle.	no	5.40
SW.547	To remove any type and size of eye or hook, shackle, turnbuckle including	no	3.00
	make good affected surfaces to match the existing.		
SW.548	Supply and install 5mm dia stainless steel turnbuckle	no	9.00
SW.549	Supply and install 6mm dia stainless steel turnbuckle	no	10.20
SW.550	Supply and install 8mm dia stainless steel turnbuckle	no	15.00
SW.551	Supply and install 10mm dia stainless steel turnbuckle.	no	16.80
SW.552	Mild steel railing consisting of tubular or square hollow section set in and	m	42.80
	including concrete foundation, painting with one coat of red lead primer,		
	one undercoat and two finishing coats of enamel paint, excavation for		
	concrete foundation and disposal of excavated material from site.		
SW.553	Mild steel railing consisting of tubular or square hollow section set in and	m	50.00
	including concrete foundation, painting with one coat of red lead primer,		
	one undercoat and two finishing coats of enamel paint, excavation for		
0144 5 5 4	concrete foundation and disposal of excavated material from site		24.50
SW.554	Supply and fix 20mm diameter stainless steel pipe railing, intermediate rail	m	24.50
	or baluster to AISI 304 x 1.5mm thick with polished finished including welding, bend, ramp, knee and end cap.		
כואו דדד			22.00
SW.555	Supply and fix 25mm diameter stainless steel pipe railing, intermediate rail or baluster to AISI 304 x 1.5mm thick with polished finished including	m	33.00
	welding, bend, ramp, knee and end cap.		
SW.556	Supply and fix 32mm diameter stainless steel pipe railing, intermediate rail	m	44.90
3VV.330	or baluster to AISI 304 x 1.5mm thick with polished finished including	'''	44.50
	welding, bend, ramp, knee and end cap.		
SW.557	Supply and fix 38mm diameter stainless steel pipe railing, intermediate rail	m	51.50
	or baluster to AISI 304 x 1.5mm thick with polished finished including		0 2.00
	welding, bend, ramp, knee and end cap.		
SW.558	Supply and fix 50 mm diameter stainless steel pipe railing, intermediate rail	m	64.10
	or baluster to AISI 304 x 1.5mm thick with polished finished including		
	welding, bend, ramp, knee and end cap,		
SW.559	Supply and fix 65mm diameter stainless steel pipe railing, intermediate rail	m	88.80
	or baluster to AISI 304 x 1.5mm thick with polished finished including		
	welding, bend, ramp, knee and end cap.		
SW.560	Dismantle and cart away existing railing	m	19.20
SW.561	Supply and install 1000mm high stainless steel railing, constructed with 50 x	m	390.00
	9mm thick flat bar baluster, 15mm dia soild rod and 50mm dia x 1.5mm		
	thick circular hollow section c/w concrete footing.		
SW.562	Stainless steel round-shaped floor flange not exceeding 38mm diameter &	no	33.00
	complete with stainless steel pipe sleeve built into concrete floor for		
6147 = 66	balusters.		20.55
SW.563	Stainless steel round-shaped floor flange exceeding 38mm diameter but not	no	39.60
	exceeding 65mm diameter & complete with stainless steel pipe sleeve built into concrete floor for balusters.		
	into concrete moor for palusters.		

S/No	Description	Unit	Unit Cost (\$)
SW.564	Supply and install aluminium 'Vee' plate, 100mm width to new or existing expansion join. (Rate inclusive of hacking out finishes to expose bare concrete surfaces install as accordance to Superintending Officer's instruction and make good. (Appendix 40).	m	78.00
SW.565	Supply and install aluminium 'Vee' plate, 200mm width to new or existing expansion join. (Rate inclusive of hacking out finishes to expose bare concrete surfaces install as accordance to Superintending Officer's instruction and make good. (Appendix 41).	m	114.00
SW.566	Supply and install aluminium 'Vee' plate, 300mm width to new or existing expansion join. (Rate inclusive of hacking out finishes to expose bare concrete surfaces install as accordance to Superintending Officer's instruction and make good. (Appendix 41).	m	150.00
SW.567	Take down existing clothes lines frames (any type and size) including any wire remove off site and make good work disturbed (Rate per post).	no	6.00
SW.568	Repair existing clothes-lines frame (any type and size) including raking out, replacing and welding of parts, refixing clothes line (if any) brushing down and 3 coats paint and making good work disturbed as necessary. (Galvanised wire lines measured separately). (Rate per post).	no	29.00
SW.569	50mm diameter galvanised steel pipe clothes lines frames with post 2.30m long and cross frame 1.60m wide all properly connected or welded together c/w wire strainer, end of post cast in and including concrete (Grade 20) footing 750mm deep, formwork, excavation, removing surplus excavated material off site and 2 coats paint (Rate per post).	no	83.90
SW.570	50mm diameter galvanised steel pipe clothes lines frames with one strut, 2.10m long, one end connected or welded to post and other end cast in and including concrete (Grade 20) footing 750mm deep, formwork, excavation, removing surplus excavated material off site and 2 coats paint (Rate per post).	no	130.20
SW.571	50mm diameter galvanised steel pipe clothes lines frames with two struts, each 2.30m long, one end connected to welded to arm and other end cast in and including concrete (Grade 20) footing 750mm deep, formwork, excavation, removing surplus excavated material off site and 2 coats paint (Rate per post).	no	174.00
SW.572	No: 8 galvanised wire for clothes lines (length measured between distance of clothes lines frames).	m	1.20
SW.573 SW.574	PVC coated 6 SWG galvanised wire for clothes lines. Supply and install 6 mm stainless steel wire with PVC coating excluding turnbuckle.	m m	1.10 4.20
SW.575	Supply labour to install clothline	no	3.00
SW.576	Supply all plant, labour and material to raise existing aluminium railings to required height and level, including all necessary replacement and extension member.	m	32.40
SW.577	Supply all plant, labour and material to re-align existing aluminium railings to required height and level including breaking up and reconstruction of concrete foundation.	m	77.30
SW.578	Fabricate & install stainless steel box (8" X 8") complete with lock and keys.	no	180.00
SW.579	Charges per service call for maintenance & repair of Gliderol shutter door	per call	66.00
SW.580	Mounting bracket plate, 8mm thk steel punched as required	per side	200.00
SW.581	Roller Bearing (for 38mm dia shaft)	no	210.00
SW.582	Roller Bearing (for 50mm dia shaft)	no	210.00
SW.583	Hood,0.9mm thk galvanised sheets bent to suit	m	72.00

SW.601	Double angle iron bottom rails, primed painted	m	29.50
SW.602	ditto but in powder coated finish	m	35.00
SW.603	ditto but in fluorocabon finish finish	m	40.00
SW.604	Triple angle-iron door Guides	m	80.00
SW.605	ditto but in powder coated finish	m	96.00
SW.606	ditto but in fluorocabon finish finish	m	113.00
SW.607	Operating Accessories- Motor Drive unit, up to 0.75 hp capacity single Ph	no	1,285.00
SW.608	Motor Drive unit,1.0 hp capacity -3 phase	no	2,100.00
SW.609	Motor Drive unit, 2.0 hp capacity -3 phase	no	3,780.00
SW.610	Control PCB Card	no	162.00
SW.611	Lockable Push-button set with SS cover	set	117.00
SW.612	Motor Drive Unit c/w descent governor -up to 1.0hp side mounted 3 Ph	no	2,950.00
SW.613	Motor Drive Unit c/w descent governor -up to 1.5hp side mounted 3 Ph	no	3,350.00
SW.614	Motor Drive Unit c/w descent governor -up to 2.0hp side mounted 3 Ph	no	4,950.00
SW.615	Control Box c/w push button	no	380.00
SW.616	Indivdual Push Buttons only	no	40.00
SW.617	Rear Mounted Chain Hoist for Manual Chain Hoist operator	no	455.00
SW.618	Side Mounted Chain Hoist for Manual Chain Hoist operator	no	930.00
SW.619	Motor Drive Sprocket	no	100.00
SW.620	Door Drive Sprocket 47 teeth	no	145.00
SW.621	Door Drive Sprocket 57 teeth	no	170.00
SW.622	Limit Switches for roller shutter	set	98.00
SW.623	Drive Chain for roller shutter	pce	50.00
SW.624	Manual Hand Chain for roller shutter	m	7.50
SW.625	Automatic (solenoid) Release Mechanism for Roller Shutter	no	385.00
SW.626	Fusible Link for roller shutter	no	35.00
SW.627	To fabricate, supply and install 1000mm high Stainless Steel Railing with 38mm Dia x 1.5mm thick	m	340.00
SW.628	Ditto for handicap ramp	m	340.00
SW.629	To fabricate, supply and install 1000mm high Stainless Steel Railing with 50.8mm Dia x 1.5mm thick	m	120.00
SW.630	To fabricate, supply and install 900mm high x 38mm Dia. Stainless Steel Railing for Handicap ram	m	95.00
SW.631	Supply and install chromed finished clothes hanger complete with 5 or more hooks in a row)	no	6.00

S/No	Description	Unit	Unit Cost (\$)
SW.632	Supply all labour, transport, tools, equipment and materials to remove and disposed off-site the existing adjustable aluminium louvred window including making good affected area to receive new installation (Area size 3700mm (L) x 1320mm (H))	per room	50.00
SW.633	Supply and install anodized extruded aluminium framed side hung casement window with top/bottom flush latch c/w 1.5mm thick aluminium grill & 6mm thk tinted float glass and ironmongery & all necessary fixing and jointing materials & accessories (Casement window area size 1200mm (L) x 1320mm X 2 nos)	per room	850.00
SW.634	Supply all labour, transport, tools, equipment and materials to install anodized extruded aluminium framed adjustable louvred vents c/w grill & aluminium U clips/holders and adjustable lever (separate into minimum 3 sections of its height), 6mm thk tinted float glass and ironmongery and all necessary fixing and jointing materials and accessories (Area size 600mm (L) x 1320mm x 2nos)	per room	100.00
SW.635	Supply and install stainless steel frame structure for laundry drying for size average size 2300mm (L)x 800mm (H) x 600mm (D)	no	335.00
SW.636	Supply and install 2mm thk approved coloured anodized powder coated aluminium sheet for average size 2300mm (L)x 800mm (H) x 600mm (D)	no	1,060.00
SW.637	Supply and install 3 nos of stainless steel laundry lines at each laundry drying area	no	120.00
SW.638	Supply, fabrication and install telephone bracket treated with anti rust powder coated finish and padlock	no	85.00
SW.639	Supply and install 3mm thick perforated aluminium panel with powder coating (any colour), hole size square/circle 8mm, opening (%) = 28.86, pitch: 16mm x 60 degree, the panels should be supported with 3mm x 50mm x 50mm aluminium hollow section with powder coating and1200mm intervel centre to center	sq m	300.00

7. PAINTWORK

S/No	Description	Unit	Unit Cost (\$)
P.1	Scape down and brush with stiff wire brush to remove all vegetable growth and contaminants, wash down with water and chlorox, allow to dry and make good damaged surfaces	sq m	2.00
P.2	Burn off existing oil paint on concrete, brick, hollow block surfaces, or plastered surface, and make good damaged surfaces to receive new painting on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	4.00
P.3	Prepare surfaces as specified, wash down with water and chlorox or other approved detergent to remove all vegetable growth, loose paintwork and other surface contaminants, allow to receive new painting on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	2.00
P.4	Prepare surfaces as specified only to receive new painting (ie. exclude washing down) on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	0.80

S/No	Description	Unit	Unit Cost (\$)
P.5	Prepare surfaces as specified, using high pressure water cleaner or other mechanical means to remove all existing paintwork to bare plaster and wash down all vegetable growths and other surface contaminants, allow to dry and make good damaged surfaces to receive new painting on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	4.00
P.6	Mechanically grind down to remove all existing paintwork to bare plaster, wash down, allow to dry and prepare surfaces as specified to receive new painting on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	4.50
P.7	Prepare and apply two (2) coats of anti-fungus solution on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	3.50
P.8	Prepare and apply two (2) coats of approved water repellent solution on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	3.80
P.9	Prepare and apply one (1) coat of weathershield acrylic emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	2.00
P.10	Prepare and apply one (1) base coat of cement paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	1.60
P.11	Prepare and apply one (1) base coat 20% dilution of pure acrylic emulsion paint used for both interior and exterior decoration on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	1.60
P.12	Prepare and apply one (1) undercoat of enamel paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	2.50
P.13	Prepare and apply one (1) finishing coat of enamel paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	2.80
P.14	Prepare and apply two (2) finishing coat of enamel paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	4.50
P.15	Prepare and apply one (1) base coat of solvent base paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	2.50

S/No	Description	Unit	Unit Cost (\$)
P.16	Prepare and apply one (1) base coat of high performance acrylic emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	2.50
P.17	Prepare and apply one (1) coat of oil base wall sealer on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	2.50
P.18	Prepare and apply one (1) coat of water base wall sealer on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	1.50
P.19	Prepare and apply one (1) base coat of solvent borne acrylic sealer on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	3.90
P.20	Prepare and apply one (1) base coat decorative coating on smooth surface on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	3.00
P.21	Prepare and apply one (1) base coat decorative coating on rough surface on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	5.50
P.22	Prepare as specified and apply one (1) coat of high performance thermoplastic acrylic resin paint, two (2) coats high performance acrylic rubber based paint and one (1) finishing coat of anti-fungi and anti-algae emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	8.80
P.23	Prepare as specified and apply two (2) coats of vinyl silk emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	3.50
P.24	Prepare as specified and apply one coat of vinyl silk emulsion paint.	sq m	1.80
P.25	Prepare as specified and use texture roller to apply two (2) coats of vinyl silk emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	3.50
P.26	Prepare and apply two (2) finishing coats of weather shield finished acrylic emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered	sq m	3.80
P.27	surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).		
P.28	P&A one finishing coats of weather shield acrylic emulsion paint on existing concrete surfaces.	sq m	2.00
P.29	Brush down and apply one (1) finishing coat of pure acrylic emulsion paint used for both interior and exterior decorations on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grilled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	1.50

S/No	Description	Unit	Unit Cost (\$)
P.30	Apply two (2) finishing coats of pure acrylic emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	2.20
P.31	Brush down and apply one (1) finishing coat of high performance acrylic emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	1.80
P.32	Brush down and apply two (2) finishing coat of high performance acrylic emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	3.00
P.33	Brush down and apply two(2) finishing coat of anti-fungus acrylic emulsion paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	3.50
P.34	Prepare and appply one (1) coat of epoxy primer and one (1) finishing coat of polyurethane paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	8.50
P.35	Prepare and appply one (1) coat of epoxy primer and two (2) finishing coat of polyurethane paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	9.50
P.36	Brush down and apply one (1) finishing coat of cement paint on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	1.60
P.37	Brush down and apply one (1) coat polyurethane paint (2 pack system) on existing previously decorated/non decorated concrete, brick or hollow block surfaces, plastered surfaces, plain, perforated or grillled asbestos surfaces, precast concrete vents, etc (measured flat overall).	sq m	4.50
P.38	Prepare as specified and apply one (1) coat of cement paint on new concrete, brick or hollow block surfaces, plastered surfaces, new fibreboard surfaces, plain, perforated or precast concrete vents, etc (measured flat overall).	sq m	1.60
P.39	Prepare as specified and apply one (1) base coat 20% dilution and one (1) undercoat and one (1) finishing coat of acrylic emulsion paint used for both interior and exterior decoration on new concrete, brick or hollow block surfaces, plastered surfaces, new fibreboard surfaces, plain, perforated or precast concrete vents, etc (measured flat overall).	sq m	3.50
P.40	Prepare as specified and apply one (1) base coat 20% dilution of acrylic PVA Copolymer emulsion paint used for both interior and exterior decoration on new concrete, brick or hollow block surfaces.	sq m	1.80
P.41	Prepare as specified and apply one (1) base coat of solvent base paint on new concrete, brick or hollow block surfaces.	sq m	3.50
P.42	Prepare as specified and apply one (1) base coat of high performance acrylic emulsion paint on new concrete, brick or hollow block surfaces.	sq m	2.50
P.43	Prepare as specified and apply one (1) coat of oil base wall sealer on new concrete, brick or hollow block surfaces.	sq m	3.50

S/No	Description	Unit	Unit Cost (\$)
P.44	Prepare as specified and apply one (1) coat of water base wall sealer on new concrete, brick or hollow block surfaces.	sq m	1.50
P.45	Prepare as specified and apply one (1) coat of solvent-borne acrylic sealer on new concrete, brick or hollow block surfaces.	sq m	3.50
P.46	Prepare and apply one (1) undercoat of enamel paint on new concrete, brick or hollow block surfaces.	sq m	1.80
P.47	Prepare and apply one (1) finishing coat of enamel paint on new concrete, brick or hollow block surfaces.	sq m	2.20
P.48	Prepare and apply two (2) finishing coat of enamel paint on new concrete, brick or hollow block surfaces.	sq m	4.40
P.49	Prepare and apply one (1) coat of epoxy primer and one (1) finishing coat of polyurethane paint on new concrete, brick or hollow block surfaces.	sq m	8.50
P.50	Prepare and apply one (1) base coat of decorative coating on smooth surface on new concrete, brick or hollow block surfaces.	sq m	2.90
P.51	Prepare and apply one (1) base coat of decorative coating on rough surface on new concrete, brick or hollow block surfaces.	sq m	5.20
P.52	Brush down and apply one finishing coat of low polyamide epoxy coating (2 packs) system	sq m	3.50
P.53	Brush down and apply one finishing coat of high-build epoxy coating	sq m	3.50
P.54	Brush down and apply 2 coats of epoxy chemical resistant finishing paint	sq m	7.50
P.55	Prepare new surfaces as specified on new concrete, brick or hollow block surfaces.	sq m	0.50
P.56	Apply one (1) coat of wood preservative on surfaces of sawn timber (all surfaces measured flat superficial)	sq m	2.80
P.57	Apply two (2) coat of wood preservative on surfaces of sawn timber (all surfaces measured flat superficial)	sq m	5.00
P.58	Apply one (1) coat of wood preservative on surfaces of wrot woodwork (all surfaces measured flat superficial)	sq m	2.80
P.59	Apply two (2) coat of wood preservative on surfaces of wrot woodwork (all surfaces measured flat superficial)	sq m	5.00
P.60	Knot, stop, sand and apply one (1) coat wood primer on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitious including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.80
P.61	Knot, stop, sand and apply one (1) coat wood primer on general surfaces of wooden trelliswork (measured flat overall between external edges of frames)	sq m	2.80
P.62	Knot, stop, sand and apply one (1) coat wood primer on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows)	sq m	2.80
P.63	Knot, stop, sand and apply one (1) coat wood primer on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.80
P.64	Knot, stop, sand and apply one (1) coat wood primer on surfaces not exceeding 100 mm girth.	m	0.80
P.65	Knot, stop, sand and apply one (1) coat wood primer on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	1.20
P.66	Knot, stop, sand and apply one (1) coat wood primer on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.50

S/No	Description	Unit	Unit Cost (\$)
P.67	Knot, stop, sand, clean with white spirit and apply one (1) coat stain on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitious including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.68	Knot, stop, sand, clean with white spirit and apply one (1) coat stain on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	3.50
P.69	Knot, stop, sand, clean with white spirit and apply one (1) coat stain on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.70	Knot, stop, sand, clean with white spirit and apply one (1) coat stain on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.71	Knot, stop, sand, clean with white spirit and apply one (1) coat stain on surfaces not exceeding 100 mm girth.	m	0.80
P.72	Knot, stop, sand, clean with white spirit and apply one (1) coat stain on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	1.20
P.73	Knot, stop, sand, clean with white spirit and apply one (1) coat stain on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.50
P.74	Knot, stop, sand, clean with white spirit and apply one (1) coat of approved wax polish with hand or polishing machine on general surfaces of chicks, flush, panelled or louvred door/windows,fitments, partitious including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of doors and windows).	sq m	4.00
P.75	Knot, stop, sand, clean with white spirit and apply one (1) coat of approved wax polish with hand or polishing machine on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	4.60
P.76	Knot, stop, sand, clean with white spirit and apply one (1) coat of approved wax polish with hand or polishing machine on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.10
P.77	Knot, stop, sand, clean with white spirit and apply one (1) coat of approved wax polish with hand or polishing machine on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.78	Knot, stop, sand, clean with white spirit and apply one (1) coat of approved wax polish with hand or polishing machine on surfaces not exceeding 100 mm girth.	m	0.60
P.79	Knot, stop, sand, clean with white spirit and apply one (1) coat of approved wax polish with hand or polishing machine on surfaces exceeding 100 mm and not exceeding 200 mm girth	m	1.00
P.80	Knot, stop, sand, clean with white spirit and apply one (1) coat of approved wax polish with hand or polishing machine on surfaces exceeding 200 mm and not exceeding 300 mm girth	m	1.30

S/No	Description	Unit	Unit Cost (\$)
P.81	Knot, stop, sand, clean with white spirit and apply one (1) coat of polyurethane alkyd based transparent wood finish or other equal and approved lacquer and polish to approval general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitious including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	4.00
P.82	Knot, stop, sand, clean with white spirit and apply one (1) coat of polyurethane alkyd based transparent wood finish or other equal and approved lacquer and polish to approval general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	4.60
P.83	Knot, stop, sand, clean with white spirit and apply one (1) coat of polyurethane alkyd based transparent wood finish or other equal and approved lacquer and polish to approval general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.10
P.84	Knot, stop, sand, clean with white spirit and apply one (1) coat of polyurethane alkyd based transparent wood finish or other equal and approved lacquer and polish to approval general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	5.00
P.85	Knot, stop, sand, clean with white spirit and apply one (1) coat of polyurethane alkyd based transparent wood finish or other equal and approved lacquer and polish to approval on surfaces not exceeding 100 mm girth.	m	1.20
P.86	Knot, stop, sand, clean with white spirit and apply one (1) coat of polyurethane alkyd based transparent wood finish or other equal and approved lacquer and polish to approval on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	1.50
P.87	Knot, stop, sand, clean with white spirit and apply one (1) coat of polyurethane alkyd based transparent wood finish or other equal and approved lacquer and polish to approval on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.80
P.88	Knot, stop, sand, clean with white spirit and apply one (1) coat of varnish on general surfaces of chicks, flush, panelled or louvred door/windows,fitments, partitious including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	5.00
P.89	Knot, stop, sand, clean with white spirit and apply one (1) coat of varnish on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	5.00
P.90	Knot, stop, sand, clean with white spirit and apply one (1) coat of varnish on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	5.00
P.91	Knot, stop, sand, clean with white spirit and apply one (1) coat of varnish on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of	sq m	5.00
P.92	doors and windows). Knot, stop, sand, clean with white spirit and apply one (1) coat of varnish on surfaces not exceeding 100 mm girth.	m	1.20

S/No	Description	Unit	Unit Cost (\$)
P.93	Knot, stop, sand, clean with white spirit and apply one (1) coat of varnish on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	1.50
P.94	Knot, stop, sand, clean with white spirit and apply one (1) coat of varnish on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.80
P.95	Apply one (1) coat of wood preservative on existing painted surfaces of sawn and wrot woodwork (all surfaces measured flat superficial).	sq m	2.50
P.96	Apply two (2) coats of wood preservative on existing painted surfaces of sawn and wrot woodwork (all surfaces measured flat superficial).	sq m	4.80
P.97	Prepare and apply 2 coats of approved chalkboard paint to chalkboard in accordance with the Manufacturer's instructions on existing painted surffaces of woodwork.	sq m	4.60
P.98	Sandpaper, stop and prepare general surfaces of chicks, flush, panelled or louvred door/windows,fitments, partitious including frames, mullions and transomes to receive new paintwork (measured flat overall between external edges of frames or external edges of doors and windows).	sq m	0.80
P.99	Sandpaper, stop and prepare general surfaces of wooden trelliswork to receive new paintwork (measured flat overall between external edges of frames).	sq m	1.20
P.100	Sandpaper, stop and prepare general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed to receive new paintwork (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	1.20
P.101	Sandpaper, stop and prepare general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed to receive new paintwork (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	1.20
P.102	Sandpaper, stop and prepare surfaces not exceeding 100 mm girth to receive new paintwork.	m	0.50
P.103	Sandpaper, stop and prepare surfaces exceeding 100 mm and not exceeding 200 mm girth to receive new paintwork.	m	0.80
P.104	Sandpaper, stop and prepare surfaces exceeding 200 mm and not exceeding 300 mm girth to receive new paintwork.	m	1.20
P.105	Prepare, clean with white spirit and apply one (1) coat of wood primer on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitious including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	2.50
P.106	Prepare, clean with white spirit and apply one (1) coat of wood primer on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	2.50
P.107	Prepare, clean with white spirit and apply one (1) coat of wood primer on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.50
P.108	Prepare, clean with white spirit and apply one (1) coat of wood primer on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.50
P.109	Prepare, clean with white spirit and apply one (1) coat of wood primer on surfaces not exceeding 100 mm girth.	m	0.50
P.110	Prepare, clean with white spirit and apply one (1) coat of wood primer on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	0.80

S/No	Description	Unit	Unit Cost (\$)
P.111	Prepare, clean with white spirit and apply one (1) coat of wood primer on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.20
P.112	Sandpaper, stop and clean with white spirit on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes to receive new paintwork (measured flat overall between external edges of frames or external edges of door and windows).	sq m	1.50
P.113	Sandpaper, stop and clean with white spirit on general surfaces of wooden trelliswork to receive new paintwork (measured flat overall between external edges of frames).	sq m	1.80
P.114	Sandpaper, stop and clean with white spirit on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed to receive new paintwork (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.00
P.115	Sandpaper, stop and clean with white spirit on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed to receive new paintwork (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	0.70
P.116	Sandpaper, stop and clean with white spirit on surfaces not exceeding 100 mm girth to receive new paintwork.	m	0.50
P.117	Sandpaper, stop and clean with white spirit on surfaces exceeding 100 mm and not exceeding 200 mm girth to receive new paintwork.	m	0.80
P.118	Sandpaper, stop and clean with white spirit on surfaces exceeding 200 mm and not exceeding 300 mm girth to receive new paintwork.	m	1.20
P.119	Sandpaper, stop and clean with white spirit and apply one (1) coat of stain on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	3.50
P.120	Sandpaper, clean with white spirit and apply one (1) coat of stain on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	3.50
P.121	Sandpaper, clean with white spirit and apply one (1) coat of stain on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.122	Sandpaper, clean with white spirit and apply one (1) coat of stain on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.123	Sandpaper, clean with white spirit and apply one (1) coat of stain on surfaces not exceeding 100 mm girth.	m	0.80
P.124	Sandpaper, clean with white spirit and apply one (1) coat of stain on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	1.20
P.125	Sandpaper, clean with white spirit and apply one (1) coat of stain on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.60
P.126	Rub down and apply one (1) undercoat of enamel paint on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	2.50

S/No	Description	Unit	Unit Cost (\$)
P.127	Rub down and apply one (1) undercoat of enamel paint on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	2.50
P.128	Rub down and apply one (1) undercoat of enamel paint on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.50
P.129	Rub down and apply one (1) undercoat of enamel paint on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.50
P.130	Rub down and apply one (1) undercoat of enamel paint on surfaces not exceeding 100 mm girth.	m	0.50
P.131	Rub down and apply one (1) undercoat of enamel paint on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	0.80
P.132	Rub down and apply one (1) undercoat of enamel paint on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.20
P.133	Rub down and apply one (1) finishing coat of enamel paint on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	2.50
P.134	Rub down and apply one (1) finishing coat of enamel paint on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	2.50
P.135	Rub down and apply one (1) finishing coat of enamel paint on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.50
P.136	Rub down and apply one (1) finishing coat of enamel paint on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.50
P.137	Rub down and apply one (1) finishing coat of enamel paint on surfaces not exceeding 100 mm girth.	m	0.50
P.138	Rub down and apply one (1) finishing coat of enamel paint on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	0.80
P.139	Rub down and apply one (1) finishing coat of enamel paint on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.00
P.140	Rub down and apply two (2) finishing coat of enamel paint on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door andwindows).	sq m	3.50
P.141	Rub down and apply two (2) finishing coat of enamel paint on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	4.00
P.142	Rub down and apply two (2) finishing coat of enamel paint on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50

S/No	Description	Unit	Unit Cost (\$)
P.143	Rub down and apply two (2) finishing coat of enamel paint on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.144	Rub down and apply two (2) finishing coat of enamel paint on surfaces not exceeding 100 mm girth.	m	1.20
P.145	Rub down and apply two (2) finishing coat of enamel paint on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	1.50
P.146	Rub down and apply two (2) finishing coat of enamel paint on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.80
P.147	Rub down and apply one (1) coat of stain on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	3.50
P.148	Rub down and apply one (1) coat of stain on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	3.50
P.149	Rub down and apply one (1) coat of stain on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	2.50
P.150	Rub down and apply one (1) coat of stain on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.00
P.151	Rub down and apply one (1) coat of stain on surfaces not exceeding 100 mm girth.	m	0.50
P.152	Rub down and apply one (1) coat of stain on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	0.80
P.153	Rub down and apply one (1) coat of stain on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.20
P.154	Rub down and apply one (1) coat of varnish on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	3.50
P.155	Rub down and apply one (1) coat of varnish on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	3.50
P.156	Rub down and apply one (1) coat of varnish on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.157	Rub down and apply one (1) coat of varnish on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.158	Rub down and apply one (1) coat of varnish on surfaces not exceeding 100 mm girth.	m	0.50
P.159	Rub down and apply one (1) coat of varnish on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	0.80
P.160	Rub down and apply one (1) coat of varnish on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.20

S/No	Description	Unit	Unit Cost (\$)
P.161	Rub down and apply one (1) coat of varnish on loose furniture of staff quarters such as 1-seater sofa (dining chairs included).	no	6.00
P.162	Rub down and apply one (1) coat of varnish on loose furniture of staff quarters such as 2-seater sofa (dining chairs included).	no	8.50
P.163	Rub down and apply one (1) coat of varnish on loose furniture of staff quarters such as 3-seater sofa (dining chairs included).	no	12
P.164	Rub down and apply one (1) coat of shellac on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	2.50
P.165	Rub down and apply one (1) coat of shellac on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	3.50
P.166	Rub down and apply one (1) coat of shellac on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.167	Rub down and apply one (1) coat of shellac on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.50
P.168	Rub down and apply one (1) coat of shellac on surfaces not exceeding 100 mm girth.	m	0.50
P.169	Rub down and apply one (1) coat of shellac on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	0.80
P.170	Rub down and apply one (1) coat of shellac on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.20
P.171	Not In Use		
P.172	Not In Use		
P.173	Not In Use		4.50
P.174	Rub down and apply two (2) coat of shellac on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	4.50
P.175	Rub down and apply two (2) coat of shellac on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	4.50
P.176	Rub down and apply two (2) coat of shellac on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	4.50
P.177	Rub down and apply two (2) coat of shellac on general surfaces of panelled windows, panelled doors, fanlights, partitions and including frames, mullions and transomes, with one panel glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	4.50
P.178	Rub down and apply two (2) coat of shellac on surfaces not exceeding 100 mm girth.	m	0.80
P.179	Rub down and apply two (2) coat of shellac on surfaces exceeding 100 mm and not exceeding 200 mm girth.	m	1.20
P.180	Rub down and apply two (2) coat of shellac on surfaces exceeding 200 mm and not exceeding 300 mm girth.	m	1.50

S/No	Description	Unit	Unit Cost (\$)
P.181	Rub down and apply one (1) coat of polyurethane-alkyd based transparent wood finish or other equal and approved lacquer and polish to approval on general surfaces of chicks, flush, panelled or louvred door/windows, fitments, partitions including frames, mullions and transomes (measured flat overall between external edges of frames or external edges of door and windows).	sq m	4.50
P.182	Rub down and apply one (1) coat of polyurethane-alkyd based transparent wood finish or other equal and approved lacquer and polish to approval on general surfaces of wooden trelliswork (measured flat overall between external edges of frames).	sq m	4.50
P.183	Rub down and apply one (1) coat of polyurethane-alkyd based transparent wood finish or other equal and approved lacquer and polish to approval on general surfaces of panelled windows, panelled doors, fanlights, partitions including frames, mullions and transomes, all panels glazed (Measured flat overall between external edges of frames or external edges of doors and windows).	sq m	3.00

PRICE SCHEDULE OF RATES II – MECHANICAL WORKS

1. AIRCON MAINTENANCE

S/No	Description	Unit	Unit Cost (\$)
1 to	Not In Use		
21			
22	To supply labours, materials and transport for the dismantling and	no	100.00
	inspection and returning the compressors to the original location only		
	when the compressors is beyond the economical repair		
23	To supply and replace New Inverter Type 220V/240V single Phase	no	500.00
	Compressor - up to 1 H.P. (9,000 btu)		
24	To supply and replace New Inverter Type 220V/240V single Phase	no	800.00
	Compressor - 1 1/2 H.P. (12,000 btu - 16,000 btu) up to 1 H.P.		
	(9,000 btu)		
25	To supply and replace New Inverter Type 220V/240V single Phase	no	900.00
	Compressor - 2 1/2 H.P. (18,000 btu - 24,000 btu)		
26	To supply labours, materials & transport for the dismantling and	no	2025.00
	replacement of new inverter compressor including installation,		
	brazing, purging system, vacuum, charging gas and testing and		
	commissioning (included disposal of defective parts) 230v/415v 50		
	Hz, up to 2.5kw		
27	To supply labours, materials & transport for the dismantling and	no	2205.00
	replacement of new inverter compressor including installation,		
	brazing, purging system, vacuum, charging gas and testing and		
	commissioning (included disposal of defective parts) 415v, 50Hz,		
	three phase up to 3.5 kw		
28	To supply labours, materials & transport for the dismantling and	no	2280.00
	replacement of new inverter compressor including installation,		
	brazing, purging system, vacuum, charging gas and testing and		
	commissioning (included disposal of defective parts) 415v, 50Hz,		
	three phase up to 4.5 kw		
29	To supply labours, materials & transport for the dismantling and	no	2550.00
	replacement of new inverter compressor including installation,		
	brazing, purging system, vacuum, charging gas and testing and		
	commissioning (included disposal of defective parts) 415v, 50Hz,		
	three phase up to 5.5 kw		
30	To supply labours, materials & transport for the dismantling and	no	2700.00
	replacement of new inverter compressor including installation,		
	brazing, purging system, vacuum, charging gas and testing and		
	commissioning (included disposal of defective parts) 415v, 50Hz,		
	three phase up to 7.5 kw		
31	To supply labours, materials & transport for the dismantling and	no	2970.00
	replacement of new inverter compressor including installation,		
	brazing, purging system, vacuum, charging gas and testing and		
	commissioning (included disposal of defective parts) 230v/415v,		
	50Hz, up to 11.5 kw		650.00
32	To supply & replace new Hermetic rotary compressor, 230V, 50 Hz	no	650.00
	single phase up to 10,000 Btuh including installation, changing filter		
	drier, flushing and vacuuming system, re-charging gas re-		
22	commissioning, removal and disposal of the faulty units		750.00
33	To supply & replace new Hermetic rotary compressor, 230V, 50 Hz	no	750.00

S/No	Description	Unit	Unit Cost (\$)
	single phase up to 12,000 Btuh including installation, changing filter		
	drier, flushing and vacuuming system, re-charging gas re-		
	commissioning, removal and disposal of the faulty units		
34	To supply & replace new Hermetic rotary compressor, 230V, 50 Hz	no	950.00
	single phase up to 24,000 Btuh including installation, changing filter		
	drier, flushing and vacuuming system, re-charging gas re-		
	commissioning, removal and disposal of the faulty units		
35	To supply & replace new Hermetic rotary compressor, 230V, 50 Hz	no	1150.00
	single phase up to 29,000 Btuh including installation, changing filter		
	drier, flushing and vacuuming system, re-charging gas re-		
	commissioning, removal and disposal of the faulty units		
36	To supply all materials, labours and transports to replace new	no	960.00
	hermetic compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included		
	disposal of defective parts) 415v, 50Hz up to 12,000 btuh		
37	To supply all materials, labours and transports to replace new	no	980.00
	hermetic compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included		
	disposal of defective parts) 415v, 50Hz up to 18,000 Btuh		
38	To supply all materials, labours and transports to replace new	no	2317.00
	hermetic compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included		
	disposal of defective parts) 415v, 50Hz up to 2,6000 Btuh		
39	To supply all materials, labours and transports to replace new	no	2320.00
	hermetic compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included		
	disposal of defective parts) 415v, 50Hz up to 38,000 Btuh		
40	To supply all materials, labours and transports to replace new	no	2466.00
	hermetic compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included		
	disposal of defective parts) 415v, 50Hz up to 52,000 Btuh		
41	To supply all materials, labours and transports to replace new	no	3500.00
	hermetic compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included		
	disposal of defective parts) 415v, 50Hz up to 75,000 Btuh		
42	To supply labour to pressurize system and perform refrigerant leaks	no	150.00
	test with nitrogen up to 240,000 Btuh (Labour and nitrogen only)		
43	To supply labour, tools and materials to pressurise system and	no	300.00
	perform leak test with nitrogen gas repair gas leaks, leak test (after		
	repair) replace filter drier, vacuum system and charge gas up to		
	6000,000 Btuh		
44	To supply labour, materials and transport to replace High Pressure	no	80.00
	Switch-auto reset		
45	To supply labour, materials and transport to replace Low Pressure	no	80.00
	Switch-auto reset		
46	To supply labour, materials and transport to replace Expansion	no	150.00
	Valves including brazing and flaring up to 60,000 Btuh		
47	To supply labour, materials and transport to replace Expansion	no	170.00
	Valves including brazing and flaring up to 180,000 Btuh		
48	To supply labour, materials and transport to replace Liquid Filter Line	no	65.00
	Drier Up to 3/8" (9.6mm) Diameter		

S/No	Description	Unit	Unit Cost (\$)
49	To supply labour, materials and transport to replace Liquid Line Filter	no	80.00
	Drier Up to 1/2" (12.7mm) Diameter		
50	To supply labour, materials and transport to replace Liquid Line Filter	no	90.00
	Drier Up to 5/8" (16.0mm) Diameter		
51	To supply labour, materials and transport to replace Liquid Line Filter	no	100.00
	Drier Up to 3/4" (19.1mm) Diameter		
52	To supply labour, materials and transport to replace Liquid Line Filter	no	120.00
	Drier Up to 1" (25.4mm) Diameter		
53	To supply labour, materials and transport to replace Sight glass with	no	88.00
5 4	moisture indicator up to 1/4" x 1/4" (6.5 x 6.5mm)		00.00
54	To supply labour, materials and transport to replace Sight glass with	no	99.00
55	moisture indicator up to 3/8 x 3/8" (9.6 x 9.6mm) To supply labour, materials and transport to replace Sight glass with	no	70.00
33	moisture indicator up to 1/2 x 1/2" (12.7 x 12.7mm)	no	70.00
56	To supply labour, materials and transport to replace Sight glass with	no	80.00
	moisture indicator up to 5/8 x 5/8" (16.0 x 16.0mm)	110	00.00
57	To supply labour, materials and transport to replace Sight glass with	no	90.00
	moisture indicator up to 3/4 x 3/4" (19.1 x 19.1mm)		
58	To supply labour, materials and transport to replace Sight glass with	no	100.00
	moisture indicator up to 1" x 1" (15.4 x 25.4mm)		
59	To supply labour, materials and transport to replace Solenoid Valve	no	88.00
	up to 6.5mm		
60	To supply labour, materials and transport to replace Solenoid Valve	no	132.00
	up to 12.7mm		
61	To supply labour, materials and transport to replace Solenoid Valve	no	176.00
	up to 19.1mm		
62	To supply labour, materials and transport to replace Solenoid Valve	no	220.00
63	up to 25.4mm To supply labour, materials and transport to replace terminal clip		1.20
64	To supply labour, materials and transport to replace terminal clip To supply labour, materials and transport to install 6.5mm diameter	no no	6.50
04	Refrigerant pipe	110	0.50
65	To supply labour, materials and transport to install 9.5mm diameter	no	7.50
	Refrigerant pipe		
66	To supply labour, materials and transport to install 12.5mm diameter	no	8.50
	Refrigerant pipe		
67	To supply labour, materials and transport to install 16.0mm diameter	no	9.50
	Refrigerant pipe		
68	To supply labour, materials and transport to install 1.0mm diameter	no	10.00
	Refrigerant pipe		
69	To supply labour & materials to replace pillow block bearings up to	no	90.00
70	1/2" (12.7mm) diameter	20	150.00
70	To supply labour & materials to replace pillow block bearings up to 1" (25.4mm) diameter	no	150.00
71	To supply labour & materials to replace pillow block bearings up to 1	no	198.00
'-	1/2" (38.1mm) diameter	110	150.00
72	To supply all labour, materials. transport and tools to replace/install	no	145.00
-	taper lock pulley (complete with bush and max bore) including		
	aligning and commissioning the system for single A groove pulley up		
	to SPA 112 x 1		
73	To supply all labour, materials. transport and tools to replace/install	no	170.00
	taper lock pulley (complete with bush and max bore) including		

aligning and commissioning the system for single A groove pulley up to SPA 180 x 1 74 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single A groove pulley up to SPA 200 x 1 75 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 150 x 1 76 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 77 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 78 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 79 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove	S/No	Description	Unit	Unit Cost (\$)
To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single A groove pulley up to SPA 200 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 150 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock p		aligning and commissioning the system for single A groove pulley up		
taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single A groove pulley up to SPA 200 x 1 75 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 150 x 1 76 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 77 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 78 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 79 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 s				
aligning and commissioning the system for single A groove pulley up to SPA 200 x 1 75 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 150 x 1 76 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 77 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 78 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 410 x 2 79 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 83 To supply all replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter ma	74		no	180.00
to SPA 200 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 150 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq				
To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 150 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq.m				
taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 150 x 1 76 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 77 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 78 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 79 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq.m	75		no	170.00
aligning and commissioning the system for single B groove pulley up to SPB 150 x 1 76 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 77 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 78 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 79 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 84 To supply and replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 sq.m 85 To supply and replace permanent washable air filter ma	/5		110	170.00
to SPB 150 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply and replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 77 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 78 To supply all labour, materials. transport and tools to replace/install no 200.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 79 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install no 230.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 84 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame. Total surface area up to 0.2 sq.m 85 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame. Total surface area up to 0.2 sq.m				
aligning and commissioning the system for single B groove pulley up to SPB 190 x 1 77 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 78 To supply all labour, materials. transport and tools to replace/install no 200.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 79 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 83 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 84 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame. Total surface area up to 0.2 sq.m 85 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m	76	To supply all labour, materials. transport and tools to replace/install	no	210.00
to SPB 190 x 1 To supply all labour, materials. transport and tools to replace/install aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 To supply all labour, materials. transport and tools to replace/install no 200.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install no 210.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply all replace permanent washable air filter mats with 85% of 6.00 efficiency complete with filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% of 6.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m		taper lock pulley (complete with bush and max bore) including		
To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply all replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq.m				
taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 78 To supply all labour, materials. transport and tools to replace/install aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 79 To supply all labour, materials. transport and tools to replace/install aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply all filabour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 84 To supply all graph and replace permanent washable air filter mats with 85% no 6.00 efficiency complete with filter frame. Total surface area up to 0.2 sq.m 85 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
aligning and commissioning the system for single B groove pulley up to SPB 250 x 1 To supply all labour, materials. transport and tools to replace/install aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install no 210.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install no 230.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install no 240.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 84 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m 85 To supply and replace permanent washable air filter mats with 85% no 13.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m	77		no	250.00
to SPB 250 x 1 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply all replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% no 13.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m		, , , , ,		
To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply all replace permanent washable air filter mats with 85% officiency without filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% officiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 79 To supply all labour, materials. transport and tools to replace/install no 210.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install no 230.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install no 240.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% no 13.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m	78		no	200.00
aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install no 210.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install no 230.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install no 240.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% no 13.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install no 230.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install no 240.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% no efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install no taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install no taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install no taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% no 13.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m		up to SPB 140 x 2		
aligning and commissioning the system for double B groove pulley up to SPB 180 x 2 80 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% of efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% of efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m	79		no	210.00
up to SPB 180 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% no efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% no 13.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install no 270.00 taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% no 6.00 efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% no 13.00 efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m	00			220.00
aligning and commissioning the system for double B groove pulley up to SPB 140 x 2 81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m	80		no	230.00
up to SPB 140 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 To supply and replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 sq.m To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
81 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% efficiency without filter frame. Total surface area up to 0.2 sq.m 84 To supply and replace permanent washable air filter mats with 85% efficiency complete with filter frame thickness up to 4mm. Total surface area up to 0.2 sq m				
aligning and commissioning the system for double B groove pulley up to SPB 200 x 2 82 To supply all labour, materials. transport and tools to replace/install taper lock pulley (complete with bush and max bore) including aligning and commissioning the system for double B groove pulley up to SPB 250 x 2 83 To supply and replace permanent washable air filter mats with 85% efficiency without filter frame. To supply labour and materials to install/replace PVC termination no 3.00 gland 38mm dia. To supply and erect steel staging of height not exceeding 3m high and remove after use and clearing debris off site. To supply and erect steel staging of height from 3m high to not exceeding 5m high and remove after use and clearing debris off site. To supply and erect steel staging of height from 5m high to not exceeding 7m high and remove after use and clearing debris off site. To supply and erect steel staging of height from 5m high to not exceeding 10m high and remove after use and clearing debris off site. To supply and erect steel staging of height from 7m high to not exceeding 10m high and remove after use and clearing debris off site. To supply all materials, labour and transport for the replacement of faring up to 1-3/8". Not in Use To supply all materials, labour and transport for the replacement of auto-transformer up to 7.5 kw (10 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 1 tapping. To supply all materials, labour and transport for the replacement of Direct-On-Line-Starters, hand reset, with 2 or more auxiliary contacts with line and phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 3.75 kw (5 hp) (range 0.3-9 amp operating coll volts 230 vo r 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5 mp. 4.5 - 9.0 mp. 6.0	S/No	Description	Unit	Unit Cost (\$)
To supply labour and materials to install/replace PVC termination gland 38mm dia. 425 To supply and erect steel staging of height not exceeding 3m high and remove after use and clearing debris off site. 426 To supply and erect steel staging of height from 3m high to not exceeding 5m high and remove after use and clearing debris off site. 427 To supply and erect steel staging of height from 3m high to not exceeding 7m high and remove after use and clearing debris off site. 428 To supply and erect steel staging of height from 5m high to not exceeding 7m high and remove after use and clearing debris off site. 429 Supply/install flexible vibration absorber tube including brazing and flaring up to 1-3/8". 430 Not In Use 431 To supply all materials, labour and transport for the replacement of auto-transformer up to 7.5 kw (10 hp), 1 tapping. 432 To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 1 tapping. 433 To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 4 tapping (40% to 75%). 434 To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 4 tapping (40% to 75%). 436 To supply all materials, labour and transport for the replacement of Direct-On-Line-Starters, hand reset, with 2 or more auxiliary contacts with line and phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to 85 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5mpn, 4.5 - 9.0mmp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. 436 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to 85 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5mpn, 4.5 - 9.0mmp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. 437 To supply all ma			no	
gland 38mm dia. To supply and erect steel staging of height not exceeding 3m high and remove after use and clearing debris off site. To supply and erect steel staging of height from 3m high to not exceeding 5m high and remove after use and clearing debris off site. To supply and erect steel staging of height from 5m high to not exceeding 5m high and remove after use and clearing debris off site. To supply and erect steel staging of height from 5m high to not exceeding 7m high and remove after use and clearing debris off site. To supply and erect steel staging of height from 7m high to not exceeding 10m high and remove after use and clearing debris off site. Not in Use Supply/install flexible vibration absorber tube including brazing and flaring up to 1-3/8". Not in Use To supply all materials, labour and transport for the replacement of auto-transformer up to 7.5 kw (10 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 1 tapping (40% to 75%). To supply all materials, labour and transport for the replacement of Direct-On-Line-Starters, hand reset, with 2 or more auxiliary contacts with line and phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to 85 S87 and or IEC PUB 151-1, 292-1 up to 3.75 kw (5 hp) (range 0.3-9 amp operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of 5tar-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to 85 S87 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5mpt, 45 - 9.0 amp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Direct-On-Line-Starters, hand reset, with 2 or more auxiliary contacts with line and phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 3.75 kw (5 hp) (range 0.3-9 amp operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 1.10 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 1.0 kw (15 hp) (ranges 24-34amps, operating coil volts 230v or 24v. To supply labour, materials to install Appr				
flaring up to 1-3/8". Not In Use To supply all materials, labour and transport for the replacement of auto-transformer up to 7.5 kw (10 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 4 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 4 tapping (40% to 75%). To supply all materials, labour and transport for the replacement of Direct-On-Line-Starters, hand reset, with 2 or more auxiliary contacts with line and phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to 85 587 and or IEC PUB 151-1, 292-1 up to 3.75 kw (5 hp) (range 0.3-9 amp operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to 85 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to 85 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, 0perating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to 85 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. To supply labour, materials to install Approved MCCB 30amp-32amp 2 pole, 230volts including wiring trunking, PVC c	429		no	120.00
To supply all materials, labour and transport for the replacement of auto-transformer up to 7.5 kw (10 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 4 tapping (40% to 75%). To supply all materials, labour and transport for the replacement of Direct-On-Line-Starters, hand reset, with 2 or more auxiliary contacts with line and phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 3.75 kw (5 hp) (range 0.3-9 amp operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 1.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 1.0 kw (15 hp) (ranges 24-34amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up		1 '''		
auto-transformer up to 7.5 kw (10 hp), 1 tapping. To supply all materials, labour and transport for the replacement of auto-transformer up to 11 kw (15 hp), 1 tapping. 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position.				
To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position.				
Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. 436 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. 437 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. 438 To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position. 439 To supply labour, materials and install Approved MCCB 30amp- 32amp 3 pole, 415volts including wiring trunking, PVC conduit and etc. with protective insulation, to cover to Terminal position.	435		no	300.00
single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12- 16amp, operating coil volts 230v or 24v. 436 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. 437 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. 438 To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position. 439 To supply labour, materials and install Approved MCCB 30amp- 32amp 3 pole, 415volts including wiring trunking, PVC conduit and etc. with protective insulation, to cover to Terminal position.	133		110	300.00
Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12- 16amp, operating coil volts 230v or 24v. 436 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. 437 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. 438 To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position. 439 To supply labour, materials and install Approved MCCB 30amp- 32amp 3 pole, 415volts including wiring trunking, PVC conduit and etc. with protective insulation, to cover to Terminal position.		<u> </u>		
7.5 kw (10 hp) full (ranges 2.5amp, 4.5 - 9.0amp, 6.0 - 12amp, 12-16amp, operating coil volts 230v or 24v. 436 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. 437 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. 438 To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position. 439 To supply labour, materials and install Approved MCCB 30amp- no 32amp 3 pole, 415volts including wiring trunking, PVC conduit and etc. with protective insulation, to cover to Terminal position.				
16amp, operating coil volts 230v or 24v. 436 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. 437 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. 438 To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position. 439 To supply labour, materials and install Approved MCCB 30amp- no 32amp 3 pole, 415volts including wiring trunking, PVC conduit and etc. with protective insulation, to cover to Terminal position.		·		
Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. 437 To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. 438 To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position. 439 To supply labour, materials and install Approved MCCB 30amp- no 120.00 32amp 3 pole, 415volts including wiring trunking, PVC conduit and etc. with protective insulation, to cover to Terminal position.				
single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position. To supply labour, materials and install Approved MCCB 30amp- 32amp 3 pole, 415volts including wiring trunking, PVC conduit and etc. with protective insulation, to cover to Terminal position.	436	To supply all materials, labour and transport for the replacement of	no	250.00
Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 11.0 kw (15 hp) (ranges 16-25amp, operating coil volts 230v or 24v. To supply all materials, labour and transport for the replacement of Star-Delta-Starters, hand reset, with 2 or more auxiliary contacts and single phasing protection over-load relay, suitable for AC 500V, 3 Phase, 50 Hz conform to BS 587 and or IEC PUB 151-1, 292-1 up to 15 kw (20 hp) (ranges 24-34amps, operating coil volts 230v or 24v. To supply labour, materials to install Approved MCCB 30amp- 32amp 2 pole, 230volts including wiring trunking, PVC conduit and etc. with protective insulation, cover to Terminal position. To supply labour, materials and install Approved MCCB 30amp- 32amp 3 pole, 415volts including wiring trunking, PVC conduit and etc. with protective insulation, to cover to Terminal position. 486	condensing unit, drainage, testing and commissioning. Supply all materials, labour and transport (incl. hoisting) to install	no	2110.00
480	Daikin/ Mitsubishi/ Toshiba or equivalent for Ceiling Mounted	110	2110.00
	Cassette (4-way) Type VRV split unit (c/w remote controller, refnet joints &		
	panel inclusive of 12 times of monthly servicing) for capacity		
	up to 48000Btuh (Indoor Unit only). The rate herein shall include all		
	wiring, PVC trunking, refrigerant, pipe works and insulation to no		
	more than 50 meters, stainless steel bracket or cement casting for		
	condensing unit, drainage, testing and commissioning.		
487	Supply all materials, labour and transport (incl. hoisting) to install	no	7167.00
	Daikin/ Mitsubishi/ Toshiba or equivalent for VRV Condensing Unit		
	(c/w remote controller, refnet joints & panel inclusive of 12 times of monthly servicing) for capacity up to 100000Btuh (Outdoor Unit only).		
	The rate herein shall include all wiring, PVC trunking, refrigerant, pipe		
	works and insulation to no more than 50 meters, stainless steel		
	bracket or cement casting for condensing unit, drainage, testing and		
	commissioning.		
488	Supply and install Daikin/ Mitsubishi/ Toshiba or equivalent (Ceiling	no	2166.00
	Suspended type) Single Split Unit for capacity up to 12,500Btuh. The		
	rate herein shall include all wiring, PVC trunking, refrigerant, pipe works and		
	insulation to no more than 25 meters, stainless steel		
	bracket or cement casting for condensing unit, testing and		
	commissioning of air-cooled multi/single split air-conditioning unit with		
	minimum gross cooling capacity not less than what is specific. Inclusive of one (1) year warranty for entire system & six (6) two		
	monthly servicing, dismantling the existing air-con system and make		
	good to disturbed area if any. The complete new set of the split air-		
	conditioning unit (condensing and fan coil units c/w wireless/		
	wire remote control with drainage).		
489	Supply and install Daikin/ Mitsubishi/ Toshiba or equivalent (Ceiling	no	2227.00
	Suspended type) Single Split Unit for capacity up to 18,500Btuh. The		
	rate herein shall include all wiring, PVC trunking, refrigerant, pipe works and		
	insulation to no more than 25 meters, stainless steel		

S/No	Description	Unit	Unit Cost (\$)
	bracket or cement casting for condensing unit, testing and		
	commissioning of air-cooled multi/single split air-conditioning unit with		
	minimum gross cooling capacity not less than what is specific. Inclusive of one (1) year warranty for entire system & six (6) two		
	monthly servicing, dismantling the existing air-con system and make		
	good to disturbed area if any. The complete new set of the split air-		
	conditioning unit (condensing and fan coil units c/w wireless/		
	wire remote control with drainage).		
490	Supply and install Daikin/ Mitsubishi/ Toshiba or equivalent (Ceiling	no	2227.00
	Suspended type) Single Split Unit for capacity up to 24,500Btuh. The		
	rate herein shall include all wiring, PVC trunking, refrigerant, pipe works and		
	insulation to no more than 25 meters, stainless steel		
	bracket or cement casting for condensing unit, testing and		
	commissioning of air-cooled multi/single split air-conditioning unit with minimum gross cooling capacity not less than what is specific.		
	Inclusive of one (1) year warranty for entire system & six (6) two		
	monthly servicing, dismantling the existing air-con system and make		
	good to disturbed area if any. The complete new set of the split air-		
	conditioning unit (condensing and fan coil units c/w wireless/		
	wire remote control with drainage).		
491	Supply and install Daikin/ Mitsubishi/ Toshiba or equivalent (Ceiling	no	2227.00
	Suspended type) Single Split Unit for capacity up to 28,500Btuh. The		
	rate herein shall include all wiring, PVC trunking, refrigerant, pipe		
	works and insulation to no more than 25 meters, stainless steel		
	bracket or cement casting for condensing unit, testing and		
	commissioning of air-cooled multi/single split air-conditioning unit with minimum gross cooling capacity not less than what is specific.		
	Inclusive of one (1) year warranty for entire system & six (6) two		
	monthly servicing, dismantling the existing air-con system and make

525	Chemical cleaning of chiller shell and tubes cooler/condenser with approved	no	924.00
	chemical or brush up to 800RT including replacement of		
	gasket, anti-corrosive protection painting		

2. CENTRAL AIRCON MAINTENANCE

S/No	Description	Unit	Unit Cost (\$)
1	Bi-Monthly servicing of air-cooled/water-cooled reciprocating chiller,	set	25.00
	air-cooled water-cooled packaged unit and computer air conditioner		
	complete with the starter panels and chilled water pumps,		
	condenser water pumps for the systems up to 10 RT		
2	Bi-Monthly servicing of air-cooled/ water-cooled reciprocating chiller,	set	40.00
	air-cooled water-cooled packaged unit and computer air conditioner		
	complete with the starter panels and chilled water pumps,		
	condenser water pumps for the systems up to 20 RT.	_	
3	Bi-Monthly servicing of air-cooled/ water-cooled reciprocating chiller, air-	set	50.00
	cooled/ water-cooled packaged unit and computer air conditioner		
	complete with the starter panels and chilled water pumps,		
4	condenser water pumps for the systems up to 50 RT.	cot	80.00
4	Bi-Monthly servicing of air-cooled/water-cooled reciprocating chiller, air-cooled/water-cooled packaged unit and computer air conditioner	set	80.00
	complete with the starter panels and chilled water pumps, condenser		
	water pumps for the systems		
	up to 80 RT.		
5	Bi-Monthly servicing of air-cooled/ water-cooled reciprocating chiller, air-	set	100.00
	cooled/ water-cooled packaged unit and computer air conditioner		
	complete with the starter panels and chilled water pumps, condenser		
	water pumps for the systems up to 120 TR and above		
6	Munters dehumidifiers - To Supply labour tools and transport for a	set	390.00
	One-Time servicing of a Dehumidifier of all capacity including testing and		
	commissioning		
7	Rewinding of hermetic/ semi-hermetic compressor, 230v, 50Hz	no	300.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
8	recharging gas and re-commissioning up to 1.5 kw.	20	400.00
٥	Rewinding of hermetic/ semi-hermetic compressor, 230v, 50Hz including renewal of bearing/ bushing, strainer, filter drier, general	no	400.00
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 2.25 kw		
9	Rewinding of hermetic/ semi-herrmetic compressor, 230v, 50Hz	no	500.00
	including renewal of bearing/ bushing, strainer, filter drier, general		300.00
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 3.75 kw.		
10	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	600.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 3.75 kw.		
11	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	800.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
4.0	recharging gas and re-commissioning up to 5.62 kw		4 400 00
12	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	1,100.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
13	recharging gas and re-commissioning up to 7.5 kw. Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	1,400.00
13	Newmanig of Hermetic, Semi-Hermetic Compressor, 4137, 30112	110	1,400.00

S/No	Description	Unit	Unit Cost (\$)
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to I 1.25 kw		
14	Rewinding of hermetic/ semi-bermetic compressor, 4/5v, 50Hz	no	1,700.00
	including renewal of bearing/ hushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 15 kw.		
15	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	2,240.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 18.75 kw.		
16	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	2,500.00
	includingrenewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 22.5 kw.		
17	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	3,000.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 30 kw		
18	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	3,020.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 37.5 kw		
19	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	3,250.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 45 kw		
20	Rewinding of hermetic/ semi-hermetic compressor, 415v, 50Hz	no	4,000.00
	including renewal of bearing/ bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system,		
	recharging gas and re-commissioning up to 60 kw,		
21	To supply labour for the dismantling, and inspection and returning	no	100.00
	the compressors to the origiN.A.I location only when the compressors		
22	is beyond the economical repair.		4 600 00
22	To supply all materials, labours and transports to replace hermetic	no	1,600.00
	compressor including installation, brazing, purging system, vacuum,		
	charging gas and testing and conrrnissioning (included disposal of		
22	defective parts) 415v, 50Hz, up to 3.75kw		2,000,00
23	To supply all materials, labours and transports to replace hermetic	no	2,000.00
	compressor including installation, brazing, purging system, vacuum, charging gas and testing and commissioning (included disposal of		
	defective parts) 415v, 50Hz, up to 5.62kw		
24	To supply all materials, labours and transports to replace hermetic	no	2,400.00
24	compressor including installation, brazing, purging system, vacuum,	110	2,400.00
	charging gas and testing and commissioning (included disposal of		
	defective parts) 415v, 50Hz, up to 7.5kw		
25	To supply all materials, labours and transports to replace hermetic	no	2,800.00
23	compressor including installation, brazing, purging system, vacuum,	110	2,000.00
	charging gas and testing and commissioning (included disposal of		
	defective parts) 4/5v, 50Hz, up to 11.25kw		
1	45.555 parto, 1,51,551.12, ap to 11.25kW	I	1

S/No	Description	Unit	Unit Cost (\$)
26	To supply all materials, labours and transports to replace new hermetic	no	840.00
	compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included		
	disposal of defective parts) 415v, 50Hz, up to 9,000 Btuh		
27	To supply all materials, labours and transports to replace new hermetic	no	2,800.00
	compressor including installation, brazing, purging system, vacuum,		
	charging gas and testing and commissioning (included disposal of defective parts) 415v, 50Hz,		
	up to 12,000 Btuh		
28	To supply all materials, labours and transports to replace new	no	4,200.00
	hermetic compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included disposal of		
	defective parts) 415v, 50Hz, up to 18,000 Btuh		
29	To supply all materials, labours and transports to replace new	no	6,000.00
	hermetic compressor including installation, brazing, purging system,		
	vacuum, charging gas and testing and commissioning (included disposal of		
20	defective parts) 415v, 50Hz, up to 26,000 Btuh		7 000 00
30	To supply all materials, labours and transports to replace new	no	7,000.00
	hermetic compressor including installation, brazing, purging system, vacuum, charging gas and testing and commissioning (included disposal of		
	defective parts) 415v, 50Hz, up to 38,000 Btuh		
31	To supply all materials, labours and transports to replace new	no	9,600.00
	hermetic compressor including installation, brazing, purging system,		,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
	vacuum, charging gas and testing and commissioning (included disposal of		
	defective parts) 415v, 50Hz, up to 52,000 Btuh		
32	Rewinding of hermetic/semi-hermetic compressor, 415v, 50 Hz	no	5,000.00
	including renewal of bearing/bushing, strainer, filter drier, general		
	overhaul, replacing of gaskets flushing, vacuuming system recharging gas		
20	and recommissioning up to 80kw		6 000 00
33	Rewinding of hermetic/semi-hermetic compressor, 415v, 50 Hz	no	6,000.00
	including renewal of bearing/bushing, strainer, fileter drier, general overhaul, replacing of gaskets flushing, vacuuming system recharging gas		
	and recommissioning up to 120kw		
34	To supply all materials, labours and transports to replace semi-	no	5,000.00
	hermetic ompressor inlcuded installation, brazing, purging system,		3,000.00
	vacuum, charging gas and testing and commissioning (included disposal of		
	defective parts) 415v, 50Hz, up to 7.5kw		
35	To supply and replace termiN.A.l clip	no	1.00
36	To pressurize system and perform refrigerant leaks test with nitrogen up	job	150.00
	to 50 ton (Labour and nitrogen only)		
37	To pressurize system and perform to repair gas leaks, leak test	job	200.00
	(after repair) replace filter drier, vacuum system and charge gas up to 20 ton.		
38	To pressurize system and perform pressurise system and perform	job	250.00
	leak test with nitrogen gas repair gas leaks, leak test (after repair)	,00	230.00
	replace filter drier, vacuum system and charge gas up to 600,000 Btu		
39	To supply labour, tools and materials to repair gas leaks, leak test (after	job	200.00
	repair) vacuum system and charge gas (labour only) by tightening of loose		
	parts.		
	(Up to 20 RT)		1

S/No	Description	Unit	Unit Cost (\$)
40	To supply labour, tools and materials to repair gas leaks, leak test (after	job	220.00
	repair) vacuum system and charge gas (labour only) By flaring, replacing		
	of flare nuts (includes copper fitting) (Up to 50 RT)		
41	To supply labour, tools and materials to repair gas leaks, leak test (after	job	600.00
	repair) vacuum system and charge gas (labour only) By brazing of cracks (include copper pipes copper fitting and modification of pipe lines) (Up to		
	100 RT and above.)		
42 - 119	N.A.		
119	To supply and install flexible vibration absorber tube including	no	120.00
	brazing and flaring up to 1 3/8		
120	To supply and install flexible vibration absorber tube including	no	140.00
	brazing and flaring up to 1 5/8		
121	To supply and install flexible vibration absorber tube including	no	200.00
	brazing and flaring up to 2 1/8		
122	To supply and replace Dual Pressure Switch-manual reset	no	160.00
123	To supply and replace High Pressure Switch-manual reset (Range:8	no	140.00
	- 30 Kg/ sq cm).		
124	To supply and replace High Pressure Switch-auto reset	no	80.00
125	To supply and replace Low Pressure Switch -auto reset	no	80.00
126	To supply and replace Oil Pressure Switch	no	85.00
127	To supply and replace Suction or Discharge Pressure Gauge	no	85.00
128 129	To supply and replace Water Flow Switch To supply and replace Chilled Water Pressure Gauge	no	160.00 80.00
130	To supply and replace Condenser Water Pressure Gauge	no	80.00
131	To supply and replace Condensel Water Fressure Gauge To supply and replace Thermometer	no no	80.00
132	To supply and replace thermometer To supply and replace Low Chilled Water Cut Out Switch	no	260.00
133	To supply and replace Oil Pressure Safety Switch	no	400.00
134	To supply and replace Expansion Valves including brazing and	no	150.00
	flaring up to 5 RT		
135	To supply and replace Expansion Valves including brazing and	no	170.00
	flaring up to 10RT		
136	To supply and replace Expansion Valves including brazing and	no	220.00
	flaring up to 12 RT		
137	To supply and replace Expansion Valves including brazing and	no	280.00
	flaring up to 15 RT

786	To supply and replace belting including cooling tower fan drive including alignment, adjusting belt tension and commissioning for	no	60.00
	size B149 or SPB5000		
787	Servicing all stainers 1/2" to 2"	no	20.00
788	Servicing all strainers 2.1" to 4'	no	40.00
789	Servicing all strainers 4.1" to 6"	no	60.00
790	Servicing all strainers 6.1" to 12"	no	80.00
791	Servicing all strainers 12.1 to 20"	no	100.00
792	To overhaul the water pump up to 5.6kw (motor kw)	no	270.00
793	To overhaul the water pump up to 11.2kw (motor kw)	no	300.00
794	To overhaul the water pump up to 30kw (motor kw)	no	350.00
795	To overhaul the water pump up to 37.5kw (motor kw)	no	450.00
796	To overhaul the water pump up to 45kw (motor kw)	no	580.00
797	To overhaul the water pump up to 60kw (motor kw)	no	700.00
798	To overhaul the water pump up to 75 kw (motor kw)	no	830.00
799	To overhaul the water pump up to 90kw (motor kw)	no	1,000.00

S/No	Description	Unit	Unit Cost (\$)
800	Supply and replace of water pump housing, mechanical seal,	no	3,900.00
	bearings up to 91kw (motor size)		
801	Supply labour/tools/transport to check overhaul the water pump	no	1,200.00
	91kw and above		
802	To supply all materials, labour and transport for the replacement of	no	80.00
	water pump metal/stainless steel strainer up to 51mm dia		
803	To supply all materials, labour and transport for the replacement of	no	100.00
	water pump metal/stainless steel strainer up to 101mm dia		
804	To supply all materials, labour and transport for the replacement of	no	150.00
	water pump metal/stainless steel strainer up to 151mm dia		
805	To supply all materials, labour and transport for the replacement of	no	200.00
	water pump metal/stainless steel strainer up to 201mm dia		
806	To supply all materials, labour and transport for the replacement of	no	250.00
007	water pump metal/stainless steel strainer up to 251mm dia		450.00
807	To supply all materials, labour and transport for the replacement of	no	450.00
	water pump metal/stainless steel strainer with support bracket up to 251mm dia		
808	To supply all materials, labour and transport for the replacement of	no	50.00
808	water pump metal/stainless steel strainer CAP up to 51mm dia	no	50.00
809	To supply all materials, labour and transport for the replacement of	no	75.00
803	water pump metal/stainless steel strainer CAP up to 101mm dia	110	75.00
810	To supply all materials, labour and transport for the replacement of	no	100.00
010	water pump metal/stainless steel strainer CAP up to 151mm dia	110	100.00
811	To supply all materials, labour and transport for the replacement of	no	150.00
	water pump metal/stainless steel strainer CAP up to 201mm dia		
812	To supply all materials, labour and transport for the replacement of water	no	200.00
	pump metal/stainless steel strainer cap up to 251mm dia		
813	To supply all materials, labour and transport for the replacement of	no	180.00
	mechanical seal complete set for shaft diameter up to 20mm		
814	To supply all materials, labour and transport for the replacement of	no	200.00
	mechanical seal complete set for shaft diameter up to 24mm		
815	To supply all materials, labour and transport for the replacement of	no	230.00
	mechanical seal complete set for shaft diameter up to 28mm		
816	To supply all materials, labour and transport for the replacement of	no	250.00
	mechanical seal complete set for shaft diameter up to 30mm		
817	To supply all materials, labour transport for the replacement of	no	290.00
04.0	mechanical seal complete set for shaft diameter up to 35mm		250.00
818	To supply all materials, labour transport for the replacement of	no	350.00
819	mechanical seal complete set for shaft diameter up to 40mm To supply all materials, labour and transport for the replacement of	no	500.00
019	mechanical seal complete set for shaft diameter up to 50mm	no	300.00
820	To supply all materials, labour and transport for the replacement of	no	750.00
820	mechanical seal complete set for shaft diameter up to 75mm	110	750.00
821	To supply all materials, labour.transport for the replacement of	no	60.00
021	gland packing.	110	00.00
822	To supply all materials, labour, transport for the installation/	no	380.00
	replacement of water pump polyurethane foam insulation complete		
	with galvanised jacketing and painting.		
823	To supply and replace water pump duty change over relay 8 pins	no	120.00
	c/w socket 230v		
824	To supply all materials, labour and transport for the machining of	no	40.00

S/No	Description	Unit	Unit Cost (\$)
	shaft sleeve (all sizes)		
825	To supply all materials, labour and transport for the machining of	no	60.00
	gland plate (all sizes)		
826	Supply labour/tools/transport to check and service of solar water	no	3.00
827	heater system Supply Jahour /tools /transport to shock and sorvice of dometic water	20	10.00
027	Supply labour/tools/transport to check and service of dometic water pump system up to 7.5H.P. motor	no	10.00
828	Supply labour/tools,/transport to check and service of foundation	no	7.50
323	water pump system		7.00
829	Supply all materials, labour and transport for the rewinding and	no	170.00
	replacing of bearings/bushings of single phase, 230V, 4-poles or 6-		
	poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 0.2kw (1/4 H. P)		
830	Supply all materials, labour and transport for the rewinding and	no	200.00
	replacing of bearings/bushings of single phase, 230V, 4-poles or 6-		
	poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning		
	up to 0.37kw (1/2 H. P)		
831	Supply all materials, labour and transport for the rewinding and	no	220.00
	replacing of bearings/bushings of single phase, 230V, 4-poles or 6-		
	poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 0.55kw (3/4 H. P)		
832	Supply all materials, labour and transport for the rewinding and	no	240.00
	replacing of bearings/bushings of single phase, 230V, 4-poles or 6-		
	poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning		
	up to 0.75kw (1 H. P)		
833	Supply all materials, labour and transport for the rewinding and	no	250.00
	replacing of bearings/bushings of single phase, 230V, 4-poles or 6-		
	poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 1.2kw (1 1/2 H. P)		
834	Supply all materials, labour and transport for the rewinding and	no	260.00
	replacing of bearings/bushings of single phase, 230V, 4-poles or 6-		
	poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning		
	up to 1.5kw (2 H. P)		
835	Supply all materials, labour and transport for the rewinding and	no	320.00
	replacing of bearings/bushings of single phase, 230V, 4-poles or 6-		
	poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 3kw (4 H. P)		
836	Supply all materials, labour and transport for the rewinding and	no	200.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning up to 0.75kw (1 H. P)		
837	Supply all materials, labour and transport for the rewinding and	no	240.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
•	, , , , , , , , , , , , , , , , , , , ,	ı	1

S/No	Description	Unit	Unit Cost (\$)
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning up to 1.5kw (2 H. P)		
838	Supply all materials, labour and transport for the rewinding and	no	280.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 3.0kw		
839	Supply all materials, labour and transport for the rewinding and	no	320.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 3.75kw		
840	Supply all materials, labour and transport for the rewinding and	no	380.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 5.6kw		
841	Supply all materials, labour and transport for the rewinding and	no	400.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
842	up to 7.5kw Supply all materials, labour and transport for the rewinding and	no	600.00
042	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or	110	000.00
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 11.2kw		
843	Supply all materials, labour and transport for the rewinding and	no	750.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 15kw		
844	Supply all materials, labour and transport for the rewinding and	no	850.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
845	up to 18.7kw Supply all materials, labour and transport for the rewinding and	no	1,000.00
043	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or	110	1,000.00
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 22.5.7kw		
846	Supply all materials, labour and transport for the rewinding and	no	1,300.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
	6-poles squirrel cage motor with Class F insulation including		
	removing, dismantling, servicing reinstallation and re-commissioning		
	up to 26.2kw		
847	Supply all materials, labour and transport for the rewinding and	no	1,400.00
	replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
[6-poles squirrel cage motor with Class F insulation including		

removing, dismantling, servicing reinstallation and re-commissioning up to 30kw 848 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirric lage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 45kw 849 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirric lage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirric lage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirric lage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling, servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 25.kw 855	S/No	Description	Unit	Unit Cost (\$)
Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirred cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 45kw 849 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirred cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirred cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 To supply all materials, labour and transport for the rewinding of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and re		removing, dismantling, servicing reinstallation and re-commissioning		
replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 45kw 849 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings i				
6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 45kw 849 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing, reinstallation and re-commissioning up to 22.5kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-comm	848		no	1,600.00
removing, dismantling, servicing reinstallation and re-commissioning up to 45kw 849 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15.kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour a				
up to 45kw Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 60kw Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw Stipply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw Start Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 18.7kw Start Supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 25.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearin				
Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacemen				
replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above of 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.5kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings	040			1 000 00
6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 857 To suppl	849		no	1,800.00
removing, dismantling, servicing reinstallation and re-commissioning up to 60kw 850 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of thre				
up to 60kw Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, disma				
Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings includin				
replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissi	850		no	2.000.00
6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and readomissioning up to 26.2kw 858 To supply all materials, labour and transport		· · · · · =		_,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
removing, dismantling, servicing reinstallation and re-commissioning up to 75kw 851 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motorrotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motorrotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and r				
Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw To supply all materials, labour and transport for the rewinding and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewin				
replacing of bearings/bushings of three (3) phase, 415V, 4-poles or 6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 858 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30.0kw		up to 75kw		
6-poles squirrel cage motor with Class F insulation including removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above 852 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 858 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30.0kw	851	Supply all materials, labour and transport for the rewinding and	no	2,250.00
removing, dismantling, servicing reinstallation and re-commissioning up to 90kw and above To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantlin servicing, reinstallation and re-commissioning up to 20.2kw 858 To supply all materials, labour and transport for the rewinding of three (3) phase, dependent of the rewinding of three (3) phase, dependen		replacing of bearings/bushings of three (3) phase, 415V, 4-poles or		
up to 90kw and above To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motorrotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motorrotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 858 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00				
To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 36.2kw 858 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 wolts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,200.00				
replacing of bearings/bushings of three (3) phase, 415 volts motor- rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor- rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,200.00				
rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 11.2kw 853 To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motorrotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00	852		no	630.00
dismantling servicing, reinstallation and re-commissioning up to 11.2kw To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw Supply all materials, labour and transport for the rewinding and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00				
To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 26.2kw 858 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00				
To supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415 volts motor-rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00				
replacing of bearings/bushings of three (3) phase, 415 volts motor- rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,200.00	952		no	770.00
rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00	633		110	770.00
dismantling servicing, reinstallation and re-commissioning up to 15kw 854 Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials, labour and transport for the rewinding of To supply all materials,				
15kw Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00				
Supply all materials, labour and transport for the rewinding and replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00		J 3.		
replacing of bearings/bushings of three (3) phase, 415V volts motor rotor and replacement of bearings and bushings including removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw 855 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00	854		no	850.00
removing, dismantling, servicing reinstallation and re-commissioning up to 18.7kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00				
up to 18.7kw To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00		rotor and replacement of bearings and bushings including		
To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00		removing, dismantling, servicing reinstallation and re-commissioning		
three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw 856 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00		up to 18.7kw		
and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 22.5kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,200.00	855		no	950.00
reinstallation and re-commissioning up to 22.5kw To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00				
To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00				
three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw 857 To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw 858 To supply all materials, labour and transport for the rewinding of no 1,350.00				
and bushings including removing, dismanlin servicing, reinstallation and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00	856		no	1,050.00
and re-commissioning up to 26.2kw To supply all materials, labour and transport for the rewinding of three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00				
To supply all materials, labour and transport for the rewinding of three (3) phase, 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00				
three (3) phase , 415 volts motor rotor and replacement of bearings and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of 1,350.00	857		no	1 200 00
and bushings including removing, dismantling servicing, reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00	857		110	1,200.00
reinstallation and re-commissioning up to 30kw To supply all materials, labour and transport for the rewinding of no 1,350.00				
To supply all materials, labour and transport for the rewinding of no 1,350.00				
	858		no	1,350.00

S/No	Description	Unit	Unit Cost (\$)
	and bushings including removing, dismantling servicing,		
	reinstallation and re-commissioning up to 45kw		
859	To supply all materials, labour and transport for the rewinding of	no	1,700.00
	three (3) phase , 415 volts motor rotor and replacement of bearings		
	and bushings including removing, dismantling servicing,		
	reinstallation and re-commissioning up to 60kw		
860	To supply all materials, labour and transport for the rewinding of	no	2,500.00
	three (3) phase , 415 volts motor rotor and replacement of bearings		
	and bushings including removing, dismantling servicing,		
	reinstallation and re-commissioning up to 75kw		
861	To supply all materials, labour and transport for the rewinding of	no	3,200.00
	three (3) phase , 415 volts motor rotor and replacement of bearings		
	and bushings including removing, dismantling servicing,		
	reinstallation and re-commissioning up to 90kw		
862	To supply all materials, labour and transport for the rewinding of	no	4,500.00
	three (3) phase , 415 volts motor rotor and replacement of bearings		
	and bushings including removing, dismantling servicing,		
	reinstallation and re-commissioning up from to 91kw and above		
863	To supply all materials, labour and transport for the replacement of	no	120.00
	the bearings/bushings only including removing, dismantling,		
	sevicing reinstallation and re-commissioning for single Phase 230v		
	motor up to 0.75kw		
864	To supply all materials, labour and transport for the replacement of	no	130.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for single Phase 230v		
	motor up to 1.5kw		
865	To supply all materials, labour and transport for the replacement of	no	155.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for single Phase 230v		
966	motor up to 2.25kw	20	140.00
866	To supply all materials, labour and transport for the replacement of	no	140.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415 v,		
867	To supply all materials, labour and transport for the replacement of	no	160.00
807	the bearings/bushings only including removing, dismantling,	no	100.00
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 5.5kw		
868	To supply all materials, labour and transport for the replacement of	no	180.00
000	the bearings/bushings only including removing, dismantling,	110	100.00
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 7.5kw		
869	To supply all materials, labour and transport for the replacement of	no	205.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 11.2kw		
870	To supply all materials, labour and transport for the replacement of	no	230.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 15kw		
871	To supply all materials, labour and transport for the replacement of	no	285.00
			·

S/No	Description	Unit	Unit Cost (\$)
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 18.7kw		
872	To supply all materials, labour and transport for the replacement of	no	320.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v		
070	motor up to 22.5kw		250.00
873	To supply all materials, labour and transport for the replacement of	no	350.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v motor up to 26.2kw		
874	To supply all materials, labour and transport for the replacement of	no	400.00
074	the bearings/bushings only including removing, dismantling,	110	400.00
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 30kw		
875	To supply all materials, labour and transport for the replacement of	no	430.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 45kw		
876	To supply all materials, labour and transport for the replacement of	no	500.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 60kw		
877	To supply all materials, labour and transport for the replacement of	no	650.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 75kw		
878	To supply all materials, labour and transport for the replacement of	no	800.00
	the bearings/bushings only including removing, dismantling,		
	servicing reinstallation and re-commissioning for three Phase 415v motor up to 90kw		
879	To supply all materials, labour and transport for the replacement of	no	950.00
0/3	the bearings/bushings only including removing, dismantling,	110	930.00
	servicing reinstallation and re-commissioning for three Phase 415v		
	motor up to 91kw and above		
880	To supply all materials, labour and transport for the replacement of	no	60.00
	the couplings/bushings only including the removing, dismantling,		
	servicing reinstallation using dial gauges and re-commissioning for		
	single phase 230V motor of all sizes		
881	To supply all materials, labour and transport for the replacement of	no	400.00
	couplings/bushings only including the removing, dismantling,		
	servicing reinstallation using dial gauges and re-commissioning for		
	three phase 415v motor of shaft size up to 51mm dia		
882	To supply all materials, labour and transport for the replacement of	no	500.00
	couplings/bushings only including the removing, dismantling,		
	servicing reinstallation using dial gauges and re-commissioning for		
000	three phase 415v motor of shaft size up to 101mm dia		600.00
883	To supply all materials, labour and transport for the replacement of	no	600.00
	couplings/bushings only including the removing, dismantling,		
	servicing reinstallation using dial gauges and re-commissioning for three phase 415v motor of shaft size up to 126mm dia		
	tinee phase 4134 motor of shart size up to 120mm dia	I	ı l

S/No	Description	Unit	Unit Cost (\$)
884	To supply all materials, labour and transport for the replacement of	no	240.00
	motors including installation and commissioning single phase 230v,		
	4 poles/6poles, 50 Hz, up to 0.25 kw		
885	To supply all materials, labour and transport for the replacement of	no	300.00
	motors including installation and re-commissioning single phase		
	230v, 4 poles/6poles, 50 Hz, up to 0.37 kw		
886	To supply all materials, labour and transport for the replacement of	no	340.00
	motors including installation and commissioning single phase 230v,		
	4 poles/6poles, 50 Hz, up to 0.56 kw		
887	To supply all materials, labour and transport for the replacement of	no	390.00
	motors including installation and commissioning single phase 230v,		
	4 poles/6poles, 50 Hz, up to 0.75 kw		
888	To supply all materials, labour and transport for the replacement of	no	430.00
	motors including installation and commissioning single phase 230v,		
	4 poles/6poles, 50 Hz, up to 1.2 kw		
889	To supply all materials, labour and transport for the replacement of	no	420.00
	motors including installation and commissioning single phase 230v,		
	4 poles/6poles, 50 Hz, up to 1.5 kw		
890	To supply all materials, labour and transport for the replacement of	no	450.00
	motors including installation and commissioning single phase 230v,		
	4 poles/6poles, 50 Hz, up to 2.25 kw		
891	To supply all materials, labour and transport for the replacement of	no	260.00
	motors including installation and commissioning three phase 415v,		
	50Hz, 4 poles or 6 poles, up to 0.75 kw		
892	To supply all materials, labour and transport for the replacement of	no	320.00
	motors including installation and commissioning three phase 415v,		
	50Hz, 4 poles or 6 poles, up to 1.5 kw		
893	To supply all materials, labour and transport for the replacement of	no	420.00
	motors including installation and commissioning three phase 415v,		
004	50Hz, 4 poles or 6poles, up to 2.25 kw		500.00
894	To supply all materials, labour and transport for replacement of	no	500.00
	motors including installation and commissioning three phase 415v,		
905	50Hz, 4 poles or 6poles, up to 3.75kw		600.00
895	To supply all materials, labour and transport for replacement of	no	600.00
	motors including installation and -commissioning three phase 415v, 50Hz, 4 poles or 6poles, up to 5.6kw		
896	To supply all materials, labour and transport for replacement of	no	720.00
030	motors including installation and -commissioning three phase 415v,	no	720.00
	50Hz, 4 poles or 6poles, up to 7.5kw		
897	To supply all materials, labour and transport for replacement of	no	900.00
037	motors including installation and commissioning three phase 415v,	110	300.00
	50Hz, 4 poles or 6poles, up to 11.2kw		
898	To supply all materials, labour and transport for replacement of	no	1,200.00
	motors including installation and commissioning three phase 415v,		
	50Hz, 4 poles or 6poles, up to 15kw		
899	To supply all materials, labour and transport for replacement of	no	1,500.00
	motors including installation and commissioning three phase 415v,		,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
	50Hz, 4 poles or 6poles, up to 18.7kw		
900	To supply all materials, labour and transport for replacement of	no	1,800.00
	motors including installation and commissioning three phase 415v,		
	50Hz, 4 poles or 6poles, up to 22.5kw		
	•	•	•

S/No	Description	Unit	Unit Cost (\$)
901	To supply all materials, labour and transport for replacement of	no	2,200.00
	motors including installation and commissioning three phase 415v,		
	50Hz, 4 poles or 6poles, up to 30kw		
902	To supply all materials, labour and transport for replacement of	no	3,200.00
	motors including installation and commissioning three phase 415v,		
	50Hz, 4 poles or 6poles, up to 37.5kw		
903	To supply all materials, labour and transport for replacement of	no	4,200.00
	motors including installation and commissioning three phase 415v,		
	50Hz, 4 poles or 6poles, up to 45kw		
904	To supply all materials, labour and transport for replacement of	no	5,400.00
	motors including installation and commissioning three phase 415v,		
005	50Hz, 4 poles or 6poles, up to 52.5kw		6 500 00
905	To supply all materials, labour and transport for replacement of	no	6,500.00
	motors including installation and commissioning three phase 415v,		
906	50Hz, 4 poles or 6poles, up to 75kw To supply all materials, labour and transport for replacement of	no	7,200.00
300	motors including installation and commissioning three phase 415v,	no	7,200.00
	50Hz, 4 poles or 6poles, up to 90kw		
	motors including installation and commissioning three phase 415v,		
	50Hz, 4 poles or 6 poles, up to 91kw and above		
908	To supply all materials, labour and transport for replacement of	no	100.00
	Direct-On-Line Starters, hand reset, with 2 or more auxilliary		
	contacts with line and phasing protection over-load relay, suitable		
	for AC 500V; 3 phase 50 Hz conform to BS 587 and or IEC PUB		
	152-1, 292-2-1 up to 3.75 kw (5 hp) (range 0.3-9 amp opeaating coil		
	vols 230v or 24v)

S/No	Description	Unit	Unit Cost (\$)
1076	VARIABLE SPEED DRIVE SYSTEM (VSD)	no	4,000.00
	To supply materials, labour and transport for installation/		
	replacement of VSD Controller complete with testing and		
	commissioning of the system for motor up to 22.4kw.		
1077	VARIABLE SPEED DRIVE CONTROLLER	no	4,500.00
	To supply materials, labour and transport for installation/		
	replacement of VSD Controller complete with testing and		
	commissioning of the system for motor up to 31kw.		
1078	VARIABLE SPEED DRIVE CONTROLLER	no	6,000.00
	To supply materials, labour and transport for installation/		
	replacement of VSD Controller complete with testing and		
	commissioning of the system for motor up to 46Kw.		
1079	VARIABLE SPEED DRIVE CONTROLLER	no	7,000.00
	To supply materials, labour and transport for installation/		
	replacement of VSD Controller complete with testing and		
1000	commissioning of the system for motor up to 56Kw.		10 000 00
1080	VARIABLE SPEED DRIVE CONTROLLER	no	10,000.00
	To supply materials, labour and transport for installation/ replacement of VSD Controller complete with testing and		
	commissioning of the system for motor up to 76Kw.		
1081	VARIABLE SPEED DRIVE CONTROLLER	no	14,000.00
1001	To supply materials, labour and transport for installation/		11,000.00
	replacement of VSD Controller complete with testing and		
	commissioning of the system for motor up to 95Kw.		
1082	VARIABLE SPEED DRIVE CONTROLLER	no	16,000.00
	To supply materials, labour and transport for installation/		
	replacement of VSD Controller complete with testing and		
	commissioning of the system for motor up to 115Kw.		
1083	VARIABLE SPEED DRIVE CONTROLLER	no	20,000.00
	To supply materials, labour and transport for installation/		
	replacement of VSD Controller complete with testing and		
4004	commissioning of the system for motor up to 135Kw.		50.00
1084	To supply materials, labour and transport for the replacement of	no	50.00
1085	VSD Parts - TOP Fan Capacitor To supply materials, labour and transport for the replacement of	no	350.00
1065	VSD Parts - DC Card	no	330.00
1086	To supply materials, labour and transport for the replacement of	no	450.00
1000	VSD Parts - IGBT Module	110	430.00
1087	To supply materials, labour and transport for the replacement of	no	500.00
	VSD Parts - IGBT w/PCB		
1088	To supply materials, labour and transport for the replacement of VSD	no	200.00
	Parts		
	- Rectifier		
1089	To supply materials, labour and transport for the replacement of VSD	no	380.00
	Parts - Relay Card		
1090	To supply materials, labour and transport for the replacement of VSD	no	800.00
1001	Parts - Gate Drive Board up to 56 kw		2 200 22
1091	To supply materials, labour and transport for the replacement of VSD Parts - Gate Drive Board up to 135 kw	no	2,200.00

	form insulation for all types of valves c/w flanges and fitting complete		
	with 26G aluminium jacketing with painting for pipes size up to		
4400	51mm dia.		60.00
1199	To supply labour, materials, transport for install/replace polyurethane	no	60.00

S/No	Description	Unit	Unit Cost (\$)
	form insulation for all types of valves c/w flanges and fitting complete		
	with 26G aluminium jacketing with painting for pipes size up to 64mm dia.		
1200	To supply labour, materials, transport for install/replace polyurethane	no	100.00
	form insulation for all types of valves c/w flanges and fitting complete		
	with 26G aluminium jacketing with painting for pipes size up to		
4004	80mm dia.		450.00
1201	To supply labour, materials, transport for install/replace polyurethane	no	150.00
	form insulation for all types of valves c/w flanges and fitting complete with 26G aluminium jacketing with painting for pipes size up to		
	102mm dia.		
1202	To supply labour, materials, transport for install/replace polyurethane	no	200.00
1202	form insulation for all types of valves c/w flanges and fitting complete		200.00
	with 26G aluminium jacketing with painting for pipes size up to		
	127mm dia.		
1203	To supply labour, materials, transport for install/replace polyurethane	no	250.00
	form insulation for all types of valves c/w flanges and fitting complete		
	with 26G aluminium jacketing with painting for pipes size up to		
	135mm dia.		
1204	To supply labour, materials, transport for install/replace polyurethane	no	320.00
	form insulation for all types of valves c/w flanges and fitting complete with 26G aluminium jacketing with painting for pipes size up to		
	204mm dia.		
1205	To supply labour, materials, transport for install/replace polyurethane	no	400.00
	form insulation for all types of valves c/w flanges and fitting complete		
	with 26G aluminium jacketing with painting for pipes size up to		
	254mm dia.		
1206	To supply labour, materials, transport for install/replace polyurethane	no	460.00
	form insulation for all types of valves c/w flanges and fitting complete		
	with 26G aluminium jacketing with painting for pipes size up to		
1207	305mm dia.	no	550.00
1207	To supply labour, materials, transport for install/replace polyurethane form insulation for all types of valves c/w flanges and fitting complete	no	550.00
	with 26G aluminium jacketing with painting for pipes size up to		
	356mm dia.		
1208	To supply labour, materials, transport for install/replace polyurethane	no	22.50
	form insulation for all types of valves c/w flanges and fitting		
	complete with 26G galvanised steel jacketing with painting for pipes		
	size up to 25mm dia.		
1209	To supply labour, materials, transport for install/replace polyurethane	no	27.00
	form insulation for all types of valves c/w flanges and fitting		
	complete with 26G galvanised steel jacketing with painting for pipes size up to 32mm dia.		
1210	To supply labour, materials, transport for install/replace polyurethane	no	31.50
1210	form insulation for all types of valves c/w flanges and fitting		31.50
	complete with 26G galvanised steel jacketing with painting for pipes		
	size up to 40mm dia.		
1211	To supply labour, materials, transport for install/replace polyurethane	no	36.00
	form insulation for all types of valves c/w flanges and fitting complete		
	with 26G aluminium jacketing with painting for pipes size up to		
	51mm dia.		

S/No	Description	Unit	Unit Cost (\$)
1212	To supply labour, materials, transport for install/replace polyurethane	no	54.00
	form insulation for all types of valves c/w flanges and fitting		
	complete with 26G galvanised steel jacketing with painting for pipes		
	size up to 64mm dia.		
1213	To supply labour, materials, transport for install/replace polyurethane	no	90.00
	form insulation for all types of valves c/w flanges and fitting		
	complete with 26G galvanised steel jacketing with painting for pipes		
	size up to 80mm dia.		
1214	To supply labour, materials, transport for install/replace polyurethane	no	135.00

S/No	Description	Unit	Unit Cost (\$)
1837	To supply all labour, materials for the chemical cleaning of chilled	no	154.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 53 kw cooling capacity		
1838	To supply all labour, materials for the chemical cleaning of chilled	no	165.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 71 kw cooling capacity		
1839	To supply all labour, materials for the chemical cleaning of chilled	no	176.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 106 kw cooling capacity		
1840	To supply all labour, materials for the chemical cleaning of chilled	no	187.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 141 kw cooling capacity		
1841	To supply all labour, materials for the chemical cleaning of chilled	no	220.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 176 kw cooling capacity		
1842	To supply all labour, materials for the chemical cleaning of chilled	no	253.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 212 kw cooling capacity		
1843	To supply all labour, materials for the chemical cleaning of chilled	no	308.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 282 kw cooling capacity		
1844	To supply all labour, materials for the chemical cleaning of chilled	no	374.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 352 kw cooling capacity		
1845	To supply all labour, materials for the chemical cleaning of chilled	no	440.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 423 kw cooling capacity		
1846	To supply all labour, materials for the chemical cleaning of chilled	no	506.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 493 kw cooling capacity		
1847	To supply all labour, materials for the chemical cleaning of chilled	no	570.00
	water cooling coils (AHUs and FCUs) with approved chemical and		
	painting of rusy parts up to 563 kw cooling capacity		
1848	To supply all labour, materials for the dismantling of chilled watr fan	no	440.00
	coil unit for rewinding of motor with CLASS F insulation, rebushing,		
	chemical cleaning of coil, clearing drain pipe and painting of all		
	rusty parts and drip pan		
1849	To supply all labour, materials for the chemical cleaning of air-	no	240.00
	cooled condenser with approved chemical and painting of rusty		
	parts up to 80 RT (281 kw) cooling capacity		
1850	To supply all labour, materials for the chemical cleaning of air-	no	270.00
	cooled condenser with approved chemical and painting of rusty		
4054	parts up to 90RT and above (316kw) cooling capacity

	brickwall to form opening up to 0.50 cu m.		
1903	To supply labour, materials, transport and tools to cut through	no	280.00
	brickwall to form opening up to 0.60 cu m.		
1904	To supply labour, materials, transport and tools to patch up opening	no	10.00
	for pipes /conduits with waterproof cement and sand mortar up to		
4005	100mm diameter.		1400
1905	To supply labour, materials, transport and tools to patch up opening	no	14.00
	for pipes /conduits with waterproof cement and sand mortar up to		
1906	205mm diameter.	20	20.00
1906	To supply labour, materials, transport and tools to patch up opening for pipes /conduits with waterproof cement and sand mortar up to	no	20.00
	305mm diameter.		
1907	To prepare wall surface and apply one base coat of 20% dilution of	m2	2.40
1507	synthetic emulsion paint and one finishing coat of synthetic	1112	2.40
	emulsion paint to wall of handling unit room of any colour approved		
	by SO.		
1908	To seal up louvred panels, holes etc with 6mm thick master board	m2	26.00
	(calcium silicated matric reinforced with cellulose).		
1909	To seal up louvred panels, holes etc with 6mm thick waterproof	m2	12.00
	plywood.		
1910	To seal up louvred panels, holes etc with brick and cement plaster	m2	20.00
	(wall thickness up to 225mm).		
1911	To supply labour, materials, transport and tools to patch up opening	m2	45.00
	for pipes /conduits with waterproof cement and sand mortar up to		
	100mm diameter.		
1912	To supply and erect steel staging of height from 3m high but not	no	56.00
	exceeding 5m high and remove after use and clearing debris off		
	site.		
1913	To supply and erect steel staging of height from 5m high but not	no	77.00
	exceeding 7m high and remove after use and clearing debris off		
1014	site.		101.00
1914	To supply and erect steel staging of height from 7m high but not	no	101.00
	exceeding 10m high and remove after use and clearing debris off site.		
1915	To supply and install stainless steel plain latch used for securing	no	32.00
1913	AHU and Cooling Tower access panels and fastened with bolts and	110	32.00
	nuts to SO's approval.		
1916	To supply and install stainless steel plain latch used for securing	no	30.00
	AHU and Cooling Tower access panels and fastened with screws or		
	rivets to SO's approval.		
1917	To provide monthly servicing inspection for chilled water fan coil unit	no	6.00
	as per spec and attending complaint calls (unlimited) for additioN.A.l		
	or omission unit for central air-con system. Cost per unit per service		
	per month.		
1918	To provide monthly servicing inspection for AHU as per spec and	no	20.00
	attending complaint calls (unlimited) for additioN.A.I or omission unit		
	for central air-con system. Cost per unit per service per month.		

S/No	Description	Unit	Unit Cost (\$)
1919	To provide monthly servicing inspection for MVF inclusive of	no	4.00
	cleaning, checking of control check and adjust alignment of all drive,		
	greasing all bearings etc, housekeeping for additioN.A.l or omission		
	unit. Cost per unit per service per month.		
1920	To provide monthly servicing inspection for water pumps as per	no	40.00
	spec and attending complaint calls (unlimited) for additioN.A.l or		
	omission unit for central air-con system. Cost per unit per service		
	per month.		
1921	To provide monthly servicing inspection for cooling towers as per	no	80.00
	spec and attending complaint calls (unlimited) for additioN.A.l or		
	omission unit for central air-con system. Cost per unit per service		
	per month.		
1922	To provide monthly servicing inspection for chillers as per spec and	no	400.00
	attending complaint calls (unlimited) for additioN.A.l or omission unit		
	for central air-con system. Cost per unit per service per month.		
1923	To provide rental of elevated platform (min 2 hours) for access to	trip	400.00
	high places including all necessary fuel, operator/driver, parking,		
	ALS, clearance with traffic police etc.		
1924	To provide mobile crane for hoisting air-con equipment to/from roof	trip	400.00
	top of building including operator.		
1925	Service to provide for preparation of drawing (tracing, drafting etc)	no	120.00
	for negative of AO size (1189mm x 841mm)		
1926	Service to provide for preparation of drawing (tracing, drafting etc)	no	55.00
	for negative of A1 size (594mm x 841mm)		
1927	Service to provide for preparation of drawing (tracing, drafting etc)	no	40.00
	for negative of A2 size (594mm x 841mm)		
1928	Service to provide for preparation of drawing (tracing, drafting etc)	no	30.00
	for negative of A3 size (297mm x 841mm)		
1929	To supply and provide printed drawing of paper size AO (1189mm x	no	5.50
	841mm)		
1930	To supply and provide printed drawing of paper size A1 (594mm x	no	4.50
	841mm)		
1931	To supply and provide printed drawing of paper size A2 (420mm x	no	2.50
4022	841mm)		4.50
1932	To supply and provide printed drawing of paper size A3 (297mm x	no	1.50
4022	420mm)

165	Supply and install PVC glands termination for 95mm2 to 150mm2.	no	6.00
166	Supply and install PVC glands termination for 240mm2 to 400mm2.	no	8.00
167	Supply and install lightning earth electrode 3.6m x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm GI inspection box with heavy duty hinged cover, fibre glass base and riveted trifoliate labelling: LIGHTNING EARTH ELECTRODE DO NOT REMOVE.	no	200.00
168	Supply and install copper lightning finial, 300mm-600mm x 16mm c/w base plate including connecting up to interconnecting copper tape.	no	15.00
169	Supply and install 25mm x 3.25mm copper tape using purpose made copper or brass saddles on purpose made cement blocks at one metre intervals or vertical run for down conductors.	m	7.50
170	Supply and install brass test clamp c/w expansion bolt or ramset onto wall.	no	20.00
171	Supply and install square tape clamp for forming straight through, cross or tee joint in tape.	no	7.00
172	Supply and install 25mm x 3.25mm aluminum tape using purpose made aluminum saddles on purpose made cement blocks at one metre intervals.	m	3.50
173	Supply and install aluminum finial 300mm-600mm x 16mm diameter solid aluminum c/w base plate as Fuse RA105 or equivalent including connecting up to interconnecting aluminum tape.	no	10.00
174	Supply and install square tape clamp for forming straight through, cross or tee joint in aluminum tape as Fuse CT005 or equivalent.	no	2.50
175	Supply and install bi-metallic connector for joining aluminum to copper tape as Fuse Type A CN910 or equivalent including connecting up copper/aluminum tapes.	no	40.00
176	Supply and install 50mm UPVC conduit to enclose lightning down conductor.	no	4.00
177	Supply and replace existing lightning earth inspection box with angle steel reinforced chamber with 10mm thick steel checker plates.	no	40.00
178	Highly non-linear surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) for DIN- rail mounting.	no	100.00
179	Highly non-linear 3 phase surge protection of characteristic [a>30], as OBO V20C or equivalent, 0.8 KV impulse breakdown voltage, 75 KA current capacity (8/20 characteristic) with fault monitoring by audio and visual signalling.	no	550.00
180	13A surge protective plug top, impulse breakdown voltage 0.6 KV, 2.5 KA current capacity (8/20 characteristics)	no	50.00
181	As above but for 15A surge protective plug top.	no	80.00
182	Single phase surge protection module for DB board DIN rail mounting as SP-200-2D or equivalent, impulse breakdown voltage < 1KV, current capacity 20 KA (8/20 characteristics) with thermal fault indications as an integral unit with Live, Neutral and Earth connections.	no	120.00

S/No	Description	Unit	Unit Cost (\$)
183	Supply and install earth electrode 3.6m deep x 16mm diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm GI inspection box with heavy duty hinged cover, fibre glass base and riveted trifoliate labeling: SAFETY EARTH ELECTRODE DO NOT REMOVE.	no	200.00
184	Supply and install earth electrode 16mm diameter x 5.4m deep diameter copper clad steel rod c/w brass or copper clamp and 20cm x 20cm GI inspection box with heavy duty hinged cover, fibre glass base and riveted trifoliate labelling: SAFETY EARTH ELECTRODE DO NOT REMOVE.	no	240.00
185	Supply and lay 25mm x 3.20mm copper tap including the excavating in ground, backfilling, compacting, make good and returfing.	m	12.50
186	Supply and lay earth clip sizes 19mm to 50mm.	no	1.50
187	Earth pit of 2m depth c/w 1m x 1m x 3m copper plate, 5 Nos 16mm diameter by 3.6m long copper earth electrodes connected to concrete inspections pit as per Sketch F1.The work includes excavating in ground, backfilling, temporary shoring, competing, make good returfing.	no	1,600.00
188	Supply labour, materials and install PUB approved RCCB 40A/0.03, 2 pole, 240V including protective insulation cover to termination position.	no	50.00
189	Supply labour, materials and install PUB approved RCCB 40A/0.01, 2 pole, 240V including protective insulation cover to termination position.	no	60.00
190	Supply labour, materials and install PUB approved RCCB 40A/0.03 to 0.3A sensitivity, 4 pole 415V including protective insulation cover to termination position.	no	80.00
191	Supply labour, materials and install PUB approved RCCB 40A/0.5, 4 pole 415V including protective insulation cover to termination position.	no	95.00
192	Supply labour, materials and install PUB approved RCCB 63A/0.03, 2 pole 240V including protective insulation cover to termination position.	no	90.00
193	Supply labour, materials and install PUB approved RCCB 63A/0.1, 2 pole 240V including protective insulation cover to termination position.	no	90.00
194	Supply labour, materials and install PUB approved RCCB 63A/0.03 - 0.3, 4 pole 415V including protective insulation cover to termination position.	no	110.00
195	Supply labour, materials and install PUB approved RCCB 63A/0.5 4 pole, 415V including protective insulation cover to termination position.	no	150.00
196	Supply labour, materials and install PUB approved RCCB 100A/0.03 - 0.5, 4 pole, 415V including protective insulation cover to termination position.	no	200.00
197	Combined RCCB/MCB in-one as follows: RCCB - 30 mA 0.1 sec trip 30A MCB - 5-30A (Type B - D) M6 duty.	no	120.00
198	Earth pit of 2m depth c/w 1m x 1m x 3m copper plate, 5 Nos 16mm diameter by 3.6m long copper earth electrodes connected to concrete inspections pit as per Sketch F1. The work includes excavating in ground, backfilling, temporary shoring, competing, make good returfing.	no	70.00
199	Supply labour, materials and install PUB approved RCCB 40A/0.03, 2 pole, 240V including protective insulation cover to termination position.	no	144.00
200	Supply labour, materials and install PUB approved RCCB 40A/0.01, 2 pole, 240V including protective insulation cover to termination position.	no	192.00
201	Supply labour, materials and install PUB approved RCCB 40A/0.03 to 0.3A sensitivity, 4 pole 415V including protective insulation cover to termination position.	no	228.00
202	Supply labour, materials and install PUB approved RCCB 40A/0.5, 4 pole 415V including protective insulation cover to termination position.	no	420.00
203	Supply labour, materials and install PUB approved RCCB 63A/0.03, 2 pole 240V including protective insulation cover to termination position.	no	624.00

Supply labour, materials and install PUB approved RCCB 63A/0.1, 2 pole	S/No	Description	Unit	Unit Cost (\$)
Supply labour, materials and install PUB approved RCCB 63A/0.03 - 0.3, 4 pole 415V including protective insulation cover to termination position. 206 Supply labour, materials and install PUB approved RCCB 63A/0.5 4 pole, 415V including protective insulation cover to termination position. 207 Supply labour, materials and install PUB approved RCCB 103A/0.3 - 0.5, 4 pole, 415V including protective insulation cover to termination position. 208 Supply labour, materials and install PUB approved MCCB 2.0 - 40A 3 pole, 415V, 50KA including protective insulation cover to termination position. 209 Supply labour, materials and install approved MCCB 2.0 - 60A 3 pole, 415V, 50KA including protective insulation cover to termination position. 210 Supply labour, materials and install approved MCCB 100-125A 3 pole, 415V, 50KA including protective insulation cover to termination position. 211 Supply labour, materials and install approved MCCB 100-125A 3 pole, 415V, 50KA including protective insulation cover to termination position. 212 Supply labour, materials and install approved MCCB 100-125A 3 pole, 415V, 50KA including protective insulation cover to termination position. 213 Supply labour, materials and install approved MCCB 200-225A 3 pole, 415V, 50KA including protective insulation cover to termination position. 214 Supply labour, materials and install approved MCCB 200 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 215 Supply labour, materials and install approved MCCB 400 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 216 Supply labour, materials and install approved MCCB 000 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 217 Supply labour, materials and install approved MCCB 000 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 218 Supply labour, materials and install approved MCCB 000 amps, 3 pole, 415V, 50KA including protective insulation cover	204	_ ,, , , , , , , , , , , , , , , , , ,	no	660.00
pole 415V including protective insulation cover to termination position. Supply labour, materials and install PUB approved RCCB 63A/0.5 4 pole, 415V including protective insulation cover to termination position. 207 Supply labour, materials and install PUB approved RCCB 100A/0.03 - 0.5, 4 pole, 415V including protective insulation cover to termination position. 208 Supply labour, materials and install approved MCCB 20-40A 3 pole, 415V, 50KA including protective insulation cover to termination position. 209 Supply labour, materials and install approved MCCB 20-40A 3 pole, 415V, 50KA including protective insulation cover to termination position. 210 Supply labour, materials and install approved MCCB 100-175A 3 pole, 415V, 50KA including protective insulation cover to termination position. 211 Supply labour, materials and install approved MCCB 100-175A 3 pole, 415V, 50KA including protective insulation cover to termination position. 212 Supply labour, materials and install approved MCCB 200-225A 3 pole, 415V, 50KA including protective insulation cover to termination position. 213 Supply labour, materials and install approved MCCB 200-25A 3 pole, 415V, 50KA including protective insulation cover to termination position. 214 Supply labour, materials and install approved MCCB 25O-300A 3 pole, 415V, 50KA including protective insulation cover to termination position. 215 Supply labour, materials and install approved MCCB 400 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 216 Supply labour, materials and install approved MCCB 500 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 217 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 218 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 219 Supply and install and replace Low Voltage Air				
Supply labour, materials and install PUB approved RCCB 63A/0.5 4 pole, 415V including protective insulation cover to termination position. 208 Supply labour, materials and install PUB approved RCCB 100A/0.03 - 0.5, 4 pole, 415V including protective insulation cover to termination position. 209 Supply labour, materials and install approved MCCB 20-40A 3 pole, 415V, 50KA including protective insulation cover to termination position. 210 Supply labour, materials and install approved MCCB 20-40A 3 pole, 415V, 50KA including protective insulation cover to termination position. 211 Supply labour, materials and install approved MCCB 100-125A 3 pole, 415V, 50KA including protective insulation cover to termination position. 212 Supply labour, materials and install approved MCCB 100-125A 3 pole, 415V, 50KA including protective insulation cover to termination position. 213 Supply labour, materials and install approved MCCB 150-160A 3 pole, 415V, 50KA including protective insulation cover to termination position. 214 Supply labour, materials and install approved MCCB 200-225A 3 pole, 415V, 50KA including protective insulation cover to termination position. 215 Supply labour, materials and install approved MCCB 200 amps, 3 pole, 145V, 50KA including protective insulation cover to termination position. 216 Supply labour, materials and install approved MCCB 300 amps, 3 pole, 145V, 50KA including protective insulation cover to termination position. 216 Supply labour, materials and install approved MCCB 500 amps, 3 pole, 145V, 50KA including protective insulation cover to termination position. 217 Supply labour, materials and install approved MCCB 500 amps, 3 pole, 145V, 50KA including protective insulation cover to termination position. 218 Supply labour, materials and install approved MCCB 500 amps, 3 pole, 145V, 50KA including protective insulation cover to termination position. 219 Supply labour, materials and install approved MCCB 1000 amps, 3 pole, 145V, 50KA including protective insulation cover to terminati	205		no	840.00
415V including protective insulation cover to termination position. Supply labour, materials and install PUB approved RCCB 100A/0.03 - 0.5, 4 pole, 415V including protective insulation cover to termination position. Supply labour, materials and install approved MCCB 20-40A 3 pole, 415V, 50KA including protective insulation cover to termination position. 209 Supply labour, materials and install approved MCCB 20-40A 3 pole, 415V, 50KA including protective insulation cover to termination position. 210 Supply labour, materials and install approved MCCB 100-125A 3 pole, 415V, 50KA including protective insulation cover to termination position. 211 Supply labour, materials and install approved MCCB 150-160A 3 pole, 415V, 50KA including protective insulation cover to termination position. 212 Supply labour, materials and install approved MCCB 200-225A 3 pole, 415V, 50KA including protective insulation cover to termination position. 213 Supply labour, materials and install approved MCCB 200-225A 3 pole, 415V, 50KA including protective insulation cover to termination position. 214 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 215 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 216 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 217 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 218 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 219 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 220 Supply, install and replace Low Voltage Air Circuit Breaker 3				
Supply labour, materials and install PUB approved RCCB 100A/0.03 - 0.5, 4 pole, 415V including protective insulation cover to termination position. 208 Supply labour, materials and install approved MCCB 20-40A 3 pole, 415V, 50KA including protective insulation cover to termination position. 209 Supply labour, materials and install approved MCCB 40-60A 3 pole, 415V, 50KA including protective insulation cover to termination position. 210 Supply labour, materials and install approved MCCB 100-125A 3 pole, 415V, 50KA including protective insulation cover to termination position. 211 Supply labour, materials and install approved MCCB 100-125A 3 pole, 415V, 50KA including protective insulation cover to termination position. 212 Supply labour, materials and install approved MCCB 200-225A 3 pole, 415V, 50KA including protective insulation cover to termination position. 213 Supply labour, materials and install approved MCCB 200-225A 3 pole, 415V, 50KA including protective insulation cover to termination position. 214 Supply labour, materials and install approved MCCB 250-300A 3 pole, 415V, 50KA including protective insulation cover to termination position. 215 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 216 Supply labour, materials and install approved MCCB 600 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 217 Supply labour, materials and install approved MCCB 600 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 218 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 218 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termination position. 219 Supply labour, materials and install approved MCCB 800 amps, 3 pole, 415V, 50KA including protective insulation cover to termin	206		no	1,200.00
pole, 415V including protective insulation cover to termination position. -	electronic ballast.		
430	To replace existing electronic ballast all labours, parts <(>&<)> cables to light fittings, 1 x 28W ballast/1 x 14W ballast.	no	30.00
431	Supply, install and replace 2 x 54W weather proof fluorescent luminaries with IP 55 protection.	no	115.00
432	Supply, install and replace explosion proof 2 x 28W light fixture c/w light tube.	no	700.00
433	To supply and install wall mounted luminaries (any types of face plate description "Caution/Lecture in Progress/Laser in Operation/Toxic Discharge"/complete with gear and LED/tubes.	no	450.00
434	To supply and install LED type of flood light fixture 80-200W complete with inverter and LED.	no	600.00
435	To supply and install LED type of halogen light fixture complete with inverter and LED. (3-10W), any colour rendering, weather proof.	no	120.00
436	Supply, deliver, replace and install circular globe fixtures c/w gear <(>&<)> lamp up to 250W, Globe of 400 diameter.	no	300.00
437	Supply, deliver, replace and install Zebra Crossing yellow circular globe c/w 30 - 50W LED including driver, timer, PCB.	no	500.00
438	Main bell wiring pt 230 Volts c/w switch.	no	24.00
439	Mains wiring point for bell transformer.	no	20.00
440	Bell push pt c/w bell push 30m run bell wire and mounting block.	no	24.00
441	240 to 6-24V bell transformer 12VA make.	no	15.00
442	6-24V (AC or DC) electric bell, 75mm diameter	no	10.00
443	6-24V (AC or DC) electric buzzer.	no	10.00
444	230 volt electric gong 150mm diameter revolving light / baby siren / buzzer.	no	60.00
445	230 volt electric gong 225mm diameter revolving light / baby siren / buzzer.	no	100.00
446	300mm diameter AC230V electric, wall mounted clock with red seconds hand and 72 hours of power reserve in case of power failure.	no	200.00
447	Electronic multi-function bell timer c/w a choice of 4 melodies, 2 control output channels and easy to program.	no	950.00
448	300mm Wall Clock DC 1.5V.	no	50.00
449	Supply, install and replace TV point including splitter.	no	20.00
450	Supply, deliver, replace and install UPS >= 10KVA, 3 phase, 63A c/w 4 output terminal, tolerance range +/- 10%.	no	5,000.00
451	Supply, deliver, replace and install UPS >= 20KVA, 3 phase, 63A c/w 4 output terminal, tolerance range +/- 10%.	no	8,000.00
452	Supply, deliver, replace and install UPS >= 10KVA, 1 phase, 63A c/w 4 output terminal, tolerance range +/- 10%.	no	2,000.00
453	Supply, deliver, replace and install UPS >= 20KVA, 1 phase, 63A c/w 4 output terminal, tolerance range +/- 10%.	no	4,000.00
454	To remove one lighting point including wiring fitting, batten, conduits etc and make good wall or ceiling surface (excluding touch-up).	no	4.00
455	To remove one power point including wiring fitting, batten, conduits etc and make good wall or ceiling surface (excluding touch-up).	no	4.00
456	To remove bracket, exhaust or ceiling oscillating fan pt including wiring fan, batten, or conduits mounting block and make good wall surface.	no	6.00
457	To remove ceiling fan pt including wiring, batten, fan/hook and regulator make good wall or ceiling surface (excluding touch up).	no	5.00
458	To take down ceiling fan, wall bracket fans, oscillating fan.	no	3.00
459	To take down fluorescent/tungsten light fitting (ceiling, pendant or	no	3.00

S/No	Description	Unit	Unit Cost (\$)
	recessed).		
460	To touch up one light point or power point including plastering and painting, etc to match existing wall surface.	no	2.20
461	To take down Perimeter and security light fitting c/w arm and bracket (Any type).	no	8.00
462	To remove one single or 3-phase isolator point including wiring, conduits, etc and make good wall or ceiling surface.	no	8.00
463	To take down high bay luminaries c/w integrated control gear and bracket and make good with painting.	no	15.00
464	Lighting fitting of any type (ceiling, pendant or recessed).	no	6.00
465	1.5m or 1.2m sweep ceiling fan and speed regulator.	no	8.00
466	Wall bracket or exhaust fan (all sizes).	no	6.00
467	Ceiling oscillating fan (all sizes).	no	6.00
468	Perimeter and security light fitting (any type).	no	10.00
469	Electric Clock or Bell Timer (all sizes).	no	6.00
470	Tungsten light point with simple shade.	no	12.60
471	Light point with fitting of any type.	no	8.50
472	Ceiling fan point and fan c/w fan hook, regulator and teak block.	no	20.00
473	Bracket fan point c/w fan mounting block and fan.	no	11.00
474	Switch points c/w switch and teak block metal box.	no	7.00
475	13A or 15A switch socket outlet point.	no	9.00
476	Supply and replace/install including connecting up 5 amps white rocker	no	5.00
	plate SP c/w moulded surface mounting box.		0.00
477	Supply and replace/install including connecting up 2 ways 5 amps white	no	6.40
478	rocker plate SP c/w moulded surface mounting box. Supply and replace/install including connecting up 2g 5 amps white rocker	no	6.40
470	plate SP c/w moulded surface mounting box.	20	0.20
479	Supply and replace/install including connecting up 3g 5 amps white rocker plate SP c/w moulded surface mounting box.	no	9.20
480	Supply and replace/install including connecting up 4g 5 amps white rocker plate SP c/w moulded surface mounting box.	no	11.00
481	Supply and replace/install including connecting up 13 amps switch socket outlet c/w moulded box.	no	7.00
482	Supply and replace/install including connecting up 2g 13 amps switch socket outlet c/w moulded box.	no	16.00
483	Supply and replace/install including connecting up 15 amps switch socket outlet c/w moulded box.	no	12.40
484	Supply and replace/install including connecting up 13 amps metal clad	no	10.40
485	switch socket outlet c/w box. Supply and replace/install including connecting up 2g 13 amps metal clad	no	18.00
486	switch socket outlet c/w box. Supply and replace/install including connecting up 15 Amps metal clad	no	13.00
487	switch socket outlet c/w box Supply and replace/install including connecting up 20 Amps double-pole	no	20.00
488	switch with indicator light c/w moulded box Supply and install including connecting up time switch electric operated 230	no	180.00
400	volt 50 c/s 10-30 Amp Quartz reserve (150) yours) 24 hour dial with 15 mins settings	110	160.00
489	Supply and install including connecting up 15-20 Amps DOL motor starter contactor c/w auxillary contacts	no	160.00

S/No	Description	Unit	Unit Cost (\$)
490	Supply and install including connecting up 30 Amps single (3 phase) DOL	no	300.00
	motor starter contactor c/w auxillary contacts		
491	Supply and install 20 Amps TPN metal clad isolator c/w 4mm2 PVC cable in	no	328.00

	fluo tube		
520	Supply and replace including connecting up fluorescent starter of any size	no	1.50
521	Supply and replace including connecting up low loss ballast for 14 watt lamp	no	9.00
522	Supply and replace including connecting up low loss ballast for 28 watt lamp	no	11.00
523	Supply and replace including connecting up PL 9 watts to 13 watt lamp	no	9.00
524	Supply and replace including connecting up 10w to 40w 2D fluorescent lamp 2 to 4 pin	no	15.50
525	Supply and replace including connecting up 60w and above spiral compact fluorescent lamp	no	30.00
526	Supply and replace including connecting up PL-18 - 26 watt lamp	no	15.00
527	Supply and replace including connecting up ballast for PL 9 watt - 11 watt	no	6.00
528	Supply and replace including connecting up ballast for PL 13 watt - 18 watt	no	8.00
529	Supply and replace 10W - 13W PLC lamp including connecting up	no	14.00
530	Supply and replace 18W - 26W PLC lamp including connecting up	no	16.50
531	Supply and replace including connecting up ceiling rose with 3-plate	no	4.50
532	Supply and replace including connecting up batten holder/lamp holder	no	4.50
533	Supply and replace including connecting up capacitor for 1- 2 metre or 1.5 metres ceiling fan	no	9.00
534	Supply and replace including connecting up 3 amp SP water tight switch	no	20.00
535	Supply and replace including connecting up twin gang 5 amp SP water tight switch	no	30.00
536	Supply and replace including connecting up ceiling fan regulator of any type and make	no	16.50
537	Supply and replace 8w fluorescent tube for exit light luminaries including connecting up	no	3.00
538	Supply and install plot cell control switch including connecting up	no	45.00
539	Supply and replace polypropylene power factor capacitor for any sizes of light fitting	no	5.00
540	Supply and replace prismatic acrylic diffuser, size 600mm x 600mm	no	10.00
541	Supply and replace prismatic acrylic diffuser, size 1200 x 600mm	no	14.00
542	Supply and replace existing diffuser to egg crate silver anodized diffuser of any sizes including disposal	no	25.00
543	Supply and replace/install including connecting up 6 gang 5 amps white rocker plate SP c/w moulded surface mounting box	no	12.00
544	Supply and replace/install including connecting up 8 gang 5 amps white rocker plate SP c/w moulded surface mounting box	no	14.00
545	Supply and install/replace including connecting up to power point and ready to operate for an electronic time switch 230V, 50Hz, 7 days operations, class of operation IP 42/11, with minimum time setting of 1 minute. The timber shall have 24 start/stop functions.	no	400.00
546	Supply and install digital electronics time switch 230 volt 50 Hz c/s 10 Amp.	no	160.00
547	Supply and install including connecting up to 35-60 Amp star-delta motor starter contactor c/w auxillary contacts	no	340.00
548	Supply and replace Bulb ES or BC 15w-100w	no	3.00

S/No	Description	Unit	Unit Cost (\$)
549	Supply and replace 42W PLC (4 pins) lamp (OSPAM) or equivalent	no	30.00
550	Supply and replace 35w-50w Halogen lamp c/w Cool beam & UV filter type	no	20.00
551	Supply and replace 10w Halogen lamp (Emergency light)	no	10.00
552	Supply & replace 5w 6.3v blub (pilot indicating light)	no	2.00
553	Supply and replace 35w - 60w ES or BC carbon bulb (Philips) or equivalent	no	40.00
554	Supply & replace 20w - 40w UV fluorescent	no	40.00
555	Supply & replace 50w HME mercury lamp	no	14.00
556	Supply & replace Ballast for 50w HME mercury lamp	no	26.00
557	Supply & replace 32w -40W circular flow lamp	no	10.00
558	Digital KHH meter, 32A to 1000A equivalent c/w CTS ,< (>&<) > connections,	no	300.00
	wiring		
559	Supply & replace 150W - 250w Sodium Vapour lamps ballast	no	50.00
560	Supply and replace 150w-250w sodium Vapour lamp	no	120.00
561	Supply & replace 70w metal halide lamp/sodium	no	35.00
562	Supply and replace 70w-200w metal halide lamp	no	50.00
563	Supply and replace 70w - 200w metal halide ballast, type constant wattage	no	70.00
	auto-transformer (CWA)		
564	Supply and replace outdoor light fitting (L-810) 35w-50w 12V low voltage	no	120.00
	c/w bulb and transformer		
565	Supply and replace outdoor light fitting 12V to 24V, 35w - 50w transformer	no	50.00
566	Supply and replace including connecting 50 to 65 watt lamps (energy saving	no	40.00
	lamp)		
567	Supply & replace 1000 to 2000 watts sodium/mercury/metal halide lamp	no	150.00
568	Supply & replace ballast for 1000 to 2000 watts sodium/mercury/metal	no	250.00
	halide lamp		
569	Supply & replace ignitor for 1000 to 2000 watts sodium/mercury 1 metal halide lamp	no	50.00
570	Supply & replace including connecting up ballast for PLC 10- 23 watts	no	7.00
571	Supply & replace including connecting up ballast for PLC 10- 25 watts Supply & replace including connecting up ballast for PLC 18- 26 watts	no	16.00
572	Supply & replace fluorescent tube T5 (16mm) extra slim 25w Supply &	no	18.00
372	replace weather protected junction Box IP65 of	no	16.00
573	any sizes	no	120.00
573 574	Supply & replace ground buried luminaries metal halide fitting c/w 1 x	no	500.00
374	70w/100w lamp complete with control gear and protection conforms to IP	no	300.00
	67 class 1		
575	To check, testing, service and commissioning (software programming)	no	400.00
373	lighting dimming system	110	400.00
576	To supply & replace 4-stage scene control & push button	no	300.00
577	To supply & replace master ON/OFF switch c/w indicating lights	no	70.00
578	To supply & replace HF electronic dimmable ballast for PLC bulb	no	120.00
579	To supply & replace HP electronic dimmable ballast for fluorescent tube	no	90.00
580	To supply & replace LT/HT step-down transformer for outdoor building	no	150.00
300	lighted signages (Any capacity)	110	150.00
581	To supply & replace outdoor water-proof lighted signages bulb	no	8.00
582	To supply & replace programmable Dim Actuator DC 24V in Dimming	no	120.00
302	System	110	120.00
583	To supply & replace bus-voltage supply module	no	200.00
584	To supply & replace programmable dimming control modules 0.7kw to 2 kw	no	1,000.00
	range		,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
585	To supply & replace plug in thysistor or Transistor modules for phase	no	1,200.00
	controlled in dimming system, the power range from 3 kw to 5 kw with

	approved)		
673	Ceiling oscillating fan 400mm x/w bracket and regulator Hitachi or similar	no	144.00

S/No	Description	Unit	Unit Cost (\$)
674	Additional length of down rod for ceiling fan	no	6.00
675	To supply/install 20cm KDK or equivalent exhaust fan	no	121.00
676	To supply/install 25cm KDK or equivalent exhaust fan	no	150.00
677	To supply/install 30cm KDK or equivalent exhaust fan	no	187.00
678	To supply/install 30cm KDK or equivalent Industry exhaust fan	no	400.00
679	To supply/install 50cm KDK or equivalent Industry exhaust fan	no	520.00
680	To supply/install 40cm KDK or equivalent Industry exhaust fan	no	700.00
681	Open a concrete hole for exhaust fan including providing wooden frame	no	75.00
682	To remove existing window glass and cover back by wooden block c/w painting	no	18.00
683	To supply/install 15cm KDK or equivalent exhaust fan	no	100.00
684	Painting of existing ceiling fan (all sizes) - sand down and clean before	no	10.00
	painting		
685	Supply and install or replace hand drier (automatic) similar to "Stibel Eltron or "vortice" - ADHR or equivalent	no	450.00
686	Supply and replace the printed Circuit Board (PCB) in the hand-drier	no	120.00
	including removing the defective PCB, connecting up ready for operation and testing		
687	Supply and replace the heating element in the hand-drier including connecting up and testing	no	55.00
688	Paint ceiling fan 1.5 metres or 1.2 metres sweep c/w speed regulator (sand down and clean before painting)	no	10.00
689	Paint fluorescent fitting c/w down rods (sand down and clean before painting)	no	7.00
690	Paint 300mm - 400mm bracket wall (oscillating) fan (sand down and clean before painting)	no	7.00
691	Paint 500mm - 600mm bracket wall (oscillating) fan (sand down and clean before painting)	no	9.00
692	To carry out inspection on safe operation of the ceiling fan inclusive of the system, supports, bolts, etc. for impending corrosion, fatigue failure and disintegration and to ensure that the fan will not collapse within 12 months from the date of inspection. A report and certification of completion for the fans shall be issued by the Contractor to the University	no	30.00
693	To perform 1 time servicing for Dehumidifier inclusive of washing of filters, clearing of reservoir etc.	no	50.00
694	To make good or convert existing opening to fire stop (for opening not more than 3m x 3m per level)	no	300.00
695	Supply/install 13 amps plug top	no	3.00
696	Supply/install 15 amps plug top	no	4.00
697	Supply and install stainless steel type of anchor bolt and nut (this item does not apply to new installation)	no	30.00
698	Arrange for PUB testing and installation of lighting/power KWH meter for first consumer 40A to 100A TF supply c/w LEW endorsement	no	100.00
699	Arrange for testing and installation of lighting/power KWH meter for subsequent consumer unit within the same premises	no	50.00
700	Scrapping and repainting of O/G box for feeder pillar (one under coat of anti-rust paint and two coats of approved finishing paint)	no	80.00
701	Scrapping and repainting street lighting, perimeter lighting or O/H distribution steel poles (one undercoat of anti-rust paint and two coats of approved finishing paint and numbered accordingly by 3" brass stencils)	no	80.00

S/No	Description	Unit	Unit Cost (\$)
702	Scrapping and repainting street lighting, perimeter lighting or O/H	no	60.00
	distribution steel poles (one undercoat of anti-rust paint and two coats of		
	approved finishing paint and numbered accordingly by 3" brass stencils)		
703	Scrapping and repainting outdoor park lighting pole (one undercoat of antirust paint and two coats of approved finishing paint and numbered accordingly by 3" brass stencils)	no	100.00
704	Install only and make concrete foundation, correct wiring c/w provision of parts, install pole top fitting and globe cover, check cable and commission street lights. (lamp post by others)	no	120.00
705	Breaking up concrete foundation, excavate, backfill, straighten street light pole or overhead mains, mild steel pole and remake concrete foundation	no	42.00
706	Breaking up concrete foundation, excavate, backfill and remove street light pole c/w pole top fitting overhead main pole and return to Estate Office Store, including provision of labour and transport	no	65.00
707	Shunt trip coil for MCCB of any ampere	no	100.00
708	Danger signboard in 4 languages	no	18.00
709	Danger sticker in 4 languages	no	10.00
710	60A BI Connector	no	20.00
711	100A BI Connector	no	30.00
712	20-150 Amp 1-phase direct connected KWH meter	no	240.00
713	Selector switch	no	20.00
714	Insulating fibre 300mm x 300mm x 5mm	no	10.00
715	insulation PVC sheet 300mm x 300mm x 1.5mm	no	4.00
716	1.5mm² to 4mm² cable link	no	2.50
717	30-100A 3-phase direct connected KWH meter	no	450.00
718	200 to 400/5A 3-phase 4 wire CT connected KWH meter	no	600.00
719	Weather proof switch socket c/w plug 20A single phase 3 poles or three phase 4 poles	no	220.00
720	Weather-proof switch socket c/w plug 30A single phase 3 poles or three phase 4 poles	no	270.00
721	Weather-proof switch socket c/w plug 30A three phase 5 poles	no	350.00
722	Weather-proof switch socket c/w plug 60A three phase 5 poles	no	450.00
723	Electronic potential dimming switch to Philips LPS-100 or equivalent	no	100.00
724	Supply and riveting of traffolyte labels (engraved with black/white/red letterings on backgrounds) up to 150mm x 40 mm	no	5.00
725	Similar to the above labels from above 150mm x 40mm Circular globe of 400 to 650mm diameter	no	8.00
726	Supply all labour, transport, materials and equipment to conduct Primary Injection (PI)	no	400.00
727	Testing of circuit breaker inclusive of LEW (PE) endorsement (First Test)	no	450.00
728	Similar to above PI Test but for subsequent breaker at the same time	no	150.00
729	Supply all labour, transport, materials and equipment to conduct Secondary Injection (SI) Testing of circuit breaker inclusive of LEW (PE) endorsement (First Test)	no	350.00
730	Similar to above SI test but for subsequent breaker at the same time	no	100.00
731	Supply labour, transport, tools and material for the servicing of LT SWBD inclusive of air circuit breaker (of any rating up to 400A)	no	400.00
732	Soppy and lay 150mm diameter heavy duty UPVC pipe including socket connector and end cap SS141 Class B	m	15.00
733	Supply and lay 100mm diameter heavy duty UPVC pipe including socket connector and end cap SS141 Class B	m	12.00

S/No	Description	Unit	Unit Cost (\$)
734	Supply and lay 50mm diameter heavy duty UPVC pipe including socket	m	10.00
	connector and end cap SS213		
735	To update a A1 or AO size electrical soft/hardcopy single line drawing c/w	no	300.00
	PE endorsement		
736	High performance lead acid (Plante type) battery for Genset of 1.85v 157AH	no	300.00
	at C8 20°C		
737	Nickel cadmium battery of 1.15v of 33AH at C5 20°C	no	250.00
738	Height of scaffolding 4.1m to 10m	no	100.00
739	Height of scaffolding 4m to 10m c/w certified scaffold erector PE	no	500.00
740	endorsement Height of scaffolding 10m and above c/w certified scaffold erector PE	no	1,000.00
740	endorsement	110	1,000.00
741	Not In Use		
742	Not In Use		
743	Circular globe of 400 diameter and below	no	200.00
744	Hiring of suspended cradles/gondolas or mechanically powered jack type	no	1,000.00
	gondolas of 2.00m length of below including erection, maintaining, shirting		,
	anchorages testing certifying by approval engineer endorsement removing		
	after use, all as specified for first week		
745	To supply & install industrial plug and connector (IP44) 20A to 32A, 240v	no	150.00
746	To supply & install industrial plug and connector (IP44) 20A to 32A, 400v	no	230.00
747	Supply only GE SPECTRA BUSWAY (225A to 600A) with 3 pole dull neutral	no	2,500.00
	and 50% internal copper earth bar		
748	Supply 60A/10A TPN MCCB Plug Unit	no	1,251.00
749	Supply 150A/200A TPN MCCB Plug	no	2,658.00
750	Supply 300A/400a TPN MCCB Plug	no	4,514.00

767	Supply/Install/Replace Road lighting Die Cast aluminum alloy fitting IP66	no	950.00
	c/w control gear of 150W - 250W high pressure sodium lamps, ignitor,		
7.00	anodised reflector and mounting bracket.		400.00
768	Supply/install/replace Zebra Crossing lighting fitting c/w synchronized timer, yellow globe lamp 100W bulb (long life type)	no	400.00
769	Re-arrangement of main cables of any sizes at Switch room riser & Plant	no	300.00
703	Room	110	300.00
770	Supply of labour and carry out underground detection service by qualified	no	800.00
	or licensed person		
771	Supply/Install/Replace Decorative Bollard fitting c/w control gear, lamp	no	350.00
	holder at 1m height complete with underground planting.		
772	Supply labour, transport, tools and material for the servicing of LT SWBD of	no	200.00
	rate up to 800A for sub LT SW RM and MDB		100.00
773	Supply & install 150A to 250A 4-pole Termination block	no	100.00
774 775	Supply and Install 300A to 400A 4-pole Termination Block	no	140.00
//5	Supply/install/replace road lighting Die Cast Aluminium alloy fitting IP66 c/w control gear of 150W-250W high pressure sodium lamps, ignitor,	no	2,200.00
	anodised reflector, 3-6m hot-dipped galvanised planted or flanged pole,		
	concrete plinth with PE endorsement, drawing of the underground		
	concrete plinth, labor to excavate and backfill of earth, luminous labelling		
	and mounting bracket		
776	To check, maintenance, labour & conduct lightning and earthing impedance	per	420.00
	test c/w reported drawing by LEW schedule of servicing and others	buildi	
777	To any ideal to be supply and a supply and a supply at the supply in first and in a size	ng	500.00
777	To provide labour to open panels and conduct thermal infra- red imaging scanning c/w report for each LT board with/without coupler/MSB/sub	per LT	500.00
	board	boar	
		d	
778	To check, maintenance, labour and conduct Insulation test and tightening	no	200.00
	of Busbar system both vertical and horizontal position c/w report and		
	drawing by LEW during after office hour period including on Sunday and		
770	Public Holiday		
779	Not In Use		1 200 00
780	Supply install and replace Zebra crossing lamp-post c/w 3m galvanized flagged pole, concrete plinth with PE (C&S) endorsement, drawing of the	no	1,200.00
	underground concrete plinth, labor to excavate and backfill of earth,		
	painting of yellow & black colour, luminous labeling synchronized timer,		
	yellow globe and 100W bulb		
781	Supply, labour, equipment & all materials equipment necessary to conduct	lot	5,000.00
	check and service of low tension servicing of Main switchboard (MSB with		
	two incoming Air Circuit Breakers with one coupler of capacity from 1.5		
	MVA to 2 .5MVA, MCCBs, Primary injection Test (PI) Secondary Injection		
	Test (Si) Earth Fault Relays Over current Relays, current transformers replacement of bulbs, and fuses an other related parts with the MSB		
	tightening of busbars, cleaning/vacuuming of enclosure, Professional		
	engineer service to Turn OFF & ON of the ACBs/MCCBs submission of		
	reports (COC, PI/SI testing, insulation/megger test) c/w FE endorsement.		
	The work is to be carried out on after hour, ie Saturday, Sunday and Public		
	Holiday		

S/No	Description	Unit	Unit Cost (\$)
782	Supply, labour, equipment & all materials equipment necessary to conduct	lot	3,400.00
	check and service of low tension servicing of Main switchboard (MSB) with		
	two incoming Air Circuit Breakers with one coupler of capacity less than 1.5		
	MVA .5MVA, MCCBs, Primary injection Test (PI) Secondary Injection Test		
	(Si) Earth Fault Relays Over current Relays, current transformers		
	replacement of bulbs, and fuses an other related parts with the MSB		
	tightening of busbars, cleaning/vacuuming of enclosure, Professional		
	engineer service to Turn OFF <(>&<)> ON of the ACBs/MCCBs submission		
	of reports (COC, PI/SI testing, insulation/megger test) c/w PE endorsement.		
	The work is to be carried out after office hour, ie Saturday, Sunday and		
	Public Holiday		
783	Supply labour, install, erect transport, equipment, tools and all materials of	lot	850.00
	metal scaffolding work c/w with safety step ladders, toe boards, hardness		
	and others related safety gadgets including inspection and testing c/w Per		
	endorsement, submission to comply to all relevant authorities, eg MOM in		
	compliance to BCA's safety Act requirements for the height of at least 15		
	metres and above		
784	Supply and replace 230V, hour run meter	no	180.00
785	Supply and install AO/A1 size drawing frame	no	100.00
786	13A single PVC switch socket outlet c/w built in RCD and pilot lights	no	99.00
787	13A twin PVC switch socket outlet c/w built in RCD and pilot lights	no	140.00
788	Draw, update, replace and install AO/A1 size, SLD/electrical layout/floor	no	150.00
	plan in hardcopy and soft copy both PDF & AutoCAD format c/w LEW		
	endorsement		
789	Supply, deliver replace and install electrical enclosure keyway/lockset	no	20.00
	hinges/turn, knob/ABROY lockset		
790	Supply, deliver replace and install digital power analyser c/w	no	300.00
	communication module "Rudolf/MG/Janitza Brand" or equivalent		
791	Rental of mobile genset 501 - 1000KVA for a day (including supply, deliver,	no	800.00
	install, including fuel, main & final cabling, Socket Outlet Assembly, LEW		
	endorsement on test report, apply SI license, comply to CP88 and MOM		
702	requirements)		200.00
792	Provide mobile crane for street light maintenance/repairs, above 6m from	no	200.00
700	ground level, replacement of 1-4 street lights		200.00
793	Provide mobile crane for street light maintenance/repairs, above 6m from	no	300.00
704	ground level, replacement of 5-8 street lights		400.00
794	Provide mobile crane for street light maintenance/repairs above 6m from	no	400.00
705	ground level, replacement of 8-12 street lights		252.00
795	Up to 0025 cu metre	no	260.00
796	In excess of 0.025 cu metre to 0.05 cu metre	no	400.00
797	In excess of 0.5 cu metre to 0.75 cu metre	no	500.00
798	In excess of 0.975 cu metre to 0.1 cu metre	no	600.00
799	In excess of 0.1 cu metre to 0.125 cu metre	no	700.00
800	In excess of 0.125 cu metre to 0.18 cu metre	no	800.00
801	In excess of 0.18 cu metre to 0.27 cu metre	no	900.00
802	Supply and install weatherproof mild steel 16 SWG enclosure (powder	no	950.00
	coated) c/w rain hood and provision for padlocking of size 1100mm(H) x		
	1000mm (W) x 450mm (D)		
803	Planted /flange mounted 3-3.5m pole	no	280.00
804	Planted/flanged mounted 6m pole	no	450.00
805	Planted/flanged mounted 8m pole	no	600.00

S/No	Description	Unit	Unit Cost (\$)
806	Supply and install hot-dipped galvanized mild steel bracket for one	no	210.00
	floodlight luminaries to be used on lamp pole		
807	Similar as above but for two or three floodlight luminaries on lamp pole	no	300.00
808	Supply and install OG Box of size 1300mm(H) x 820mm(W) x 350mm(D) c/w base	no	1,600.00
809	Supply and install OG Box of size 1200mm(H) x 700mm(W) x 250mm(D) c/w base	no	1,200.00
810	Supply and install OG Box of size 1200mm(H) x 700mm(W) x 220mm(D) c/w base	no	1,100.00
811	Concrete collar, plinth and foundation OG box only	no	360.00
812	To supply, fabricate, deliver & install Main Distribution board (MCB) of 250 Amp to 400Amp, 400V rating, weatherproof IP55, mild steel, 16 SWG enclosure (power coated) of dimension of Up to 0.35m³, c/w indicating lights (2 sets) fuses, Earth Fault relay shunt trip, Ammeter, voltmeter, selector switch, CTs 6 Nos of out going 40AMp to 150Amp, 22KA TP MCCB. All works shall include PE endorsement. Single-line drawing, terminations, removal cutting of holes, rearrangement of submains cables cleaning and other related works.	lot	6,500.00
813	To supply, fabricate, deliver & install Main Distribution board (MCB) of 500 Amp to 800Amp, 400V rating, weatherproof IP55, mild steel, 16 SWG enclosure (power coated) of dimension of up to 1.25m³, c/w indicating lights (2 sets) fuses, Earth Fault relay shunt trip, Ammeter, voltmeter, selector switch, CTS 6 Nos of out going 40AMp to 300Amp, 22KA TP MCCB. All works shall include PE endorsement. Single-line drawing, terminations, removal cutting of holes, rearrangement of submains cables cleaning and other related works.	lot	10,000.00
814	To supply, fabricate, deliver & install Main KWH meter enclosure c/w EMA's KWH meter, BI, cut-out (MCB or Fuses) Internal wiring, termination works, removal and LEW endorsement up to at least 45 KVA 240/400V.	lot	400.00
815	Supply, fabricate, deliver & install KWH meter enclosure c/w EMA's KWh meter BI, Cut-out (MCB or Fuses) Internal wiring terminating works, removal and LEW endorsement up to at least 104KVA, 240/400V	lot	
816-	Not In Use		
823			
824	Dispatch LEW/ Electrician services works on weekdays whole day (24hrs)	hr	50.00
825	Dispatch LEW/ Electrician services on (Sat/Sun/PH) whole day (24hrs)	hr	70.00
826	Dispatch LEW/ Technician services works on weekdays whole day(24hrs)	hr	100.00
827	Dispatch LEW/ Technician services on (Sat/Sun/PH) whole day (24hrs)	hr	130.00
828 829	Dispatch LEW/ PE services works on weekdays whole day(24hrs) Dispatch LEW/PE services on (Sat/Sun/PH) whole day(24hrs)	hr hr	160.00 200.00
830	Labour charges for engineer to check, test and recommission the Dimming	hr	60.00
	programmable console systems at Lecture theatre and Seminar Room	111	00.00
831 832	Not in use To supply, deliver, transportation for rental of Room Lift to a height of at	lot	650.00
032	least 20 metre c/w Licensed machine operator, valid certified permit of the machine and other necessary	101	650.00
833	IRAT Technician equipped with gear and mounting accessories	hr	20.00
834	Draftsmen service	hr	10.00
835	High grade lubrication oil	lit	8.00
836	High grade coolant	no	4.00
837	Fuel filter	no	51.00
838	Air filter	no	92.00

S/No	Description	Unit	Unit Cost (\$)
839	Oil filter	no	377.00
840	Supply manpower, transportation, hoisting including cables, equipment and other accessories for the executing of Artifice Load-bank Testing (up to 500KVA)	lot	4500.00
841	Supply manpower, transportation, hoisting including cables, equipment and other accessories for the executing of Artifice Load-bank Testing (up to 1500KVA)	lot	8000.00
842	To supply and perform the shutdown Preventive Maintenance to one switchgear panel of 22kV AIS or GIS switchboard of any makes inclusive of busbar & cable insulation test and submitting endorsed test report	ea	1050.00
843	To supply and perform the shutdown Preventive maintenance to one unit of either 22kV/400V to 1.5 - 3.5MVA distribution transformer (of any makes) inclusive of cleaning conducting the transformer windings & cable insulation tests, oil dielectric test & protection devices interfacing test, and submitting test reports.	ea	520.00
844	To check, clean and perform the maintenance for 30VDC battery panel unit	ea	200.00
845	To supply, deliver, collect and perform oil quality test (OQT) on the main tank of distribution transformer with ratings ranging from either 22kV/415V for 1.5 – 3.5MVA and submitting test reports	ea	350.00
846	To supply, deliver, collect and perform dissolved gas analysis test (DGA) on the main tank of distribution transformer with ratings ranging from either 22kV/415V for 1.5 – 3.5MVA and submitting test reports	ea	400.00
847	To supply, deliver and perform partial discharge locator (PDL) measurement with the supplement of using ultra sound detector, if necessary, on one 22kV panel and submitting test reports	ea	350.00
848	To supply, deliver and perform partial discharge monitor (PDM) measurement on 22kV switchboard of up to a max of 7 panels for duration of up to 7 days inclusive of submitting test reports	ea	3500.00
849	To supply, deliver, dismantle, dispose, replace and/or install 1 set of HV or LV warning/caution signage	ea	50.00
850	To supply, deliver, dismantle, dispose, replace and/or install 1set of first aid chart	ea	40.00
851	To supply, deliver, dispose, replace and/or lay 1 full length, of up to 5metres, of rubber mats of 6mm thickness in-front of the HV or LV main switchboard	ea	250.00
852	Replace the existing faulty battery panel unit with the supply, deliver, dispose, install, test and commission the new battery charger with batteries cells in the same battery charger enclosure for the 30VDC supply	ea	4200.00
853	Carry out top-up of nitrogen gas to 1.5 – 3.5 MVA transformer tank inclusive of verification checks both before and after top up and further top-up to detect leakage if necessary	ea	700.00
854	Carry out on-site repair of oil leak from bolted tank cover of 1.5 – 3.5MVA transformer inclusive of replacing the worn-out gasket, pumping out and in of transformer oil, conducting insulation resistance and ratio tests, etc	ea	12000.00
855	Carry out replacement of transformer pressure switch inclusive of verification checks both before- and after- replacement	ea	3200.00
856	Carry out replacement of transformer oil temperature guage inclusive of verification checks both before- and after- replacement	ea	3200.00
857	Carry out replacement of transformer oil level guage inclusive of verification checks both before- and after- replacement	ea	3200.00

S/No	Description	Unit	Unit Cost (\$)
858	To replace to new protection relays inclusive of verification tests: removing, installing and connecting of cables and relays and checks both before and after replacement Over- Current without high set relay	ea	4000.00
859	To replace to new protection relays inclusive of verification tests: removing, installing and connecting of cables and relays and checks both before and after replacement Over- Current with high set relay	ea	5500.00
860	To replace to new protection relays inclusive of verification tests: removing, installing and connecting of cables and relays and checks both before and after replacement pilot wire protection	ea	4000.00
861	To replace to new protection relays inclusive of verification tests removing, installing and connecting of cables and relays and checks both before and after replacement earth fault	ea	2500.00
862	To carry out cable insulation tests to high voltage power cables and/or pilot and supervisory cables	lot	500.00
863	Supply and lay/install 2 row 2 nos of 150mm diameter HD UPVC pipers encased in concrete	m	200.00
864	To supply, deliver to site and lay 22kV 3C/300 sq mm XLPE/DSTA/PVC multicore, stranded copper conductor cable in prepared trench (exclude the trench excavation)	m	220.00
865	To supply, deliver to site and lay 22kV 3C/185 sq mm XLPE/DSTA/PVC multicore, stranded copper conductor cable in prepared trench (exclude the trench excavation)	m	330.00
866	To supply, deliver to site and lay 1 length of 10 twisted pairs 2.5 sq mm PVC/SWA/PVC pilot cable in prepared trench (exclude the trench excavation)	m	100.00
867	To supply, deliver to site and lay 1 length of 20 twisted pairs 2.5 sq mm PVC/SWA/PVC pilot cable in prepared trench (exclude the trench excavation)	m	200.00
868	Licensed cable jointer to supply and install cable joint for straight cable joint to 22kV power cable	ea	2500.00
869	Rental of mobile genset 501 - 1000KVA for a week (including supply, deliver, install, including fuel, main & final cabling, Socket Outlet Assembly, LEW endorsement on test report, apply SI license, comply to CP88 and MOM requirements)	lot	4000.00
870	Rental of mobile genset 200 - 500KVA for a day (including supply, deliver, install, including fuel, main & final cabling, Socket Outlet Assembly, LEW endorsement on test report, apply SI license, comply to CP88 and MOM requirements)	lot	500.00
871	Rental of mobile genset 200 - 500KVA for a week (including supply, deliver, install, including fuel, main & final cabling, Socket Outlet Assembly, LEW endorsement on test report, apply SI license, comply to CP88 and MOM requirements)	lot	2700.00
872	Rental of mobile genset 80 - 199KVA for a day (including supply, deliver, install, including fuel, main & final cabling, Socket Outlet Assembly, LEW endorsement on test report, apply SI license, comply to CP88 and MOM requirements)	lot	300.00
873	Rental of mobile genset 80 - 199KVA for a week (including supply, deliver, install, including fuel, main & final cabling, Socket Outlet Assembly, LEW endorsement on test report, apply SI license, comply to CP88 and MOM requirements)	lot	1900.00
874	Supply and install single phase 16Amp cee form (male & female) in PVC trunking/conduit, 3x1 core 2.5mm2 PVC cable of above 40m run	lot	200.00

S/No	Description	Unit	Unit Cost (\$)
875	Supply and install single phase 32Amp cee form (male & female) in PVC trunking/conduit, 3x1 core 6mm2 PVC cable of above 40m run	lot	250.00
876	Supply and install three phase 32Amp cee form (male & female) in PVC trunking/conduit, 5x1 core 6mm2 PVC cable of above 40m run	lot	380.00
877	Supply and install three phase 63Amp cee form (male & female) in PVC trunking/conduit, 5x1 core 16mm2 PVC cable of above 40m run	lot	500.00
878	3 core x 105/0.25 flexible insulated neoprene cables	m	4.20
879	Supply Engineer between 0800 hrs to 1800 hrs on weekdays	hr	32.00
880	Supply Supervisor/Technical officer between 0800 hrs to 1800 hrs on weekdays	hr	22.00
881	Supply Senior Technician / Technician between 0800 hrs to 1800 hrs on weekdays	hr	12.00
882	Supply Engineer between 1801 hrs to 0759 hrs on weekdays and full day (Sat/Sun/PH)	hr	40.00
883	Supply Supervisor/Technical officer between 1801 hrs to 0759 hrs on weekdays and full day (Sat/Sun/PH)	hr	30.00
884	Supply Senior Technician / Technician between 1801 hrs to 0759 hrs on weekdays and full day (Sat/Sun/PH)	hr	20.00
885	6 ways 13A domestic power socket extension strip c/w 1 x 13plug top	ea	18.00
886	10 ways 13A domestic power socket extension strip c/w 1 x 13plug top	ea	24.00

PRICE SCHEDULE OF RATES IV - PLUMBING AND SANITARY

1. MAINTENANCE, REPAIRS, ADDITIONS & ALTERATIONS

S/No	Description	Unit	Unit Cost (\$)
1	To supply, install or replace Roof to	EACH	264.00
	galvanised storage tank gauge 12

	Mechanical Tee (Threaded Outlet) Model:		
	7721 Shurjoint mechanical pipe fittings		
	to USA ISO 9002 UL/FM,LPC, VDS approved.		
410	To supply, install or replace	EACH	40.00
	40mm (1 1/2")diameter 90 ° Grooved Elbow		
	Model: 7110 Shurjoint mechanical pipe		
	fittings to USA ISO 9002 UL/FM, LPC, VDS		

S/No	Description	Unit	Unit Cost (\$)
	approved.		
411	To supply, install or replace	EACH	45.00
	50mm (2") diameter 90 ° Grooved Elbow		
	Model: 7110 Shurjoint mechanical pipe		
	fittings to USA ISO 9002 UL/FM, LPC, VDS approved.		
412	To supply, install or replace 65mm (2 1/2")diameter 90 ° Grooved Elbow	EACH	54.00
	Model: 7110 Shurjoint mechanical pipe		
	fittings to USA ISO 9002 UL/FM, LPC, VDS		
	approved.		
413	To supply, install or replace	EACH	65.00
	80mm (3") diameter 90 ° Grooved Elbow		
	Model: 7110 Shurjoint mechanical pipe fittings to USA ISO 9002 UL/FM, LPC, VDS		
	approved.		
414	To supply, install or replace 100mm (4") diameter 90 ° Grooved Elbow	EACH	86.00
	Model: 7110 Shurjoint mechanical pipe		
	fittings to USA ISO 9002 UL/FM, LPC, VDS		
	approved.		
415	To supply, install or replace	EACH	103.00
	125mm (5") diameter 90 ° Grooved Elbow		
	Model: 7110 Shurjoint mechanical pipe fittings to USA ISO 9002 UL/FM,		
	LPC, VDS approved.		
416	To supply, install or replace	EACH	122.00
	150mm (6") diameter 90 Grooved Elbow		
	Model: 7110 Shurjoint mechanical pipe fittings to USA ISO 9002 UL/FM, LPC, VDS		
	approved.		
417	To supply install or replace	EACH	107.00
417	To supply, install or replace 200mm or 216.3 O/D (8") diameter 90 °	EACH	187.00
	Grooved Elbow Model: 7110 Shurjoint		
	mechanical pipe fittings to USA ISO 9002		
	UL/FM, LPC, VDS approved.		
418	To supply, install or replace	EACH	49.00
	65mm (2 1/2") diameter 45 ° Grooved Elbow Model 7111 Shurjoint mechanical pipe		
	fittings to USA ISO 9002 UL/FM, LPC, VDS		
	approved.		
419	To supply, install or replace	EACH	65.00

S/No	Description	Unit	Unit Cost (\$)

1486	To supply, install or replace manual operated chain pulled Roller Shutter/RollerGrill (natural anodised aluminium) Size: Area 100sq.ft and above	M2	15.00
1487	To supply, install or replace Roller Shutter Motor(Japan Make)	M2	2,000.00
1488	To supply, install or replace Roller Shutter Motor (Others Make)	SET	1,400.00
1489	To supply, install or replace approved 1800mm diameter chequered aluminium grease interceptor cover, 3-piece type Trap Cover including locking and all	EACH	1,535.00

S/No	Description	Unit	Unit Cost (\$)
	necessary accessories as according to ENV Standard drawing.		
1490	To supply, install or replace approved 1800mm diameter chequered aluminium grease, 9-piece type Trap Cover including locking and all necessary accessories as according to ENV Standard drawing.	EACH	1,900.00
1491	To supply, install or replace 1800mm diameter X 15mm thick Glass Fibre Reinforced Plastic (GRP) Grease Interceptor Cover.	EACH	1,400.00
1492	To supply, install or replace 1800mm diameter X 10mm thick Mild Steel Chequered Plate with angles skeleton frames with bituminous painted on both sides for Grease Interceptor / Grease Trap Cover.	EACH	22.00
1493	To supply, install or replace Construct, standard grease interceptor as per Drawing No: ENV/SEW/76/82 - 4 comprising of 1050mm diameter precast chamber ring, aluminium alloy strainer, bucket, aluminium alloy chequered plate cover welded to grating etc of depth not exceeding 1500mm (Rate excluding cover).	EACH	4,400.00
1494	To supply, install or replace Construct standard grease interceptor as per Drawing No: ENV/SEW/76/82 - 4 comprising of 1050mm diameter precast chamber ring, aluminium alloy strainer, bucket, aluminium alloy chequered plate cover welded to grating etc of depth exceeding 1500mm and not exceeding 2000mm (Rate excluding cover).	EACH	4,760.00
1495	To supply, install or replace Construct standard grease interceptor as per Drawing No: ENV/SEW/76/82 - 4 comprising of 1050mm diameter precast chamber ring, aluminium alloy strainer, bucket, aluminium alloy chequered plate cover welded to grating etc of depth exceeding 2000mm and not exceeding 2500mm (Rate excluding cover).	EACH	5,120.00

S/No	Description	Unit	Unit Cost (\$)
1496	To supply, install or replace Construct	EACH	5,470.00
	standard grease interceptor as per		
	Drawing No: ENV/SEW/76/82 - 4		
	comprising of 1050mm diameter precast		
	chamber ring, aluminium alloy strainer,		
	bucket, aluminium alloy chequered plate		
	cover welded to grating etc of depth		
	exceeding 2500mm and not exceeding		
	3000mm (Rate excluding cover)		
1497	To supply, install or replace Construct	EACH	5,820.00
	standard grease interceptor as per		
	Drawing No: ENV/SEW/76/82 - 4		
	comprising of 1050mm diameter precast		
	chamber ring, aluminium alloy strainer,		
	bucket, aluminium alloy chequered plate		
	cover welded to grating etc of depth		
	exceeding 3000mm and not exceeding		
	3500mm (Rate excluding cover)		
1498	To supply, install or replace Construct	EACH	6,200.00
	standard grease interceptor as per		
	Drawing No: ENV/SEW/76/82 - 4		
	comprising of 1050mm diameter precast		
	chamber ring, aluminium alloy strainer,		
	bucket, aluminium alloy chequered plate		
	cover welded to grating etc of depth		
	exceeding 3500mm and not exceeding		
	4000mm (Rate excluding cover)		
1499	To supply, install or replace Construct	EACH	6,400.00
	standard grease interceptor as per		
	Drawing No: ENV/SEW/76/82 - 3B		
	comprising of 1800mm diameter precast		
	chamber ring, aluminium alloy strainer,		
	bucket, aluminium alloy chequered plate		
	cover welded to grating etc of depth not		
	exceeding 1500mm. (Rate excluding cover)		
1500	To supply, install or replace Construct	EACH	6,960.00
	standard grease interceptor as per		
	Drawing No: ENV/SEW/76/82 - 3B		
	comprising of 1800mm diameter precast		
	chamber ring, aluminium alloy strainer,		
	bucket, aluminium alloy chequered plate		
	cover welded to grating etc of depth		
	exceeding 1500mm and not exceeding		
	2000mm (Rate excluding cover)		
1501	To supply, install or replace Construct	EACH	7,500.00
	standard grease interceptor as per		
	Drawing No: ENV/SEW/76/82 - 3B		

S/No	Description	Unit	Unit Cost (\$)
1502	comprising of 1800mm diameter precast chamber ring, aluminium alloy strainer, bucket, aluminium alloy chequered plate cover welded to grating etc of depth exceeding 2000mm and not exceeding 2500mm (Rate excluding cover)	FACIL	9 020 00
1502	To supply, install or replace Construct standard grease interceptor as per Drawing No: ENV/SEW/76/82 - 3B comprising of 1800mm diameter precast chamber ring, aluminium alloy strainer, bucket, aluminium alloy chequered plate cover welded to grating etc of depth exceeding 2500mm and not exceeding 3000mm (Rate excluding cover)	EACH	8,030.00
1503	To supply, install or replace Construct standard grease interceptor as per Drawing No: ENV/SEW/76/82 - 3B comprising of 1800mm diameter precast chamber ring, aluminium alloy strainer, bucket, aluminium alloy chequered plate cover welded to grating etc of depth exceeding 3000mm and not exceeding 3500mm	EACH	8,560.00
1504	To supply, install or replace Construct standard grease interceptor as per Drawing No: ENV/SEW/76/82 - 3B comprising of 1800mm diameter precast chamber ring, aluminium alloy strainer, bucket, aluminium alloy chequered plate cover welded to grating etc of depth exceeding 3500mm and not exceeding 4000mm. (Rate excluding cover)	EACH	9,120.00
1505	To supply, install or replace Construct standar grease, petrol and silt interceptor (three compartments) with an overall size of 3038mm long x 675mm wide x 1200mm deep internally and complete with 75mm thick sand bed 225mm thick reinforced concrete (Grade 20A) base with 25mm thick waterproof paving, 215mm thick brick surround, 102.5mm thick brick baffle, 150mm diameter cast iron pipes and pipe fittings, 75mm thick precast concrete (Grade 20A) cover with lifting rings and including all necessary excavation, back-filling, disposing excavated	EACH	2,594.00

S/No	Description	Unit	Unit Cost (\$)
	material, formwork, reinforcement,		
	waterproof plastering, etc as per		
	Drawing No: ENV/SEW/76/80B		
1506	Add for each additional stage of 150mm	EACH	125.00
	deep internally for item CE0131.		
1507	To supply, install or replace 737mm x	EACH	560.70
	559mm x 559mm deep Fibreglass dilution		
	tank (grey colour) complete with waste pipe.(Extra piping measured separately)		
	pipe.(Lxtra piping measured separatery)		
1508	To supply, install or replace 150mm	EACH	60.00
	salt glazed stoneware gulley complete		
	with grating, 100 mm outgo and concrete		
	surround minimum 100mm thick including		
	removing existing damaged gulley and		
	JTing new gulley to existing pipes.		
1509	To supply, install or replace Cast iron	EACH	54.00
	deep seal floor trap complete with		
	hinged grating, hopper and with vertical		
	side or back inlets and 75mm outgo.		
1510	To supply, install or replace 150mm	EACH	62.05
1010	diameter coated cast iron floor waste	_,	02.00
	"P" type with 75mm diameter outgo and		
	necessary side inlets, UPVC or		
	galvanised hinged grating and frame,

1	WATER DISPENSER	No	15.00
1	To carry out monthly maintenance & servicing of Hot & Cold Water Dispensers or Pantry Wall Mounted Direct Piping Hot Water Dispensers	No.	15.00

S/No	Description	Unit	Unit Cost (\$)
2	Hot & Cold water dispenser floor standing type complete with	No.	800.00
	accessories inclusive carbon type water filter 220V-240V 50H/60hz		
	single phase Cold:115W, Hot:500W model D5CH or		
	equivalent complete with discharge/outlet drainage system from		
	receptacle tray		
3	Thermostat for hot water dispenser	No.	49.20
4	Red faucet for hot water dispenser for pantry	No.	108.00
5	Upper assembly for hot water dispenser	No.	57.60
6	Spring for hot water dispenser	No.	6.00
7	Stem for tap of hot water dispenser	No.	12.00
8	Seat cap for hot water dispenser	No.	14.40
9	Tap handle for hot water dispenser	No.	14.40
10	Tap bonnet for hot water dispenser	No.	16.80
11	Tap pin for hot water dispenser	No.	4.80
12	Indicator Light for hot water dispenser	No.	3.60
13	Indicator Lens for hot water dispenser	No.	1.20
14	Solenoid valve for hot water dispenser	No.	93.60
15	Fan for hot water dispenser	No.	58.00
16	Transformer for hot water dispenser	No.	45.00
17	IC board for hot water dispenser	No.	132.00
18	Hot water faucet complete set for H & C water dispenser complete with	No.	33.60
	safety device		
19	Reservoir float valve for H & C water dispenser	No.	204.00
20	Float assembly for H & C water dispenser	No.	42.00
21	Compressor for H & C water dispenser	No.	350.00
22	Cold water thermostat for H & C water dispenser	No.	72.00
23	Hot water thermostat for H & C water dispenser	No.	42.00
24	Divider(between tank) for H & C water dispenser	No.	42.00
25	Hot or Cold water outlet pipe for H & C water dispenser	No.	40.00
26	Hot water tank (with heating element) for H & C water dispenser	No.	220.00
27	On / off switch for heater of H & C water dispenser	No.	18.00
28	Overheat protection (auto / manual) for H & C water dispenser	No.	36.00
29	Overload protection (for compressor) of H & C water dispenser	No.	42.00
30	Starting relay for H & C water dispenser	No.	78.00
31	Top cover (B series) for H & C water dispenser	No.	60.00
32	Top cover (D series) for H & C water dispenser	No.	132.00
33	Front lower panel for H & C water dispenser	No.	96.00
34 35	Front upper panel for H & C water dispenser	No.	96.00 84.00
36	LH side panel for H & C water dispenser RH side panel for H & C water dispenser	No. No.	
37	Inlet hose W' (plastic) for H & C water dispenser inclusive of connectors	No.	84.00 8.00
37	(2 nos)	INO.	8.00
38	Plastic rim for H & C water dispenser	No.	18.00
39	Plastic cup holder (code : CRB) for H & C water dispenser	No.	30.00
40	Drip tray (complete set with outlet nozzle) for H & C water dispenser	No.	30.00
41	Insulation for reservoir for H & C water dispenser	No.	78.00
42	PCB for operating lamp (with display lamp) for H & C water dispenser	No.	60.00
43	Plastic nut for H & C water dispenser	No.	12.00
44	Copper end cap for H & C water dispenser	No.	12.00
45	Pushing and reservoir for H & C water dispenser	No.	54.00

S/No	Description	Unit	Unit Cost (\$)
46	Floor standing stainless steel water-cooler reciprocating type or	No.	1,000.00
	rotary type, single phase hermetic compressor, power supply		
	220V/240V/IP/50Hz, capacity : 20-25 litres including 3 core power		
	cable (1.5 M long) with 13A plug top model: GE123 or equivalent, (Hot		
	and Cold)		
47	Bubbler with lock nut	No.	54.00
48	Bubbler chromium plated (inclusive of regulator and regulator holder	No.	222.00
49	Regulator valve	No.	70.00
50	Regulator holder	No.	50.40
51	Storage water tank (evaporator tank)	No.	168.00
52	Condenser	No.	96.00
53	'Y' strainer	No.	6.00
54	Drier - filter	No.	6.00
55	Lock nut for bubbler	No.	3.60
56	To supply, install or replace angle bracket (aluminium) of sizes 35mm	No.	25.00
	x 35mm x 3mm thickness x 200mm in length		
	inclusive of expansion bolts		
57	Carbon type filter model : Cuno or equivalent	No.	80.00
58	Cartridge typ_e filter with or without housing	No.	55.55
59	Cold water faucet -lever type (complete set)	No.	30.00
60	Hot water faucet -lever type (complete set) complete with safety catch or	No.	33.60
	device		
61	Water pressure regulator	No.	55.00
62	Waste water tray	No.	12.00
63	Fan motor bracket	No.	36.00
64	Fan motor (up to 1/2 HP)	No.	84.00
65	Fan blade	No.	12.00
66	Rubber absorber	No.	3.00
67	Overload relay	No.	19.20
68	Potential relay	No.	42.00
69	Capillary tube	No.	25.00
70	Dehydrator / strainer	No.	10.20
71	Thermostat-IC type	No.	135.00
72	Thermostat	No.	65.00
73	Selector knob	No.	3.60
74	Charging of R22 refrigerant gas	lbs	6.00
75	Supply labour, tools and transport to dismantle and remove off site I	No.	50.00
	relocate, re-install dispenser/ water cooler to new location including		
	removing service and drainage pipes work. (Installation of service pipes and		
	drainage pipes shall be paid separately)		
76	Heating element c/w themostat for hot water dispenser	No.	120.20
77	Lever switch for hot water dispenser	No.	78.00
78	Electronic pilot lamp for H & C water dispenser	No.	42.00
79	Fuse (8A) for H & C water dispenser	No.	6.00
80	Wall mounted or table top hot & cold water dispenser	No.	600.00
	5 litre/hr heating capacity 85 deg C to 100 deg C, 2200W-2500W		
	with 3 pin plug wiring stainless steel		
81	Wall mounted or table top hot & cold water dispenser	No.	680.00
	7 litre/hr heating capacity 85 deg C to 100 deg C, 2200W-2500W		
	with 3 pin plug wiring stainless steel GE7ABL or e_guivalent		

S/No	Description	Unit	Unit Cost (\$)		
82	Wall mounted or table top hot & cold water dispenser 10 litre/hr	No.	760.00		
	heating capacity 85 deg C to 100 deg C, 2200W with 3 pin Qlug wiring				
	stainless steel GE10BL or equivalent				
83	Wall mounted or table top hot & cold water dispenser 15 litre/hr	No.	850.00		
	heating capacity 85 deg C to 100 deg C, 2500W with 3 pin plug wiring				
	stainless steel GE15BL or equivalent				
84	Wall mounted or table top hot & cold water dispenser 20 litre/hr	No.	910.00		
	heating capacity 85 deg C to 100 deg C, 2500W with 3 pin plug wiring				
	stainless steel GE20BL or equivalent				
85	Filter holder	No	15.00		
86	Copper tubing include couplings	Set	35.00		
87	Stainless steel stand for hot & cold watercoolers	No	250.00
